FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Presidential Documents

Title 3—

The President

Executive Order 12550 of February 19, 1986

Amendments to the Manual for Courts-Martial, United States, 1984

By the authority vested in me as President by the Constitution of the United States and by Chapter 47 of Title 10 of the United States Code (Uniform Code of Military Justice), in order to prescribe amendments to the Manual for Courts-Martial, United States, 1984, prescribed by Executive Order No. 12473, as amended by Executive Order No. 12484, it is hereby ordered as follows:

Section 1. Part II of the Manual for Courts-Martial, United States, 1984, is amended as follows:

a. R.C.M. 707(a) is amended to read as follows:

"(a) *In general.* The accused shall be brought to trial within 120 days after the earlier of:

"(1) Notice to the accused of preferral of charges under R.C.M. 308; or

"(2) The imposition of restraint under R.C.M. 304(a)(2)–(4).".

b. R.C.M. 805(b) is amended by striking out "911" each time it appears and inserting "912" in lieu thereof.

c. R.C.M. 903(c)(3) is amended by inserting "a request" after "or".

d. R.C.M. 909 is amended—

(1) by amending subsection (a) to read as follows:

"(a) *In general.* No person may be brought to trail by court-martial if that person is presently suffering from a mental disease or defect rendering him or her mentally incompetent to the extent that he or she is unable to understand the nature of the proceedings against that person or to conduct or cooperate intelligently in the defense of the case.";

(2) in subsection (b) by striking out "appears" and inserting in lieu thereof "is established"; and

(3) by amending subsection (c)(2) to read as follows:

"(2) *Standard.* Trial may proceed unless it is established by a preponderance of the evidence that the accused is presently suffering from a mental disease or defect rendering him or her mentally incompetent to the extent that he or she is unable to understand the nature of the proceedings against the accused or to conduct or cooperate intelligently in the defense of the case.".

e. R.C.M. 916(e)(3) is amended by striking out "(c)(1)" and inserting in lieu thereof "(e)(1)".

f. R.C.M. 920(e)(2) is amended by inserting, "unless trial of a lesser included offense is barred by the statute of limitations (Article 43) and the accused refuses to waive the bar" after "issue".

g. R.C.M. 921(d) is amended by striking out "sentence" and inserting in lieu thereof "findings".

h. R.C.M. 922(b) is amended—

(1) by redesignating the second sentence as paragraph (1); and

(2) by inserting the following new paragraph at the end thereof:

VOL
51
ISS
37
FE
25
1986
UMI

"(2) In a capital case, if a finding of guilty is unanimous with respect to a capital offense, the president shall so state. This provision shall not apply during reconsideration under R.C.M. 924(a) of a finding of guilty previously announced in open court unless the prior finding was announced as unanimous.".

i. R.C.M. 1001 is amended—

(1) in subsection (b)(1) by striking out "age, pay," and inserting in lieu thereof "pay"; and

(2) in subsection (b)(3)(B) by striking out "65(c)" and inserting in lieu thereof "64".

j. R.C.M. 1003(b)(10)(B) is amended by inserting "Regardless of the maximum punishment specified for an offense in Part IV of this Manual, a dishonorable discharge may be adjudged for any offense of which a warrant officer who is not commissioned has been found guilty." after the first sentence.

k. R.C.M. 1004 is amended—

(1) by striking out "circumstance" and "circumstances" each time these words appear and inserting in lieu thereof "factor" and "factors", respectively;

(2) in subsection (a) by—

(A) striking out "and" at the end of paragraph (1); and

(B) redesignating paragraph (2) as paragraph (3) and inserting the following as paragraph (2):

"(2) The accused was convicted of such an offense by the concurrence of all the members of the court-martial present at the time the vote was taken; and";

(3) by amending subsection (b)(4) to read as follows:

"(4) *Necessary findings.* Death may not be adjudged unless—

"(A) The members find that at least one of the aggravating factors under subsection (c) existed;

"(B) Notice of such factor was provided in accordance with paragraph (1) of this subsection and all members concur in the finding with respect to such factor; and

"(C) All members concur that any extenuating or mitigating circumstances are substantially outweighed by any aggravating circumstances admissible under R.C.M. 1001(b)(4), including the factors under subsection (c) of this Rule.";

"(4) by amending subsection (c)(2) to read as follows:

"(2) That in committing the offense the accused—

"(A) Knowingly created a grave risk of substantial damage to the national security of the United States; or

"(B) Knowingly created a grave risk of substantial damage to a mission, system, or function of the United States, provided that this subparagraph shall apply only if substantial damage to the national security of the United States would have resulted had the intended damage been effected;";

(5) in subsection (c)(4) by striking out "Article 120" and inserting in lieu thereof "Articles 104, 106a, or 120";

(6) in subsection (c)(7)(F) by—

(A) inserting "(including a Delegate to, or Resident Commissioner in, the Congress)" after "Member of Congress"; and

(B) striking out "or any judge of the United States." and inserting in lieu thereof "justice or judge of the United States, a chief of state or head of government (or the political equivalent) of a foreign nation, or a foreign official (as such term is defined in section 1116(b)(3)(A) of title 18, United States Code), if the official was on official business at the time of the offense and

was in the United States or in a place described in Mil. R. Evid. 315(c)(2) or 315(c)(3);";

(7) in subsection (c)(9)(B) by striking out "or";

(8) in subsection (c)(10) by striking out the period and inserting "; or" in lieu thereof; and

(9) by inserting the following new subsection after subsection (c)(10):

"(11) That, only in the case of a violation of Article 104 or 106a:

"(A) The accused has been convicted of another offense involving espionage or treason for which either a sentence of death or imprisonment for life was authorized by statute; or

"(B) That in committing the offense, the accused knowingly created a grave risk of death to a person other than the individual who was the victim.".

l. R.C.M. 1010 is amended—

(1) by striking out "ADVICE" and inserting in lieu thereof "NOTICE" in the rule title;

(2) by striking out "(a) *Advice.*" at the beginning of the rule;

(3) by redesignating subsections (1), (2), (3), and (4) as subsections (a), (b), (c), and (d), respectively; and

(4) by striking out subsection (b), "*Inquiry*", in its entirety.

m. R.C.M. 1106(b) is amended by striking out "or any reviewing" and inserting in lieu thereof "to any reviewing".

n. R.C.M. 1114(c)(1) is amended by striking out "actions" in the last sentence and inserting in lieu thereof "orders".

Sec. 2. Part III of the Manual for Courts-Martial, United States, 1984, is amended as follows:

a. Mil.R.Evid. 304 is amended as follows:

(1) Subdivision (a) is amended by striking out "An involuntary" and inserting in lieu thereof "Except as provided in subsection (b), an involuntary".

(2) Subdivision (b) is amended by—

(A) striking out "*Exception*" and inserting in lieu thereof "*Exceptions*";

(B) designating the first sentence as subsection (1); and

(C) adding the following new subsection at the end thereof:

"(2) Evidence that was obtained as a result of an involuntary statement may be used when the evidence would have been obtained even if the involuntary statement had not been made.".

(3) Paragraph (e)(3) is amended by—

(A) striking out "either";

(B) striking out "or" and inserting in lieu thereof a comma; and

(C) inserting ", or that the evidence would have been obtained even if the statement had not been made" after "use of the statement".

b. Mil.R.Evid. 311 is amended as follows:

(1) Subdivision (b) is amended to read as follows:

"b. *Exceptions.*

"(1) Evidence that was obtained as a result of an unlawful search or seizure may be used to impeach by contradiction the in-court testimony of the accused.

VOL 51 ISS 37 FE 25 1986 UMI

"(2) Evidence that was obtained as a result of an unlawful search or seizure may be used when the evidence would have been obtained even if such unlawful search or seizure had not been made.

"(3) Evidence that was obtained as a result of an unlawful search or seizure may be used if:

"(A) The search or seizure resulted from an authorization to search, seize, or apprehend issued by an individual competent to issue the authorization under Mil.R.Evid. 315(d) or from a search warrant or arrest warrant issued by competent civilian authority;

"(B) The individual issuing the authorization or warrant had a substantial basis for determining the existence of probable cause; and

"(C) The officials seeking and executing the authorization or warrant reasonably and with good faith relied on the issuance of the authorization or warrant. Good faith shall be determined on an objective standard.".

(2) Paragraph (e)(1) is amended by striking out the period at the end thereof and inserting in lieu thereof ", that the evidence would have been obtained even if the unlawful search or seizure had not been made, or that the evidence was obtained by officials who reasonably and with good faith relied on the issuance of an authorization to search, seize, or apprehend or a search warrant or an arrest warrant.".

(3) Paragraph (e)(2) is amended by striking out the period at the end thereof and inserting in lieu thereof ", that the evidence would have been obtained even if the unlawful search or seizure had not been made, or that the evidence was obtained by officials who reasonably and with good faith relied on the issuance of an authorization to search, seize, or apprehend or a search warrant or an arrest warrant.".

c. Mil.R.Evid. 609(e) is amended by deleting "65(c)" and inserting in lieu thereof "64".

d. Mil.R.Evid. 804(a) is amended by striking out "claim or lack of memory" and inserting in lieu thereof "claim of lack of memory".

Sec. 3. Part IV of the Manual for Courts-Martial, United States, 1984, is amended as follows:

a. Paragraph 16 is amended—

(1) in subparagraph b(3)(b) by striking out "had knowledge" and inserting in lieu thereof "knew or reasonably should have known";

(2) by amending subparagraph c(3)(b) to read as follows:

"(b) *Knowledge.* Actual knowledge of duties may be proved by circumstantial evidence. Actual knowledge need not be shown if the individual reasonably should have known of the duties. This may be demonstrated by regulations, training or operating manuals, customs of the service, academic literature or testimony, testimony of persons who have held similar or superior positions, or similar evidence."; and

(3) by amending subparagraph f(4) to read as follows:

"(4) *Dereliction in the performance of duties.*

"In that ______, (personal jurisdiction data), who (knew) (should have known) of his/her duties (at/on board—location) (subject-matter jurisdiction data, if required), (on or about ______ 19__) (from about ______ 19__ to about ______ 19__), was derelict in the performance of those duties in that he/she (negligently) (willfully) (by culpable inefficiency) failed to ______, as it was his/her duty to do."

b. Part IV is amended by inserting the following new paragraph after paragraph 30:

"30a. Article 106a—Espionage

"a. *Text.*

"(a)(1) Any person subject to this chapter who, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits, or attempts to communicate, deliver, or transmit, to any entity described in paragraph (2), either directly or indirectly, any thing described in paragraph (3), shall be punished as a court-martial may direct, except that if the accused is found guilty of any offense that directly concerns (A) nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large scale attack, (B) war plans, (C) communications intelligence or cryptographic information, or (D) any other major weapons system or major element of defense strategy, the accused shall be punished by death or such other punishment as a court-martial may direct.

"(2) An entity referred to in paragraph (1) is—

"(A) a foreign government;

"(B) a faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States; or

"(C) a representative, officer, agent, employee, subject, or citizen of such a government, faction, party, or force.

"(3) A thing referred to in paragraph (1) is a document, writing, code book, signal book, sketch, photograph, photographic negative, blueprint, plan, map, model, note, instrument, appliance, or information relating to the national defense.

"(b)(1) No person may be sentenced by court-martial to suffer death for an offense under this section (article) unless—

"(A) The members of the court-martial unanimously find at least one of the aggravating factors set out under subsection (c); and

"(B) The members unanimously determine that any extenuating or mitigating factors are substantially outweighed by any aggravating circumstances, including the aggravating factors set out under subsection (c).

"(2) Findings under this subsection may be based on—

"(A) evidence introduced on the issue of guilt or innocence;

"(B) evidence introduced during the sentencing proceeding; or

"(C) all such evidence.

"(3) the accused shall be given broad latitude to present matters in extenuation and mitigation.

"(c) A sentence of death may be adjudged by a court-martial for an offense under this section (article) only if the members unanimously find, beyond a reasonable doubt, one or more of the following aggravating factors:

"(1) The accused has been convicted of another offense involving espionage or treason for which either a sentence of death or imprisonment for life was authorized by statute.

"(2) In the commission of the offense, the accused knowingly created a grave risk of substantial damage to the national security.

"(3) In the commission of the offense, the accused knowingly created a grave risk of death to another person.

"(4) Any other factor that may be prescribed by the President by regulations under section 836 of this title (Article 36).".

"b. *Elements.*

"(1) *Espionage.*

"(a) That the accused communicated, delivered, or transmitted any document, writing, code book, signal book, sketch, photograph, photographic negative,

VOL 51 ISS 37 FE 25 1986 UMI

blueprint, plan, map, model, note, instrument, appliance, or information relating to the national defense;

"(b) That this matter was communicated, delivered, or transmitted to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly; and

"(c) That the accused did so with intent or reason to believe that such matter would be used to the injury of the United States or to the advantage of a foreign nation.

"(2) *Attempted espionage.*

"(a) That the accused did a certain overt act;

"(b) That the act was done with the intent to commit the offense of espionage;

"(c) That the act amounted to more than mere preparation; and

"(d) That the act apparently tended to bring about the offense of espionage.

"(3) *Espionage as a capital offense*

"(a) That the accused committed espionage or attempted espionage; and

"(b) That the offense directly concerned (1) nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large scale attack, (2) war plans, (3) communications intelligence or cryptographic information, or (4) any other major weapons system or major element of defense strategy.

"c. *Explanation*

"(1) *Intent.* 'Intent or reason to believe' that the information 'is to be used to the injury of the United States or to the advantage of a foreign nation' means that the accused acted in bad faith or otherwise without authority with respect to information that is not lawfully accessible to the public.

"(2) *National defense information.* 'Instrument, appliance, or information relating to the national defense' includes the full range of modern technology and matter that may be developed in the future, including chemical or biological agents, computer technology, and other matter related to the national defense.

"(3) *Espionage as a capital offense.* Capital punishment is authorized if the government alleges and proves that the offense directly concerned (1) nuclear weaponry, military spacecraft or satellites, early warning systems, or other means of defense or retaliation against large scale attack, (2) war plans, (3) communications intelligence or cryptographic information, or (4) any other major weapons system or major element of defense strategy. *See* R.C.M. 1004 concerning sentencing proceedings in capital cases.

"d. *Lesser included offense.* Although no lesser included offenses are set forth in the code, federal civilian offenses on this matter may be incorporated through the third clause of Article 134.

"e. *Maximum punishment*

"(1) *Espionage as a capital offense.* Death or such other punishment as a court-martial may direct. *See* R.C.M. 1003 and R.C.M. 1004.

"(2) *Espionage or attempted espionage.* Any punishment, other than death, that a court-martial may direct. *See* R.C.M. 1003.

"f. *Sample specifications*

In that ______ (personal jurisdiction data), did, (at/on board—location), on or about ____, 19__, with intent or reason to believe it would be used to the injury of the United States or to the advantage of ____, a foreign nation, (attempt to) (communicate) (deliver) (transmit) ____ (description of item), (a document) (a writing) (a code book) (a signal book) (a sketch) (a photograph) (a photographic negative) (a blueprint) (a plan) (a map) (a model) (a note) (an instrument) (an appliance) (information) relating to the national defense, [which directly concerned (nuclear weaponry) (military spacecraft) (military satellites) (early warning systems) (______, a means of defense or retaliation against a large scale attack) (war plans) (communications intelligence) (cryptographic information) (______, a major weapons system) (______, a major element of defense strategy)] to ______ [(a representative of) (an officer of) (an agent of) (an employee of) (a subject of) (a citizen of)] [(a foreign government) (a faction within a foreign country) (a party within a foreign country) (a military force within a foreign country) (a naval force within a foreign country)] (indirectly by ______].".

c. Part IV is amended by adding the following new sentence at the end of paragraph 105e:

"However, any person subject to the code who is found guilty of soliciting or advising another person to commit the offense of aiding the enemy, spying, or espionage (Articles 104, 106, or 106a) shall be subject to any punishment, other than death, that a court-martial may direct.".

Sec. 4. Part V of the Manual for Courts-Martial, United States, 1984, is amended as follows:

a. The text of paragraph 2 is amended by inserting the following new paragraph at the beginning thereof:

"The following persons may serve as a nonjudicial punishment authority for the purposes of administering nonjudicial punishment proceedings under this Part:".

b. Paragraph 4a is amended by striking out "commander" each time it appears and inserting in lieu thereof "nonjudicial punishment authority".

c. Paragraph 4b(2) is amended by striking out "commander" and inserting in lieu thereof "nonjudicial punishment authority".

d. Paragraph 4c(1) is amended by—

(1) striking out "commander—or the commander's delegee (*see* paragraph 2c of this Part)—who offered nonjudicial punishment" and inserting in lieu thereof "nonjudicial punishment authority";

and

(2) striking out "commander" the second, third, and fourth time it appears in the first sentence and in subparagraphs (B), (D), and (G), and inserting in lieu thereof "nonjudicial punishment authority".

e. Paragraph 4c(2) is amended to read as follows:

"(2) *Personal appearance waived; procedure.* Subject to the approval of the nonjudicial punishment authority, the servicemember may request not to appear personally under subparagraph 4(c)(1) of this Part. If such request is granted, the servicemember may submit written matters for consideration by the nonjudicial punishment authority before such authority's decision under subparagraph 4c(4) of this Part. The servicemember shall be informed of the right to remain silent and that matters submitted may be used against the member in a trial by court-martial.".

f. Paragraph 4c(4) is amended by—

(1) striking out "*Commander's decision*" and inserting in lieu thereof "*Decision*"; and

(2) striking out "commander" each time it appears and inserting in lieu thereof "nonjudicial punishment authority".

g. Paragraph 5(b) is amended by striking out "by the following commanders".

h. The introductory clause of paragraph 5b(1)(B) is amended to read as follows:

VOL 51
ISS 37
FE 25
1986
UMI

"(B) If imposed by an officer exercising general court-martial jurisdiction, an officer of general or flag rank in command, or a principal assistant as defined in paragraph 2c of this Part—".

i. Paragraph 5b(2)(A) is amended by striking out "commander" and inserting in lieu thereof "nonjudicial punishment authority".

j. The introductory clause of paragraph 5b(2)(B) is amended by inserting "or a principal assistant to such a commanding officer as defined in paragraph 2c of this Part" after "above".

k. Paragraph 5c(2) is amended by striking out "commander imposing this form of punishment" and inserting in lieu thereof "nonjudicial punishment authority".

l. Paragraph 6a is amended by striking out "commander" and inserting in lieu thereof "nonjudicial punishment authority who imposes nonjudicial punishment, the commander".

m. Paragraph 6a(4) is amended by inserting "nonjudicial punishment authority or" after "A suspension may be vacated by any" in the first sentence.

n. Paragraph 6b is amended by—

(1) striking out "commander" in the third sentence and inserting in lieu thereof "nonjudicial punishment authority who imposed nonjudicial punishment, the commander,"; and

(2) striking out "commander" in the fourth sentence and inserting in lieu thereof "nonjudicial punishment authority who imposes nonjudicial punishment, the commander who imposes nonjudicial punishment, or a successor in command".

o. Paragraph 6c is amended by striking out "commander" in the second sentence and inserting in lieu thereof "nonjudicial punishment authority who imposes nonjudicial punishment, the commander".

p. Paragraph 6d is amended by striking out "commander who imposes nonjudicial punishment" in the second sentence and inserting in lieu thereof "nonjudicial punishment authority who imposes nonjudicial punishment, the commander who imposes nonjudicial punishment,".

q. Paragraph 7f(3) is amended by inserting "the commander," after "the officer who imposed the nonjudicial punishment,".

Sec. 5. The amendments to Mil.R.Evid. 704, which were implemented on 10 April 1985 pursuant to Mil.R.Evid. 1102, are hereby rescinded; *Provided,* That this recision shall not apply in the trial of any case in which arraignment occurred while such amendments were in effect.

Sec. 6. These amendments shall take effect on March 1, 1986, with respect to all court-martial processes taken on and after that date: *Provided,* That nothing contained in these amendments shall be construed to invalidate any nonjudicial punishment proceeding, restraint, investigation, referral of charges, trial, in which arraignment occurred, or other action begun prior to that date, and any such restraint, investigation, referral of charges, trial, or other action may proceed in the same manner and with the same effect as if these amendments had not been prescribed; *Provided further,* That the amendments made in Rule for Court-Martial 1004(c) shall apply in the trial of offenses committed on or after March 1, 1986; *Provided further,* That nothing contained in these amendments shall be construed to invalidate any capital sentencing proceeding conducted prior to March 1, 1986, and any such proceeding shall be completed and reviewed in the same manner and with the same effect as if these amendments had not been prescribed; *Provided further,* That amendments to Rule for Court-Martial 707(a) shall not apply to any condition on liberty imposed before March 1, 1986, and the effect of such a condition on liberty shall be considered under Rule for Court-Martial 707(a) as it existed before March 1, 1986; *Provided further,* That the amendments made in paragraph 16 of Part IV shall apply in trials of offenses committed on or after March 1, 1986; *Provided further,* That the amendments made in paragraph 30a of Part IV shall apply in the trials of offenses committed under Article 106a on or after March 1, 1986; *And provided further,* That the amendments made in paragraph 30a of Part IV authorizing capital punishment shall apply with respect to offenses under Article 106a committed on or after March 1, 1986.

Sec. 7. The Secretary of Defense, on behalf of the President, shall transmit a copy of this Order to the Congress of the United States in accord with Section 836 of Title 10 of the United States Code.

Proclamation 5442 of February 21, 1986

National Hemophilia Month, 1986

By the President of the United States of America

A Proclamation

Hemophilia is a genetic disease in which the blood will not clot properly because a specific clotting factor is missing or defective. It is almost exclusively a male disease, affecting one of every four thousand live male births, regardless of race, nationality, or family economic status.

Significant advances have been made in the diagnosis and treatment of hemophilia. Methods of early diagnosis provide the means to institute preventive measures at an early age. Modern blood fractionation technology provides a moderately priced, readily available supply of the needed clotting component for those who must have regular infusions. Still, hemophiliacs face a life of unpredictable medical complications that may result in disability or death.

Proper medical treatment for the hemophiliac, and public awareness and acceptance of this medical condition, will allow the individual to live a normal, productive, and independent life and will dispel many of the common misconceptions of the disease.

To stimulate public awareness about hemophilia and to encourage the development of improved techniques of diagnosis and treatment, the Congress, by Senate Joint Resolution 150, has designated the month of March 1986 as "National Hemophilia Month" and authorized and requested the President to issue a proclamation in observance of this period.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of March 1986 as National Hemophilia Month. I invite the Governors of each State, the Commonwealth of Puerto Rico, the officials of other areas subject to the jurisdiction of the United States, and the American people to join me in reaffirming our commitment to finding better ways of helping those afflicted with hemophilia.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of February, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Executive Order 12551 of February 21, 1986

The President's Export Council

By the authority vested in me as President by the Constitution and statutes of the United States of America, including the Federal Advisory Committee Act, as amended (5 U.S.C. App. I), and in order to expand the membership of the President's Export Council, it is hereby ordered that Section 1-102(b) of Executive Order No. 12131 of May 4, 1979, is amended to read as follows:

"(b) Five members of the United States Senate, designated by the President of the Senate, and five members of the United States House of Representatives, designated by the Speaker of the House, to serve for a two-year term."

Rules and Regulations

Federal Register
Vol. 51, No. 37
Tuesday, February 25, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 271, 272, 273, 274 and 278

[Amdt. 267]

Food Stamp Program; Community Mental Health Centers, Credit Unions, and Farm Self-Employment Losses

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This rulemaking implements three provisions of the Food Security Act of 1985 which revise sections 3 (f) and (i), section 5(d) and section 10 of the Food Stamp Act of 1977, as amended. The first provision will allow Food Stamp Program participation by publicly operated community mental health centers which conduct residential programs for drug addicts and/or alcoholics pursuant to part B of title XIX of the Public Health Service Act (42 U.S.C. 300x et seq.). The second provision allows certain federally insured credit unions to redeem food stamps and the third provision permits farm self-employment losses to be offset against other household income.

DATES: This rule is effective on February 25, 1986. State agencies shall implement the provisions not later than 30 days after February 25, 1986. Comments must be received on or before April 28, 1986 to be assured of consideration.

ADDRESS: Comments should be submitted to Bruce A. Clutter, Chief, Eligibility and Monitoring Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia, Room 708.

FOR FURTHER INFORMATION CONTACT: Judith Seymour, Supervisor, Certification Rulemaking Section, at the above address. Phone (703) 756–3429.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Department has reviewed this rule under Executive Order 12291 and Secretary's Memorandum No. 1512–1. The proposed rule would affect the economy by less than $100 million a year. The rule would not significantly raise costs or prices for consumers, industries, government agencies or geographic regions. There would not be significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified the rule as "not major."

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final Rule Related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Interim Rule

Robert E. Leard, Administrator of the Food and Nutrition Service (FNS), has determined, pursuant to 5 U.S.C. 553, that public comment on this rulemaking prior to implementation is impracticable and contrary to public interest and, additionally, that good cause exists for making this rule effective earlier than thirty days after publication. Allowing, but not requiring, implementation earlier than thirty days after publication will allow State agencies which want to implement as soon as possible to do so but will not place an undue burden on those State agencies which need more time to implement. The language contained in the regulations is drawn from the language of the Food Security Act of 1985 which authorized these changes. However, because the Department believes that the rule may be improved by public comment, comments are solicited on this rule for 90 days. All comments received will be analyzed and any appropriate changes in the rule will be incorporated in the subsequent publication of a final rule.

Regulatory Flexibility Act

This interim rule has also been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.). Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that this interim rule will not have a significant economic impact on a substantial number of small entities. State and local welfare agencies are affected to the extent that they administer the Program. Publicly operated community mental health centers will be affected because of changes to allow for the residents' participation in the Program. Self-employed farmers whose farm operations show losses will be affected because of changes in policy to determine eligibility and benefits for these farmers. The rule will also affect retail food stores and wholesale food concerns and credit unions which accept and redeem food stamps, respectively. Thus, while the rule may affect a substantial number of small entities, the effect on any one entity will not be significant.

Paperwork Reduction Act

The provisions in this regulation concerning mental health centers and offsetting losses for farmers do not contain reporting and recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) pursuant to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). The reporting requirements relating to the provision on the redemption of food stamps have been approved by OMB under OMB number 0584–0085.

Background

Community Mental Health Centers

The Food Stamp Act of 1977, as amended, has, historically, allowed drug addicts or alcoholics who live in private nonprofit centers which operate drug addiction or alcoholic rehabilitation programs to participate in the Food Stamp Program and also has allowed private nonprofit centers which operate

BEST COPY AVAILABLE

VOL 51
ISS 37
FE 25
1986
UMI

drug addiction or alcoholic rehabilitation programs to redeem food stamps for their residents who would otherwise be eligible for food stamps were they not living in those centers. Drug addicts or alcoholics who live in such private nonprofit centers for the purpose of regular participation in a drug or alcoholic treatment program are considered individual households instead of residents of institutions. These centers meet the definition of a retail food store and can be authorized to use food coupons at a designated wholesale concern.

Prior to 1982, residents of twelve community mental health centers in Mississippi, which operated halfway houses for alcoholics, participated in the Food Stamp Program.

In 1982, the Department notified these community mental health centers that they could no longer accept food stamps for their residents. The Department ruled that all but one of the programs in Mississippi were ineligible to participate in the program on the grounds that they were public, not private agencies.

The Department reached the conclusion that the agencies were public, rather than private, operations based on information from the Mississippi Tax Commission which indicated that the institutions were State-owned and operated public institutions. The centers were established by the State under regional commissions whose boards are appointed by the boards of supervisors in the counties. In this sense, the centers are public. However, the commissioners that supervise the centers are private citizens; the employees are not public employees, and the centers are not directly supervised by any agency of Mississippi's State or county governments. Additionally, the programs are identical to those in other States that are privately incorporated and that have self-perpetuating boards of directors.

In the Continuing Resolution enacted on October 1, 1983 (Pub. L. 98–107), Congress included language to allow public operated community health centers which operate drug addition and alcoholic rehabilitation programs to redeem food stamps for residents of their centers. This change was intended to address the situation in Mississippi. On November 14, 1983, the Department issued FNS Notice 84–17 to inform State and local welfare agencies and FNS regional and field offices of the expanded definition of drug addiction and alcoholic treatment centers. As a result, drug addicts or alcoholics who lived under the supervision of these public or private nonprofit institutions, for the purpose of regular participation in a drug or alcoholic treatment program, were considered individual households instead of residents of institutions. In addition, these institutions met the definition of a retail food store and were authorized to use food coupons at a designated wholesale concern.

The legislative history of the first 1983 Continuing Resolution was not clear enough to determine unequivocally if the change in the law to allow the participation of residents of publicly operated community health centers was a permanent action or if Congress intended for it to expire at the end of the fiscal year, September 30, 1984. After reviewing the provision, the Department interpreted the language to mean that the authority to allow residents of publicly operated community health centers to participate in the Program expired on September 30, 1984. As a result, on December 14, 1984, the Department issued a memorandum to all State and local welfare agencies through Food and Nutrition Service Regional Offices informing them that there was no longer a legislative basis for the participation of the residents of publicly operated community health centers in the Program. The memorandum requested that State agencies remove the recipients in these centers from the Program and stop certifying new applicants as of January 1, 1985. Field offices were notified to remove these publicly operated centers from their list of retail food stores, to cease authorization of these centers immediately, and to withdraw authorizations previously issued, effective March 1, 1985.

Congress also addressed this issue in the Fiscal Year 1985 Supplemental Appropriations Act, Pub. L. 99–88 (99 Stat. 293) which was signed on August 15, 1985. The Act stated that the treatment accorded private nonprofit drug addiction or alcohol treatment and rehabilitation programs, "shall henceforth also be applicable to publicly operated community health centers." In the accompanying legislative history (Senate Report Number 99–82), the Senate Appropriations Committee indicated that it intended that the authority which makes publicly operated community health centers eligible to be a permanent change in law.

Congress again addressed this issue in the Food Security Act of 1985, Pub. L. 99–198, this time amending the Food Stamp Act of 1977 to specify that publicly operated community mental health centers (such as those identified in Mississippi)—which provide the same type of residential programs for alcoholic or drug rehabilitation as in the case of private, nonprofit institutions—can participate in the Food Stamp Program. Inclusion of this provision in the Food Stamp Act clearly makes the change a part of permanent law. The language in the Food Security Act of 1985 identifies such centers as publicly operated community mental health centers under part B of title XIX of the Public Health Service Act (42 U.S.C. 300x et seq.).

Consistent with this permanent change in law made in the Food Security Act, this rule provides that each narcotic addict or alcoholic who lives under the supervision of a publicly operated community mental health center for the purpose of regular participation in a drug or alcoholic treatment program will be considered an individual household instead of a resident of an institution and may again participate in the Program if otherwise eligible. In addition, publicly operated community mental health centers which treat drug addicts or alcoholics now meet the definition of a retail food store and can be authorized to use food stamps at a designated wholesale food concern.

The Department would like to point out that the Food Security Act of 1985 also makes a technical revision to the existing Food Stamp Act by removing references to now repealed laws dealing with food stamp eligibility for residents of private, nonprofit treatment programs and subsituting a reference to the Alcohol, Drug Abuse, and Mental Health Services Block Grant. Accordingly, these citations have been omitted in the regulations as well.

The regulatory language changes needed to effect this expansion are contained in § § 271.2, 272.1(g), 273.1(f)(2)(i), 273.11(e)(1), 274.10(d)(1) and 278.1(e) of the regulations.

Redemption of Food Stamps by Credit Unions

Currently, the Food Stamp Program regulations provide that only those financial institutions insured by the Federal Deposit Insurance Corporation (FDIC) or the Federal Savings and Loan Insurance Corporation (FSLIC) may redeem food stamps for retail food stores and wholesale food concerns participating in the program. Credit unions have not been allowed to redeem food stamps because they are not insured by either the FDIC or the FSLIC. However, in some areas credit unions serve as the only financial institutions in a community. As a result, some grocers have had to seek approved financial institutions outside their communities to

redeem food stamps. In order to afford these firms more convenience in redeeming food stamps, Congress amended the Food Stamp Act of 1977, as amended to allow the redemption of food stamps by certain federally insured credit unions. The Food Security Act of 1985 (section 1522 of Title XV of Pub. L. 99–198) provides that financial institutions which are insured under the Federal Credit Union Act and which have retail food stores or wholesale food concerns in their field of membership may also redeem food stamps. This rule revises the regulations accordingly to allow redemption of food stamps by those federally insured credit unions specified in Pub. L. 99–198.

The regulatory changes required to allow credit unions to redeem food stamps are contained in §§ 271.2, and 278.5(a)(1) of the regulations.

Offsetting Losses of Self-Employed Farmers

Current rules do not allow offsetting net losses from farm self-employment income against other household income. If another household member works outside the home and the farm operation shows a net loss, the Food Stamp Program currently looks only at the gain from this outside income, and does not offset the net farm income loss against other income. It is Congress' view that determining income in such a manner does not accurately reflect such a household's available income. (House Report 99–271, Part 1, p. 144.)

To address this concern, the Food Security Act of 1985 enacted on December 23, 1985 (section 1509 of Pub. L. 99–198) requires farm self-employment losses to be offset against other countable income in a household. It is Congress' intent that whatever base is used to determine income from self-employed farm operations, the previous year's tax return or current income, the same base be used in determining any net loss. In addition, losses should be prorated over the year in a manner comparable to that used to prorate farm self-employment income. In order to ensure uniform implementation of this provision we are stating in the rule that to be considered a self-employed farmer, the farmer must receive or anticipate receiving annual gross proceeds of $1000 or more from the farming enterprise.

This "definition" is from the 1982 Census of Agriculture, Volume 1, Geographic Area Series, Part 51, United States Summary and State Data, Introduction, p. V, published by the U.S. Department of Commerce, Bureau of the Census.

The regulatory changes required to permit farm self-employment losses to be offset against other household income are contained in §§ 273.10(e)(1)(i)(A) and 273.11(a)(2)(iii) of the regulations.

Implementation

State agencies shall implement the requirements regarding publicly operated community mental health centers and offsetting farm self-employment losses not later than thirty days after the effective date of this interim rule. State agencies may implement these changes upon publication February 25, 1986. This allows implementation earlier than thirty days after publication for those State agencies that want and are able to do so, while allowing State agencies which need more time up to thirty days to implement. Consequently, State agencies must begin taking applications from residents of publicly operated community mental health centers not later than thirty days after the rule's effective date. FNS field offices may authorize these centers to act as retail food stores on the effective date of this rule. Since the expanded definition of eligible centers was implemented prior to 1982 and for a one-year period as a result of the first 1983 Continuing Resolution, the Department does not expect problems with implementation. Also, the Department does not anticipate problems with implementation of the offset of farm self-employment losses since there is only a minor change in determining eligibility and benefits and this only affects one portion of the food stamp caseload.

The federally insured credit unions authorized to redeem food stamps under this rule may begin accepting food stamps for redemption not later than thirty days after the effective date of this rule.

List of Subjects

7 CFR Part 271

Administrative practice and procedures, Food stamps, Grant programs—social programs.

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Records, Reporting requirements, Social security, Students.

7 CFR Part 274

Administrative practice and procedure, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 278

Administrative practice and procedure, Banks, Banking claims, Food stamps, Groceries—retail groceries, general line—wholesaler, Penalties.

Therefore, 7 CFR Parts 271, 272, 273, 274 and 278 are amended as follows:

1. The authority citation for Parts 271, 273, 274 and 278 continues to read as follows:

Authority: 91 Stat. 958 (7 U.S.C. 2011–2027).

2. The authority citation for Part 272 continues to read as follows:

Authority: 91 Stat. 958 (7 U.S.C. 2011–2029).

PART 271—GENERAL INFORMATION AND DEFINITIONS

3. In § 271.2, Definitions, the definition of "Insured financial institution" is amended by adding after "FSLIC" the phrase "or financial institutions which are insured under the Federal Credit Union Act and which have retail food stores or wholesale food concerns in their field of membership".

4. In § 271.2, Definitions, the definition of "Retail food store" is amended by adding to clause (2) the words "publicly operated community mental health centers which conduct residential programs for drug addicts and/or alcoholics;" after the semicolon following the words "drug addict or alcoholic treatment and rehabilitation programs;".

5. In § 271.2, Definitions, the definition of "Drug addiction or alcoholic treatment and rehabilitation program" is revised to read as follows:

§ 271.2 Definitions.

* * * * *

"Drug addiction or alcoholic treatment and rehabilitation program" means any drug addiction or alcoholic treatment and rehabilitation program conducted by a private, nonprofit organization or institution, or a publicly operated community mental health center, under part B of title XIX of the Public Health Service Act (42 U.S.C. 300x et seq.).

* * * * *

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

6. In § 272.1, a new paragraph (g)(72) is added to read as follows:

VOL 51
ISS 37
FE 25
1986
UMI

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(72) *Amendment No. 267.* State agencies shall implement the eligibility requirements of this rulemaking as they apply to offsetting farm self-employment losses and publicly operated community mental health centers not later than March 27, 1986. State agencies must begin taking applications from residents of publicly operated community mental health centers (as defined in § 271.2) not later than March 27, 1986. FNS field offices may authorize these centers to act as retail food stores on February 25, 1986.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

§ 273.1 [Amended]

7. In § 273.1(f)(2)(i), the first sentence is amended by adding the words "the publicly operated community mental health center or" before the words "the private nonprofit".

8. In § 273.10, paragraph (e)(1)(i)(A) is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 273.10 Determining household eligibility and benefit levels.

* * * * *

(e) *Calculating net income and benefit levels.*—(1) *Net monthly income.*
(i) * * *

(A) * * * Net losses from the self-employment income of a farmer shall be offset in accordance with § 273.11(a)(2)(iii).

* * * * *

9. In § 273.11, paragraph (a)(2)(iii) is amended by adding a new sentence after the second sentence to read as follows:

§ 273.11 Action on households with special circumstances.

(a) *Self-employment income.* * * *

(2) *Determining monthly income from self-employment.* * * *

(iii) * * * If the cost of producing self-employment income exceeds the income derived from self-employment as a farmer, such losses shall be offset against any other countable income in the household. For purposes of this provision, to be considered a self-employed farmer, the farmer must receive or anticipate receiving annual gross proceeds of $1000 or more from the farming enterprise. * * *

* * * * *

10. In §273.11(e)(1), the first sentence is amended by adding the words "publicly operated or private nonprofit" after the words "participate in" and before the words "drug or alcoholic" and the last sentence is amended by removing everything after "FNS as a retailer" and inserting the words "or is funded under part B of Title XIX of the Public Health Service Act (42 U.S.C.300x et seq.)."

PART 274—ISSUANCE AND USE OF FOOD COUPONS

§ 274.10 [Amended]

11. In § 274.10, paragraph (d)(1) is amended by adding the words "or a publicly operated community mental health center" after the words "private nonprofit organization or institution".

PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD STORES, WHOLESALE FOOD CONCERNS AND INSURED FINANCIAL INSTITUTIONS

12. In § 278.1(e) the first sentence is amended by removing the word "certified" and the remainder of the sentence and adding in its place the words "funded under part B of Title XIX of the Public Health Service Act (42 U.S.C. 300x et seq.)." The second and third sentences are removed, and the fourth sentence is revised to read as follows:

§ 278.1 Approval of retail food stores and wholesale food concerns.

* * * * *

(e) *Treatment programs.* * * * Approval to participate is automatically withdrawn once funding under Part B of Title XIX is discontinued.

* * * * *

§ 278.5 [Amended]

13. In § 278.5(e)(1), the first sentence is amended by adding after "(FSLIC)" and before the word "may" the phrase "or financial institutions which are insured under the Federal Credit Union Act and which have retail food stores or wholesale food concerns in their field of membership".

14. In § 278.9, a new paragraph (c) is added to read as follows:

§ 278.9 Implementation of amendments relating to the participation of retail food stores, wholesale food concerns and insured financial institutions.

* * * * *

(c) *Amendment No. 267.* The federally insured credit unions authorized to redeem food stamps under this amendment may begin accepting food stamps for redemption not later than March 27, 1986.

Dated: February 19, 1986.

Robert E. Leard,
Administrator.

BILLING CODE 3410-30-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Limiting the Use of Highly Enriched Uranium in Domestically Licensed Research and Test Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its regulations to limit the use of highly enriched uranium (HEU) fuel in domestically licensed research and test reactors (non-power reactors). The amendments generally would require that newly licensed non-power reactors use low enriched uranium (LEU) fuel and, contingent on Federal Government funding for conversion-related costs, that licensees of existing non-power reactors replace HEU fuel with LEU fuel acceptable to the Commission. The amendments are intended to promote the common defense and security by reducing the risk of theft or diversion of HEU fuel used in non-power reactors and the consequences to public health, safety and the environment from such theft or diversion. The reduction in use of HEU should encourage similar action by foreign operators of non-power reactors and, thereby, reduce the amount of HEU fuel in international use.

EFFECTIVE DATE: March 27, 1986.

FOR FURTHER INFORMATION CONTACT: F.P. Gillespie, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 443-7936.

SUPPLEMENTARY INFORMATION:

Contents

I. Background
II. Response to Public Comments on the Proposed Rule
III. Revisions to the Proposed Rule

I. Background

On July 6, 1984 (49 FR 27769), the Commission published a proposed rule which would implement Commission policy (expressed in 47 FR 37007, dated August 24, 1982) to reduce, to the maximum extent possible, the use of highly enriched uranium (HEU) in domestic and foreign research and test reactors (non-power reactors). The

proposed rule was intended to implement this policy by generally requiring newly licensed non-power reactors to use low enriched uranium (LEU) fuel and licensees of existing non-power reactors to replace HEU fuel with LEU fuel when available. Use of LEU fuel rather than HEU fuel reduces the possibility that fuel from non-power reactors would be diverted or stolen for the ultimate purpose of making "Weapons-usable" material.

In the supplementary information accompanying the publication of the proposed rule, the Commission acknowledged its concerns about the costs of conversion to its licensees, including costs attendant to the licensing process. The Commission, therefore, invited comments on (1) the extent that economics of conversions should influence its actions and (2) the approach of using "generic envelopes" of safety limits (explained below) and limiting conditions of operation to facilitate conversion safety reviews. Both of these issues were addressed in many comment letters, and the final rule includes provisions which the Commission believes respond in a reasonable and prudent manner to the legitimate concerns about these subjects.

II. Responses to Public Comments on the Proposed Rule

Over 130 comment letters were received from members of Congress, public interest groups, members of the research and test reactor community, special interest groups, the Departments of Energy (DOE) and State, the Arms Control and Disarmament Agency, and individual members of the public. The extensive comments on this proposal were separated into nine categories. (1) International Significance of NRC-Mandated Conversion; (2) Value/Impacts of Proposed Conversion; (3) Technical Feasibility and Safety Issues; (4) Licensing Issues Attendant to Conversion; (5) Funding for Proposed Conversions; (6) Risk of Theft or Diversion of HEU Fuel; (7) Evaluation of the Threat of Theft or Diversion of HEU—Adequacy of Security; (8) Implementation Options and Alternatives; and (9) Miscellaneous Comments.

Three categories of comments were most relevant to the underlying basis for the changes incorporated into the final rule. These were Category 4—Licensing Issues Attendance to Conversion; Category 5—Funding for Proposed Conversions; and Category 8—Implementation Options and Alternatives. Two other categories were considered to be most relevant to the decision to promulgate final rule. These were Category 1—International Significance of NRC-Mandated Conversions and Category 6—Risk of Theft or Diversion of HEU Fuel. The Commission's positions on the topics addressed in these five categories of comments are summarized below. Copies of all public comments and the complete Commission staff responses are available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street NW, Washington, DC 20555. Single copies are available without charge from the contact person.

Funding for Proposed Conversions

In publishing the proposed rule for public comments, the Commission indicated in the Supplementary information section that it shares the licensees' expressed views that conversion costs should largely or entirely be financed by the Federal Government. Currently, the Federal Government, through the DOE, is providing funding for the Reduced Enrichment for Research and Test Reactor (RERTR) and other fuel research programs. The objective of these programs is to develop and demonstrate non-power reactor fuels which can be operated safely and will allow substitution of LEU for HEU fuel in such reactors. These programs have been successful to date, and their continued success is expected to result in technological developments which could lead to a significant reduction of HEU inventories both in the United States and abroad.

It was recognized that additional operational and support costs associated with physical replacement of HEU fuel with LEU fuel would be incurred in the domestic conversion of licensed facilities. A number of commenters stated that the NRC statement on costs did not constitute a firm commitment for funding expensive fuel changes and did not specify what costs would or would not be covered. Cost of transportation (both of new and old fuel), costs caused by the differences in fuel cycles for LEU and HEU fuels, and costs associated with insurance, disposal, licensing support and potential litigation were specifically identified by commenters. It was also pointed out that the proposed rule did not establish a vital link between Federal funding and implementation, that is, it did not make clear whether or not implementation could be delayed if Federal funding did not materialize. One comment letter discussed the apparently conflicting views of NRC and DOE on conversion funding, especially for "lifetime cores," and questioned Congressional willingness to provide funding. Resolution of the funding question was considered necessary before issuance of a final rule.

Many commenters supporting the proposed rule implied that economics should not be used as a reason to avoid the changeover. Comments from two members of Congress indicated their belief that Congress would continue to provide funding for development of reduced enrichment fuels and would defray the cost of their use in *university* research reactors. Others also stated their belief that funding for conversion would be provided by Congress.

After reviewing these comments, the Commission is of the view that conversion costs of *all* domestic non-power reactors directed to convert should be financed fully by the Federal Government. The domestic conversion actions it has proposed are based on the determination that the residual risks of theft or diversion of HEU fuel from non-power reactors would be further reduced in a cost/effective manner and that these actions are consistent with the U.S. policy of setting an example to encourage conversion by foreign users of HEU in non-power reactors. Full Federal financing would also permit the Commission to meet the dictates of section 104c. of the Atomic Energy Act of 1954, as amended. Such financing would allow the Commission to impose only the minimum amount of regulation on non-power reactor licensees to fulfill its obligations under this Act to promote the common defense and security and to protect the health and safety of the public and will permit the continued conduct of widespread and diverse research and development activities by these licensees.

As noted in the background material accompanying publication of the proposed rule, DOE historically has provided significant support to research and test reactor programs. In fact, fuel for university reactors is currently supplied and paid for by DOE (i.e., U.S. taxpayers) and "loaned" to the universities. It is anticipated that the funding necessary for conversion activities for both university and other licensees could be provided through DOE or another Federal agency. The Commission has requested that Congress appropriate the necessary funding to cover licensees' conversion-related costs.

To reflect its determinations and views with respect to the funding issue, the Commission has added the following features to the final rule. First, in the definitions in § 50.2, the Commission sets forth its views on elements to be

VOL 51 ISS 37 FE 25 1986 UMI

considered in determining the Federal Government's obligations to provide funding for conversion-related activities. That funding could include, but is not necessarily limited or extend to (1) costs attendant to the procurement of LEU fuel; (2) costs attendant to "lost HEU fuel value" (i.e., residual value of HEU fuel being used by commercial licensees); (3) licensee cost attendant to operations necessary to replace HEU fuel with LEU fuel; (4) reasonable lost revenue costs attendant to (a) facility shutdowns necessary to accomplish the conversion process, and (b) the difference in fuel cycle costs, such as more frequent refueling resulting from the use of LEU fuel rather than HEU fuel; (5) costs attendant to both transporation of HEU fuel from and LEU fuel to the licensed facility undergoing conversion; (6) reasonable costs attendant to preparing analyses and presenting documentation required by the final rule or necessary to obtain NRC approval for the conversion process; and (7) reasonable costs associated with safeguarding HEU fuel being replaced in the process of conversion until it has been transferred to an appropriate facility. Final determination of conversion costs under the provisions of this rule and certification thereof to the Commission shall rest with the Department of Energy or other agency responsible for disbursing conversion funds, in consultation with the licensee.

Second, the paragraph on implementation, § 50.64(c), has been modified to require licensees to submit proposals for conversion which would include a certification from DOE or other appropriate Federal agency that Federal Government funding for conversion is available. Only if the certification is obtained would a licensee be required to include a schedule for conversion in the required proposal. If Federal Government funding for conversion cannot be certified, the proposal's contents may be limited to a statement of this fact; however, the licensee would be required to resubmit a proposal for conversion at 12-month intervals thereafter, until certification is obtained. This provision applies to all non-power reactor licensees.

Finally, under the provisions of § 170.11(b)(1), the Commission hereby grants to non-power reactor licensees a one-time exemption from application fees, license fees, amendment fees, renewal fees, approval fees and inspection fees associated solely with the conversion processes required by § 50.64. Aside from inspection fees, the exemption for the other fees would apply to four commercial licensees affected by § 50.64 (the other facilities are already exempt under § 170.11(a) (4), (5), and (9)). The exemption of inspection fees would apply to 28 licensees, and is expected to be limited to any single non-routine safety inspection performed by NRC following a facility's conversion to assure that a licensee is complying with its stated or approved conversion plans and operations.

Through these provisions, the Commission believes that the costs of conversion to its licensees can be virtually eliminated.

Implementation Options and Alternatives

A large fraction of the comment letters focused on the implementation features of the proposed rule. Two views held by commenters supporting the proposed rule were that a specific deadline should be imposed on conversion actions and that the conversion exemptions, under the proposed rule's unique purpose provisions, should be eliminated or tightened. In counter-point, several commenters stated that, since it is at present uncertain what fuel would be acceptable to the Commission, the issues of funding and for license amendments should be resolved before any final rule is issued.

As to the deadline issue, the Commission has determined that establishing a specific deadline for conversion actions is not generally justified. This is in keeping with the Commission's view that funding for conversions should be available, that HEU to LEU fuel conversion addresses the potential reduction of the residual risk posed by the use of HEU fuel at licensed non-power reactors and thus does not require a specific deadline, and that domestic conversions are intended to be put on solid footing by setting a strong, resolute and sensible example, consistent with U.S. national policy, to encourage foreign operators of non-power reactors to convert to the use of LEU fuel. The Commission, however, does want to initiate the overall conversion process at the earliest possible date, and, therefore, has provided in § 50.64 for 12 months for the initial submission by affected licensees of their conversion proposals. To further assist licensees and the DOE, a definition of fuel acceptable to the Commission has been added to § 50.2. The Commission believes that, for several non-power reactors, fuels can be made available which would be capable of meeting this definition.

Turning to the issue of conversion exemptions which could be granted under the unique purpose provisions of the proposed rule, the Commission believes that these exemptions are needed under section 104c. of the Atomic Energy Act to permit the continued conduct of widespread and diverse research and development; however, the definition of unique purpose in § 50.2 has been expanded to define more precisely the nature and purpose of the experiment, program, or commercial activity necessitating the use of HEU fuel.

The funding issue has been addressed already and the amendment issue is discussed later with respect to § 50.64. The remaining issue in this subgroup of implementation options involves the question of licensing uncertainties (i.e., the possibility that licensees may become involved in protracted adjudicatory hearings as a result of their conversion activities). This issue is addressed in the following section.

Licensing Issues Attendant to Conversion

In the supplementary information section of the proposed rule, the Commission stated that it is considering the development of "generic envelopes" of safety limits for several types of non-power reactors. The Commission believed that these envelopes could be developed by (1) defining the licensing needs for various classes of reactors (e.g., for both normal operating conditions and potential accident scenarios); (2) reviewing the domestic and foreign data available through the RERTR and other fuel development and demonstration programs; and (3) assessing the feasibility of generic safety evaluation of safety analysis reports. The development of these generic envelopes could facilitate safety reviews attendant to the HEU/LEU fuel conversion process. Comments were invited on this approach and many were received from both supporters and opponents of the proposed rule. These comments can be divided into two general classes.

One class argued that conversion would require, in almost all cases, either a reactor "relicensing" (or new operating license) or a licensing amendment. The possibility of implementing conversion under § 50.59 without amendment was generally considered unrealistic. Concerns were expressed that this "relicensing" or license amendment process could lead to extensive licensing hearings brought about by intervenors and that costs related to such hearings could exceed

the hardware costs of conversion. Some of these commenters cited the recent shutdown of the UCLA reactors as a pertinent example. Many commenters, including several involved with the operation of non-power reactors at universities, indicated that they could not afford to engage in litigation against determined opponents and that even the perception of uncertainties about such litigation could influence decisions on continued reactor operation.

Following this line of argument, a few commenters recommended that the NRC undertake a rulemaking proceeding on the issue of generic licensing and that any changeover be contingent on a finding that safe operation of a non-power reactor would not be affected significantly by a conversion from HEU to LEU fuel. It was also suggested that the requirement in the proposed rule regarding the acquisition (or fabrication) of additional HEU fuel should be contingent on completion of the license changes necessary to accommodate use of LEU fuel. The potential need for the rule to provide, in any conversion process, for stepwise refueling to keep the reactor within present 10 CFR Part 73 requirements was also identified.

The other class of comments presented an opposite viewpoint, arguing that, even if conversion requires a license amendment, challenges can raise questions only on the narrowest of matters relevant to the subject of the amendment. Further, many commenters in this class opposed the idea of generic envelopes of safety limits for several types of non-power reactors, although some of them recognized the need for generic safety analysis of fuels. These commenters stated that if there are any questions about the safety of reactors due to conversion, the public should be allowed to address these safety questions in a public hearing. Others emphasized that safety margins should increase or remain equal to those currently approved by the NRC and that a license amendment should be required if margins are reduced. On the other hand, several commenters noted that interventions against the amendments required to accomplish conversion would be unlikely but that, indeed, failure to convert could lead to intervention in license renewal and license amendment proceedings.

The Commission has decided to forego, at least for the near term, any "generic envelope" safety rulemaking. While this rule resolves all issues as to need for conversion to LEU, it does not provide any generic resolution for any safety issues that may arise, in individual cases, in connection with changes in the license, facility or procedures made necessary by the conversion to a different fuel type from HEU to LEU.

After receipt of a licensee proposal for implementation of the conversion to LEU, NRC staff will conduct an appropriate evaluation for both implementation of the rule and for assuring the protection of the public health and safety in connection with any licensee-proposed changes in the license, facility, and procedures made necessary by the conversion. After the NRC staff evaluation, an appropriate enforcement order will be issued directing both the conversion and any necessary changes in the license, facility and procedures. It is expected that in most cases, if not all, that enforcement order will be in the form of an order to modify the license under 10 CFR 2.204.

In the event that any interested person should, in accordance with section 189a. of the Atomic Energy Act, request a hearing on the enforcement order, NRC staff will participate fully in the proceeding and will have the burden of defending the order. Thus, in the event a hearing is requested, the licensee need not participate in the hearing and may therefore avoid litigative expenses associated with the conversion and hearing. The Commission believes that this NRC staff role is consistent with the general policy that the costs of conversion to LEU should, to the maximum practical extent, be borne by the Federal Government.

International Significance of NRC-Mandated Conversions

The Commission's view on the international and nonproliferation significance of the proposed domestic conversions was reflected in the Policy Statement of August 1982 (47 FR 37007, dated August 24, 1982). The Commission discussed in this Statement its interest in reducing, to the maximum extent possible, the use of HEU in domestic research and test reactors and, thereby, encouraging conversion by foreign reactor operators. To assist in accomplishing this policy goal, the Commission made two commitments: First, to provide full support for DOE's RERTR program; and second, as part of the policy to strongly encourage conversion by foreign operators, to take steps to encourage similar action by U.S. non-power reactor operators. Subsequently, the Commission considered the proposed rule to limit the use of HEU fuel in domestic non-power reactors as such a step.

As to international and nonproliferation implications, the State Department stated that the proposed action could have some marginal effect on future negotiations with foreign non-power reactor operators regarding the need and timing for converting their own reactors. It also suggested to the NRC that converting some reactors might impose an undue technical or economic penalty. The Commission has responded to this comment by closely coupling conversion to Federal Government funding of conversion-related activities. Through this action, the Commission believes it has brought the criteria for the domestic conversion program in line with the no undue economic penalty criterion suggested by the Executive Branch for foreign non-power reactor operators. The Commission also recognizes that the development and demonstration of acceptable LEU replacement fuel and the conversion of larger DOE facilities can have a significant influence on foreign non-power reactor operators.

The proposed rule implied that HEU fuel at all licensed non-power reactors, whether in a facility's inventory or in transit, has relatively equal proliferation significance. The State Department view is that no significant nonproliferation benefits are associated with conversion of "lifetime core" reactors, i.e., those reactors that were designed and built to operate over their entire life with the initial fuel load. Currently, 16 of 28 (originally 20 of 31) licensed facilities potentially affected by the final rule can be characterized as having lifetime cores. The Commission concludes that conversion of domestic non-power reactors will promote the common defense and security by reducing the risk of theft or diversion of HEU fuel at these reactors and the consequences to public health, safety and environment from such theft or diversion. Additionally, domestic conversions should generally encourage, in a symbolic way, conversions of foreign non-power reactors.

Risk of Theft or Diversion of HEU Fuel

Although the proposed rule to limit the use of HEU in non-power reactors was based primarily on international policy and nonproliferation considerations, the comments necessitated a reexamination of the "values" and "impacts" associated with further reductions in the domestic risk of theft or diversion of HEU fuel from NRC-licensed non-power reactors. This reexamination is summarized here. The complete responses to public comments are available from the NRC Public Document Room, under the title, "Limiting the Use of Highly Enriched Uranium in Domestic Research and Test

VOL
51
ISS
37
FE
25
1986
UMI

Reactors, Responses to Public Comments," July 22, 1985. As stated above and explained below, the Commission concludes that the final rule is based on domestic common defense and security and public health and safety considerations as well as on international and nonproliferation considerations.

In assessing the "value" of conversions in terms of residual risk reduction, the conservatisms in the current operating assumption of the likelihood of clandestine fission explosive (CFE) fabrication must be considered. Specifically, consideration must be given not only to the level of security provided, but also to: (1) The theat; (2) the ability of the intelligence community to give advance warning of a developing event or a planned malevolent act in sufficient time to implement additional countermeasures; (3) the deterrent value of irradiated fuel; (4) the length of time it would take to remove fresh or irradiated fuel from a facility (irradiated fuel would normally take longer); (5) the likelihood that an adversary would successfully process either fresh or irradiated fuel to obtain material which potentially could be used to construct a nuclear explosive device, and the time and resources required (processing of irradiated fuel is significantly more difficult); (6) the ability to find and retrieve nuclear material, if stolen (irradiated fuel would be easier to find); (7) the conservatism built into the 5-kilogram formula quantity for U–235—see generally §§ 73.1(a) and 73.2(bb)(the presence of fission products would increase the conservatism of this number); and (8) the likelihood that an adversary could successfully construct a nuclear explosive device (the presence of fission products would make this more difficult). All of these factors have an impact on the assessment of the likelihood that an adversary could construct a CFE through diversion or theft of HEU fuel from non-power reactors. To complete the evaluation of risk, the range of consequences has been considered in the event of a successful theft or diversion of any quantity of HEU fuel from licensed non-power reactors. The resultant reduction of risks can be balanced against the incurred costs. As explained above, the costs of conversion for all affected licensees includes a quantifiable component, currently estimated as $12–16 million. In addition, nonquantifiable costs have been identified, including any licensing cost associated with potential hearings and potential losses in functional capabilities at affected facilities. As discussed above, virtually all costs will be borne by the Federal Government. The Commission also believes, based on comments received on the proposed rule, that promulgation of this final rule will involve a benefit to licensees. The Commission's conclusion, based on the cost/benefit evaluation, is to proceed with promulgation of this final rule, in order to fulfill its obligations under the Atomic Energy Act to promote the common defense and security and to protect the health and safety of the public, as well as to permit the continued conduct of widespread and diverse research and development.

III. Revisions to the Proposed Rule

1. Section 50.2—Formerly § 50.64(b) of the Proposed Rule

This section has been expanded to include definitions of "Federal Government funding for conversion," "Fuel acceptable to the Commission," and several other definitions identified in § 50.64(b) of the proposed rule. These definitions have not been included in § 50.2 for easy and consistent reference. The first definition was necessary to couple conversion actions by licensees to the funds necessary to accomplish the conversion process. The second definition was needed to indicate that those non-power reactors meeting the unique purpose provision of the rule must use HEU fuel of enrichment as close to 20% as is available and acceptable to the Commission.

In addition, the unique purpose definition, stated in § 50.64(b)(5)(1) of the proposed rule, has been expanded to define more precisely the specific experiment, program or commercial activity that justifies continued use of HEU fuel. The change is also intended to limit consideration of activities to those having merit for research purposes, and not because they may have some economic benefit. The Commission itself will make the final decision on any conversion requirement based upon a finding of unique purpose.

Section 50.64(b)—Formerly § 50.64(c) of the Proposed Rule

The changes to § 50.64(c), now § 50.64(b), include minor word changes in § 50.64(b) (1) and (2) and two clarifications in § 50.64(b)(2). The proposed rule would not have allowed a licensee to acquire additional HEU fuel if LEU fuel acceptable to the Commission for that reactor were available. Since a few of the affected non-power reactors refuel frequently enough to require "lead times" for fuel acquisition, the wording could have caused an unnecessary shutdown of these facilities until acceptable LEU fuel was available for use in the reactor. The background statement to the proposed rule indicated that the conversion schedule could include consideration of reactor usage which could apply to these situations. To clarify the final rule's intent, § 50.64(b)(2)(1) has been modified so that a licensee is required not to initiate acquisition of additional HEU fuel if LEU fuel acceptable to the Commission is available.

The change in § 50.64(b)(3) is intended to limit the scope of use of HEU fuel while allowing the use of fuel that is acceptable to the Commission but is slightly different from that needed to meet the strict definition of LEU weight percent of U–235. Such fuel might be required, in isolated instances, because of non-power reactor's core geometry and conditions for operation. However, the Commission wishes to see all licensees go to fuel as close to 20% enrichment as possible.

4. Section 50.64(c)—Formerly § 50.64(d) of the Proposed Rule

The changes in § 50.64(c)(2)(i) and the inclusion of § 50.64(c)(2)(ii) have been made to couple implementation of the rule to the availability of Federal Government funding in order to cover the costs of conversion.

Finding of No Significant Environmental Impact: Availability

The Commission has determined under the National Environmental Policy Act of 1969, as amended, and the Commission's regulations in Subpart A of 10 CFR Part 51, that this rule is not a major Federal action significantly affecting the quality of the human environment and that, therefore, an environmental impact statement is not required. Basically, the rule places limitations on the use of HEU fuel in domestic research and test reactors. In so doing, the risk of theft or diversion of HEU will be reduced. Neither the safe operation, nor any routine release of radioactivity from the affected reactors will be changed in any significant manner. The environmental assessment and finding of no significant impact on which this determination is based are available for inspection at the NRC Public Document Room, 1717 H Street NW., Washington, DC. Single copies of the environmental assessment and the finding of no significant impact are available from F.P. Gillespie, U.S. Nuclear Regulatory Commission, Washington, DC 20555, (301) 443–7936.

Paperwork Reduction Act Statement

The final rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). These requirements were approved by the Office of Management and Budget approval number 3150–0011.

Regulatory Analysis

The Commission has prepared a regulatory analysis on this final regulation. The analysis examines the costs and benefits considered by the Commission. The analysis is available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555. Single copies of the analysis may be obtained from F.P. Gillespie, Office of Nuclear Regulatory Research, Nuclear Regulatory Commission, Washington, DC 20555, (301) 443–7936.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Commission certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule affects nonpower reactor licensees that own and operate facilities licensed under sections 103 and 104 of the Atomic Energy Act of 1954, as amended. These licensees do not fall within the definition of small businesses set forth in section 3 of the Small Business Act, 15 U.S.C. 632, or within the Small Business Size Standards set forth in 13 CFR Part 121.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is adopting the following amendments to 10 CFR Part 50.

PART 50—[AMENDED]

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Sections 50.57(d), 50.58, 50.91 and 50.92 also issued under Pub. L. 97–415, 96 Stat. 2701, 2073 (42 U.S.C. 2133, 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100–50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10 (a), (b), and (c), 50.44, 50.46, 50.48, 50.54 and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 50.10 (b) and (c) and 50. 54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, 50.73, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

§ 50.2 [Amended]

2. In § 50.2, add the following new definitions in the proper alphabetical sequence.

"Federal Government funding for conversion" means funds appropriated to the Department of Energy or to any other Federal Agency to pay directly to or to reimburse non-power reactor licensees for costs attendant to conversion.

"Fuel acceptable to the Commission" means that the fuel replacing the existing HEU fuel in a specific non-power reactor (1) meets the operating requirements of the existing license or, through appropriate NRC safety review and approval, can be used in a manner which protects public health and safety and promotes the common defense and security; and (2) meets the Commission's policy of limiting, to the maximum extent possible, the use of HEU fuel in that reactor.

"Highly enriched uranium (HEU) fuel" means fuel in which the weight percent of U–235 in the uranium is 20% or greater. Target material, special instrumentation, or experimental devices using HEU are not included.

"Low enriched uranium (LEU) fuel" means fuel in which the weight percent of U–235 in the uranium is less than 20%.

"Non-power reactor" means a research or test reactor licensed under §§ 50.21(c) or 50.22 of this part for research and development.

"Unique purpose" means a project, program, or commercial activity which cannot reasonably be accomplished without the use of HEU fuel, and may include: (1) A specific experiment, program, or commercial activity (typically long-term) that significantly serves the U.S. national interest and cannot be accomplished without the use of HEU fuel; (2) Reactor physics or reactor development based explicitly on the use of HEU fuel, (3) Research projects based on neutron flux levels or spectra attainable only with HEU fuel; or (4) A reactor core of special design that could not perform its intended function without using HEU fuel.

3. In § 50.8, paragraph (b) is revised to read as follows:

§ 50.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 50.30, 50.33, 50.33a, 50.34, 50.34a, 50.35, 50.36, 50.36a, 50.48, 50.49, 50.54, 50.55, 50.55a, 50.59, 50.60, 50.64, 50.71, 50.72, 50.80, 50.82, 50.90, 50.91, and Appendixes A, B, E, G, H, J, K, M, N, and R.

4. A new § 50.64 is added to read as follows:

§ 50.64 Limitations on the use of highly enriched uranium (HEU) in domestic non-power reactors.

(a) *Applicability.* The requirements of this section apply to all non-power reactors.

(b) *Requirements.* (1) The Commission will not issue a construction permit after March 27, 1986 for a non-power reactor where the applicant proposes to use highly enriched uranium (HEU) fuel, unless the applicant demonstrates that the proposed reactor will have a unique purpose as defined in § 50.2.

(2) Unless the Commission has determined, based on a request submitted in accordance with paragraph (c)(1) of this section, that the non-power reactor has a unique purpose, each licensee authorized to possess and use HEU fuel in connection with the reactor's operation shall:

(i) Not initiate acquisition of additional HEU fuel, if low enriched uranium (LEU) fuel acceptable to the Commission for that reactor is available when it proposes that acquisition; and

(ii) Replace all HEU fuel in its possession with available LEU fuel acceptable to the Commission for that reactor, in accordance with a schedule determined pursuant to paragraph (c)(2) of this section.

(3) If not required by paragraphs (b) (1) and (2) of this section to use LEU fuel, the applicant or licensee must use HEU fuel of enrichment as close to 20% as is available and acceptable to the Commisson.

(c) *Implementation.* (1) Any request by a licensee for a determination that a non-power reactor has a unique purpose as defined in § 50.2 should be submitted with supporting documentation to the Director of the Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory

VOL 51
ISS 37
FE 25
1986
UMI

Commission, Washington, DC 20555, by September 29, 1986.

(2) (i) By March 27, 1987 and at 12-month intervals thereafter, each licensee of a non-power reactor authorized to possess and use HEU fuel shall develop and submit to the Director of the Office of Nuclear Reactor Regulation a written proposal for meeting the requirements of paragraphs (b) (2) or (3) of this section. The licensee shall include in the proposal a certification that Federal Government funding for conversion is available through the Department of Energy (DOE) or other appropriate Federal Agency. The licensee shall also include in the proposal a schedule for conversion, based upon availability of replacement fuel acceptable to the Commisson for that reactor and upon consideration of other factors such as the availability of shipping casks, implementation of arrangements for the available financial support, and reactor usage.

(ii) If Federal Government funding for conversion cannot be certified, the proposal's contents may be limited to a statement of this fact. If a statement of non-availability of Federal Government funding for conversion is submitted by a licensee, then it shall be required to resubmit a proposal for meeting the requirements of paragraphs (b) (2) or (3) of this section at 12-month intervals.

(iii) The proposal shall include, to the extent required to effect the conversion, all necessary changes in the license, facility, or procedures. Supporting safety analyses should be provided so as to meet the schedule established for conversion. As long as Federal Government funding for conversion is not available, the resubmittal may be a reiteration of the original proposal. The Director of the Office of Nuclear Reactor Regulation shall review the proposal and confirm the status of Federal Government funding for conversion and, if a schedule for conversion has been submitted by the licensee, will then determine a final schedule.

(3) After review of the safety analysis required by paragraph (c)(2), the Director of the Office of Nuclear Reactor Regulation will issue an appropriate enforcement order directing both the conversion and, to the extent consistent with protection of the public health and safety, any necessary changes to the license, facility, or procedures.

Separate Views

Chairman Palladino supports Federal funding for all conversion. However, in the event that no Federal funds are provided, the view of Chairman Palladino is that no conversion should be required. The Chairman also believes that, in the event that Federal funds are provided for university reactors but not for commercial non-power reactors, then the latter should still be required to convert to LEU, notwithstanding the lack of Federal funds.

Commissoner Asselstine believes that the conversion of commercial non-power reactors should not be contingent upon federal funding. The Federal government historically has provided significant support to *university* research and test reactor programs. In fact, it was this longstanding relationship with the university non-power reactors, coupled with the concern on the part of the university reactor operators of excessive costs and protracted litigation, which led the Commisson to support federal funding for conversion. There was never any discussion on the part of the Commission of how requiring conversions of the commercial non-power reactors would create a severe financial hardship for the commercial concerns. Commissioner Asselstine believes that if federal funds are not provided for the conversion of commercial non-power reactors, then the rule should require these licensees to convert to LEU notwithstanding the lack of federal funding. He believes that it is most unfortunate that the Commission has created a loophole in its rule whereby these commercial non-power reactors will never be required to convert to LEU if Federal funding is not provided.

Dated at Washington, DC this 20th day of February, 1986.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 1505-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8067]

Income Tax; Accounting for Long-Term Contracts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction.

SUMMARY: This document contains corrections to Treasury Decision 8067, which was published in the Federal Register on January 6, 1986 (51 FR 376). T.D. 8067 issued final regulations relating to accounting for long-term contracts.

EFFECTIVE DATE: These corrections are effective January 6, 1986.

FOR FURTHER INFORMATION CONTACT: Paulette Chernyshev of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T). Telephone 202-566-3288 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On January 6, 1986, the Federal Register published (51 FR 367) Treasury Decision 8067 which set forth final regulations that amended existing regulations relating to accounting for long-term contracts. The amendments were necessary because of provisions contained in the Tax Equity and Fiscal Responsibility Act of 1982.

Need for Correction

As published, T.D. 8067 contains typographical errors and one format error in the following locations: page 381, first column, paragraph numbered (3)(i), line 37; page 381, third column, paragraph (iii), line 12; page 383, second column, paragraph (C), line 1; page 385, first column, paragraph (I), line 7; page 388, third column, continuing to page 389, first column, paragraph (v); page 390, third column, line 2.

Correction of Publication

Accordingly, the publication of Treasury Decision 8067, which was the subject of FR Doc. 85.30814 (51 FR 376), is corrected as follows:

§ 1.451-3 [Corrected]

Par. 1. In § 1.451-3, on page 381, first column, paragraph (b)(3)(i), line 37, the word "costs" is removed and the word "cost" is added in its place.

Par. 2. In § 1.451-3, on page 381, third column, paragraph (b)(3)(iii), line 12, the word "has" is added immediately following the word "taxpayer".

Par. 3. In § 1.451-3, on page 383, second column, paragraph (C), line 1, the language "(C) *Short taxable years.* For any" is removed and the language "(D) *Short taxable years.* For any" is added in its place.

Par. 4. In § 1.451-3, on page 385, first column, paragraph (d)(5)(iii)(I), line 7, the word "contruction" is removed and the word "construction" is added in its place.

Par. 5. In § 1.451-3, on page 389, first column, lines 6 through 8, the language "performed no further allocation of that type of cost shall be required at the jobsite, and (C) For each taxable year" is removed and the language "performed at that jobsite, and no further allocation of that type of cost shall be required. (C) For each taxable year" is added in its place.

Par. 6. In § 1.451-3, on page 388, third column, continuing to page 389, first column, paragraph (d)(9)(v), subparagraphs (A), (B), and (C) are separate, indented components of paragraph (d)(9)(v) instead of a continuous string.

Par. 7. In § 1.451-3, on page 390, third column, line 2, the comma following the word "office" is removed.

Paul A. Francis,

Acting Director, Legislation and Regulations Division.

[FR Doc. 86-4061 Filed 2-24-86; 8:45 am]

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 230

[DoD Instruction 1000.12]

Procedures Governing Banking Offices on DoD Installations

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This part updates Department of Defense (DoD) policies and procedures concerning banking institutions and savings associations that may operate on DoD domestic and overseas installations. The revision provides specific guidance to the Heads of DoD Components on the establishment, operation and termination of these onbase institutions. In so doing, it contemplates a more active role by the Assistant Secretary of Defense (Comptroller) in coordinating related DoD Component actions. In order to assure consistent treatment, some rules formerly applicable only to credit unions or to banks and savings associations were applied, wherever possible, to the other types of institutions. The revision streamlines approval procedures for installations of automated teller machines and clarifies procedures for onbase office construction. Policies governing permissible service charges and fees are made less restrictive; for example, while Treasury checks must be cashed for all DoD personnel, institutions may determine the charge to non-accountholders for providing this service. The revision modifies provisions for establishment of onbase offices to permit service by more than one institution under singular circumstances, as indicated.

EFFECTIVE DATE: February 3, 1986.

ADDRESS: Directorate for Banking, Office of the Deputy Assistant Secretary of Defense (Management Systems), The Pentagon, Room 1A650, Washington, DC 20301-1100.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald L. Adolphi, telephone (202) 697-8281, AUTOVON: 227-8281.

SUPPLEMENTARY INFORMATION: On April 27, 1983, 48 FR 19140 amended Title 32, CFR, Part 230, which contains the existing Office of the Secretary of Defense (OSD) procedures for the operation of onbase banking institutions. On September 9, 1985, 50 FR 36610 proposed revision to those procedures. Accompanying policies are contained at Part 231. Comments were received from the DoD Components, Treasury Department, U.S. Small Business Administration, trade associations representing affected institutions, and two financial institutions operating at several DoD installations. All comments were fully considered and a majority were accepted in this final rule. A new provision precludes performance of commercial banking operations by DoD activities; DoD Components are to rely upon commercially available sources. DoD Components are required to forward requests for establishment of military banking facilities (MBFs) to the Deputy Assistant Secretary of Defense (Management Systems). At Treasury Department requests, a provision was added stating that where authorization is required to have the institution act as a Treasury General Account (TGA) domestic depositary, the institution's rating from a Treasury approved rating service shall be "C" or better, and the average daily TGA balance shall normally not exceed five percent of the institution's total assets. Reference to the $1.00 charge for domestic encashment of Treasury checks for non-accountholders was eliminated. Domestic banking institutions may adjust services and fees to maintain consistency with competing institutions or the onbase institution's branch-wide service offerings and fee schedules. Procedures are clarified for nonself-sustaining banking office construction of a building or renovation of government space. Lease duration is for the stated term or upon determining that the office is self-sustaining, whichever occurs first. The counting of dependents is prohibited when seeking to qualify under the 250 or 1,000 population rules for part- or full-time MBFs overseas. Component implementing regulations are to provide for support of overseas MBFs under terms of DoD contracts, thereby reducing procedural details formerly in the issuances. Overseas commanders having onbase MBFs are required to "accept" services rendered and report service shortfalls under identified procedures. DoD personnel may not serve as directors of banking institutions that operate banking offices on installations to which assigned. Numerous editorial improvements also were made in the final rule. Procedures contained herein also were reviewed for compliance with the Regulatory Flexibility Act, Pub. L. 96-354. It was determined that this final rule will not have a significant economic impact on a substantial number of small entities since its provisions apply mainly to the DoD Components and do not alter existing relationships with financial institutions chartered by Federal and State regulatory agencies to operate on DoD installations.

List of Subjects in 32 CFR Part 230

Banks, Military banking facilities, Savings and loan associations.

Accordingly, 32 CFR Part 230 is revised to read as follows:

PART 230—PROCEDURES GOVERNING BANKING OFFICES ON DOD INSTALLATIONS

Sec.
230.1 Reissuance and purpose.
230.2 Applicability and scope.
230.3 Definitions.
230.4 Responsibilities.
230.5 General operating policies and procedures.
Appendix A—Procedures for Establishing, Supporting, and Terminating Onbase Banking Offices.
Appendix B—Operating on Onbase Banking Offices.

Authority: 10 U.S.C. 136.

VOL

§ 230.1 Reissuance and purpose.

This part reissues DoD Instruction 1000.12[1] and provides procedural guidance to supplement DoD Directive 1000.11 concerning relations with banking offices serving on DoD installations.

§ 230.2 Applicability and scope.

(a) This part applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Organization of the Joint Chiefs of Staff (OJCS), the Unified and Specified Commands, the Defense Agencies, and Washington Headquarters Services (WHS) (hereafter referred to collectively as "DoD Components").

(b) Its provisions also pertain to all banking institutions that operate on DoD installations.

§ 230.3 Definitions.

Terms used in this part are defined in 32 CFR Part 231.

§ 230.4 Responsibilities.

(a) The *Assistant Secretary of Defense (Comptroller)* (ASD(C)) or designee, the Deputy Assistant Secretary of Defense (Management Systems) (DASD(MS)), shall:

(1) Coordinate the DoD domestic and overseas banking programs, consulting on aspects that pertain to the morale and welfare of DoD personnel with the Assistant Secretary of Defense (Force Management and Personnel).

(2) In coordination with affected DoD Components, authorize the specific types of banking services that will be provided by overseas banking facilities and specify the charges or fees, or the basis for these, to be levied on users of these services.

(3) Coordinate with the Fiscal Assistant Secretary of the Treasury on the designation of domestic and overseas banking facilities as depositaries and financial agents of the U.S. Government.

(4) Maintain liaison, as necessary, with Federal and equivalent State bank regulatory agencies as defined at enclosure 2 of DoD Directive 1000.11.

(5) Designate a technical representative to provide policy direction for the procuring and administrative contracting officer(s) responsible under the Federal Acquisition Regulation (FAR) for acquiring banking services required at overseas DoD installations.

(6) Serve as principal liaison with banking institutions having offices on overseas DoD installations. In this capacity, monitor banking facility managerial and operational policies, procedures, and operating results and take action as appropriate.

(7) Coordinate on DoD Component actions that contemplate a banking institution's removal for cause from an installation before final decision and referral to the appropriate regulatory agency.

(8) As necessary, negotiate government-to-government agreements for the provision of banking services on overseas DoD installations, in accordance with DoD Instruction 2050.1.

(9) Take final action on requests for exception to the provisions of this Part.

(b) The *Assistant Secretary of Defense (Acquisition and Logistics)* (ASD(A&L)) shall carry out responsibilities outlined in subsection F.2. of DoD Directive 1000.11.

(c) The *Assistant Secretary of Defense (Force Management and Personnel)* (ASD(FM&P)) shall carry out responsibilities outlined in subsection F.3. of DoD Directive 1000.11.

(d) The *Secretaries of the Military Departments and Directors of Defense Agencies* shall:

(1) Prescribe procedures for soliciting banking institutions to establish banking offices on respective domestic DoD installations. Such procedures shall prohibit DoD personnel from subjecting banking institutions to any form of coercion either while banking arrangements are under consideration or after banking offices are established.

(2) Review proposals to establish banking offices on respective domestic DoD installations, select the banking institution making the best offer and recommend designation of that institution to the appropriate regulatory agency.

(3) Forward proposals to establish banking facilities to the DASD(MS) for determination in conjunction with the Fiscal Assistant Secretary of the Treasury.

(4) Provide for liaison to banking institutions operating banking offices on respective domestic DoD installations.

(5) Supervise the use of banking offices on respective DoD installations within the guidance contained herein and in DoD Directive 1000.11

(6) Evaluate the services provided by banking offices to ensure that they fulfill the requirements upon which establishment and retention of those services were justified.

(7) Monitor practices and procedures of respective onbase banking offices to ensure that the welfare and interests of DoD personnel as consumers are protected.

(8) Assist respective onbase banking offices in developing and expanding necessary services for DoD personnel consistent with the provisions stated herein.

(9) Determine the level of logistic support to be provided to respective domestic banking institutions that submit reports reflecting nonself-sustaining status.

(10) Encourage the conversion of existing domestic banking facilities on respective installations to independent or branch bank status where feasible.

(11) Provide logistic support to overseas banking facilities under terms and conditions identified in respective contracts.

(12) Ensure that the recommendations of the Unified or Specified Command concerned are considered before processing requests for overseas banking service or related actions emanating from Component commands overseas.

(13) Refer matters requiring policy decisions or proposed changes to this Part or DoD Directive 1000.11 to the DASD(MS).

(e) The *Commanders of Unified and Specified Commands*, or designees, shall:

(1) Ensure the appropriate coordination of requests to:

(i) Establish banking offices in countries not presently served. Such requests shall include a statement that the requirement has been coordinated with the U.S. Chief of Diplomatic Mission or U.S. Embassy and that the host country will permit the operation.

(ii) Totally eliminate banking offices in a country. Such requests shall include a statement that the U.S. Chief of Diplomatic Mission has been informed and that appropriate arrangements to coordinate local termination announcements and procedures have been made with the U.S. Embassy.

(2) Monitor and coordinate military banking operations within the command area. Personnel assigned to security assistance positions shall not perform this function without the prior approval of the Director, Defense Security Assistance Agency (DSAA).

§ 230.5 General operating policies and procedures.

(a) *Limitation on Service.* Under singular circumstances, more than one banking institution may be permitted to operate on a DoD installation to ensure that personnel on the installation receive adequate financial services.

(1) If a particular installation demonstrably needs more services, the existing banking office shall first be given the opportunity to meet those needs.

(2) When conditions warrant consideration of a second banking institution on the installation, a request providing full details shall be forwarded through channels to the DoD Component headquarters concerned for evaluation and appropriate action. The Head of the DoD Component or designee may approve and forward such requests to the appropriate regulatory agency after coordination with the DASD(MS).

(b) *Uniformity of Service.* Financial services provided on DoD installations shall be as uniform as possible for all DoD personnel. Similarly, service charges and fee schedules shall, wherever possible, be uniform at overseas DoD installations.

(c) *Establishing Banking Offices.* (1) Banking offices on domestic DoD installations shall be established only with prior approval of the DoD Component concerned and the appropriate regulatory agency. Specific procedures are identified at Appendix 1. No commitment may be made to any banking institution regarding its proposal until a designation is made by the appropriate regulatory agency.

(2) Only banking institutions insured by the Federal Deposit Insurance Corporation (FDIC) or the Federal Savings and Loan Insurance Corporation (FSLIC) shall operate on domestic DoD installations.

(3) Except under singular circumstances, DoD Components may establish banking facilities only overseas and in those states that prohibit branch banking.

(4) Where domestic DoD installations are unable to obtain onbase banking services, the DoD Component concerned may contact the financial community about installing automated teller machines (ATMs).

(i) Proposals that offer shared-access ATMs shall receive preference.

(ii) The financial institution selected must secure regulatory agency approval, where necessary, before commencing ATM service.

(iii) Action taken in response to such proposals shall be exempt from the limitation in paragraph (a) of this section. The availability of ATM service shall not preclude the later establishment of a banking office if conditions on an installation should change.

(5) The provision of banking services by means other than duly chartered public sector banking offices or ATM service is subject to prior review and approval by the DASD(MS).

(6) In those cases where authorization will be required for the banking institution to act as a Treasury General Account domestic depositary, the banking institution shall satisfy the risk management standards established by the Treasury Department.

(d) *Operating Agreements.* An operating agreement, conforming to the guidelines set forth herein, shall be executed and maintained between each installation (community) commander and onbase banking institution. A sample format is contained in DoD 4000.19–R. At a minimum, each agreement shall include the following provisions:

(1) Services to be rendered and the conditions therefor. To the extent feasible, full financial services shall be provided; however, agreements entered into under this provision may not restrict the banking institution's right to adjust services and fees to maintain consistency with competing institutions or the banking institution's branch-wide service offerings and fee schedules.

(2) Banking institution agreement to:

(i) Comply with this part, DoD Directive 1000.11, DoD Component regulations that implement these issuances;

(ii) Indemnify and hold harmless the U.S. Government from (and against) any loss, expense, claim, or demand to which the Government may be subjected as a result of death, loss, destruction, or damage in conjunction with the use and occupancy of premises of the DoD Component caused in whole or in part by agents or employees of the banking institution; and

(iii) Accommodate, whenever possible, local command requests for lecturers and printed materials for consumer credit education programs. Banking office personnel invited to participate in such programs shall not use the occasion to promote the exclusive services of a particular financial institution.

(3) Agreement that neither the DoD Component concerned nor its representatives will be responsible or liable for the financial operation of the banking office or for any loss (including criminal losses), expense, or claim for damages arising from banking office operation.

(4) Installation (community) commander's agreement to provide support as specified at Appendix 1 of this part.

(e) *Liaison Officers.* In the interest of maintaining effective lines of communication, each commander of an installation with an onbase banking office shall appoint a bank liaison officer as defined at enclosure 2 of DoD Directive 1000.11.

(1) The bank liaison officer's name and duty telephone number shall be displayed in the lobby of each onbase banking office.

(2) The liaison officer shall maintain regular contact with the banking office manager to confer, help resolve customer complaints, and discuss quantitative and qualitative improvements in the services provided. However, neither liaison officers nor their superiors shall become involved in the internal operations of the banking office.

(3) No one on the board of directors or serving the banking institution in another official capacity may serve as bank or credit union liaison officer.

(f) *DoD Personnel as Directors of Banking Institutions.* (1) DoD personnel may not serve as directors of banking institutions that operate on installations where they are currently assigned.

(2) Members of DoD reserve components called to active duty while serving as directors of banking institutions with onbase banking offices need not resign those directorships because of their changed status.

(g) *Complaints Processing.* (1) *Discrimination.* Any installation commander who suspects or receives complaints of discrimination by the onbase banking institution shall try to resolve any such problem by negotiation. Failing this, in accordance with implementing DoD Component regulations, a written request for investigation shall be forwarded to the appropriate regulatory agency. The request must document the problem and command efforts toward resolution. Information copies of all related correspondence shall be sent through channels to the DoD Component concerned for transmittal to the DASD(MS).

(2) *Malpractice.* The installation commander shall report to the appropriate regulatory agency evidence suggesting malpractice by banking office personnel, in accordance with implementing DoD Component regulations.

(3) *Follow-up.* A DoD Component unsatisfied with action taken by the appropriate regulatory agency shall submit a full report with recommendations to the DASD(MS). The DASD(MS) shall pursue the matter with the appropriate regulatory agency and apprise the respective DoD Component of progress or resolution.

(h) *Logistic Support.* (1) *Categories of Domestic Banking Offices.* For the purpose of authorizing logistic support, banking offices are categorized either as self-sustaining or nonself-sustaining.

---

[1] All DoD Directives and/or Instructions may be obtained, if needed, from the Naval Publications and Forms Center, 5801 Tabor Avenue, Code 301, Philadelphia, PA 19120.

VOL 51
ISS 37
FE 25
1986
UMI

(i) A domestic banking office is considered to be self-sustaining until, based upon financial data provided by the banking institution, the DoD Component concerned determines it to be nonself-sustaining. Payment of rent for space and reimbursement for utilities furnished shall be required from self-sustaining banking offices. Nonself-sustaining banking offices may receive building space and utilities free of charge under procedures prescribed by the DoD Component concerned.

(ii) Normally, a domestic banking office shall have nonself-sustaining status for at least four consecutive calendar quarters before qualifying for logistic support. Conversely, a nonself-sustaining banking office would not be designated as self-sustaining until it has experienced four consecutive quarters of profitable operation.

(2) *Detailed Procedures.* Details of required and authorized support for onbase banking offices are provided by Appendix 1.

(i) *Termination of Banking Service.* (1) *Termination of Operations by the Banking Institution.* An onbase banking office planning to terminate its operations should notify the installation commander at least 90 days before the closing date. This notification should precede any public announcement of the planned closure. When appropriate, the commander shall attempt to negotiate an agreement permitting the banking office to continue operations until the installation has made other arrangements. Immediately upon notification of a closing, the commander shall advise the DoD Component headquarters concerned. If it is determined that continuation of banking services is justified, action to establish another banking office shall be taken in accordance with paragraph (c) of this section.

(2) *Termination for Cause.* If, after discussion with banking institution officials, the installation commander determines that the operating policies of the banking office are inconsistent with this Instruction, a recommendation for termination of logistic support and space arrangements may be made through DoD Component channels. Removal of a banking office from the installation shall be made only with approval by the DoD Component headquarters, after coordination with the DASD(MS) and the appropriate regulatory agency.

Appendix A—Procedures for Establishing, Supporting, and Terminating Onbase Banking Offices

A. Establishing Banking Offices

1. *General.* DoD Components shall review banking institution proposals and recommend selections in accordance with § 230.5(c). Banking institutions selected for domestic onbase operations must obtain authority from the appropriate regulatory agency before commencing such operation.

a. In the case of State-chartered institutions that are members of the Federal Reserve System, approval shall also be obtained from the Federal Reserve Bank for the district in which the proposed banking office is located.

b. In the case of State-chartered savings associations, approval shall be obtained from appropriate State regulatory agencies.

c. In the case of federally chartered savings associations, the determination shall be made by the Federal Home Loan Bank Board or its principal supervisory agent for the district in which the association does business.

2. *Domestic Banking Offices.* a. Each DoD Component shall develop internal instructions that govern the submission and justification of requests to establish banking facilities on respecitive installations. The following information shall be included in requests to the DoD Component headquarters for banking facility establishment:

(1) Justification for establishment of a banking facility as opposed to another type of banking office.

(2) Such other supporting data as deemed necessary by the DoD Component concerned.

b. Proposals received by installation commanders to establish an independent or branch bank or a savings association office shall be forwarded through channels to the DoD Component headquarters concerned, together with recommendations for acceptance or rejection.

c. The DoD Component headquarters concerned shall evaluate each proposal to establish such offices and, if acceptable, recommend designation by the appropriate regulatory agency.

(1) If there is no existing banking office on the installation and it is determined that one is needed, the DoD Component concerned shall solicit proposals from other nearby banking institutions before making a determination.

(2) If a banking office other than a banking facility already is operating on the DoD installation, the provisions of § 230.5(a)(1) apply.

(3) If the proposal offers to replace an existing banking facility with an independent or branch bank, the DoD Component concerned shall offer the banking institution currently operating the facility an opportunity to submit a proposal to convert the facility.

(4) With respect to a proposed independent or branch bank, preference shall be given to the banking institution that has operated the banking facility, provided that prior banking service has been satisfactory and that the institution's proposal is deemed adequate.

(5) Proposals to establish new banking facilities shall be forwarded to the DASD(MS) for determination in conjunction with the Fiscal Assistant Secretary of the Treasury.

3. *Conversions of Domestic Banking Facilities to Independent or Branch Banks.* DoD Components shall encourage banking institutions that operate banking facilities to convert them to independent or branch banks, if consistent with State law. Proposals from a banking institution to convert an existing banking facility to an independent or branch bank shall be forwarded to the DoD Component headquarters concerned for its approval after coordination with the DASD(MS) and Treasury Department.

4. *Domestic Automated Teller Machine (ATM) Service.* a. ATMs may be used to augment service provided by an onbase banking office.

(1) An onbase banking facility may be authorized to site ATMs on the installation if it conforms to the following requirements. Further approval by the Treasury Department is not required.

(2) An onbase branch or independent bank may site ATMs on the installation after obtaining the approval of the appropriate regulatory agency, if required to do so by the regulations of that agency, and by conforming to the following requirements.

b. A banking institution proposing to augment onbase banking office service by installing one or more ATMs shall:

(1) Coordinate the ATM proposal through the installation commander according to DoD Component regulations;

(2) Provide a statement that the cost of ATM installation and maintenance shall be borne by the banking institution alone or in conjunction with other financial institutions; and

(3) Provide for access through debit transaction cards, rather than restricting access to holders of a financial institution's credit cards.

c. Upon approval, appropriate leases shall be negotiated in accordance with this Instruction.

(1) No lease is needed to site an ATM within the existing banking office.

(2) When a banking office requests up to 100 square feet of additional floor space in an existing structure, and the banking office agrees to bear all expenses for modifying the structure, a lease providing for an annual rental fee of $1.00 shall be locally negotiated and approved. This lease provision also shall be offered if the banking office requests up to 250 square feet of land to construct, at its expense, a kiosk or other structure to house an ATM. In either case, the cost of any maintenance, utilities, and services provided by the installation shall be borne by the banking office.

(3) Leases pertaining to other situations shall be negotiated in accordance with section C., below.

5. *Overseas Banking Facilities Operated under Contract.* a. In implementing this Instruction, each DoD Component shall develop internal instructions governing the submission of requests justifying the need for banking facilities proposed for particular overseas installations. Upon favorable review by the DoD Component headquarters concerned, such requests shall be submitted to the DASD(MS) with a recommendation for inclusion in the appropriate contract, subject to the conditions set forth below.

b. As a general rule, banking facilities may be established when the installation (community) population meets the following criteria:

(1) *Full-Time Banking Facility.* Except in unusual circumstances, a total of at least 1,000 permanent party military personnel and DoD civilian employees is necessary to qualify for a full-time banking facility.

(2) *Part-Time Banking Facility.* Except in unusual circumstances, a total of at least 250 permanent party military personnel and DoD civilian employees is necessary to qualify for a part-time banking facility.

c. If the population at certain remote areas is not sufficient to qualify under the criteria for full- or part-time banking facilities, the installation (community) commander shall explore all other alternatives for acquiring limited banking services (such as check-cashing and accommodation exchange service by disbursing officers and their agents) before requesting establishment of a banking facility as an exception to these provisions.

d. The data used to justify establishment of overseas banking facilities shall include but not be limited to:

(1) The approximate number of DoD personnel at the installation and any other persons who may be authorized to use the banking facility.

(2) The distances between the installation and the nearest banking facility and credit union offices, the operators of those institutions, and the installations (military communities) at which they are located.

(3) The availability of official and public transportation between the installation and the nearest banking facility and credit union office.

(4) The approximate loss of duty time as a result of DoD personnel leaving the installation to obtain banking services.

(5) The number of DoD personnel in duty assignments that confine them to the installation or who cannot obtain transportation (such as hospital patients).

(6) Source(s) from which the military disbursing officer presently obtains operating and payroll cash, the frequency of these cash acquisitions, and the approximate dollar value obtained monthly.

(7) The name and location of the depositary now being used by the military disbursing officer to make official deposits for credit to the U.S. Treasury's General Account.

(8) The estimated savings to the military disbursing officer if a banking facility is established on the installation.

(9) A list of organizational and nonappropriated fund accounts, the name(s) and location(s) of the banking institution where presently deposited, and the average daily activity and balance of each account.

(10) A written description and photographs of drawings of the space proposed for banking facility use. The extent and approximate cost of required alterations, including the construction of counters and teller cages, shall be included.

(11) A statement detailing the requirements of the proposed banking facility for safes, a vault, or both; appropriate alarm systems; and camera surveillance equipment, where deemed necessary. The statement shall include the costs of such equipment and the manner in which it will be acquired.

(12) In countries without U.S.-operated banking facilities, a statement as required by § 230.4(e)(1).

e. Establishment of an overseas banking facility is predicated upon: (1) Designation of the facility contractor as a depositary and financial agent of the U.S. Government by the Fiscal Assistant Secretary of the Treasury;

(2) The availability of proposed banking contractors able and willing to bid for the operation of the facility, and the reasonableness of such proposals; and

(3) The availability of appropriated funds to underwrite such banking services.

6. *Other Overseas Banking Offices.* The banking and currency control laws of certain host countries do not permit U.S. banking institutions to operate banking facilities on DoD installations.

a. Commanders of installations (communities) in such countries where there is a demonstrated need for additional banking service and the population meets the above criterion shall forward requests for banking services, or unsolicited proposals from local banks, through command channels with supporting data as required in paragraph A.5.d., above.

b. If the DoD Component concerned concurs in the request, it shall be forwarded to the DASD(MS) for approval and coordination with the Fiscal Assistant Secretary of the Treasury for designation of the parent banking institution as a depositary and financial agent of the U.S. Government.

c. Banking offices in this category shall become operational only after Treasury designation of the parent banking institution and an indication of the institution's willingness and ability to provide collateral backing for any official and nonappropriated fund U.S. dollar deposits in a form acceptable to the DASD(MS) and the Fiscal Assistant Secretary of the Treasury.

B. Support of Onbase Banking Offices

1. *General.* DoD Component regulations that implement this Instruction shall provide for installation support to all onbase banking offices, including:

a. Military or civilian guards (the latter to be used within the installation only), military police, or other protective services to accompany shipments of money from the parent banking institution or other source when such monies are primarily for use by the military disbursing officer, on paydays and when required to avoid undue risks or insurance costs on the part of the onbase banking office. In this regard, overall security precautions normally present shall be considered.

b. Central locator service, under conditions identified at enclosure 3 of DoD Directive 1000.11 when requested by onbase banking offices. This service shall be provided at no cost in accordance with DoD Instruction 7230.7.

c. Debt processing assistance in accordance with DoD Directive 1344.9 as limited by the Privacy Act guidelines set forth in enclosure 3 DoD Directive 1000.11. If delinquent loans or dishonored checks are not recouped within 48 hours, banking institutions operating on DoD installations may bring them to the attention of the local commander, bank liaison officer or other designee, for assistance in effecting restitution of the amount due, if not otherwise prohibited by law.

d. Clearance procedures for military personnel departing their installations which provide the onbase banking office with adequate notice of its customers' impending departure. Clearance involves reporting a change of address, reaffirming allotments or notes payable and arranging for counseling, if appropriate. Clearance shall not be denied to facilitate the collection of debts or the resolution of disputes between the financial institution and its departing customers. Where administratively feasible, similar clearance procedures shall be used for departing DoD civilian personnel.

e. Prohibition of traveler's check and money order sales by organizations other than the onbase banking office, post office, and credit union during times when the banking office is open for business.

2. *Domestic Nonself-Sustaining Banking Offices.* When a DoD Component determines that a banking office has nonself-sustaining status, it may furnish logistic support, as provided herein, without charge.

a. Through no-cost permits or licenses, a nonself-sustaining banking office may be provided space on a DoD installation at one or more locations for up to 5 years, as prescribed in DoD Directive 4165.6. The cumulative total of space authorized for one or more locations is subject to the limitations contained in DoD 4270.1–M.

b. All space assigned by the GSA, whether leased or in Federal office buildings, is reimbursable to the GSA at the standard level user charge, under Pub. L. 92–313. Consequently, the GSA shall charge the benefiting DoD Component for any GSA space assigned for banking office operations.

c. In those exceptional cases when a nonself-sustaining banking office is authorized to construct its own building or use its funds to expend, modify, or renovate Government-owned space, a no-cost permit or license may be provided for a period not to exceed 25 years. Duration of the permit or license shall be commensurate with the extent of the improvements as determined by the DoD Component concerned. It shall be effective until the agreed date of expiration or until the banking office is determined to be self-sustaining, whichever occurs first. The provisions of section C., below, apply in the latter case.

d. The term "logistic support" shall include:

(1) Customer and work areas, in accordance with DoD 4270.1–M. It is important that the banking office be housed in a building accessible to most DoD personnel on the installation, in a location permitting maximum security.

(2) Steel bars, grillwork, security doors, a vault or safe (or both), burglar alarm system, other security features normally used by banking institutions, construction of counters and teller cages, and other necessary modifications and alterations to existing buildings delimited in DoD Directive 4270.24.

(3) Utilities, custodial and janitorial services, and intrastation telephone service. The banking office shall pay costs for long-distance toll calls, however.

(4) Air-conditioning, which is considered a normal utility for banking offices located on installations qualifying for air-conditioning

VOL
51
ISS
37
FE
25
1986
UMI

under DoD Component regulations. Banking space is classified as administrative space on DoD installations.

(5) When available from local stock, lease of the following at nominal cost, i.e., $1.00 per year, under authority of 10 U.S.C. 2667: typewriters, adding machines, other office equipment, and office furniture.

e. All maintenance, repair, rehabilitation, alterations, or construction for onbase banking offices shall comply with DoD Instruction 4165.64.

f. Upon determination that a banking office has become self-sustaining, its no-cost lease or permit shall be canceled and a lease negotiated in accordance with section C., below.

3. *Additional Support in Overseas Areas.* a. *Banking Facilities Operated Under Contract.* In addition to the logistic support identified above, the following shall be made available to banking facilities operating under DoD contract at overseas installations:

(1) U.S. Military Postal Service under DoD Directive 4525.6. Mail must bear necessary postage.

(2) AUTOVON and AUTODIN as approved on a case-by-case basis.

(3) Certificates of nonavailability, if required by the designated property administrator, when items of office equipment or furniture requested by the banking facility are unavailable for loan on memorandum receipt.

(4) Vehicle registration and purchase of fuel from Government-owned facilities for bank-operated vehicles if not in conflict with host country agreements. Vehicle registrations shall be subject to normal fees.

(5) Public quarters under DoD Instruction 4165.44 to key banking facility personnel unable to find suitable, reasonably priced housing in the vicinity of the DoD installation. Rent charged shall be in accordance with DoD Instruction 4165.42.

(6) Travel of a U.S.-based banking institution officials to their overseas onbase offices as set forth in DoD Directive 4000.6. Invitational travel orders that authorize travel at no expense to the U.S. Government may be issued by the local commander for official onsite visits.

(7) Other support as required under the terms and conditions established during annual contract negotiations and confirmed in respective contracts. Suggestions for change may be forwarded through military channels to the DASD(MS).

b. *Other Overseas Banking Offices.* (1) Logistic support shall be negotiated with the parent banking institution and the resulting provisions incorporated into written operating agreements.

(2) Logistic support should not exceed that provided to banking offices in the United States. Whenever possible, parent banking institutions shall reimburse the DoD Component concerned for logistic support.

C. Leases of Government Real Property

1. *Government-Owned Buildings.* The lease of an existing structure to house a self-sustaining banking office shall be at appraised fair market rental value under the following terms and considerations:

a. The lease term shall not exceed 5 years, subject to renewal by mutual agreement, with the head of the DoD Component concerned reserving the right to terminate the lease under conditions specified in paragraph C.2.a., below. The banking institution shall reimburse the DoD Component concerned for GSA-assigned space at the standard level user charge.

b. When the banking institution uses its own funds to modify or renovate government building space, a lease may be negotiated for a period not to exceed 25 years. Duration of the lease shall be commensurate with the extent of the improvements as determined by the DoD Component concerned.

c. The lessee shall perform any required interior alteration and maintenance and shall pay for utilities and custodial, janitorial, and other services furnished.

2. *Government-Owned Land.* a. Except as provided in paragraph B.2.c., above, land required for approved building construction at bank expense shall be made available at appraised fair market rental by real estate lease, not to exceed 25 years, in accordance with DoD Directive 4165.6. Once determined, the charges shall be applicable for the term of the lease.

b. When a banking institution participates in the construction of a complex, such as an installation shopping mall, it shall be provided a lease at fair market rental not to exceed 25 years. The lease shall cover only underlying land for the specific space to be occupied by the banking office.

c. When, under the terms of a lease, title to improvements passes to the Government, arrangements shall normally be made:

(1) By no-cost permit or license for the continued occupancy of those improvements by a nonself-sustaining banking office if it continues to be nonself-sustaining. When the square footage involved exceeds that authorized in DoD 4270.1–M the banking office shall be given first choice to continue occupying the excess space under a lease that provides for fair market rental for the land underlying that excess space; or

(2) By lease for continued occupancy of those improvements by a self-sustaining banking office at fair market rental value only for the land associated therewith. The lessee shall continue to maintain the premises and pay the cost of utilities and services furnished, in accordance with DoD Directive 4000.6.

3. *Other Lease Considerations.* a. The term of a lease may exceed 5 years only when a Military Department Secretary, or designee, determines that such an extended term will promote the national defense or be in the public interest, per 10 U.S.C. 2667(b)(1).

b. Leases shall include the provision that, in the event of national emergency or the following events, at the option of the Government, structures and other improvements erected thereon shall be conveyed to the Government without reimbursement or removed and the land restored to its original condition:

(1) Installation inactivation, closing, or other disposal action;

or

(2) Termination of the banking institution's lease under § 230.5(i).

c. Leases executed before this part takes effect shall not be altered unless a lessee specifically requests a renegotiation under these provisions. No lease contract may be negotiated or renegotiated, nor may any rights thereunder be waived or surrendered, without compensation to the Government, except as provided in § 230.5(h).

D. Construction of Bank Buildings

Banking institution proposals to finance construction of buildings on domestic DoD installations must be processed in accordance with the DoD Instruction 7700.18. In support of each construction proposal, the banking institution shall provide written assurance that:

1. Management understands its potential loss of the building in the event of installation closure or other delimiting condition identified in paragraph C.3.b., above;

2. The proposed building will serve only the needs of the banking office and will not be used to house other activities; and

3. Management accepts financial responsibility for and will reimburse the U.S. Government for all costs of construction and maintenance, utilities, and other services furnished. Rates shall be established per DoD Directive 4000.6 and confirmed by a written agreement between the DoD installation and the banking institution.

E. Banking Office Termination

1. *Domestic Banking Facilities.* a. The installation commander shall notify the DoD Component headquarters concerned when a banking facility has been placed in an inactive status and when personnel reductions at the DoD installation have reduced banking facility operations to below a justifiable level. The DoD Component shall advise the DASD (MS) and the Fiscal Assistant Secretary of the Treasury so that the banking institution's authority to operate the banking facility may be terminated.

b. In general, the parent banking institution may close a banking facility after sending written notification to the Treasury Department and the installation commander not less than 90 days before the closing date. The Treasury Department will then terminate the banking institution's authority to operate the banking facility, and the DoD Component concerned shall determine the feasibility of requesting another banking institution to operate at the installation.

2. *Other Domestic Banking Offices.* a. Requests for termination for cause shall be processed in accordance with § 230.5(i)(2).

b. Banking offices other than banking facilities may be terminated by the parent banking institution provided written notice is furnished to the installation commander not less than 90 days before the closing date.

3. *Overseas Banking Facilities Operated Under Contract.* a. The installation (community) commander shall, through DoD Component channels, notify the DASD(MS) when personnel reductions or other situations at the DoD installation (military community) have reduced banking activity to below a level justifying continued operation.

b. Such notifications shall indicate whether a part-time facility should be established and the number of hours and days per week that such an operation is justified.

4. *Other Overseas Banking Offices.* Terminations shall be effected under termination clauses in respective operating agreements. Notice of intent to terminate, including the closing date, shall be forwarded by the overseas component commander per DoD Component implementing instructions. The DoD Component shall so notify the DASD(MS) and Fiscal Assistant Secretary of the Treasury so that the banking institution's authority as a depositary and financial agent of the U.S. Government may be revoked.

F. Notification of Banking Offices

Each DoD Component shall ensure that every banking institution with an office at its installations receives a copy of the document that implements this Instruction and DoD Directive 1000.11.

Appendix B—Operations of Onbase Banking Offices

A. Services Rendered

1. *To Individuals and Nonappropriated Fund Instrumentalities.* a. Normally, banking offices shall provide the same services at DoD installations as available locally. Service charges or fees levied for such services may not exceed those customary for the banking institution that operates the banking office, with the following exceptions:

(1) Treasury checks shall be cashed for all DoD personnel and there will be no charge to the banking office's accountholders.

(2) A reasonable charge may be made for cashing personal checks; however, checks drawn on the banking institution operating the banking office shall be cashed without charge provided sufficient collected funds are on deposit to cover such checks.

b. Counseling service shall be made available without charge to individual accountholders. Such services shall include helping customers to budget and solve financial problems. Military members in junior enlisted grades or newly married couples who apply for loans shall receive special attention and counseling.

c. In accordance with accepted banking practice, policies on loans to individuals are expected to be as liberal as possible while remaining consistent with the overall interests of the banking institution and its stockholders.

(1) Onbase banking offices must strive to provide the best possible service to all customers. Offices that evidence a policy of discrimination in their loan services are in violation of this Instruction. In resolving complaints of discrimination, the installation commander shall follow procedures specified in § 230.5(g)(1).

(2) Onbase banking offices shall conform to the Standards of Fairness principles as set forth in DoD Directive 1344.9 before executing loan or credit agreements. Should an onbase banking office refer a prospective borrower to an offbase office of the same institution, it shall advise the latter office that the DoD requires compliance with the Standards of Fairness before executing the loan or credit agreement.

2. *To Disbursing Officers.* a. Banking offices are expected to provide payroll cash to military disbursing offices, upon request. Local operating funds may be expended if the banking office requests reimbursement for costs incurred.

b. When so authorized, banking offices shall accept deposits for credit to the Treasury's General Account.

B. Staffing

1. Onbase banking offices are expected to be adequately staffed commensurate with banking industry standards for similar numbers of accountholders and financial services rendered. Staffing at overseas banking facilities operated under contract shall be maintained within negotiated ceilings.

2. Remote service locations at the same installation may be staffed with one person alone, provided that there is a direct courier or message service to the main onbase banking office.

3. All staffing shall fully comply with the spirit and intent of the DoD equal employment opportunity policies and programs, in accordance with DoD Directive 1100.15.

4. Neither active duty military personnel nor DoD civilian employees may be detailed to duty or employment with an onbase banking office. However, off-duty DoD personnel may be employed by a banking office if approved by the installation commander following a determination that such employment will not interfere with the full performance of the individual's official duties.

C. Hours of Operation

1. *General.* Onbase banking offices may conduct operations during normal duty hours provided they do not disrupt the performance of official duties. Banking offices should set operating hours that meet the needs of all concerned. ATMs may be used to provide expanded service and operating hours.

2. *Overseas Banking Facilities Operated Under Contract.* Although respective contracts limit the number of operating hours per week, installation (community) commanders and banking facility managers are encouraged to agree on the specific days and hours of operation that best meet local needs.

a. Operating days negotiated locally may include Saturdays and operating hours may include evening hours when necessary to complement or parallel other retail services available to DoD personnel, provided the contractor agrees to provide such service at no additional cost to the Government.

b. When cost implications are involved, the installation (community) commander shall forward his request for expanded or modified days or hours of operation, with a justification therefor, through military channels for consideration by the DASD(MS).

D. Deposit Insurance

Domestic onbase banking offices must provide insurance coverage by the FDIC (for commercial banks and certain savings banks) or FSLIC (for certain savings banks and all other savings associations as defined in DoD Directive 1000.11. A banking office not maintaining such insurance shall be suspended from onbase operation.

E. Allotments of Pay

DoD personnel may use their allotment of pay privileges as authorized by DoD Directives 7330.1 and 1418.4 to establish sound credit and savings practices through onbase banking offices.

1. The banking institution shall credit customer accounts not later than the value date of the allotment check or electronic funds transfer.

2. Under no circumstances shall the initiation of an allotment of pay become a prerequisite for loan approval or disbursement to the banking office's customer. Allotments voluntarily consigned to a banking office shall continue at the option of the allotter.

F. Advertising

1. Advertising of onbase banking services shall be in harmony with applicable policies continued in DoD Directive 1344.7.

2. Advertising in official Armed Forces newspapers and periodicals (DoD Instruction 5120.4 and DoD Directive 5120.43) is prohibited with the exception of insert advertising in the *Stars and Stripes* overseas.

3. DoD Instruction 5120.20 precludes use of the Armed Forces Radio and Television Service to promote a specific financial institution.

4. Onbase banking offices may use the unofficial section of the installation daily bulletin, provided space is available, to inform DoD personnel of financial services and announce seminars, consumer information programs, and other matters of broad general interest. Announcements of free financial counseling services are encouraged. Such media may not be used for competitive or comparative advertising of, for example, specific interest rates on savings or loans.

5. Onbase banking offices may use onbase information bulletin boards for announcements of a broad general nature that complement the installation's financial counseling and thrift promotion programs. Onbase banking offices may use installation message center services to distribute, with moderation, announcements for display on informational bulletin boards, provided this does not overburden the distribution system.

6. Installations, to include military exchange outlets or concessionaires, shall not permit the distribution of competitive literature from other banking institutions at locations served by onbase banking offices. This does not preclude a banking institution from using commercial advertising or mailings to serve its customers.

G. Supplemental Conditions for Overseas Operation

1. *General.* Overseas banking facilities shall operate under terms and conditions established at the time of annual contract negotiations and confirmed in respective contracts or contracting officer determinations.

2. *Authorized Customers.* Respective banking contracts specify personnel authorized to receive service. Additionally, overseas major commanders may approve banking services for other individuals and

VOL 51 ISS 37 FE 25 1986 UMI

organizations that qualify for individual logistic support under the regulations of the DoD Component concerned, provided that use of banking services is not precluded by status of forces agreement, other intergovernmental agreement, or local law.

3. *Services Rendered.* Services to be rendered and related charges shall be specified in respective contracts. Suggestions for expansion or modification of authorized services, fees, or charges may be forwarded through military channels to the DASD(MS). Proposals for any new service must be coordinated with the appropriate Unified Commander and U.S. Chief of Diplomatic Mission or U.S. Embassy to make certain that the proposal does not conflict with status of forces agreements or host-country law.

4. *Acceptance of Services Rendered.* DoD Component regulations implementing this Instruction shall require each commander of an installation (military community) with a banking facility, or designee, to:

a. Review monthly income, expense, and activity statements provided by full-time banking facilities.

b. Report to the banking facility manager within 7 calendar days of discovery, and deficiency in the delivery of contractual banking services. If the deficiency is not remedied within 30 calendar days, the commander shall report the matter through military channels to the DASD(MS).

5. *Other Operating Conditions.* a. Both the banking facility contractor and DoD disbursing offices shall ensure that cash management practices minimize the cash required to conduct business.

b. Banking facility provision of foreign currencies shall be in accordance with DoD Directive 7360.11.

c. When military payment certificates are prescribed for the area in which the overseas banking facility is operating, they shall be used in accordance with DoD Instruction 7360.5 and DoD Component regulations which implement that Instruction.

d. Overseas major commanders shall cooperate with banking facility contractors in planning for the provision or termination of banking services in the event of hostilities or other emergencies.

6. *Other Overseas Banking Offices.* a. Operating agreements executed under § 230.5(d) shall specify authorized customers, services rendered and related charges, and conditions of operation. To the extent feasible, services and charges shall be negotiated to parallel those provided by banking facilities operated under the DoD banking contracts.

b. Before such agreements are executed, they shall be coordinated with the Unified Commander, or designee and the DoD Component concerned. Upon approval, copies shall be provided to the DASD(MS).

Linda M. Lawson,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

32 CFR Part 231

[DoD Directive 1000.11]

Financial Institutions on DoD Installations

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Final rule.

SUMMARY: This part updates Department of Defense (DoD) policies and procedures concerning banking institutions, credit unions, and savings associations that may operate on DoD domestic and overseas installations. The revision provides specific guidance to the Heads of DoD Components on the establishment, operation and termination of these onbase institutions. In so doing, it contemplates a more active role by the Assistant Secretary of Defense (Comptroller) in coordinating related DoD Component actions. In order to assure consistent treatment, some rules formerly applicable only to credit unions or to banks and savings associations have been applied, wherever possible, to the other types of institutions. The rule now specifies that failure of a financial institution to maintain an adequate rating under the Treasury Department risk management program is grounds for termination of onbase operations. The rule streamlines approval procedures for installation of automated teller machines and clarifies procedures for onbase office construction. Policies governing permissible service charges and fees were made restrictive.

EFFECTIVE DATE: February 3, 1986.

ADDRESS: Directorate for Banking, Office of the Deputy Assistant Secretary of Defense (Management Systems), The Pentagon, Room 1A658, Washington, DC 20301-1100.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Adolphi, telephone (202)-697-8281.

SUPPLEMENTARY INFORMATION: On April 27, 1983, 48 FR 19130 amended Title 32, CFR, Part 231, which contains the existing Office of the Secretary of Defense (OSD) policies for the operation of onbase institutions. Accompanying procedures were contained at Part 230. On September 9, 1985, FR 36819 proposed revision of these policies. Certain provisions, formerly applicable only to credit unions were, wherever possible, made applicable, to banking institutions and savings associations. Comments were received from the DoD Components, Treasury Department, U.S. Small Business Administration, trade associations representing affected institutions, and two financial institutions operating at several DoD installations. All comments were fully considered and a majority were accepted in this final rule. Numerous editorial improvements also were made. Policies contained herein also were reviewed for compliance with the Regulatory Flexibility Act, Pub. L. 96-354. It was determined that this final rule will not have a significant economic impact on a substantial number of small entities since its provisions apply mainly to the DoD Components and do not alter existing relationships with financial institutions chartered by Federal and State regulatory agencies to operate on DoD installations.

List of Subjects in 32 CFR Part 231

Banks, Military banking facilities, Savings and Loan Associations.

Accordingly, 32 CFR Part 231 is revised to read as follows:

PART 231—FINANCIAL INSTITUTIONS ON DOD INSTALLATIONS

Sec.
231.1 Purpose.
231.2 Applicability.
231.3 Definitions.
231.4 Objectives.
231.5 Policies.
231.6 Responsibilities.
Appendix—Guidelines for Application of the Privacy Act to Financial Institutions on DoD Installations.

Authority: 10 U.S.C. 136.

§ 231.1 Purpose.

This part replaces DoD Directive 1000.10[1] (Dec. 23, 81) and DoD Directive 1000.11. It consolidates and clarifies policies for financial institutions that serve DoD personnel on DoD installations worldwide. Associated procedures are contained in DoD Instruction 1000.10 (Feb. 3, 86) and DoD Instruction 1000.12.

§ 231.2 Applicability.

This part applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Organization of the Joint Chiefs of Staff (OJCS), the Unified and Specified Commands, the Defense Agencies, and Washington Headquarters Services (WHS) (hereafter referred to collectively as "DoD Components").

§ 231.3 Definitions.

Automated Teller Machine (ATM). An electronic machine that dispenses cash, accepts deposits, and transfers funds among a customer's various accounts. Equipment generally is activated by a plastic debit card in combination with pushbuttons and a personal identification number (PIN). Also known as a customer-bank communication terminal. Shared access to ATMs refers to the customer's ability to use the ATM of more than one cooperating institution.

Bank/Credit Union Liaison Officer. A commissioned officer or DoD civilian employee of equivalent grade appointed by an installation (military community) commander to work with officials of the servicing financial institution and its clients. A noncommissioned officer may be appointed if he or she is the senior financial management official at the installation.

Banking Facility. A banking office located on a DoD installation and operated by a banking institution that the Treasury Department has specifically authorized, under its designation as a "depository and financial agent of the U.S. Government," to provide certain banking services at the installation. Such offices may be either self-sustaining or nonself-sustaining. Also known as a military (or community) banking facility.

Banking Institution. The organization that is chartered to operate a banking office on a DoD installation. For purposes of this part and DoD Instructions 1000.10 and 1000.12 the term also includes savings associations as defined herein.

Banking Office. A banking facility, branch bank, or independent bank operated by a banking institution on a DoD installation. Also includes savings associations and their branches operated on a DoD installation.

Branch Bank. A separate unit chartered to operate at an on-base location geographically remote from its parent banking institution.

Credit Union. A cooperative nonprofit association, incorporated under the Federal Credit Union Act, 12 U.S.C. 1751 et seq., or similar state statute, for the purposes of encouraging thrift among its members and creating a source of credit at a fair and reasonable rate of interest.

Credit Union Branch. A subsidiary office of an existing full-service credit union.

Credit Union Facility. A facility employing a communications system with the parent credit union to conduct business at remote locations where a full-service credit union or credit union branch is impractical. Credit union facilities need not provide case transaction services, but must disburse loans and shares via check or draft and provide competent financial counseling during normal working hours.

Defense Credit Union. A state or federally chartered credit union with a field of membership composed primarily of DoD personnel.

Discrimination. Any differential treatment in provision of services, including loan services, by a financial institution to DoD personnel and their dependents on the basis of race, color, religion, national origin, sex, marital status, age, rank, or grade. However, if uniformly applied, the amount of credit extended may be directly based upon an applicant's total income.

DoD Personnel. All military personnel; civil service employees; other civilian employees, including special Government employees of all offices, agencies, and departments performing functions on a DoD installation (including non-appropriated fund instrumentalities); and their dependents. On domestic DoD installations, retired U.S. military personnel and their dependents are included.

Domestic DoD Installation. A military installation located within a state of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

Fair Market Rental. A reasonable charge for onbase land, buildings, or building space (i.e., property). Rental is determined by a Government appraisal, based on comparable properties in the local civilian economy. However, the appraiser shall consider that onbase property may not always be comparable to similar property in the local commercial geographic area: for example, limitation of usage and access to the financial institution by persons other than those on the installation, proximity to the community center or installation business district, the Government's right to terminate the lease or take title to improvements constructed at the financial institution's expense, and the limited consumer environment of a DoD installation.

Federal Credit Union. A credit union established and operated under authority granted by the Federal Credit Union Act, 12 U.S.C. 1751 et seq., and chartered, supervised, and periodically examined by the National Credit Union Administration.

Field of Membership. The group of people entitled to credit union membership because of a common bond of occupation or association; or employment or residence within a well-defined neighborhood, community, or rural district. The field of membership is defined in the credit union's charter by the Federal or State regulatory agency.

Financial Institution. This term encompasses any banking institution, credit union, and subordinate office or facility, each as separately defined herein.

Financial Services. Those services commonly associated with financial institutions in the United States, such as checking, share and savings accounts; funds transfers; sales of official checks, money orders, and travelers checks; loan services; safe deposit boxes; trust services; sale and redemption of U.S. Savings Bonds; and acceptance of utility payments.

Full-Service Credit Union. A credit union that provides normal counter transaction services and is staffed with a loan officer, a person authorized to sign checks, and a qualified financial counselor.

Full-Time Banking Facility. A banking facility that operates at least 5 days a week.

Independent Bank. A bank specifically chartered to operate on a DoD installation, whose directors and officers usually come from the local business and professional community. Such operations are thus differentiated from countywide or statewide branch systems consisting of a head office and one or more geographically separate branch offices.

Malpractice. Any unreasonable lack of skill or fidelity in fiduciary duties, or the intentional violation of an applicable law or regulation, or both, that governs the operations of the financial institution. A violation shall be considered intentional if the responsible officials know that an action or inaction violated a law or regulation.

National Bank. An association approved and chartered by the Comptroller of the Currency to operate a banking business.

Onbase. Refers to physical presence on a domestic or overseas DoD installation.

Operating Agreement. A mutual agreement between the DoD installation commander and onbase financial institution regarding their relationships.

Overseas DoD Installation. A military installation (or community) located outside the states of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

Part-Time Banking Facility. A banking facility that operates fewer than 5 days a week, exclusive of additional payday service. When only payday service is provided, the banking facility may be termed a "payday service facility."

Regulatory Agency. Includes the Office of the Comptroller of the Currency; the Federal Deposit Insurance Corporation; the Federal Home Loan

1986
UMI

Bank Board; the several Federal Reserve Banks and the Board of Governors of the Federal Reserve System; the National Credit Union Administration; the various state agencies and commissions that oversee financial institutions; and, for banking facilities, the Fiscal Assistant Secretary of the Treasury.

Savings Association. A state or federally chartered mutual or stock savings institution, to include savings and loan associations, building and loan associations, homestead associations, and savings banks.

Share Draft. A negotiable or nonnegotiable draft or other order prepared by a credit union member and used to withdraw shares from a share draft account, normally through the commercial banking system.

State Bank. An institution, organized and chartered under the laws of a state of the United States, to operate a banking business within that state.

State Credit Union. An institution, organized and chartered under the laws of a state of the United States, that operates under the same general principles as a Federal credit union and is supervised and examined by a state regulatory agency or commission.

§ 231.4 Objectives.

The objectives of this part are to ensure that:

(a) Arrangements for the provision of services by financial institutions are consistent among the DoD Components.

(b) Financial institutions operating on DoD installations provide, and are provided, support consistent with the policies stated herein.

§ 231.5 Policies.

(a) Duly chartered financial institutions may be authorized to provide services, where demonstrated and justified needs exist, to facilitate the administration of public and quasi-public monies and enhance the morale and welfare of DoD personnel.

(b) Financial institutions shall be established on DoD installations only after approval by the appropriate regulatory agency and the DoD Component concerned.

(1) Independent or branch banks, full-service credit unions, and savings associations are the preferred sources of onbase service at domestic installations.

(2) Banking facilities shall be established on DoD installations only when a demonstrated and justified need cannot be met through other means. Normally, banking facilities shall be used only at overseas locations and in states that prohibit branch banking. In times of mobilization, it may become necessary to designate additional banking facilities as an emergency measure. Upon recommendation by a DoD Component, banking facilities are designated by the Treasury Department under authority contained in 12 U.S.C. 265.

(3) The extension of banking facility and credit union services overseas is encouraged, consistent with the policies stated herein and with pertinent status of forces agreements, bilateral arrangements, and local laws.

(4) Retail banking operations shall not be performed by DoD activities. DoD Components shall rely on commercially available sources in accordance with DoD Directive 4100.15.

(c) Financial institutions authorized to locate on DoD installations shall be provided logistic support as set forth in DoD Instruction 1000.10 and DoD Instruction 1000.12.

(d) Military disbursing offices, nonappropriated fund instrumentalities, and other DoD installation activities shall use onbase financial institutions to the maximum extent feasible and consistent with sound management practice.

(e) The termination of operations by an onbase financial institution shall be initiated by a DoD Component only under one of the following conditions:

(1) The mission of the installation has changed, or is scheduled to be changed, thereby eliminating or substantially reducing the requirement for financial services.

(2) Active military operations preclude continuation of onbase financial services.

(3) The performance of the financial institution in providing services is not satisfactory according to standards ordinarily associated with the financial services industry or is inconsistent with the procedures prescribed in DoD Instruction 1000.10 and DoD Instruction 1000.12. Termination actions begun on the basis of inadequate performance shall be substantiated by sufficient evidence. Such actions shall be coordinated with the appropriate regulatory agency and the Assistant Secretary of Defense (Comptroller) before being carried out.

(4) Where the financial institution has also been designated as a Treasury General Account (TGA) domestic depository, its authorization as a TGA depositary may be withdrawn by the Treasury Department if the financial institution's rating, from a Treasury Department approved rating service, is "D" or lower. In those cases where TGA authorization is withdrawn, the DoD Component may initiate termination of operations under provisions of paragraph (e)(3) of this section.

(f) DoD personnel who tender uncollectible checks, overdraw their accounts or fail to meet their financial obligations in a proper and timely manner damage their credit reputation and affect the public image of all DoD personnel. Furthermore, losses sustained by financial institutions on DoD installations as a result of these actions increase operating costs and may reduce the institutions' viability. Such added operating costs must be borne by other customers and, in some cases, may increase the cost to the Government of providing onbase financial services. Military financial counselors or legal advisers shall recommend workable repayment plans that avoid further endangering credit ratings and careers of affected personnel. Counselors shall ensure that such personnel are aware of the stigma associated with bankruptcy and shall recommend its use only as a last resort, when no other alternative will alleviate the situation.

§ 231.6 Responsibilities.

(a) The *Assistant Secretary of Defense (Comptroller)* (ASD(C)) shall:

(1) Develop and monitor policies and procedures governing establishment, operation, and termination of financial institutions on DoD installations.

(2) Monitor industry trends, conduct studies and surveys, and facilitate appropriate dialogues on banking and credit union arrangements and cost-benefit relationships, coordinating as necessary with DoD Components, financial institutions, and trade associations.

(3) Maintain liaison, as appropriate, with financial institution regulatory agencies at Federal and State levels.

(4) Maintain liaison with financial institution trade associations, leagues, and councils in order to interpret DoD policies toward respective memberships and to aid in resolving mutual concerns affecting provision of financial services.

(5) Coordinate with the Assistant Secretary of Defense (Force Management and Personnel) on all aspects of morale and welfare and Assistant Secretary of Defense (Acquisition and Logistics) on all aspects of logistic support for onbase financial institutions.

(6) Take final action on requests for exceptions to this Directive.

(b) *The Assistant Secretary of Defense (Acquisition and Logistics)* (ASD(A&L)) shall develop and monitor policies and procedures governing logistic support furnished to financial institutions on DoD installations, including the use of DoD real property and equipment.

(c) The *Assistant Secretary of Defense (Force Management and Personnel)* (ASD(FM&P)) shall advise the ASD(C) of all aspects of onbase financial institution services that affect the morale and welfare of DoD personnel.

(d) The *Heads of DoD Components* shall:

(1) Take action on requests to establish or terminate financial institution operations on respective installations subject to the provisions of DoD Instructions 1000.10 and 1000.12.

(2) Supervise and encourage the use of financial institutions on DoD installations as a means to:

(i) Facilitate convenient, effective management of the appropriated, nonappropriated, and private funds of onbase activities.

(ii) Assist DoD personnel in managing their personal finances by participating in direct deposit programs and regular savings plans. Use of onbase financial institutions shall be on a voluntary basis and should not be urged in preference to, or to the exclusion of, other financial institutions.

(3) Recognize the right of military personnel and civilian employees to organize and join credit unions formed under duly constituted authority, and encourage the application and expansion of the principles of the credit union movement throughout the DoD establishment.

(4) Encourage and assist duly chartered financial institutions to provide complete financial services on DoD installations where there is a demonstrated need for such services.

(5) Establish liaison, as appropriate, with Federal and State regulatory agencies and financial institution trade associations, leagues, and councils.

(6) Provide debt processing assistance to onbase financial institutions in accordance with the Privacy Act guidelines set forth in Appendix of this part.

APPENDIX—GUIDELINES FOR APPLICATION OF THE PRIVACY ACT TO FINANCIAL INSTITUTIONS IN DOD INSTALLATIONS

A. The following guidelines govern application of DoD Directive 5400.11 to those financial institutions that operate under this part.

1. Financial institutions and their branches and facilities operating on DoD military installations do not fall within the purview of 12 U.S.C. 1751 et seq.

a. These financial institutions do not fit the definition of "agency" to which the Privacy Act applies: ". . . any executive department, Military Department, Government corporation, Government-controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or an independent regulatory agency" (5 U.S.C. 552(e) and 552a(a)(1)).

b. Nor are they "government contractors" within the meaning of section 552a(m), as they do not operate a system of records on behalf of an agency ". . . to accomplish an agency function." According to the Office of Management and Budget Privacy Act Guidelines, the provision relating to Government contractors applies only to systems of records ". . . actually taking the place of a Federal system which, but for the contract, would have been performed by an agency and covered by the Privacy Act." Clearly, the subject institutions do not meet these criteria.

c. Since the Act does not apply to them, these financial institutions are not required to comply with the provision of Section 552(e)(3) in obtaining and making use of personal information in their relationships with personnel authorized to use such institutions. Thus, these institutions are not required to inform individuals from whom information is requested of the authority for its solicitation, the principal purpose for which it is intended to be used, the routine uses that may be made of it, or the effects of not providing the information. There also is no requirement to post information of this nature within onbase banking and credit union offices.

2. The financial institutions concerned hold the same position and relationship to their accountholders and members and to the Government as they did before enactment. Within their usual business relationships, they still are responsible for safeguarding the information provided by their accountholders or members and for obtaining only such information as is reasonable and necessary to conduct business. This includes credit information and proper indentification, which may include social security number, as a precondition for the cashing of checks.

3. Financial institutions may incorporate the following conditions of disclosure of personal identification in all contracts, including loan agreements, account signature cards, certificates of deposit agreements, and any other agreements signed by their accountholders or members:

I hereby authorize the Department of Defence and its various Departments and Commands to verify my social security number or other identifier and disclose my home address to authorized (name of financial institution) officials so that they may contact me in connection with my business with (name of financial institution). All information furnished will be used solely in connection with my financial relationship with (name of financial institution).

When the financial institution presents such signed authorizations, the Military Commands or installations shall provide the appropriate information.

4. Even though the agreement described in subsection A.3., has not been obtained, the Department of Defense may provide these financial institutions with salary information and, when pertinent, the length or type of civilian or military appointment, consistent with the Privacy Act and Freedom of Information Act, DoD Directives 5400.11 and 5400.7. Some examples of personal information pertaining to DoD personnel that can normally be released without creating and unwarranted invasion of personal privacy are name, rank, date of rank, salary, present and past duty assignments, future assignments that have been finalized, office phone number, source of commission, and promotion sequence number.

5. When DoD personnel with financial obligations are reassigned and fail to inform the financial institution of their whereabouts, they should be located by contacting the individual's last known commander or supervisor at the official position or duty station within that particular DoD Component. That commander or supervisor shall either furnish the individual's new official duty location address to the financial institution, or shall forward, through official channels, any correspondence received pertaining thereto to the individual's new commander or supervisor for appropriate assistance and response. Correspondence addressed to the individual concerned at his or her last official place of business or duty station shall be forwarded as provided by postal regulations to the new location, but the individual may choose not to respond. However, once an individual's affiliation with the Department of Defense is terminated through separation or retirement, the locator assistance the Department may render in the disclosure of home address is severely curtailed unless the public interest dictates disclosure of the last known home address. The Department of Defense may, at its discretion, forward correspondence to the individual's last known home address. The individual may choose not to respond and the Department may not act as an intermediary for private matters concerning former DoD personnel who are no longer affiliated with it.

B. Questions concerning this guidance should be forwarded through channels to the Deputy Assistant Secretary of Defense (Management Systems) (DASD(MS)), Office of the Assistant Secretary of Defense (Comptroller) (OASD(C)), The Pentagon, Washington, DC 20301.

Linda M. Lawson,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

32 CFR Part 231a

[DoD Instruction 1000.10]

Procedures Governing Credit Unions on DoD Installations

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Final rule.

SUMMARY: This part codifies, for the first time, provisions concerning the operation of credit unions on DoD installations. On September 9, 1985, 50 FR 36622 proposed the rule for comment. The rule replaces former DoD Directive

BEST COPY AVAILABLE

VOL 51 ISS 37 FE 25 1986 UMI

1000.10 and provides specific guidance to the Head of DoD Components on the establishment, operation and termination of these onbase institutions. In so doing, it contemplates a more active role by the Assistant Secretary of Defense (Comptroller) in coordinating related DoD Component actions. In order to assure consistent treatment, some rules formerly applicable only to credit unions or to banks and savings associations were applied, wherever possible, to the other types of institutions. The rule streamlines approval procedures for installation of automated teller machines and clarifies use of the ninety-five percent membership criterion with respect to the provision of logistic and other support to onbase credit unions.

EFFECTIVE DATE: February 3, 1986.

ADDRESS: Directorate for Banking, Office of the Deputy Assistant Secretary of Defense (Management Systems), OASD(C), The Pentagon, Room 1A658, Washington, DC 20301–1100.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald L. Adolphi, (202) 697–8281.

SUPPLEMENTARY INFORMATION: Title 32, Code of Federal Regulations, contains the existing Office of the Secretary of Defense (OSD) procedures (Part 230) and policies (Part 231) for the operation of onbase banking institutions. On September 9, 1985, 50 FR 36622 proposed procedures covering onbase credit unions. Comments were received from the DoD Components, National Credit Union Administration, U.S. Small Business Administration, trade associations representing affected institutions, and several financial institutions operating on DoD installations. All comments were fully considered and a majority were accepted in this final rule. Data requirements to justify establishment of domestic onbase financial institutions were reduced. A new provision permits, subject to local negotiation and nominal consideration of $1.00 per annum, the lease of 100 square feet or less additional government building space or less than 250 square feet of land for bank or credit union installation of automated teller machines. Onbase financial institutions are asked to give installation commanders advance notice before public disclosure of planned termination. Use of the 95 percent membership criterion is clarified. Certification is required initially upon formation of the credit union, at 3-year intervals and upon renewal of each no-cost lease or license. Rent-free lease duration is for the stated term or upon failure to meet the 95 percent criterion, whichever occurs first. A proposed goal for all onbase credit unions to acquire Federal share insurance was eliminated from the final rule. Numerous editorial improvements also were made. Procedures contained herein also were reviewed for compliance with the Regulatory Flexibility Act, Pub. L. 96–354. It was determined that this final rule will not have a significant economic impact on a substantial number of small entities since its provisions apply mainly to the DoD Components and do not alter existing relationships with financial institutions chartered by Federal and State regulatory agencies to operate on DoD installations.

List of Subjects in 32 CFR Part 231a

Credit Unions, Defense Credit Unions.

Accordingly, 32 CFR is amended to add Part 231a to read as follows:

PART 231a—PROCEDURES GOVERNING CREDIT UNIONS ON DoD INSTALLATIONS

Sec.
231a.1 Purpose.
231a.2 Applicability and scope.
231a.3 Definitions.
231a.4 Responsibilities.
231a.5 General operating policies and procedures.
Appendix-Operations of Defense Credit Unions.

Authority: 10 U.S.C. 136.

§ 231a.1 Purpose.

This part provides procedural guidance to supplement DoD Directive 1000.11 [1] concerning relations with credit unions serving on DoD installations.

§ 231a.2 Applicability and scope.

(a) This part applies to the Office of the Secretary of Defense (OSD), the Military Departments, the Organization of the Joint Chiefs of Staff (OJCS), and Unified and Specified Commands, the Defense Agencies, and Washington Headquarters Services (WHS) (hereafter referred to collectively as "DoD Components").

(b) Its provisions also pertain to all credit unions that operate on DoD installations.

§ 231a.3 Definitions.

Terms used in this part are defined in 32 CFR Part 231.

§ 231a.4 Responsibilities.

(a) The *Assistant Secretary of Defense (Comptroller)* (ASD(C)) or designee, the Deputy Assistant Secretary of Defense (Management Systems) (DASD(MS)), shall:

(1) Coordinate the DoD credit union program, consulting on aspects that pertain to the morale and welfare of DoD personnel with the Assistant Secretary of Defense (Force Management and Personnel).

(2) Maintain liaison, as necessary, with the National Credit Union Administration (NCUA) and equivalent State regulatory agencies.

(3) Coordinate on DoD Component actions that propose a credit union's removal for cause from an installation before final decision and referral to the appropriate regulatory agency.

(4) Take final action on requests for exception to the provisions of this Part.

(b) The *Assistant Secretary of Defense (Acquisition and Logistics)* (ASD (A&L)) shall carry out responsibilities outlined in subsection F.2. of DoD Directive 1000.11.

(c) The *Assistant Secretary of Defense (Force Management and Personnel)* (ASD (FM&P)) shall carry out responsibilities outlined in subsection F.3. of DoD Directive 1000.11.

(d) The *Secretaries of the Military Departments and Director of Defense Agencies* shall:

(1) Supervise the use of credit unions on respective DoD installations within the guidance contained herein and in DoD Directive 1000.11.

(2) Assist respective onbase credit unions in developing and expanding necessary services for DoD personnel, consistent with the provisions stated herein.

(3) Encourage DoD personnel to serve on credit union boards and committees on a voluntary basis, without compensation, when neither conflict of duty nor conflict of interest is involved, as stated in DoD Directive 5500.7. Such personnel may be allowed to attend credit union conferences and meetings in accordance with DoD Directive 1327.5, Civilian Personnel Manual (CPM) Supplement 990–2, and CompGen Decision B–212457.

(4) Ensure that the recommendations of the Unified or Specified Command concerned are considered before processing requests for overseas credit union service or related actions emanating from overseas component commands.

(5) Refer matters requiring policy decisions or proposed changes to the provisions of this Part or DoD Directive 1000.11 to the DASD(MS).

(e) The *Commanders of Unified and Specified Commands*, or designees, shall:

(1) Ensure the appropriate coordination of requests to:

(i) Establish credit union service in countries not presently served. Such requests shall include a statement that the requirement has been coordinated with the U.S. Chief of Diplomatic Mission or U.S. Embassy and that the host country will permit the operation.

(ii) Totally eliminate credit union service in a country. Such requests shall include a statement that the U.S. Chief of Diplomatic Mission has been informed and that appropriate arrangements to coordinate local termination announcements and procedures have been made with the U.S. Embassy.

(2) Monitor and coordinate credit union operations within the command area. Personnel assigned to security assistance positions shall not serve in this capacity without the prior approval of the Director, Defense Security Assistance Agency (DSAA).

§ 231a.5 General operating policies and procedures.

(a) *General.* Given their unique role in promoting morale and welfare, credit unions operating on DoD installations shall be recognized and assisted by DoD Components at all echelons. These credit unions shall provide services to DoD personnel of all ranks and grades within their respective fields of membership.

(b) *Limitation on Service.* (1) Only one credit union shall establish a branch or facility on a DoD installation, and its field of membership normally shall include all assigned DoD personnel. However, on installations where more than one credit union already exists, each is entitled to the benefits defined in this part.

(2) As described in section G., Appendix commanders of installations served by onbase credit unions shall ensure that installation activities do not disseminate literature from competing credit unions.

(c) *Establishing Domestic Credit Union Service.* (1) A demonstrated need for credit union services may be addressed by establishing a new full-service credit union or by opening a branch office or facility of an existing credit union under the common bond principle.

(2) Each DoD Component shall develop internal instructions, consistent with the following, that govern the submission and justification of requests to establish credit unions on respective installations.

(i) DoD personnel seeking to establish a new full-service credit union or a branch or facility of an existing credit union shall submit a proposal to the installation commander. Such proposals shall be forwarded through channels to the DoD Component headquarters concerned, together with recommendations for acceptance or rejection.

(ii) The DoD Component shall notify credit unions that operate on DoD installations of the need for service; review the specific proposals of interested credit unions; coordinate with its field commands as appropriate; and recommend for approval the designation of a credit union to the appropriate regulatory agency, providing an information copy to the DASD(MS). No specific NCUA approval is required for a federal credit union to open a branch office.

(iii) No commitment may be made to a credit union regarding its proposal until the appropriate regulatory agency has announced a selection.

(d) *Establishing Overseas Credit Union Service.* (1) When the installation (community) commander determines that credit union services are needed, the DoD Component headquarters may request an existing Defense credit union to establish a branch or facility. However, it must be recognized that the basic decision concerning such extensions of service rests with the credit union.

(2) In addition to the requirements stated in paragraph (c)(2) of this section, installation commanders shall provide the following information in support of requests to their DoD Component headquarters for overseas credit union service:

(i) In countries not presently served, a statement concurred in by the Unified Commander that the requirement has been coordinated with the U.S. Chief of Diplomatic Mission or U.S. Embassy and that the host country will permit the operation, with any conditions imposed by the host-country identified.

(ii) The name and location of the nearest credit union branch or facility.

(iii) The distance between the installation and the nearest credit union branch or facility and the availability of any official or public transportation.

(iv) The number of DoD personnel in duty assignments that confine them to the installation, or who cannot obtain transportation (such as hospital patients).

(3) The DoD Component shall notify Federal credit unions that operate on DoD installations of this need; review the specific proposals of interested credit unions; coordinate with its field commands as appropriate; and, after coordination with the DASD(MS), recommend designation of a particular credit union to the NCUA for approval.

(4) Recommendations to the NCUA shall include identification of the primary installation from which the proposed branch would operate and the geographical territory in which any additional branches, facilities, or mobile outlets would operate.

(5) No commitment may be made to a credit union regarding its proposal until the NCUA announces its selection. The DoD Component shall then notify the DASD(MS) of NCUA approval and arrange for operations to begin.

(e) *Operating Agreements.* An operating agreement, conforming to the guidelines set forth herein, shall be executed and maintained between each installation (community) commander and the onbase credit union.

(1) Each agreement shall be confined to basic relationships and mutual support activities and may not involve internal operations of the credit union. The installation commander shall agree to provide support as specified in this Instruction. A sample format is contained in DoD 4000.19–R.

(2) Each credit union operating on a DoD installation shall agree to:

(i) Comply with this part, DoD Directive 1000.11 and DoD Component regulations that implement these issuances;

(ii) Keep the installation commander advised of credit union operations;

(iii) Give the installation commander a copy of its monthly financial report and other local credit union publications;

(iv) Invite command representatives to attend its annual meetings and other appropriate functions;

(v) Indemnify and hold harmless the U.S. Government from (and against) any loss, expense, claim, or demand to which the Government may be subjected as a result of death, loss, destruction, or damage in conjunction with the use and occupancy of premises of the DoD Component in any way caused by agents or employees of the credit union;

(vi) Maintain physical security of cash and negotiable items in a manner consistent with the requirements of the credit union's fidelity insurer. A copy of these requirements shall be provided to the installation commander upon request.

(vii) Accommodate, whenever possible, local command requests for lecturers and printed materials for consumer credit education programs. Credit union personnel invited to participate in such programs shall not use the occasion to promote the

FE
25
1986
UMI

exclusive services of a particular financial institution;

(viii) Provide that neither the DoD Component concerned nor its representatives shall be responsible for the financial operation of a credit union or for any expense, loss (including criminal losses), or claim for damages arising from credit union operations; and

(ix) Operate in accordance with the guidelines at Appendix and comply with other provisions of this part, with DoD Directive 1000.11, and with their DoD Component implementing regulations.

(f) *Liaison Officers.* To maintain effective lines of communication, each commander of an installation with an onbase credit union shall appoint a credit union liaison officer as defined at enclosure 2 of DoD Directive 1000.11.

(1) The credit union liaison officer's name and duty telephone number shall be displayed in the lobby of each onbase credit union location.

(2) The liaison officer shall maintain regular contact with the credit union manager to confer, help resolve member complaints, and discuss quantitative and qualitative improvements in the services provided. However, neither liaison officers nor their superiors shall become involved in the internal operations of the credit union.

(3) No one on the board of directors serving the credit union in another official capacity may serve as the credit union or bank liaison officer.

(g) *Complaints Processing.*—(1) *Discrimination.* Any installation commander who suspects or receives complaints of discrimination by the onbase credit union shall try to resolve any such problem by negotiation. The installation commander should consider using the credit union's supervisory committee in resolving the complaint. Failing resolution, and in accordance with DoD Component implementing regulations, a written request for investigation shall be forwarded to the appropriate regulatory agency. The request must document the problem and local command efforts toward resolution. Information copies of all related correspondence shall be sent through channels to the DoD Component concerned for transmittal to the DASD(MS).

(2) *Malpractice.* The installation commander shall report to the appropriate regulatory agency any evidence suggesting malpractice by credit union personnel, in accordance with DoD Component regulations.

(3) *Follow-up.* A DoD Component unsatisfied with action taken by the appropriate regulatory agency shall submit a full report with recommendations to the DASD(MS). The DASD(MS) shall pursue the matter with the appropriate regulatory agency and apprise the respective DoD Component of progress or resolution.

(h) *Logistic Support.*—

(1) *Membership Criterion.* (i) In accordance with Section 124 of the Federal Credit Union Act, the provision of no-cost office space and other real property is limited to onbase credit unions with at least 95 percent of their membership composed of current or former military and Federal civilian personnel and their families. This percentage criterion applies to the total credit union membership, not just to members who use the onbase office.

(ii) At 3-year intervals and upon renewal of each no-cost lease or license, the credit union shall provide a written certification, prepared on credit union letterhead and signed either by its president or general manager, that the credit union continues to meet the 95 percent criterion. A certification also is required whenever there is a merger, takeover or significant change in a field of membership. This certification shall serve as justification and documentation for the continued allocation of free Government space, including space renovated or constructed with credit union funds.

(2) *Criteria for Use of Space in Government-Owned Buildings.* (i) A credit union may be provided space on a DoD installation at one or more locations by no-cost permits or licenses for periods not to exceed 5 years, as prescribed in DoD Directive 4165.6. The cumulative total of space authorized at one or more locations is subject to the limitations contained in DoD 4270.1–M.

(ii) A credit union that fails to meet the 95 percent criterion shall be charged fair market rent for space provided. No credit union whose field of membership excludes any DoD personnel assigned on the installation shall receive free Government space. This latter limitation is waived in cases when an installation is served by more than one credit union.

(iii) All space assigned by the GSA, whether leased or in Federal office buildings, is reimbusable to the GSA at the standard level user charge under Pub. L. 92–313. Consequently, the GSA shall charge the benefiting DoD Component for any space assigned for credit union operations. Such space is then subject to the provisions of paragraph (h)(2) (i) and (ii) of this section.

(iv) When a credit union uses its own funds to expand, modify, or renovate Government-owned space, a no-cost permit or license may be provided for a period not to exceed 25 years. Duration of the permit or license shall be commensurate with the extent of the improvements as determined by the DoD Component concerned. It shall be effective until the agreed date of expiration or until the credit union ceases to satisfy the 95 percent criterion. In this latter case, the no-cost permit shall be cancelled in favor of a lease immediately negotiated at fair market value under the provisions of paragraph (h)(2)(ii) of this section.

(3) *Utilities, Base Services, and Equipment.* (i) When available, janitorial services, utilities (such as air-conditioning, heat, and light), fixtures, and maintenance shall be furnished at no cost to a credit union occupying free space in a Government building. The credit union shall pay for other services, such as telephone lines, long-distance calls and space alterations. Should a credit union fail to meet the 95 percent membership criterion, any logistic support furnished shall be on a reimbursable basis.

(ii) When available from local stock, typewriters, adding machines, other office equipment and office furniture may be leased to an onbase credit union at nominal cost, i.e., $1.00 per year, under authority of 10 U.S.C. 2667.

(iii) Central locator service shall be provided under conditions identified at enclosure 3 of DoD Directive 1000.11 when requested by Defense credit unions. This service shall be provided at no cost, in accordance with DoD instruction 7230.7.

(iv) DoD Components shall provide debt processing assistance to Defense credit unions, in accordance with DoD Directive 1344.9, as limited by the Privacy Act Guidelines set forth in enclosure 3 of DoD Directive 1000.11. Unless otherwise prohibited, Defense credit unions seeking restitution for delinquent loans or dishonored checks may request the assistance of local commanders, credit union liaison officers, or other officials.

(v) DoD Components shall prescribe clearance procedures for departing military personnel which provide the onbase credit union with adequate notice of such membership changes. Clearance involves reporting a change of address, reaffirming allotments or notes payable and arranging for counseling, if appropriate. Clearance shall not be denied to facilitate the collection of debts or the resolution of disputes between the credit union and its departing members. Where administratively feasible, similar clearance procedures shall be used for departing DoD civilian employees.

(4) *Additional Support in Overseas Areas.* In addition to the logistic support identified above, the following may be made available to Defense credit unions operating at overseas installations:

(i) Military postal service may be authorized, in accordance with DoD Directive 4525.6.

(ii) AUTOVON and AUTODIN may be provided on a case-by-case reimbursable basis.

(iii) Travel of U.S.-based credit union officials to their overseas offices shall be as set forth in DoD Directive 4000.6. Invitational travel orders that authorize travel at no expense to the U.S. Government may be issued by the local commander for official onsite visits.

(i) *Construction of Credit Union Building.* (1) Credit union proposals to finance construction of buildings on domestic DoD installations at their own expense must be processed in accordance with DoD Instruction 7700.18. In support of each construction proposal, the credit union shall provide written assurance that:

(i) Management understands its potential loss of the building in the event of installation closure or other delimiting condition specified in paragraph (j)(1) of this section.

(ii) The proposed building will serve only the needs of the credit union and will not be used to house other activities; and

(iii) Management accepts financial responsibility and will reimburse the U.S. Government for all costs of construction and any maintenance, utilities and other services furnished. Rates shall be established per DoD Directive 4000.6 and confirmed by a written agreement between the DoD installation and the credit union; and

(2) Credit unions that finance building construction at their own expense do not have to meet the space criteria contained in DoD 4270.1–M.

(j) *Leases of Government Land.* (1) Except as provided in paragraph (h)(iv) of this section land required for approved building construction at credit union expense shall be made available at appraised fair market rental by real estate lease, not to exceed 25 years, in accordance with DoD Directive 4165.6. Once determined, the charges shall be applicable for the term of the lease. Leases shall include the provision that, in the event of national emergency or any other event cited in paragraph (l)(3) of this section, and at the option of the Government, structures and other improvements erected thereon shall be conveyed to the Government without reimbursement or removed and the land restored to its original condition.

(2) When a credit union participates in the construction of a complex, such as an installation shopping mall, it shall be provided a lease at fair market rental not to exceed 25 years. The lease shall cover only underlying land for the specific space to be occupied by the credit union.

(3) When, under the terms of a lease, title to improvements passes to the Government, arrangements shall be made by:

(i) No-cost permit or license for the continued occupancy of those improvements by the credit union if it continues to meet the 95 percent membership criterion cited in paragraph (h)(1). When the square footage exceeds that authorized in DoD 4270.1–M, the credit union shall be given first choice to continue occupying the excess space under a lease that provides for fair market rental for the land underlying that space and associated maintenance of the premises and reimbursement for utilities and services furnished in accordance with DoD Directive 4000.6; or

(ii) Lease for continued occupancy of those improvements should the credit union no longer qualify under the 95 percent rule. The lease shall be at fair market rental value only for the land associated therewith. The lessee shall continue to maintain the premises and pay for utilities and services furnished in accordance with DoD Directive 4000.6.

(k) *Automated Teller Machine (ATM) Service.* (1) ATMs may be used to augment service provided by an onbase credit union.

(2) An onbase credit union that proposes to agument its service by installing one or more ATMs shall:

(i) Coordinate the ATM proposal through the installation commander under provisions of applicable DoD Component regulations;

(ii) Provide a statement that the cost of ATM installation and maintenance shall be borne by the credit union alone or in conjunction with other financial institutions; and

(iii) Provide for access through debit transaction cards, rather than restricting access to holders of a financial institution's credit cards.

(3) Before service begins, regulatory agency approval, as necessary, must be obtained, and leases must be negotiated in accordance with this Instruction.

(i) No lease is needed to site an ATM within an existing credit union office.

(ii) When a credit union requests up to 100 square feet of additional floor space in an existing structure and the credit union agrees to bear all expenses for modifying the structure, a lease providing for an annual rental fee of $1.00 shall be locally negotiated and approved. This lease provision also shall be offered if a credit union requests up to 250 square feet of land to construct, at its expense, a kiosk or other structure to house an ATM. In either case, the charge for any maintenance, utilities and services shall be consistent with that applied to the onbase credit union office.

(iii) Leases pertaining to other situations shall be negotiated in accordance with paragraph (h)(2) and paragraph (i) of this section.

(l) *Termination of Credit Union Service.*—(1) *Termination of Operations by the Credit Union.* An onbase credit union planning to terminate its operations should notify the installation commander at least 90 days before the closing date. This notification should precede public announcement of the planned closure. When appropriate, the commander shall attempt to negotiate an agreement permitting the credit union to continue operation until the installation has made other arrangements. Immediately upon notification of a closing, the commander shall advise the DoD Component headquarters concerned. If it is determined that continuation of credit union services is justified, action to establish another credit union shall comply with paragraph (c) or (d) of this section

(2) *Termination for Cause.* If, after discussion with credit union officials, the installation commander determines that the operating policies of the credit union are inconsistent with this Instruction, a recommendation for termination of logistic support and space arrangements may be made through DoD Component channels. A credit union shall be removed from the installation only with approval by the DoD Component headquarters, after coordination with the DASD(MS) and the appropriate regulatory agency.

(3) *Termination in Interest of National Defense.* At the option of the Government, leases may be terminated in the event of national emergency or as a result of installation inactivation, closing or other disposal action.

APPENDIX—OPERATIONS OF DEFENSE CREDIT UNION

A. Staffing

1. Full service shall be provided by onbase credit unions that are staffed by:

a. A loan officer authorized to act for the credit committee;

b. An individual authorized to sign checks; and

c. A qualified financial counselor available to serve members during operating hours.

2. Exceptions to A.1., above, may be approved by the DoD Component concerned in the case of newly organized credit unions.

VOL 51 ISS 37 FE 25 1986 UMI

3. When an onbase credit union can support only minimum staffing, one of the other positions required in A.1., above, may be subsumed under the counselor duties.

4. Remote service locations at the same installation may be staffed with one person alone, provided that a direct courier or message service links them to the credit union's onbase main office.

5. All staffing shall fully comply with the spirit and intent of DoD equal employment opportunity policies and programs, in accordance with DoD Directive 1100.15.

6. Neither active duty military personnel nor DoD civilian employees may be detailed to duty or employment with an onbase credit union. However, off-duty DoD personnel may be employed by a credit union if approved by the installation commander following a determination that such employment will not interfere with the full performance of the individual's official duties.

B. Counseling

Members of Defense credit unions shall have access to free counseling service. Members (particularly youthful or inexperienced personnel and young married families) shall receive help in budgeting and solving financial problems. Military members in junior enlisted grades who apply for loans shall receive special attention.

C. Lending

1. In accordance with accepted credit union practice, lending policies are expected to be as liberal as possible while remaining consistent with the best interests of the overall credit union membership. Credit unions must strive to provide the best possible service to all members.

2. Defense credit unions evidencing a policy of discrimination in their loan services are in violation of this Instruction. In resolving complaints of discrimination, the installation commander shall follow procedures specified in § 231a.5(g)(1).

3. Defense credit unions shall conform to the Standards of Fairness principles set forth in DoD Directive 1344.9 before executing loan or credit agreements. Should an onbase credit union branch refer a prospective borrower to an offbase office of the same credit union, it shall advise the latter office that the Department of Defense requires compliance with the Standards of Fairness.

D. Hours of Operation

Onbase credit unions may conduct operations during normal duty hours provided they do not disrupt the performance of official duties. Credit unions should set operating hours that meet the needs of all concerned. ATMs may be used to provide expended service and operating hours.

E. Share Insurance

Credit unions serving on DoD installations must maintain adequate share insurance. Any share insurance that is at least equal to that required by the NCUA for Federal credit unions may be obtained through the NCUA, a State-sponsored insurance program, or a private insurance plan to satisfy this requirement. A credit union not maintaining share insurance shall be suspended from onbase operations.

F. Allotments of Pay

DoD personnel may use their allotment of pay privileges as authorized by DoD Directives 7330.1 and 1418.4 to establish sound credit and savings practices through Defense credit unions.

1. The credit union shall credit member accounts not later than the value date of allotment check or electronic funds transfer.

2. Under no circumstances shall the initiation of an allotment of pay become a prerequisite for loan approval or disbursement to the credit union member. Allotments voluntarily consigned to a credit union shall continue at the option of the member.

G. Advertising

1. Advertising of onbase credit union services shall be in accordance with policies set forth in DoD Directive 1344.7.

2. Advertising in official Armed Forces newspapers and periodicals (DoD Instruction 5120.4 and DoD Directive 5120.43) is prohibited, with the exception of inserts in the *Stars and Stripes* overseas.

3. DoD Instruction 5120.20 precludes use of the Armed Forces Radio and Television Service to promote a specific credit union.

4. Onbase credit unions may use the unofficial section of the installation daily bulletins, provided space is available, to inform DoD personnel of financial services and announce membership meetings, seminars, consumer information programs, and other matters of broad general interest. Announcement of free financial counseling services are encouraged. Such media may not be used for competitive or comparative advertising of, for example, specific interest rates on savings of loans.

5. Defense credit unions may use onbase information bulletin boards for announcements of membership meetings and promotional materials generally complementing the installation's financial counseling and thrift promotion programs. Onbase credit unions may, with moderation, use installation message center services to distribute announcements for display on informational bulletin boards, provided this does not overburden the distribution system.

6. Installation, to include military exchange outlets or concessionaires, shall not permit the distribution of competitive literature from other credit unions at locations served by onbase credit unions. This does not preclude a credit union from using a direct mail approach to serve its field of membership or commercial advertising in another credit union's area.

H. Overseas Operations

1. An overseas credit union branch or facility shall be limited to onbase operations. It shall confine its field of membership to individuals or organizations eligible by law or regulation to receive services and benefits from the installation, not precluded from receiving these services by intergovernmental agreement or host-country law.

2. Credit unions serving overseas shall have a prescribed territorial franchise. However, any credit union may continue to serve its members stationed overseas by direct mail.

3. Any proposal for a new service must be coordinated with the appropriate Unified Commander and U.S. Chief of Diplomatic Mission or U.S. Embassy to ensure that it does not conflict with status of force agreements or host-country law.

4. Credit unions may purchase *foreign* currency from the servicing military banking facility (MBF) at the bulk rate when used for internal vendor of payroll payments. The rate of exchange for sales to individuals must be no more favorable than that available from the MBF, in accordance with DoD Directive 7360.11.

5. Overseas credit unions operating in military payment certificate areas shall comply with DoD Instruction 7360.5 and any DoD Component regulations implementing that instruction.

6. In accordance with NCUA rules and regulations, no credit union loans may be made for the purpose of purchasing real property or purchasing or erecting any type of residence in any country outside the United States, its territories and possessions, or the Commonwealth of Puerto Rico.

7. The recommendations and direction of the NCUA through its rules, regulations, procedural forms, reports, and manuals directly apply to all Defense credit union branches and facilities operating overseas.

8. Funds shall be deposited and invested in accordance with the authority applicable to federal credit unions. Overseas Defense credit union branches and facilities shall deposit funds in accordance with instructions issued by the NCUA, giving full consideration to using the servicing MBFs.

9. Operation of overseas Defense credit union branches and facilities shall be reviewed by the NCUA during examination of the parent credit union or as the NCUA determines necessary.

I. Notification of Credit Unions

Each DoD Component shall ensure that every credit union with an office at its installations receives a copy of the document that implements this part and DoD Directive 1000.11.

Linda M. Lawson,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

40 CFR Parts 261 and 271

[SWH-FRL-2973-4]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) today is amending its regulations under the Resource Conservation and Recovery Act (RCRA) by listing as hazardous four spent solvents and still bottoms from the recovery of these solvents. Wastes that result from the use of these individual solvents as well as wastes that result from the use of solvent mixtures containing 10 percent or more of any of the listed solvents (before use) will be hazardous wastes. Also, the Agency is amending the list of commercial chemical products which are hazardous wastes when discarded by adding one of these solvents, and amending the hazardous property of another of these solvents to include toxicity. Finally, two of these solvents are being added to the list of hazardous constituents in Appendix VIII of Part 261. The effect of this regulation is that all of these wastes will be subject to regulation as hazardous wastes under 40 CFR Parts 262–266, and Parts 270, 271, and 124.

DATES: *Effective Date:* This regulation becomes effective on August 25, 1986.

Compliance Dates. *Notification*—The Agency has decided not to require persons who generate, transport, treat, store, or dispose of these hazardous wastes to notify the Agency within 90 days of promulgation that they are managing these wastes. Three of the solvents listed in today's notice (benzene, 2-ethoxyethanol, and 2-nitropropane) exhibit the characteristic of ignitability. Furthermore, two of these solvents (benzene and 1,1,2-trichloroethane) previously have been included on the list of commercial chemical products which are hazardous wastes, if and when they are discarded, due to their toxicity. The Agency views the notification requirement to be unnecessary in this case, since we believe that most, it not all, persons who manage these wastes have already notified EPA and received an EPA identification number. In the event that any person who generates, transports, treats, stores, or disposes of these wastes has not previously notified and received an identification number, he must get an identification number pursuant to 40 CFR 262.12 before he can generate, transport, treat, store, or dispose of these wastes.

Interim Status—All existing hazardous waste management facilities (as defined in 40 CFR 270.2) which treat, store, or dispose of hazardous wastes covered by today's rule, and which quality to manage these wastes under interim status under section 3005(e) of RCRA, must file with EPA an amended Part A permit application by August 25, 1986, and meet the criteria in 40 CFR 270.72. Under the Hazardous and Solid Waste Amendments of 1984, a facility also is eligible for interim status if it was in existence on the effective date of any statutory or regulatory change under RCRA that requires it to obtain a section 3005 permit. See RCRA (amended) section 3005(e)(1)(A)(ii). Facilities which have qualified for interim status under section 3005(e)(1)(A)(ii) will not be allowed to manage the wastes covered by today's rule after August 25, 1986, unless they have an EPA identification number and they submit an amended Part A permit application with EPA by August 25, 1986.

If the facility has received a permit pursuant to section 3005, however, it will not be allowed to treat, store, or dispose of the wastes covered by today's rule until it submits an amended permit application pursuant to 40 CFR 124.5, and the permit has been modified pursuant to 40 CFR 270.41 to allow it to treat, store or dispose of these wastes.

ADDRESSES: The offical public docket for this rulemaking is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline at (800) 424–9346 or at (202) 382–3000. For technical information contact Mr. Robert Scarberry, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382–4761.

SUPPLEMENTARY INFORMATION:

I. Background

On July 30, 1985, EPA proposed to amend the regulations for hazardous waste management under RCRA by adding spent 1,1,2-trichloroethane and the still bottoms from the recovery of this spent solvent to the generic F002 listing, and benzene, 2-ethoxyethanol, and 2-nitropropane, as well as still bottoms from the recovery of these spent solvents to the generic F005 listing (See 50 FR 30908–30914). The hazardous constituents in these wastes are the solvents themselves, which are known to cause either carcinogenic, teratogenic, adverse reproductive, or other chronic toxic effects in laboratory animals. Also, benzene has been determined to cause leukemia in humans.

These solvents typically are present at concentrations ranging from 1 to 20 percent in the still bottoms and from 50 to 95 percent in the spent solvents. They are moderately to highly mobile in air and water, expected to be persistent in ground water, and can reach environmental receptors in harmful concentrations if these wastes are mismanaged. In addition, these solvents tend to degrade liners and, thus, may leach from land disposal facilities into ground or surface water, or form solutions of other hazardous substances, thereby rendering those compounds more mobile in the environment. Furthermore, three of these solvents (benzene, 2-ethoxyethanol, and 2-nitropropane) are also ignitable in their pure form and it is expected that the corresponding spent solvent will also exhibit the characteristic of ignitability, as these wastes typically contain significant concentrations of the solvent. On the other hand, the still bottoms from the recovery of the subject solvents typically contain a much lower concentration of these toxic solvents, and in general, are not expected to be ignitable. (See preamble to proposal (50 CFR 30908–30914) and listing background document [1] for a more detailed explanation on the basis for listing these wastes.)

EPA has evaluated these wastes against the criteria for listing hazardous wastes provided in 40 CFR 261.11(a)(3), and has determined that these wastes are hazardous because they are capable of posing a substantial present or potential threat to human health and the environment when improperly treated, stored, transported, disposed of, or otherwise managed. Also, it should be noted that the Hazardous and Solid Waste Amendments of 1984 require the Agency to determine whether or not to list wastes from a number of industrial sectors and operations, including the use of solvents (see section 3001(e)(2)). This regulation responds to Congress' request to consider listing additional solvents.

---

[1] The listing background document is available in the public docket at the address cited above.

VOL
51
ISS
37
FE
25
1986
UMI

Today's listings cover the subject solvents when they are used for their solvent properties, that is, to solubilize (dissolve) or mobilize other constituents. For example, solvents used as a cleaning or degreasing agent, a medium for chemical reactions, an extraction agent, a diluent, and similar uses are covered under this listing when spent. These solvents are considered "spent" and are regulated under Subtitle C of RCRA when they no longer can be used because they have become contaminated with physical or chemical impurities and are no longer fit for use without being regenerated, reclaimed, or otherwise re-processed. This listing does not cover manufacturing process wastes that are contaminated with solvents when the solvents are used as reactants or ingredients in the formulation of commercial chemical products. Such wastes, if determined to be hazardous, would be listed individually.

These spent solvent listings apply to wastes that result from use of the subject solvents in the following situations:

- As pure or technical grade solvents;
- In mixtures or blends that contain, in total, 10 percent (or more) of one (or more) of the subject solvents (before use); and
- In mixtures or blends that contain, in total, 10 percent (or more) of one (or more) of the subject solvents and any of the solvents currently listed in F001, F002, or F005 (before use).

The Agency received no comments on our proposal to list spent benzene, 2-ethoxyethanol, and 1,1,2-trichloroethane; therefore, we are making the listing of these spent solvents final in today's notice. The Agency did receive several comments on the waste listing proposed for 2-nitropropane from the principal manufacturer of this solvent. These comments did not refute our decision to list this solvent; however, a number of minor changes were made in the supporting documentation. Consequently, this notice makes final the regulation as proposed on July 30, 1985, and outlines EPA's response to the comments received on that proposal.

II. Response to Comments

Comments were received on the proposed rule regarding the production rate, waste generation rate, and end uses of 2-nitropropane as well as its toxic effects, mobility, and persistence. This section summarizes these comments and presents the Agency's response.

A. Comments on Production Rate, Waste Generation Rate, and End Uses of 2-Nitropropane

The principal manufacturer of 2-nitropropane has commented that recent projected market demand indicates approximately 2270 kkg/year of 2-nitropropane were manufactured in 1985. This represents a decline of one-third in the production level estimated by the Agency. Also, the commenter stated that since the Agency calculates waste generation rates based on production levels, there would be a corresponding decrease in the amount of spent 2-nitropropane solvent generated. Furthermore, the commenter stated that they were unaware of any user who currently recovers 2-nitropropane from wastes; therefore, no still bottoms are generated. Finally, the commenter reported that the use of 2-nitropropane in inks has been discontinued, except in a few specialized applications, and that 2-nitropropane is no longer used in azeotropic distillation.

The Agency has revised the listing background document to reflect this recent information on production rate, waste generation rate, and end uses of 2-nitropropane.

In regard to the comment that no users of 2-nitropropane can be identified who generate still bottoms from 2-nitropropane recovery, the Agency cannot be certain that none of the hundreds of users of 2-nitropropane are not generating this waste stream or that they will not generate it in the future. Therefore, the Agency is making final the listing of still bottoms from 2-nitropropane recovery.

B. Comments on Effects of Concern

One commenter, noting that evidence of the carcinogenicity of 2-nitropropane was derived from animal studies involving inhalation exposure, argued that postulated exposure via drinking water should not be considered as a health effect of concern.

The Agency agrees that data obtained regarding toxic effects resulting from one exposure route (*e.g.*, via inhalation exposure) cannot automatically be assumed to result in equivalent toxicity when exposure occurs by a different route (*e.g.*, oral exposure). In the case of 2-nitropropane, however, there are sound reasons to expect that this substance, which has been demonstrated to be an inhalation carcinogen, may also be carcinogenic when ingested.

2-nitropropane is readily absorbed both from the lungs and from the gastrointestinal tract, and is metabolized, in part, in the liver (U.S. EPA, 1977). Also, it has been speculated that N-nitrosocompounds (many of which are potent carcinogens) may be formed as metabolic intermediates. Furthermore, inhalation exposure to 2-nitropropane caused liver (rather than respiratory tract) tumors in animals in several studies (NIOSH, 1978; Griffin *et al.*, 1978). Therefore, it is reasonable to expect that ingestion of 2-nitropropane may result in carcinogenicity of the liver in much the same way as inhalation exposure.

C. Comments on Mobility of 2-Nitropropane

The commenter agreed with EPA that the high mobility of 2-nitropropane can be construed to imply rapid migration to potential receptors; however, the commenter also stated that the high mobility of 2-nitropropane means that it would rapidly disperse to levels low enough to be of no concern to said receptors. Further, the commenter argued that due to its high mobility, 2-nitropropane would be rapidly reduced to concentrations at which it is known to be easily assimilated by microorganisms.

The Agency disagrees with the commenter's conclusion that high mobility (due to relatively high solubility) means rapid dispersion of 2-nitropropane in ground water. The Agency maintains that substances with high solubilities, once released to the environment due to improper management at a disposal site or due to a spill, are more likely to leach out of the wastes, potentially contaminating ground water. The major factors which affect the migration of leachate plumes in ground water are hydraulic and lithologic conditions and leachate density, not solubility. Moreover, one of the basic hydrologic principles regarding the migration of leachate plumes in ground water is that the plume does not become diluted with the entire body of ground water, but tends to remain as an intact body with only slight dispersion and diffusion along the edges. Therefore, we continue to believe that 2-nitropropane's high mobility is an important basis for listing this spent solvent.

D. Comments on Persistence of 2-Nitropropane

A manufacturer who operates a nitroparaffins plant stated that they discharge wastewater containing "some 2-nitropropane" to their biological wastewater treatment plant and that it is subsequently degraded to a concentration less than the detection limit (the detection limit and analytical method used are not specified). Furthermore, citing an eight-day residence time for biological degradation of 2-nitropropane in their system, the commenter states, ". . . there can be little reason to doubt that this rapid assimilation can be duplicated in the nature (sic) environment . . ."

The Agency disagrees with this conclusion regarding the assimilation of 2-nitropropane in the environment for several reasons. First, the subject waste (*i.e.*, still bottoms and spent solvent) would release 2-nitropropane to the environment at a concentration many times greater than the concentration found in the wastewater and, at such concentrations, the substance could reasonably be expected to kill many, if not all, species of microorganisms that would be able to metabolize it at lower concentrations. Second, the residence time of a substance in a biological wastewater treatment system comprised of acclimated microorganisms is not an appropriate standard by which to estimate the rate at which unacclimated microorganisms would develop the ability to metabolize a substance. Third, were 2-nitropropane to enter the environment through ground water, the biodegradation of the compound in that medium would be very slow, since the concentration of microorganisms in ground water is many orders of magnitude less than that found in a biological treatment system. Also, the metabolic rates of microorganisms in ground water are significantly slower than those in other, more biologically active, media.

Finally, under the conditions known to prevail in ground water, hydrolysis would be the major mechanism of degradation. However, nitroparaffins do not readily undergo hydrolysis in the pH range associated with ground water. In fact, the routine manufacture of nitroparaffins such as 2-nitropropane involves steam distillation during purification and even contact with heated neutral water does not hydrolyze them significantly. Thus, the Agency predicts that 2-nitropropane will persist in ground water for years, allowing an ample period of time for migration to receptors.

III. Substances Added to 40.CFR 261.33(f)

On July 30, 1985, the Agency also proposed to add 2-ethoxyethanol to 40 CFR 261.33(f). There were no comments received on this proposed action; therefore, the Agency is making final the addition of 2-ethoxyethanol to § 261.33(f), the list of commercial chemical products or manufacturing chemical intermediates which are identified as hazardous wastes when discarded.

IV. Toxicants Added to 40 CFR Part 261, Appendix VIII

In addition, the Agency proposed to add 2-nitropropane and 2-ethoxyethanol to Appendix VIII. There were no comments received on this part of the proposal; therefore, the Agency is making final this action.

V. Test Methods for New Appendices VII and VIII Compounds

In the July 30, 1985 proposal, the Agency proposed Method Number 8030, which involves the use of a gas chromatograph with a flame ionization detector (GC/FID), and Method Number 8240, which involves the use of a gas chromatograph with mass spectrometric detection (GC/MS), for use in analyzing both 2-ethoxyethanol and 2-nitropropane. The proposed rule also stated that previously established test methods for benzene (Method Numbers 8020 and 8240) and 1,1,2-trichloroethane (Method Numbers 8010 and 8240) would be appropriate for the subject wastes. No comments were received on this part of the proposal; therefore, the Agency is making final this action.

The methods cited above are described in "Test Methods for Evaluating Solid Waste: Physical/Chemical Methods", SW–846, 2nd ed., July 1982, as amended; copies are available from: Superintendent of Documents, Government Printing Office, Washington, DC 20402, (202) 783–3238, Document Number: 055–002–81001–2.

Persons wishing to submit delisting petitions are to use the methods listed in Appendix III to demonstrate the concentration of these toxicants in the waste.[8] See 40 CFR 260.22(d)(1) and 50 FR 28742. Among other things, petitioners should submit quality control data demonstrating that the methods they have used yield acceptable recovery (*i.e.*, >50% recovery at concentrations above 1μg/g) on spiked aliquots of their waste.

VI. CERCLA Impacts

All hazardous wastes designated by today's rule will, upon the effective date, automatically become hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). (See CERCLA section 101(14).) CERCLA requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (at (800) 424–8802 or (202) 426–2675) of the release. (See CERCLA section 103 and 50 FR 13456–13522, April 4, 1985.)

RQs have already been promulgated for three of the four solvents addressed in today's rule: Benzene has an RQ of 1000 pounds, while 1,1,2-trichloroethane and 2-nitropropane have RQs of 1 pound. (50 FR 13456–13522). (Since the methodology is currently being assessed for carcinogens, the RQ's for 2-nitropropane, benzene, and 1,1,2-trichloroethane and the RQs of the listed wastes are subject to change when the assessment is completed.) In the July 30, 1985 proposal, the Agency stated that statutory RQ's of 1 pound would be imposed pursuant to CERCLA section 102(b) for spent 2-ethoxyethanol and the still bottoms from its recovery as well as for the commercial chemical product 2-ethoxyethanol (which were proposed to be added to 40 CFR 261.33(f)). The Agency received no comments on these proposed RQs.

Although this rule is not changing Table 302.4 of 40 CFR 302.4, the RQs as stated here are effective upon the effective date of today's action, pursuant to the statutory requirements of CERCLA section 102(b). These listed wastes, as well as the commercial chemical product, 2-ethoxyethanol, and their RQs, will be added to Table 302.4 of § 302.4 at the time of its next publication in the Federal Register.

Finally, the Agency wishes to clarify that, except as noted below, all hazardous wastes newly designated under RCRA will have a statutorily imposed RQ of one pound until adjusted by regulation under CERCLA. See CERCLA section 102. If a newly listed hazardous waste stream has only one constituent of concern, the waste will have the same RQ as that of the constituent. (The RQ to be considered for this purpose would be the final RQ of the constituent, whether statutorily imposed or by regulation.) On the other hand, because the generic solvent listings now apply to mixtures of listed hazardous solvents (see 50 FR 53315, December 31, 1985), the wastes may contain more than one CERCLA hazardous substance. In these cases, the lowest RQ assigned to any one of the constituents present in the waste represents the RQ for the waste stream.

---

[8] Petitioners may use other test methods to analyze for these toxicants if they submit their quality control and quality assurance information along with their analytical data.

VOL 51 ISS 37 FE 25 1986 UMI

VII. State Authority

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (See 40 CFR Part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under sections 3008, 7003, and 3013 of RCRA, although authorized States have primary enforcement responsibility.

Prior to the Hazardous and Solid Waste Amendments of 1984 (HSWA) amending RCRA, a State with final authorization administered its hazardous waste program entirely in lieu of EPA administering the Federal program in that State. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any facilities in the State which the State was authorized to permit. When new, more stringent Federal requirements were promulgated or enacted, the State was obligated to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under newly enacted section 3006(g) of RCRA, 42 U.S.C. 6926(g), new requirements and prohibitions imposed by the HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to carry out those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain authorization, the HSWA applies in authorized States in the interim.

Today's rule is being added to Table 1 in § 271.1(j) which identifies the Federal program requirements that are promulgated pursuant to HSWA. The Agency believes that it is extremely important to clearly specify which regulations implement HSWA since these requirements are immediately effective in authorized States. States may apply for either interim or final authorization for the HSWA provisions identified in Table 1 as discussed in the following section of this preamble.

B. Effect on State Authorizations

Today's announcement promulgates regulations that are effective in all States since the requirements are imposed pursuant to section 222 of the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. 6921(e)(2). Thus, EPA will implement the regulations in nonauthorized States, and in authorized States until they revise their programs to adopt these rules and the revision is approved by EPA.

A State may apply to receive either interim or final authorization under section 3006(g)(2) or 3006(b), respectively, on the basis of requirements that are substantially equivalent or equivalent to EPA's. The procedures and schedule for State revision under section 3006(b) are described in 40 CFR 271.21. The same procedures should be followed for section 3006(g)(2).

Applying § 271.21(e)(2), States that have final authorization must revise their programs within a year of promulgation of EPA's regulations if only regulatory changes are necessary, or within two years of promulgation if statutory changes are necessary. These deadlines can be extended in exceptional cases (40 CFR 271.21(e)(3)).

States with authorized RCRA programs may have requirements similar to those in today's rule. These State regulations have not been assessed against the Federal regulations being promulgated today to determine whether they meet the tests for authorization. Thus, a State is not authorized to implement these listings in lieu of EPA until the State program revision is approved. As a result, the regulations promulgated in today's rule apply in all States, including States with standards similar to those in today's rule. States with existing requirements may continue to administer and enforce their standards as a matter of State law. In implementing the Federal program, EPA will work with States under cooperative agreements to minimize duplication of efforts.

States that submit official applications for final authorization less than 12 months after promulgation of EPA's regulations may be approved without including standards equivalent to those promulgated. Once authorized, however, a State must revise its program to include standards substantially equivalent or equivalent to EPA's within the time period discussed above.

VIII. Regulatory Impact Analysis

Under Executive Order 12291, EPA must determine whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This rule is not a major rule because it is not expected to result in an effect on the economy of $100 million or more. The Agency's preliminary screening analysis of the potential impacts of today's rule indicates that the total impact will be less than $7.5 million.[3] This cost will be borne by approximately 1200 manufacturers of paint and coatings, inks, and organic chemicals. The analysis considered each of these industrial segments separately and found that today's rule will not result in either a significant increase in prices or a significant decrease in profits.

A worst-case scenario was used to provide a conservative cost estimate of the economic impact. The analysis included the costs associated with the following: Establishment of a manifest system, the maintenance of an on-site hazardous waste storage area, off-site incineration and transportation of the waste 250 miles to an incinerator, and initial costs of conducting chemical waste analysis and rewriting waste analysis plans.

The addition of the new hazardous constituents to Appendix VIII also will not result in any significant increased burden in groundwater monitoring or incineration monitoring requirements because the analytical techniques currently employed to test for the presence and concentration of other Appendix VIII hazardous constituents also would detect and quantify these additional compounds.

The cost of adding 2-ethoxyethanol to 40 CFR 261.33(f), the list of commercial chemical products which are hazardous wastes when discarded, also will be minimal because these commercial chemical products are rarely discarded, due to their inherent value. In addition, the Agency stated in the proposed rule that although some generators may be newly regulated, data from the RCRA notification data base indicate that many solvent generators also generate other RCRA hazardous wastes. Also, the Agency stated that it believes that many of the generators of the spent solvents in today's notice already manage these wastes in compliance with RCRA as three of the four solvents listed today's exhibit the characteristic of ignitability. Furthermore, the Agency stated that this rule will minimize the competitive advantage experienced by those facilities that presently are not managing these solvent wastes as hazardous. The Agency did not receive any comments regarding these statements or on the preliminary screening analysis of the impact associated with today's rule.

---

[3] A copy of the regulatory impact analysis is available in the public docket at the address cited above.

Finally, the Agency does not expect that there will be an adverse impact on the ability of the U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This rule is not a major regulation; therefore, no regulatory Impact Analysis has been conducted.

IX. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601-612, whenever an agency is required to publish a General Notice of Rulemaking for any proposed or final rule, it must prepare and make available for public comment, a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the Administrator certifies that the rule will not have a significant impact on small entities.

Although some generators will be newly regulated and some will experience an increased regulatory burden, this amendment is not expected to have a significant economic impact on a substantial number of small entities. The Agency received no comments that small entities will dispose of these wastes in significant quantities. The largest costs are more likely to be borne by generators with large quantities of difficult-to-manage wastes (*i.e.*, wastes not suitable for land disposal or recycling). Accordingly, I hereby certify that this regulation would not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

X. Paperwork Reduction Act

This rule does not contain any information collection requirements subject to OMB review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

For the reasons set out in the preamble, Title 40 of the Code of Federal Regulations is to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922).

2. In § 261.31, revise the following waste streams as shown in the subgroup 'Generic':

§ 261.31 [Amended]

* * * * *

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
Generic:		
* * * * *		
F002	The following spent halogenated solvents: tetrachloroethylene, methylene chloride, trichloroethylene, 1, 1, 1-trichloroethane, chlorobenzene, 1, 1, 2-trichloro-1, 2, 2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane, and 1, 1, 2-trichloroethane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those listed in F001, F004, or F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(T)
* * * * *		
F005	The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(I,T)
* * * * *		

§ 261.33 [Amended]

3. In § 261.33(f), add the following compounds in alphabetical order:

* * * * *

Hazardous waste No.	Substance
* * * * *	
U359	2-Ethoxyethanol.
U359	Ethylene glycol monoethyl ether.
* * * * *	

4. In § 261.33(f) change both entries for Hazardous Waste No. U171 from "2-Nitropropane (I)" and "Propane, 2-nitro-(I)" to: "2-Nitropropane (I,T)" and "Propane, 2-nitro- (I,T)", respectively.

5. Add the following hazardous constituents in alphabetical order to Table 1 of Appendix III of Part 261:

Appendix III—[Amended]

* * * * *

Compound	Method Nos.
* * * * *	
2-Ethoxyethanol	8030, 8240
2-Nitropropane	8030, 8240
* * * * *	

6. Revise the following entries in Appendix VII of Part 261 to read as follows:

Appendix VII—[Amended]

* * * * *

EPA hazardous waste No.	Hazardous constituents for which listed
* * * * *	
F002	Tetrachloroethylene, methylene chloride, trichloroethylene, 1, 1, 1-trichloroethane, 1, 1, 2-trichloroethane, chlorobenzene, 1, 1, 2-trichloro-1, 2, 2-trichlorofluoroethane, ortho-dichlorobenzene, trichlorofluoromethane.
F005	Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, 2-ethoxyethanol, benzene, 2-nitropropane.
* * * * *	

7. Add the following hazardous constituents in alphabetical order to Appendix VIII of Part 261:

Appendix VIII—Hazardous Constituents

* * * * *

Ethylene glycol monoethyl ether (Ethanol, 2-ethoxy)

* * * * *

VOL 51

PART 271—REQUIREMENTS FOR AUTHORIZATION OF STATE HAZARDOUS WASTE PROGRAMS

8. The authority citation for Part 271 continues to read as follows:

Authority: Sec. 1006, 2002(a), and 3006 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), and 6926).

§ 271.1 [Amended]

9. Section 271.1(j) is amended by adding the following entry to Table 1 in chronological order by date of publication:

Table 1—Regulations Implementing the Hazardous and Solid Waste Amendments of 1984

Date	Title or regulation
* * *	* *
February 25, 1986	Listing of four spent solvents and the still bottoms from their recovery.
* * *	* *

[FR Doc. 86-3940 Filed 2-24-86; 8:45 am]

BILLING CODE [illegible]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2800

[Circular No. 2575]

Principles and Procedures for Rights-of-Way Granted Prior to October 21, 1976

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking amends the existing regulations in 43 CFR Part 2800 to clarify that its procedures are applicable to rights-of-way granted prior to October 21, 1976, under statutory provisions repealed by the Federal Land Policy and Management Act of 1976. This amendment will resolve questions raised since the promulgation of the existing regulations in 43 CFR Part 2800 on the administration of rights-of-way issued under the repealed statutes.

EFFECTIVE DATE: March 27, 1986.

ADDRESS: Any suggestions or inquiries should be sent to: Director (330), Bureau of Land Management, Room 3660, Main Interior Bldg., 1800 C Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Theodore G. Bingham, (202) 343-5441.

SUPPLEMENTARY INFORMATION: A proposed rulemaking amending the existing regulations in 43 CFR Part 2800—Rights-of-Way, Principles and Procedures—was published in the **Federal Register** on July 2, 1985 (50 FR 27322), with a 60-day comment period. During the comment period, comments were received from seven sources, four from industry, one from an industry association, one from a local governmental entity and one from a Federal governmental entity.

All of the comments raised the issue of the need for the regulatory change contained in the proposed rulemaking. The comments expressed concern that the proposed rulemaking would, if adopted as a final rulemaking, diminish or reduce the rights conferred upon a holder of a right-of-way granted prior to October 21, 1976. as stated in the preamble to the proposed rulemaking, the procedures set forth in the proposed rulemaking would not be applicable in those instances where they are inconsistent with the provisions of a specific right-of-way grant or the statute under which it was granted. It was not the intent of the proposed rulemaking, nor is it the intent of this final rulemaking, to diminish or reduce the rights conferred by a right-of-way granted prior to October 21, 1976. This is clearly stated in the new section 2801.4 that is added to 43 CFR Part 2800 by the proposed rulemaking. However, in an effort to further clarify this point, the final rulemaking has adopted a change to § 2801.4 using a combination of language from a couple of comments. The change adopted by the final rulemaking directly addresses the question of rights conferred by a right-of-way grant and should answer the objections raised in several of the comments. In addition, if questions should arise regarding the rights of a right-of-way grant holder under a grant or statute, the earlier editions of the Code of Federal Regulations on rights-of-way will remain availabe to assist in interpretation of the rights conferred by the grant or earlier statute.

One comment suggested that the Bureau of Land Management was in a better position than would be a holder of one or more of these right-of-way grants to identify each of the right-of-way grants and the statutes under which they were granted and describe the impact that the provisions promulgated by this final rulemaking might have on those grants. The comment suggested that this review should be made before the final rulemaking is issued. In order to comply with this suggestion, the Bureau would have to examine the files on several thousand right-of-way grants, comparing each with various statutory provisions. On the other hand, a holder of a right-of-way grant would only have to deal with one or a few grants that are familiar because of use to determine whether the actions of the Bureau are diminishing or reducing the rights conferred by their particular grant(s). This suggestion has not been adopted.

The management procedures contained in the existing regulations in part 2800 will be used by the Department of the Interior to properly manage existing right-of-way grants and to meet its statutory responsibility to protect the public lands and their resources. Many of the provisions in the existing regulations are a restatement of those contained in the regulations they replaced and are those needed to properly administer the right-of-way. In carrying out the Department's management responsibilities, the authorized officer will be careful to avoid any action that will diminish or reduce the rights conferred under a right-of-way grant issued prior to October 21, 1976. Further, it is obvious that the holder of a right-of-way grant issued prior to October 21, 1976, will be alert to any action that appears to diminish or reduce the rights conferred by the grant and will challenge any such action. Therefore, the final rulemaking has adopted the provisions of the proposed rulemaking with certain changes to clarify the rights of holders of right-of-way grants issued prior to October 21, 1976.

The principal author of this final Rulemaking is Sheldon Weil, Division of Rights-of-Way, Bureau of Land Management, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that the publication of this final rulemaking is not a major Federal action significantly affecting the quality of the human environment, and that a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is not required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601).

The final rulemaking will clarify the Bureau of Land Management's authority to manage rights-of-way granted on or before October 21, 1976, removing questions that have arisen about that authority. The final rulemaking will

affect equally all holders of rights-of-way granted on or before October 21, 1976.

There are no additional information collection requirements contained in this final rulemaking requiring the approval of the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 43 CFR Part 2800

Administrative practice and procedure, Communications, Electric power, Highways and roads, Pipelines, Public lands—rights-of-way.

Under the authority of section 310 and title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), Part 2800, Group 2800, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below.

February 2, 1986.

J. Steven Griles,

Assistant Secretary of the Interior.

PART 2800—[AMENDED]

1. The authority citation for 43 CFR Part 2800 continues to read:

Authority: 43 U.S.C. 1761-1771.

§ 2800.0-1 [Amended]

2. Section 2800.0-1 is amended by removing the period at the end thereof and adding the phrase "and for the administration, assignment, monitoring and termination of right-of-way grants issued on or before October 21, 1976, pursuant to then existing statutory authority."

3. Section 2800.0-3 is revised to read:

§ 2800.0-3 Authority.

The regulations in this part are issued under the authority of section 310 and title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1740, 1761-1771).

4. Section 2800.0-5(h) is revised to read:

§ 2800.0-5 Definitions.

* * * * *

(h) "Right-of-way grant" means an instrument issued pursuant to title V of the act, or issued on or before October 21, 1976, pursuant to then existing statutory authority, authorizing the use of a right-of-way over, upon, under or through public lands for construction, operation, maintenance and termination of a project.

* * * * *

5. A new § 2801.4 is added to read:

§ 2801.4 Right-of-way grants issued on or before October 21, 1976.

A right-of-way grant issued on or before October 21, 1976, pursuant to then existing statutory authority is covered by the provisions of this part unless administration under this part diminishes or reduces any rights conferred by the grant or the statute under which it was issued, in which event the provisions of the grant or the then existing statute shall apply.

BILLING CODE 4310-84-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 671

[Docket No. 50950-5182]

Tanner Crab off Alaska; Season Closure

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of season closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the Tanner crab fishery in the North Mainland Section of the Kodiak District of Registration Area J must be closed in order to protect Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing fishing for Tanner crab by vessels of the United States in the North Mainland Section. This action is intended as a management measure to conserve Tanner crab stocks.

DATE: This notice is effective at noon, Alaska Standard Time (AST), February 21, 1986. Public comments on this notice of closure are invited until March 10, 1986.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data on which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m. AST, weekdays) at the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Raymond E. Baglin (Fishery Management Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act), provides for inseason adjustments of season and area openings and closures. Implementing regulations at §671.27(b) specify that notices of these adjustments will be issued by the Secretary of Commerce under criteria set out in that section.

As of February 12, approximately 30 vessels have delivered 700,000 pounds of Tanner crabs from the North Mainland Section. Most of the catch reported to date has been concentrated in the traditionally less productive inshore fishing grounds that are protected from strong currents. In the offshore, normally more productive waters, unanticipated severe currents caused by high winds and extreme tides have pulled under many of the crab buoys that are used to mark the location of the pots to retrieve them. Therefore, a large amount of the gear that was set at the beginning of the fishing season has not been retrieved and many fishermen have chosen to fish inshore areas. Catch per unit of effort (CPUE), mostly from the inshore areas, on January 16 was about 40 crabs per pot. The CPUE fluctuated until the end of January, when it increased to over 60 crabs per pot. Since then, it has declined to approximately 20 crabs per pot on February 9. These unexpected wind and tide conditions, which forced an unanticipated increased fishing effort in the inshore areas, resulted in declining CPUE and will have a detrimental effect on the nearshore stocks unless the fishery is closed.

Based on the relative availability of inshore and offshore Tanner crab stocks to the fishery, it is highly likely that fishing pressure will be concentrated on the inshore stocks, thereby threatening harm to those stocks. Consequently, the Regional Director has determined that the condition of the Tanner crab stocks in the North Mainland Section of the Kodiak District is substantially different from the conditions anticipated on November 1, the beginning of the fishing year, and that this difference reasonably supports the need to protect the Tanner crab stocks. The North Mainland Section, as defined in §671.26(f)(1)(i), is closed by this notice until noon, Alaska Daylight Time, April 30, 1986, at which time the closure of this section prescribed in Table 1 of §671.21(a) will begin.

This closure will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closure is publicized for 48 hours through procedures of the Alaska Department of Fish and Game. Public comments on this notice of closure may be submitted to the

VOL

1986
UMI

Regional Director at the address stated above. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the Federal Register, either confirming this notice's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the North Mainland Section of the Kodiak District will be subject to damage by overfishing unless this closure takes effect promptly. NOAA therefore finds for good cause that advance opportunity for public comment on this notice is contrary to the public interest, and that no delay should occur in its effective date.

This action is taken under 50 CFR Part 671, and complies with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 51, No. 37
Tuesday, February 25, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 526, 531, 532, 545, 555, 561, 563, 564 and 571

[No. 86-156]

Deposit, Share, and Withdrawable Accounts

Dated: February 19, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is proposing to amend its regulations governing payment of interest on deposits and related matters. This action is proposed because the expiration of the Depository Institutions Deregulation Committee ("DIDC") and regulations adopted by it on March 31, 1986, mandate updating and clarification of various Board regulations by deleting outdated references, authorizing Money Market Deposit Accounts ("MMDA") and Negotiable Order of Withdrawal ("NOW") accounts and clarifying the prohibition of the payment of interest on demand accounts. The Board also is seeking comment on the retention or deletion of mandatory penalties for withdrawal of funds from fixed-term accounts prior to maturity.

DATE: Comments must be received by March 17, 1986.

ADDRESS: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: Wendy Samuel, Deputy Director, (202) 377-6445; Jerome Edelstein, Attorney, (202) 377-7057; Stuart Feldstein, Attorney, (202) 377-6460; or Carol Rosa, Paralegal Specialist, (202) 377-6464, Regulations and Legislation Division, Office of the General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: As of March 31, 1986, the DIDC ceases to exist; many, if not all, of its regulations expire; and the Board's authority, under Section 5B of the Federal Home Loan Bank Act (12 U.S.C. 1425b), to regulate payment of interest, including the authority to prescribe different limitations for different classes of accounts of Federal Home Loan Bank System members, expires. *See* 12 U.S.C. 3506(b)(7), (8), (9); 3508; 3509.

However, prohibitions on payment of interest on demand accounts in federally chartered savings and loan associations and savings banks ("Federal associations") will remain. *See* 12 U.S.C. 1464(b)(1)(B). (Similar prohibitions of interest on demand deposits apply to Federal Reserve System member banks (12 U.S.C. 371a) and nonmember banks insured by the Federal Deposit Insurance Corporation ("FDIC") (12 U.S.C. 1828(g)(1)).)

In addition to the expiration of DIDC provisions directly relating to payment of interest on accounts, other DIDC regulations also expire. These include provisions relating to early withdrawal penalties (12 CFR 1204.101, 1204.103, 1204.107, 1204.113); premiums (12 CFR 1204.109); and finders' fees (12 CFR 1204.110, 1204.202).

Consequently, with the expiration of the DIDC and various of its regulations, current Board regulations will be severely outdated with the inclusion of provisions relating to interest rate ceilings which no longer exist, or which reference DIDC provisions which no longer exist, or other obsolete provisions. The Board's Part 526, except to the extent it relates to advertising, also will be outdated because of the expiration of its underlying authority in the Bank Act; and other regulations which refer to expired statutes as authority also require updating. Moreover, the Board may impose the substance of certain DIDC regulations under other authority. This includes requiring early withdrawal penalties, and regulations governing premiums and finders' fees on demand accounts.

Finally, issues arise regarding the continued authority of Federal associations and institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("insured institutions") to offer MMDA and NOW accounts in light of the scheduled expiration of DIDC regulations governing such accounts.

As discussed more fully below, the Board is today proposing a number of amendments to address these issues.

A. Revisions to 12 CFR Part 526

Title 12 CFR Part 526 was adopted, in part, pursuant to the Board's authority under 12 U.S.C. 1425b to regulate generally the payment and advertisement of interest on deposits, shares, or withdrawable accounts of Federal Home Loan Bank System members.

Sections 526.2, 526.2-1, 526.3, and 526.3-1, as adopted originally, established rules to regulate interest rates payable on certain accounts. Subsequent amendments conformed these sections to the DIDC regulations. These sections were relevant when interest ceilings existed because they set forth the maximum rates of return and prevented circumvention of these limitations. However, with the scheduled expiration of DIDC authority and the transition to market interest rates, the provisions contain numerous outdated references to interest rate ceilings and methods of determining the applicable rate. Therefore, the Board is proposing to rescind them.

Moreover, the Board's authority pursuant to 12 U.S.C. 1425b will be limited after March 31, 1986, to the regulation of advertising of deposit accounts. *See* 12 U.S.C. 3506(b) (7), (8), (9). Consequently, the Board proposes to remove the provisions in Part 526 concerning early withdrawal penalties, 12 CFR 526.7, and payment of interest in gold, 12 CFR 526.9. As will be discussed in more detail, the Board is seeking comment on the retention or deletion, under other Board authority, of the current provisions relating to early withdrawal penalties. The proposal would also retain, under other Board authority, current provisions relating to gold and move them to §§ 532.1 and 545.79.

Consequently, the surviving provisions of Part 526 set out in the proposal concern advertising requirements and existing definitions pertinent to those requirements. The Board notes that the Federal Reserve Board ("FRB") has proposed changes to its advertising regulations. 51 FR 1379 (Jan. 13, 1986). However, the Board, at this time, is leaving its advertising regulations unchanged except for the deletion or modification of provisions

VOL
51
ISS
37
FE
25
1986
UMI

that would be obsolete after March 31, 1986. The Board may later consider substantive revisions to its advertising regulations after assessing the need for such changes based on experience with rate deregulation on nondemand accounts after March 31.

B. Early Withdrawal Penalties

Since early in the history of interest rate regulation, the federal financial regulatory agencies have required institutions to impose substantial minimum penalties on certificate account withdrawals prior to maturity. This approach reflected the concern of the regulatory agencies that unless such penalties were required, depositors could circumvent the lower rate ceilings applicable to passbook accounts, obtaining the higher rates intended to compensate depositors for committing their funds for longer periods. Indeed, in the absence of early withdrawal penalties, the distinction among certificates with different terms to maturity has little operational significance. Widespread early withdrawals of funds deposited for a specified period could also have detrimental effects on institutions' operational planning and safety and soundness, since institutions would invest deposited funds with a stated maturity date in the expectation that they would have the use of the funds for the stated term.

In 1980 when Congress created the DIDC, it placed in the hands of this body the authority to set rate ceilings on nondemand deposits. In exercising this authority, the DIDC adopted regulations setting maximum rates that could be paid on deposits, and also imposed minimum early withdrawal penalties. These penalties, like those included in the Board's regulations at Part 526, were intended to prevent circumvention of rate control by depositors who deposited funds at long-term rates. However, with the expiration of the DIDC and its rate control authority on March 31, 1986, the DIDC's authority to impose early withdrawal penalties will also lapse.

Because the prudent use of early withdrawal penalties may contribute to the safe and sound operation of insured institutions, the Board could continue to require minimum early withdrawal penalties pursuant to its plenary authority to regulate Federal associations and the FSLIC's powers under the National Housing Act. 12 U.S.C. 1464(a), 1729 *et seq.* However, the FDIC and the FRB have recently proposed regulations deleting this requirement for banks, preferring to let the market determine the need for early withdrawal penalties. The FRB in its notice of proposed rulemaking, however, did recognize the importance of early withdrawal penalties for safety and soundness purposes and indicated that it would explore the possibility of imposing such penalties. 51 FR at 29. The Board is therefore considering whether the mandatory early withdrawal penalties set forth in 12 CFR 526.7 and 1204.103 should be retained, deleted or modified after March 31, 1986.

Deleting the requirement for early withdrawal penalties would be consistent with interest rate deregulation, especially because the bank regulatory agencies already have indicated their intent to cease requiring imposition by banks of early withdrawal penalties. To require imposition by thrifts may place these institutions at a competitive disadvantage at a time when the end of statutorily mandated interest ceilings is expected to precipitate additional competition for funds. In such a deregulated environment, the Board believes that thrifts must be as free to compete for funds as is consistent with safe and sound operation, and that to require early withdrawal penalties at a time when thrifts' primary competitors for deposits are no longer required to impose such penalties may work to thrifts' disadvantage.

The Board recognizes that ending mandatory early withdrawal penalties would not preclude Federal associations and insured institutions from requiring such penalties and incorporating them in their account documents, consistent with applicable law. Because this practice may contribute to safety and soundness, the board could encourage thrifts to consider retaining such penalties consistent with management's prudent judgment as to the needs of the particular thrift. Without federal minimums, penalties could be as little or as much as the institution deems appropriate, taking market considerations into account.

On the other hand, the Board may determine that the retention of early withdrawal penalties is necessary to assure safety and soundness. This approach would give thrifts some assurance that funds deposited for a certain time in return for a favorable rate would be retained for the stated term and contribute to the asset-liability maturity matching that the Board has found so crucial to prudent management within the thrift industry.

Several factors will be taken into account in the Board's decision on whether to continue to require early withdrawal penalties. If the requirement is deleted, the board would have to monitor Federal associations' and insured institutions' deposit offerings to assure that the rates offered by individual institutions are realistic in terms of the thrift's financial position, market and competition, and to determine the effect of the absence of a mandatory penalty on the ability of the thrift to balance effectively the maturities of assets and liabilities and, thereby, to manage interest rate risk. The Board would also have to consider whether the stated maturity of an account without such a penalty can be considered its effective maturity when analyzing interest rate risk.

The Board will also consider the effect of deleting the early withdrawal penalty requirement on existing accounts. Deleting required minimum early withdrawal penalties would have the immediate effect of making inapplicable to outstanding certificates the mandatory penalties set by regulation. To the extent that minimum early withdrawal penalties have been incorporated in account agreements for outstanding certificates, the thrift would have the option of enforcing its contractual right to collect the specified penalty or waiving it. Provided that such a waiver is not unsafe or unsound given the condition of the institution or contrary to state law if applicable, the Board believes this approach might be acceptable. On the other hand, such waivers could cause confusion among consumers, could easily be abused by selective application, and would be difficult to monitor. Therefore, the board will consider what action, if any, to take with respect to outstanding accounts.

The Board notes that deleting mandatory penalties, as proposed by the FRB and the FDIC, includes eliminating mandatory exceptions to imposition of penalties following the death or determination of incompetency of an accountholder. Similarly, deleting required penalties raises the question of removing the current requirement that advertising disclose the existence of a penalty. The Board believes that these deletions could result in a loss to consumers of significant rights and information, and such effects might outweigh the advantages to consumers from total deregulation of mandatory early withdrawal penalties.

The Board specifically seeks comment on whether mandatory early withdrawal penalties should be retained and, if so, whether the penalties currently imposed in 12 CFR 526.7 and 1204.103 or a modification of those penalties would constitute appropriate penalties. The Board also seeks comment on what

situations, including but not limited to the current exceptions for death and incompetency, require exceptions to penalties, and whether the board should adopt amendments to require such exceptions if the final rule eliminates mandatory penalties. The Board also request comment on the appropriate characterization for reporting purposes of certificates of deposit without any meaningful early withdrawal penalties. Finally, the Board requests comment on whether the final amendments should retain advertising disclosure requirements for institutions that elect to retain penalties.

C. NOW Accounts and MMDA Accounts

Pursuant to its authority, the DIDC promulgated regulations providing for the establishment by depository institutions, including Federal associations and insured institutions of NOW accounts (12 CFR 1204.108) and MMDA accounts (12 CFR 1204.122). Because of uncertainty about the status of these regulations following the scheduled expiration of the DIDC on March 31, 1986, the Board is proposing regulations and interpretations, under surviving authority, which would clarify the ability of Federal associations and insured institutions to continue to offer such accounts following the expiration of the DIDC.

1. NOW Accounts

Current DIDC regulations provide that depository institutions may offer NOW accounts as authorized under 12 U.S.C. 1832, subject to the reservation of the right to require at least seven days notice prior to withdrawal or transfer of funds in the account. Moreover, notice, if required, must be required of all depositors. 12 CFR 1204.108 (effective Jan. 1, 1986).

The Board is proposing provisions which would clarify the availability of such accounts after March 31, 1986, even if 12 CFR 1204.108 expires on March 31, 1986. The proposal would retain the current requirement that the institution offering the account retain the right to require seven days notice of withdrawal, while deleting the requirement that notice, if required, must be required of all depositors.

The Board's authority to permit Federal associations to offer such accounts is found at 12 U.S.C. 1464(b)(1)(A), (C), (E), which provides for savings accounts which may be "subject to check or to withdrawal or transfer on negotiable or transferable or other order or authorization to the association, as the Board may by regulation provide" and "subject to the right of the association to require such advance notice . . . as . . . provided for by . . . the regulations of the Board." The authority under section 1464 independently supplements the terms of 12 U.S.C. 1832, which allows federally regulated deapesitory institutions to provide interest bearing accounts which can be accessed by negotiable or transferable instruments for certain depositors. Depositors holding accounts established pursuant to the provisions of 12 U.S.C. 1832 are limited to individuals, governmental units, and organizations operated primarily for religious, philanthropic, charitable, educational, or similar purposes and not for profit. 12 U.S.C. 1832(a)(2).

The proposed regulations also clarify that 12 U.S.C. 1832 authorizes state-chartered insured institutions to offer such accounts and that such accounts must be subject to the reservation of the right to require seven days notice of withdrawal.

In proposing this regulation, the Board notes that continuing the requirement that the institution offering the account retain the right to require seven days notice prior to withdrawal, while deleting the requirement that notice, if required, must be required of all depositors, is consistent with the definition of NOW account which the FRB has proposed to include in its revised Regulation Q. *See* 51 FR 31, 33 (Jan. 2, 1986). The definition is also consistent with the definition of NOW account included by the FDIC in it first alternative proposal to its Part 329 of Title 12 of the Code of Federal Regulations. *See* 51 FR 4376, 4380 (Feb. 4, 1986). However, the Board notes that the FDIC's second alternative proposal requires institutions neither to establish a minimum of seven days for the reservation of notice, nor to reserve the right to require such notice if the depositor is eligible to hold a NOW account under 12 U.S.C. 1832. *Id.* 4381.

The Board also notes that, absent regulations on the issue, Federal associations must reserve a right to fourteen days notice of withdrawal, 12 U.S.C. 1464(b)(1)(C), absent a charter provision otherwise. Application of this requirement could place Federal associations in a competitively disadvantageous position if the FRB adopt their proposals.

Consequently, the Board specifically seeks comments on the issue of what would constitute an appropriate reservation of right of notice requirement and whether such notice should be imposed only if applied to all holders of such accounts.

2. MMDA Acocounts

Current DIDC regulations, 12 CFR 1204.122, provide that depository institutions may offer MMDS accounts if the institution:

(a) Limits the number of transactions;

(b) Reserves the right to require at least seven days notice of withdrawal;

(c) Requires notice of all depositors if notice is required;

(d) Provides methods of enforcing the limitations on transactions;

(e) Limits the rate of interest or other charges imposed on an overdraft credit arrangement on an account to which withdrawals from the MMDA can be paid to a rate not less than those imposed on overdrafts for customers who do not maintain such an account;

(f) Provides that maturities and guaranteed interest rates cannot exceed one month; and

(g) Calculates the average daily balance in accord with the regulation.

The Board is proposing provisions which would clarify the availability of such accounts for all types of depositors, even if 12 CFR 1204.122 expires on March 31, 1986.

As to the limitation on the number of transactions, the Board is aware that regulations proposed by the FRB and the FDIC take widely varying positions. *Compare* 51 FR 31, 33 (Jan. 2, 1986) (FRB proposal) *with* 51 FR 4376, 4381 (Feb. 4, 1986) (FDIC second alternative proposal).

Specifically, the FRB proposal would prohibit the payment of interest on demand deposits. *See* 51 FR at 31. Demand deposits would include deposits commonly known as MMDA accounts if the depositor is authorized or permitted to exceed limitations of six transfers per month, unless the depositor is eligible to hold a NOW account (*i.e.*, is an individual, governmental unit, or nonprofit entity of the type described in 12 U.S.C. 1832). *Id.*

In contrast, the FDIC's second alternative proposal, which is proposed under statutory authority similar to that under which the FRB has acted, prohibits interest on demand accounts, but narrowly defines demand accounts as accounts held by those ineligible to hold NOW accounts under 12 U.S.C. 1832 if the depositor "as a matter of legal right, [may] withdraw the funds . . . upon demand." 51 FR at 4381. The FDIC's preamble states that the rule would permit institutions to "pay interest on all reserved notice deposits—even when the accounts offer unlimited third-party transfer powers

VOL 51
ISS 37
FE 25
1986
UMI

and even when the accounts are owned by businesses." *Id.* at 4374.[1]

Implicit in the FDIC's second alternative proposal is the interpretation that unlimited transaction MMDAs for for-profit entities do not violate the prohibition on payment of interest on demand accounts under 12 U.S.C. 1828(g)(1) (prohibiting payment of interest by insured nonmember banks on demand deposits) or the provisions of 12 U.S.C. 1832 (governing interest-bearing transaction accounts). This position contrasts with the FRB's apparent interpretation that 12 U.S.C. 371a (prohibiting payment of interest by member banks on demand accounts) and 12 U.S.C. 1832 bar paying interest on commercial MMDAs with unlimited transaction features.

The provisions of 12 U.S.C. 1464(b)(1), governing deposit accounts of Federal associations and prohibiting payment of interest on demand accounts, do not define demand deposits. Additionally, there is no counterpart in federal law to 12 U.S.C. 371a, 1464(b)(1), or 1928(g)(1) applicable to state-chartered insured institutions. In view of these considerations, and the FDIC's second alternative proposal, the Board is proposing to permit Federal associations to offer interest-bearing MMDA-type accounts to all depositors without transaction limitations. Such accounts may be authorized for Federal associations by Board regulation as savings accounts (12 U.S.C. 1464(b)(1)(A)), subject to a notice of withdrawal as the Board provides by regulation (12 U.S.C. 1464(b)(1)(C)), and subject to withdrawals or transfer by negotiable or transferable order or authorization (12 U.S.C. 1464(b)(1)(E)).

The Board also proposes to clarify that federal laws and regulations do not preclude state-chartered insured institutions, as well as Federal associations, from offering such accounts by clarifying that if the institution reserves a right of notice of withdrawal, such accounts are not prohibited by 12 CFR 563.6, which limits demand accounts to checking accounts, tax and loan accounts, note accounts, and United States Treasury General Accounts.

The Board invites comment on the issue of the availability of interest-bearing MMDAs with unlimited transaction privileges to for-profit entities, particularly in light of the difference of opinion between the FDIC and the FRB on what transaction limitations should be placed on such accounts, and which approach best implements the intent of Congress in establishing the statutory scheme which will be in place following the expiration of the DIDC on March 31, 1986.

The Board also is proposing to retain the requirement that institutions reserve the right to require at least seven days notice of withdrawal. This is consistent with the FRB's proposal, *see* 51 FR at 33, and the FDIC's proposed first alternative, *see id.* at 4380. It is inconsistent, however, with the FDIC's proposed second alternative, which does not specify a required number of days for which an institution must reserve a right of notice of withdrawal and does not require reservation of right of notice if the depositor is eligible to hold an account under 12 U.S.C. 1832. *Id.* at 4381. The Board invites comment on the differences in approach represented, whether they need to be reconciled, and what reservation of notice requirement would be appropriate.

The Board also is proposing to delete the requirement set forth in (c)—requiring notice of all depositors if notice is required—in an effort to retain uniformity with proposals of the FDIC, (51 FR at 4376) and the FRB (51 FR at 27).

The Board is proposing to delete the provisions referred to in (d) and (e) because they were initially adopted to preserve the exemption under Regulation D (12 CFR Part 204) from the reserve requirements applicable to MMDA accounts. Because the FRB, in its proposed revision to Regulation D, 51 FR at 27, has not proposed retention of these provisions, the Board believes it would be inappropriate to adopt such limitations for reserve requirement purposes.

The Board also is proposing to delete the provisions referred to in (f) and (g) because they appear to be obsolete in light of deregulation of interest rate ceilings and minimum deposit balances as to such accounts.

The deletions of the requirements referred to in (d), (e) and (f), and (g) are consistent with the FRB and FDIC proposals. *See* 51 FR 27 (Jan. 2, 1986) and 51 FR 4376 (Feb. 4, 1986).

The Board requests comment on the advisability of retaining or deleting all of the limitations currently imposed on MMDA accounts.

D. Demand Deposits

While expiration of DIDC authority will remove limitations on the rate of return on nondemand deposit accounts, the statutory prohibition against the offering of interest on demand deposits by Federal associations will remain in force. 12 U.S.C. 1464(b)(1)(B). Consequently, the Board is proposing to codify this prohibition at 12 CFR 545.12. The Board is also proposing to incorporate a definition of demand account in 12 CFR 563.6 for both Federal associations and insured institutions in accord with its preliminary determination that MMDA and NOW accounts subject to a reservation of right to require notice of withdrawal are not demand accounts. This information would state that an account from which depositors are paid on demand includes only those accounts from which the depositors as a matter of legal right may withdraw funds on demand or for which the Federal association or insured institution either requires or reserves the right to require less than seven days notice of withdrawal. The Board specifically seeks comment on this definition.

The Board also is soliciting comments concerning the application of premium and finders' fee rules to demand deposits.

Under current DIDC regulations, premiums include merchandise, cash, or credit offered to the depositor in return for establishing an account. Finders' fees are paid to an individual who introduces the depositor to the institution. Premiums and finders' fees are characterized as interest payments, with certain exceptions, to prevent circumvention of the interest rate ceilings and the prohibitions on paying interest on demand deposits at 12 U.S.C. 371a, 1464(b)(1), 1828(g). Under the DIDC regulations, premiums are not considered payment of interest if given at the time an account is opened or renewed, and if they do not exceed in value $10 for deposits of less than $5,000, or $20 for deposits of $5,000 or more. A limit of two premiums per account within a 12 month period is also imposed. See 12 CFR 1204.109. Finders' fees are characterized as interest, except if provided in the form of bonuses paid to employees for an account drive when such bonuses are tied to the total amount of deposits. 12 CFR 1204.110. Payments to bona fide deposit brokers also are not considered to be payments of interest. 12 CFR 1204.202.

The Board notes that the FDIC is proposing to remove a policy statement that premiums are not regarded as payment of interest. The FRB has proposed to retain regulations permitting de minimis premiums on demand accounts. *See* 51 FR at 33. Neither the FDIC nor the FRB proposals discuss finders' fees.

Absent regulatory clarification of existing limited authority for Federal associations and insured institutions to pay premiums and finders' fees for demand deposits, *see* 12 CFR 526.2(f), (h), (i), 545.21, 563.24, such payments could be viewed as impermissible payments of interest on demand deposits. *See* 12 CFR 561.11a, 583.4; *cf.* 12 U.S.C. 371a. De minimis exceptions might no longer exist. The Board is specifically requesting comment on the advisability of adopting regulations governing premiums and finders' fees related to demand deposits, and if so, whether the substance of the regulations currently set forth in 12 CFR 1204.109, 1204.110 and 1204.202 should be retained or adopted with modifications.

---

[1] The FDIC's first alternative proposal would limit transactions on MMDAs in accord with current restrictions. 51 FR at 4380.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Board is providing the following initial regulatory flexibility analysis:

1. *Reasons, objectives, and legal basis underlying the proposed rule.* These elements are incorporated above in the supplementary information regarding the proposal.

2. *Small institutions to which the proposed rule would apply.* The proposed rule would apply to Federal associations and insured institutions.

3. *Impact of the proposed rule on small institutions.* The proposal would affect all Federal associations equally and all insured institutions equally and will not have an adverse impact on small institutions. Differences in regulatory treatment between Federal associations and state-chartered insured institutions arise from the differences in authority pursuant to which the Board regulates these institutions. The proposed rule would not have a disproportionate impact on small institutions because the proposal seeks to delete outdated regulatory provisions and update regulatory provisions to preserve the authority of all Federal associations and insured institutions to offer all accounts which had been authorized by regulations of the DIDC. Further, the proposal would not involve any significant new reporting or compliance costs that could impose a disproportionate burden on small institutions.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with this proposal. However, the FRB has proposed to require early withdrawal penalties for certain time deposits of institutions subject to the reserve requirements of Regulation D. *See* 51 FR 27 (Jan. 2, 1986).

5. *Alternatives to the proposed rule.* There are no alternatives that would have less impact on small institutions, consistent with the intended result, the concerns expressed in the supplementary information set forth above, and the existing statutory requirements concerning regulation of deposit accounts.

The Board had determined to provide less than a 60-day comment period, with comments due by March 17, 1986, because: (1) A longer comment period would not permit the Board to have a final rule in effect by March 31, 1986, the date the DIDC and its regulations expire; (2) the Board wishes to make a final rule effective upon publication in the Federal Register as much before March 31, 1986, as possible to give affected entities as much notice as possible of the provisions of the final rule; and (3) many of the provisions of the proposal are technical and conforming amendments to the Board's rules necessitated by the expiration of the DIDC's regulations.

List of Subjects in 12 CFR Parts 526, 531, 532, 545, 555, 561, 563, 564, and 571

Accounting, Bank deposit insurance, Consumer protection, Credit, Electronic funds transfers, Federal Home Loan Banks, Investments, Manufactured homes, Mortgages, Reporting and recordkeeping requirements, and Savings and loan associations.

Accordingly, the Board hereby proposes to amend Parts 526, 531, and 532, Subchapter B, Chapter V; Parts 545 and 555, Subchapter C, Chapter V; and Parts 561, 563, 564, and 571, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

1. Revise Part 526 to read as follows:

PART 526—ADVERTISING OF ACCOUNTS

Sec.
526.1 Definitions.
526.2 Advertising interest or dividends on savings accounts.
526.3 Disclosure of acceptance.

Authority: Sec. 4, 59 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, Stat. 132, as amended (12 U.S.C. 1464); sec. 401, Pub. L. 96-221, 94 Stat. 132; secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 526.1 Definitions.

(a) *Member.* A member as defined in § 521.7 of this subchapter, other than a savings bank whose accounts are insured by the Federal Deposit Insurance Corporation of an institution whose home office is located on Guam.

(b) *Certificate account.* A savings account evidenced by certificate which must be held for a fixed or minimum term.

(c) *Savings account.* Any withdrawable account except a demand account as defined in § 563.6 of this subchapter, a tax and loan account, a note account, a United States Treasury general account, or a United States Treasury time deposit-open account.

(d) *Tax and loan account.* An account, the balance of which is subject to the right of immediate withdrawal, established for receipt of payments of Federal taxes and certain United States obligations; such accounts are not savings accounts or savings deposits.

(e) *Note account.* A note, subject to the right of immediate call, evidencing funds held by depositories electing the note option under applicable United States Treasury Department regulations. Note accounts are not savings accounts or savings deposits.

(f) *United States Treasury general account.* An account maintained in the name of the United States Treasury the balance of which is subject to the right of immediate withdrawal, except in the case of the closure of the member, and in which a zero balance may be maintained. Such accounts are not savings accounts or savings deposits.

(g) *United States Treasury time deposit-open account.* A noninterest-bearing account maintained in the name of the United States Treasury which may not be withdrawn prior to the expiration of 30 days' written notice from the United States Treasury, or such other period of notice as the Treasury may require. Such accounts are not savings accounts of savings deposits.

§ 526.2 Advertising interest or dividends on savings accounts.

The following rules apply to advertisements, announcements, or solicitations made by a member, or any person or organization soliciting savings accounts on a member's behalf, relating to interest or dividends paid on a member's savings accounts:

(a) *Annual rate of simple interest.* Interest or dividend rates shall be stated in terms of annual rates of simple interest or dividends.

(b) *Percentage yield based on 1 year.* If a percentage yield achieved by compounding interest or dividends during one year is stated, the annual rate of simple interest shall be stated with equal prominence, with reference to the basis of compounding. A percentage yield based on the effect of grace periods shall not be stated.

VOL
51
ISS
37
FE
25
1986
UMI

(c) *Percentage yield based on more than 1 year.* A total percentage yield, compounded or simple, based on more than 1 year, or an average annual percentage yield achieved by compounding during more than 1 year, shall not be indicated.

(d) *Time or amount requirements.* If a stated rate is payable only on savings accounts that meet time or amount requirements, such requirements shall be clearly and conspicuously stated. If the time requirement for a stated rate exceeds 1 year, the required number of years shall be stated with equal prominence, with an indication of any lower rate(s) applicable if the savings account is withdrawn earlier.

(e) *Penalty for early withdrawals.* A members shall include a clear and conspicuous notice stating whether the institution will or may impose a penalty for withdrawal from an account before maturity. Such notice may state, "A substantial penalty will (or may) be imposed for early withdrawal."

(f) *Profit.* Interest or dividends paid on a savings account shall not be called "profit."

(g) *Accuracy of advertising.* No representation shall be inaccurate or misleading.

(h) *Gold.* Any statement that any portion of interest or dividends is payable in gold (including gold coin), gold-related instruments or securities, or an amount of money determined in any manner related to gold is prohibited.

§ 526.3 Disclosure on acceptance.

A member accepting a certificate account deposit shall give the depositor a written description of any premature withdrawal penalty. Such statement need not be given on renewal of an existing certificate account.

PART 531—STATEMENTS OF POLICY

2. The authority citation for Part 531 is revised to read as follows:

Authority: Sec. 4, 80 Stat. 824, as amended (12 U.S.C.1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730; Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1947 Supp.; 3 CFR 1943–48 Comp., p. 1071, unless otherwise noted.

3. Remove § 531.10; redesignate § 531.11 as § 531.10; and amend the redesignated § 531.10 by removing the authority citation reference located at the end of the section.

PART 532—BOARD RULINGS

4. The authority citation for Part 532 is revised to read as follows:

Authority: Sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–44 Comp., p. 1071.

§ 532.1 [Amended]

5. Amend § 532.1 by inserting a comma after the word "principal" in the last sentance thereof and by adding "or interest or dividends earned on," following the newly inserted comma.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

6. The authority citation for Part 545 continues to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947; 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

7. Amend § 545.11 by revising paragraph (a) to read as follows:

§ 545.11 Insured accounts.

(a) Pursuant to 12 U.S.C. 1464(b)(1)(A), (B), a Federal association may issue insured accounts as defined in § 561.3 of this chapter in the form of demand accounts and savings accounts for indefinite or fixed terms ("certificate accounts") in the form of shares or deposits. An association may establish classes of accounts and specify terms and conditions for such classes of accounts. Amounts deposited in insured accounts may be in cash or porperty in which the association is authorized to invest. The authority of an association to issue insured accounts pursuant to this subject to any applicable provision of Part 563 of this chapter.

* * * * *

8. Amend § 545.12 by adding new paragraphs (c) and (d) to read as follows:

§ 545.12 Demand deposit accounts.

* * * * *

(c) Pursuant to 12 U.S.C. 1464(b)(1)(B), a Federal association shall not pay interest on demand deposits.

(d) For purposes of this section, demand deposits include only those accounts which are payable on demand within the meaning of § 563.6(b) of Subchapter D of Chapter 5 of this title.

9. Amend § 545.14 by revising paragraph (a) to read as follows:

§ 545.14 Determination and distribution of earnings.

(a) *Rates of return.* An association may issue savings accounts earning interest at different rates of return, which may be fixed at the time the account is issued or may vary on any basis specified at the time the deposit is accepted.

* * * * *

10 Amend § 545.16 by revising paragraph (c) to read as follows:

§ 545.16 Public deposits, depositaries, and fiscal agents.

* * * * *

(c) *Depositaries and fiscal agents.* Subject to regulation of the United States Treasury Department, an association may serve as a depositary for Federal taxes, as a Treasury tax and loan depository, or as a depository of public money and fiscal agent of the Government or any other instrumentality thereof when designated for that purpose by such instrumentality and approved by the Board, and may satisfy any requirement in connection therewith, including: maintaining accounts described in § 526.1(d), (e), (f), and (g) of this chapter; pleading collateral; and performing the services outlined in 31 CFR 202.3(b) (1981) or any section that supersedes or amends § 202.3(b).

11. Amend § 545.21 by revising paragraph (a)(1) to read as follows:

§ 545.21 Give-aways.

(a) *Definitions.* (1) "Give-aways" means any thing of value, or service performed in any part outside an association's premises, given without adequate payment, but not including (i) providing safety deposit facilities at reduced rental to members of the association, (ii) repaying to members of any part of amounts paid by them for safe deposit facilities located outside the association's facilities, or (iii) providing any service or thing of value as payment of interest.

* * * * *

12. Revise § 545.79 to read as follows:

§ 545.79 Gold transactions.

No Federal association shall engage in any transaction or activity, including the payment of interest or dividends, involving gold (including gold coins) or gold-related instruments or securities. Interest or dividends shall not be paid in an amount of money determined in any manner related to gold.

PART 555—BOARD RULINGS

13. The authority citation for Part 555 is revised to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended, 80 Stat. 383, 388; 12 U.S.C. 1464, 5 U.S.C. 552, 559, Reorg. Plan No. 3 of 1947; 3 CFR, 1943–1948 Comp., p. 1071.

14. Amend § 555.8 by revising paragraph (c) to read as follows:

§ 555.8 Savings accounts.

* * * * *

(c) *Sale of merchandise in connection with soliciting savings accounts.* Even though a Federal association may (under § 563.24 of Subchapter D) give away merchandise in connection with opening or increasing savings accounts, it may not, as an incident to powers prescribed in its charter, sell, except in connection with a promotional campaign, merchandise other than coin banks and similar coin-savings devices.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

15. The authority citation for Part 561 is revised to read as follows:

Authority: Pub. L. 95–147 of Oct. 28, 1977, Sec. 4, 82 Stat. 856, sec. 4, 80 stat. 824, and Sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437); Sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Secs. 401–407 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); Sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

16. Revise § 561.11 to read as follows:

§ 561.11 Savings accounts.

The term "savings accounts" means withdrawable or repurchasable shares, investment certificates, or deposits or other savings accounts, including money market deposit accounts and negotiable order of withdrawal accounts, held by insured members in an institution issued by the Corporation, or held by insured depositors in a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation.

§ 561.11b [Amended]

17. Amend § 561.11b by removing "§ 526.1(n)" and inserting in its place "§ 526.1(d)".

§ 561.11c [Amended]

18. Amend § 561.11c by removing "§ 526.1(o)" and inserting in its place "§ 526.1(e)".

§ 561.11d [Amended]

19. Amend § 561.11d by removing "§ 526.1(p)" and inserting in its place "§ 526.1(f)".

§ 561.11e [Amended]

20. Amend § 561.11e by removing "§ 526.1(g)" and inserting in its place "§ 526.1(g)".

21. Add a new § 561.11f to read as follows:

§ 561.11f Money Market Deposit Accounts.

(a) Money Market Deposit Accounts ("MMDAs") are accounts authorized for Federal associations pursuant to 12 U.S.C. 1464(b)(1) and for state-chartered insured institutions pursuant to applicable state law, and which otherwise meet the definition of savings accounts and on which the insured institutions reserves the right to require at least seven days notice prior to withdrawal of transfers of any funds in the account.

(b) Federal associations may offer MMDAs to any depositor and state-chartered insured institutions may offer MMDAs to any depositor as authorized by applicable state law.

22. Add a new § 561.11g to read as follows:

§ 561.11g Negotiable Order of Withdrawal Accounts.

(a) Negotiable Order of Withdrawable ("NOW") accounts are savings accounts authorized by 12 U.S.C. 1832 on which the insured institution reserves the right to require at least seven days notice prior to withdrawal or transfer of any funds in the account.

(b) For purposes of 12 U.S.C. 1832:

(1) An organization shall be deemed "operated primarily for religious, philanthropic, charitable, educational, or other similar purposes . . . . and not for . . . profit" if it is described in sections 501(c)(3) through (13), 501(c)(19), or 528 of the Internal Revenue Code; and

(2) The funds of a sole proprietorship or unincorporated business owned by a husband and wife shall be deemed beneficially owned by "one or more individuals."

PART 563—OPERATIONS

23. The authority citation for Part 563 is revised to read as follows:

Authority: Sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1463); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 96 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 526.1 [Amended]

24. Amend § 563.1(a) by removing "§ 526.1" and inserting in its place "§ 561.11g".

§ 563.1 [Amended]

25. Amend § 563.1(b) by removing "§ 545.14(a)(3)" and inserting in its place "§ 561.35" and by removing the authority citation located at the end of the section.

26. Revise § 563.3–1 to read as follows:

§ 563.3–1 Fixed-term accounts (certificate accounts).

(a) *General.* Subject to the requirements of this section, an insured institution may offer certificate accounts, as defined in § 526.1(b) of this chapter, in such form as the board of directors of the institution may authorize by resolution.

(b) *Payment of interest or other earnings.* An institution may pay earnings on a certificate account at a rate or anticipated rate of return determined at the time that the account is accepted. The rate or anticipated rate on a certificate account either may be fixed or may vary according to a schedule, index, or formula specified at the time that the account is accepted.

(c) *Limitations.* In issuing certificate accounts, no institution shall:

(1) Accept any fixed-term account for a term of less than seven days; or

(2) Issue any form of certificate account, unless the institution has complied with the requirements of § 563.1.

(d) *Disclosure.* Each certificate account shall include in its provisions and display in easily read type:

(1) The rate or anticipated rate of earnings to be paid, the basis, frequency, extent and limits of any variation in the rate over the term of the account, and the dates or frequency at which earnings are distributable;

(2) The amount of the account and the date of its issuance;

(3) The minimum term (or for a savings deposit, the term) and minimum-balance requirement;

(4) Any provisions limiting the right of the holder to make additions to the account or to withdraw all or any portion of the account prior to its maturity;

(5) Any penalty or penalties for withdrawal prior to expiration of the term;

(6) Any provisions relating to redemption, call, or repurchase;

(7) Any provisions relating to a renewal when the term expires;

(8) Any provisions relating to earning after expiration of the term or any renewal period; and

(9) Any provisions converting the rate of return on the certificate account, whenever the minimum balance requirement may cease to be met, to another rate of return.

(e) A certificate account may provide that an owner cannot withdraw any portion of such account prior to maturity except under such circumstances as may be set forth therein: *Provided,* That no

BEST COPY AVAILABLE

VOL 51 ISS 37 FE 25 1986 UMI

certificate may prohibit withdrawal in the event of death or adjudication of incompetence of an account owner.

§ 563.3-1 [Amended]

27. Amend § 563.3-1 by removing the authority citation located at the end of the section.

28. Add a new § 563.3-2 to read as follows:

§ 563.3-2 Negotiable Order of Withdrawal Accounts Authorized.

Insured institutions may offer negotiable order of withdrawal accounts as are authorized by 12 U.S.C. 1832.

§ 563.3-3 [Amended]

29. Amend § 563.3-3 by removing paragraph (d)(3) and redesignating paragraph (d)(4) as paragraph (d)(3); by removing paragraph (f) and redesignating paragraph (g) as paragraph (f); and by amending redesignated paragraph (f) by removing "§ 531.11" and inserting in its place "§ 531.10".

30. Revise § 563.6 to read as follows:

§ 563.6 Payment of insured accounts on demand.

(a) Except for checking accounts, tax and loan accounts, note accounts, and United States Treasury general accounts, no insured institution shall issue any insured account, or advertise or represent that it will pay holders of its insured accouts, on demand.

(b) As used in paragraph (a), an account which is payable on demand includes only those accounts from which the depositor may, as a matter of legal right, withdraw funds on demand or where the insured institution either requires or reserves the right to require less than seven days notice of withdrawal.

§ 563.3-3 [Amended]

31. Amend § 563.3-3, § 563.7-2, and § 563.31 by removing the authority citations located at the end of the sections.

PART 564—SETTLEMENT OF INSURANCE

32. The authority citation for Part 564 is revised to read as follows:

Authority: Sec. 308, Pub. L. 96-221; sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401, 402, 403, 405, 48 Stat. 1255, 1256, 1257, 1259, as amended (12 U.S.C. 1724, 1725, 1526, 1728); Reorg. Plan. No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Comp., p. 1071, unless otherwise noted.

§§ 564.1 and 564.2 [Amended]

33. Amend § 564.1 and § 564.2 by removing the authority citations located at the end of the sections.

PART 571—STATEMENTS OF POLICY

34. The authority citation for Part 571 is revised to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402, 406, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1729, 1730); sec. 5A, 47 Stat. 727, as amended by sec. 1, 64 Stat. 256, as amended; sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1464); sec. 408, 94 Stat. 160; Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071, unless otherwise noted.

35. Amend § 571.5 by revising paragraph (f) to read as follows:

§ 571.5 Mergers and transfers of assets and liabilities.

* * * * *

(f) *Liquidating dividends.* In acting on any application under § 546.2 or § 563.22 of this chapter, the Board will consider relevant to the insurance risk of the Federal Savings and Loan Insurance Corporation the effect on the financial condition of a member of any payment by a disappearing nonmember institution to holders of its savings accounts in contemplation of a merger with a member but before execution of a merger commitment.

* * * * *

§ 571.5 [Amended]

36. Amend § 571.5 by removing the authority citation located at the end of the section.

By the Federal Home Loan Bank Board.

Nadine Y. Penn,

Acting Secretary.

BILLING CODE 6720-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 841 0181]

Champion International Corp.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Stamford, Conn. paper company to sell within nine months the Tacoma, Wash. linerboard mill acquired from St. Regis Corp. to a Commission-approved buyer. The Tacoma mill was sold to Simpson Paper Co. pursuant to a previously-issued "Agreement to Hold Separate."

DATE: Comments must be received on or before April 28, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/G-402, Ernest Nagata, Washington, D.C. 20580. (202) 254-5038.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and Section 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Linerboard, Trade practices.

Agreement Containing Consent Order To Divest

The Federal Trade Commission having initiated an investigation into the proposed acquisition of the voting securities and certain assets of St. Regis Corporation ("St. Regis") by Champion International Corporation ("Champion"), and it now appearing that Champion is willing to enter into an agreement containing an order to divest certain assets;

It is hereby agreed by and between Champion, by its duly authorized officer and its attonery, and counsel for the Commission that:

1. St. Regis Corporation is a corporation organized under the laws of the State of New York with its office and principal place of business located at 237 Park Avenue, New York, New York 10017.

2. Champion is a corporation organized under the laws of the State of New York with its office and principal place of business located at One Champion Plaza, Stamford, Connecticut 06921.

3. Champion admits all jurisdictional facts set forth in the draft of complaint here attached.

4. Champion waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

d. All rights under the Equal Access to Justice Act.

5. This agreement shall not become part of the public record unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it and the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding. Commission determination whether to give final acceptance to this agreement may be postponed until after the Commission's final decision in *Weyerhaeuser Co.,* Docket No. 9150.

6. This agreement is for settlement purposes only and does not constitute an admission by Champion that the law has been violated as alleged in the draft of complaint here attached.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34 of the Commission's Rules, the Commission may, without further notice to Champion: (a) Issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to divest in disposition of the proceeding and (b) make information public in respect thereto. When so entered, the order to divest shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to Champion's address as stated in this agreement shall constitute service. Champion waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Champion has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Champion further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

For purposes of this order, the following definitions shall apply:

(A) "Champion" means Champion International Corporation, its predecessors, subsidiaries, divisions, groups, affiliate entities, and their directors, officers, employees, agents and representatives, and their successors and assigns.

(B) "St. Regis" means St. Regis Corporation, its predecessors, subsidiaries, divisions, groups, affiliate entities, and their directors, officers, employees, agents and representatives, and their successors and assigns.

(C) The "Merger" means Champion's acquisition of the voting securities of St. Regis.

(D) "Tacoma mill" means the Tacoma, Washington linerboard mill acquired by Champion from St. Regis, together with all its assets, title and properties, tangible and intangible, and its associated interests, rights and privileges, including without limitation all buildings, machinery, equipment, raw material resources (excluding timberlands and timber rights), inventory, customer lists, patents, trade names, trademarks, and other property of whatever description, together with all additions and improvements thereto, whether made before or after the Merger.

(E) "Commission" means the Federal Trade Commission.

It is ordered that:

(A) Within nine (9) months of the date of service of this order, Champion shall divest, absolutely and in good faith, the Tacoma mill.

(B) Divestiture of the Tacoma mill shall be made only to an acquirer or acquirers, and only in a manner, that receive the prior approval of the Commission. The purpose of the divestiture of the Tacoma mill is to ensure the continuation of the Tacoma mill as an ongoing, viable enterprise engaged in the same business in which it is presently employed and to remedy the lessening of competition resulting from the Merger as alleged in the Commission's complaint.

(C) If Champion has not divested the Tacoma mill within the 9-month period, Champion shall consent to the appointment of a trustee in any action that the Commission may bring pursuant to Section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. § 45(a)(1), or any other statute enforced by the Commission. In the event the court declines to appoint a trustee, Champion shall consent to the appointment of a trustee by the Commission pursuant to this order. The appointment of a trustee shall not preclude the Commission from seeking civil penalties and other relief available to it for any failure by Champion to comply with paragraphs II(A) through VI of this order.

(D) If a trustee is appointed by a court or the Commission pursuant to Paragraph II(C) of this order, Champion shall consent to the following terms and conditions regarding the trustee's duties and responsibilities:

1. The Commission shall select the trustee, subject to Champion's consent, which shall not be unreasonably withheld. The trustee shall be a person with experience and expertise in acquisitions and divestitures.

2. The trustee shall have exclusive power and authority to divest, at the trustee's discretion, the Tacoma mill. The trustee shall have nine (9) months from the date of appointment to find an acquirer, except that such period may be extended by the Commission, or if appointed by a court, by the court for an additional period of time if the trustee represents that negotiations are ongoing that are likely to lead to the execution of a purchase agreement. Any extension of time granted under this Paragraph in order to complete ongoing negotiations with a prospective acquirer shall be limited to that period of time necessary to execute a purchase agreement and in no event shall be longer than thirty (30) days. Any delays in divestiture caused by Champion shall extend the trustee's time for divestiture in accordance with the delay caused. The divestiture shall be subject to the prior approval of the Commission.

3. The trustee shall have full and complete access to the personnel, books, records and facilities of Champion, St. Regis, and the Tacoma mill as the trustee may deem necessary. Champion shall develop such financial or other information as such trustee may reasonably request. Champion shall cooperate with the trustee, and shall take no action to interfere with or impede the trustee's accomplishment of the divestiture.

VOL 51 ISS 37 FE 25 1986 UMI

4. The power and authority of the trustee to divest shall be at the most favorable price and terms available, but at no minimum price, consistent with the Order's absolute and unconditional obligation to divest and the purposes of the divestiture as stated in paragraph II(B).

5. The trustee shall serve at the cost and expense of Champion on such reasonable and customary terms and conditions as the Commission or a court may set, including the employment of accountants, attorneys or other persons reasonably necessary to carry out the trustee's duties and responsibilities. The trustee shall account for all monies derived from the sale and all expenses incurred. After approval by the court or the Commission of the account of the trustee, including fees for his or her services, all remaining monies shall be paid to Champion and the trustee's power shall be terminated. The trustee's compensation shall be based at least in significant part on a commission arrangement contingent on the trustee divesting the trust property.

6. Promptly upon appointment of the trustee and subject to the approval of the Commission and if the trustee was appointed by a court, subject also to the prior approval of the court, Champion shall, subject to the Commission's and, if appropriate, the court's prior approval and consistent with provisions of this order, execute a trust agreement that transfers to the trustee all rights and powers necessary to permit the trustee to cause divestiture.

7. If the trustee ceases to act or fails to act diligently, a substitute trustee shall be appointed.

8. The trustee shall report in writing to Champion and the Commission and, if the trustee was appointed by a court, the court every sixty (60) days concerning the trustee's efforts to accomplish divestiture.

III

It is further ordered that, pursuant to the requirements of Paragraph II, the Tacoma mill shall not be divested, directly or indirectly, to anyone who is at the time of the divestiture an officer, director, employee or agent of, or under the control, direction or influence of Champion, or anyone who is not approved in advance by the Commission.

IV

It is further ordered that, for a period of ten (10) years from the date this order becomes final, Champion shall not acquire, or acquire and hold, directly or indirectly, through subsidiaries or otherwise the prior approval of the Commission, the whole or any part of the stock, share capital, assets, any interest in or any interest of, any concern, corporate or non-corporate, engaged in the business of manufacturing linerboard in the West Coast market (as defined in the complaint), nor shall Champion for a period of ten (10) years from the date this order becomes final enter into any agreement, understanding or arrangement, without the prior approval of the Commission, with any such concern by which Champion obtains the market share, in whole or in part, of such concern in the above described product line and geographic market. For a period of ten (10) years from the date this order becomes final, Champion shall annually submit a verified report in writing to the Commission of compliance with this paragraph.

V

It is further ordered that, within sixty (60) days from the date of this order becomes final and every sixty (60) days thereafter until it has fully complied with Paragraph II of this order, Champion shall submit a verified report in writing to the Commission setting forth in detail the manner and form in which it intends to comply, is complying or has complied therewith.

All such reports shall include, in addition to such other information and documentation as may hereafter be requested, (a) a specification of the steps taken by Champion to make public its desire to divest the Tacoma mill, (b) a list of all persons or organizations to whom notice of divestiture has been given, (c) a summary of all discussions and negotiations together with the identity and address of all interested persons or organizations, and (d) copies of all reports, internal memoranda, offers, counteroffers, communications and correspondence concerning said divestiture.

VI

It is further ordered that, Champion shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or other change that may affect compliance obligations arising out of this order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission ("Commission") has accepted, subject to final approval, a consent agreement with Champion International Corporation of Stamford, Connecticut ("Champion"). The proposed complaint alleges that Champion's acquisition of St. Regis Corporation ("St. Regis") violated Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The consent agreement, as modified by a subsequent agreement entered into by Champion, would require Champion to sell within nine months the Tacoma, Washington linerboard mill acquired from St. Regis to a buyer approved by the Commission, unless Champion already has sold the mill to Simpson Paper Company or to any other person approved in advance by the Commission.

The consent order would also prohibit Champion for ten years from acquiring, without prior Commission approval, any interest in any corporation or business engaged in the manufacture of linerboard in the area west of the Rocky Mountains.

On August 28, 1984, the Commission entered into an "Agreement to Hold Separate" with Champion requiring that Champion hold separate the Tacoma, Washington linerboard mill until the Commission orders Champion to divest the mill (as required by the consent agreement) or until the Commission determines that divestiture is unwarranted. On August 27, 1985, the Commission modified that agreement to permit the sale of the Tacoma mill to Simpson Paper Company or to any other person approved in advance by the Commission. Subsequent to that date, the mill was sold to Simpson Paper Company.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 141 and 171

Proposed Customs Regulations Amendments Relating to Liens

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: The Tariff Act of 1930 authorizes Customs officers to refuse to permit delivery of certain merchandise when notified in writing of the existence of a lien for freight, charges, or contribution in general average until proof has been produced that the lien has been satisfied or discharged. The Trade and Tariff Act of 1984 amended the Tariff Act of 1930 to allow licensed customs brokers to file a lien for freight, charges or contribution in general average to the same extent that a carrier may file such a lien. This document proposes to amend the Customs Regulations to implement the statutory provisions.

DATES: Comments must be received on or before April 28, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Jerry Laderberg, Entry, Licensing, and Restricted Merchandise Branch, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229; 202-566-5765.

SUPPLEMENTARY INFORMATION:

Background

Section 564, Tariff Act of 1930, as amended (19 U.S.C. 1564), provides that whenever a Customs officer is notified in writing of the existence of a lien for freight, charges, or contribution in general average upon any imported merchandise sent to the appraiser's store for examination, entered for warehouse or taken possession of by him, he will refuse to permit delivery thereof from the public store or bonded warehouse until proof is produced that the lien has been satisfied or discharged.

For purposes of § 564, § 141.112(a)(1), Customs Regulations (19 CFR 141.112(a)(1)), defines "freight" to mean the carrier's charge for the transportation of the goods from the place of shipment in the foreign country to the final destination in the U.S. "Charges" are defined in § 141.112(a)(2), Customs Regulations (19 CFR 141.112(a)(2)), to mean the charges due to or assumed by the claimant of the lien which are incident to the shipment and forwarding of the goods to the destination in the U.S., but does not include the purchase price, whether advanced or to be collected, nor other claims not connected with the transportation of the goods. Section 141.112(a)(3), Customs Regulations (19 CFR 141.112(a)(3)), defines "general average" as the liability to contribution of the owners of a cargo which arises when a sacrifice of a part of the cargo has been made for the preservation of the residue or when money is expended to preserve the whole. A lien for contribution in general average only arises from actions impelled by necessity.

A customs broker is a person licensed by Customs under the provisions of section 641, Tariff Act of 1930, as amended (19 U.S.C. 1641) and Part 111, Customs Regulations (19 CFR Part 111), to transact Customs business on behalf of importers and other persons. Section 212(b)(7), Trade and Tariff Act of 1984, Pub. L. 98-573, amended section 564 by adding a sentence to that provision which stated that the section will apply to licensed customs brokers who otherwise possess a lien for the purposes states in section 564 upon merchandise under the statutes or common law, or by order of any court of competent jurisdiction, of any state. By virtue of this provision Congress has authorized customs brokers possessing a lien for freight, charges or contribution in general average upon merchandise held by Customs to file that lien with the proper Customs officer so that the merchandise will not be released from Customs custody until the lien is satisfied or discharged.

Prior to the passage of the Trade and Tariff Act, section 564 had been limited to liens filed by carriers or their agents. By amending section 564, Congress specifically provided that brokers may file liens with Customs for the purposes stated in the law. Because brokers now stand in the same position as carriers with respect to filing liens, it is proposed to add a definition of the word "claimant" to § 141.112(a). It is proposed to define "claimant" in a new § 141.112(a)(4) as a carrier, customs broker or the successors or assigns of either. In addition, it is proposed to amend § 141.112(a)(1), which defines "freight", by removing the reference to the "carrier's charge" and substituting, in its place, the word "charges" without any reference to whose charges they might be. It is further proposed to amend § 141.112(b), relating to notice of lien, and § 141.112(d), relating to merchandise entered for immediate transportation, to remove the reference to the carrier signing the notice of lien and filing the notice of lien and substitute a reference to the claimant.

Finally, it is proposed to correct certain clerical errors in § 171.44, Customs Regulations (19 CFR 171.44), relating to satisfaction on liens of forfeited property authorized for official use. Section 171.44 refers to the "satisfaction of liens for freight charges and contributions in general average." It is proposed to place a comma between the words "freight" and "charges" to reflect the statutory language and eliminate any confusion or limitation on the type of charges covered. It is further proposed to remove the "s" from the word "contributions."

Comments

Before adopting this proposal, consideration will be given to any written comments (preferably in triplicate) that are submitted timely to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Executive Order 12291

This document does not meet the criteria for a "major rule" as defined in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that, if adopted, the proposed regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, the proposed regulation is not subject to the regulatory analysis requirement of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was John E. Elkins, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Parts 141 and 171

Brokers, Customs duties and inspection, Imports, Liens.

Proposed Amendments to the Regulations

It is proposed to amend Parts 141 and 171, Customs Regulations (19 CFR Parts 141, 171), as set forth below.

PART 141—ENTRY OF MERCHANDISE

1. It is proposed that the general authority citation for Part 141 continue to read as set forth below:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

2. It is proposed to amend § 141.112(a)(1) by removing the words "carrier's charge" and inserting, in their place, the word "charges".

3. It is proposed to further amend § 141.112(a) by adding a new paragraph (4) to read as follows:

§ 141.112 Liens for freight, charges, or contribution in general average.

(a) * * *

(4) *Claimant.* "Claimant" means a carrier, customs broker or the successors or assigns of either.

4. It is proposed to amend §§ 141.112(b) and (d) by removing the word "carrier" and, in each instance, inserting, in its place, the word "claimant".

PART 171—FINES, PENALTIES, AND FORFEITURES

1. It is proposed that the general authority citation for Part 171 continue to read as set forth below:

Authority: 19 U.S.C. 66, 1592, 1618, 1624.

2. It is proposed to amend § 171.44 by placing a comma after the word "freight" in the second sentence of the paragraph and by removing the letter "s" from the word "contributions".

Approved: February 3, 1986.

Francis A. Keating, II,
Assistant Secretary of the Treasury.

William von Raab,
Commissioner of Customs.

BILLING CODE 4820-02-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 203

[Docket No. R-86-1233; FR-2004]

Mutual Mortgage Insurance and Rehabilitation Loans; Conveyance of One- to Four-Family Properties Occupied by Tenants or Former Mortgagors

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the current regulations at 24 CFR 203.670 through 203.683 under the general heading of Occupied Conveyance. Included in this proposed rule are revised criteria for determining when HUD will accept conveyance of a one- to four-family property by a mortgagee when there are tenants or former mortgagors in occupancy. The purposes of this proposed rule include: (1) Clarification of the habitability and eligibility criteria for occupied conveyance in accordance with the Department's current policy to maximize its ability to reduce its inventory of acquired properties, in addition to providing necessary protections for the occupants of acquired properties; (2) revision of the notice and occupant appeal procedures for departmental decisions involving occupied conveyance; and (3) streamlining of departmental procedures for the disposition of HUD-acquired properties.

DATE: Comment due date: April 28, 1986.

ADDRESS: Interested parties are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Jacqueline B. Campbell, Director, Single Family Property Disposition Division, Department of Housing and Urban Development, Room 9172, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone number (202) 755-5740. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

I. Background

Under the Department's single family mortgage insurance programs, HUD insures a mortgage securing a loan for the purchase of a one- to four-family property. See, e.g., sections 203, 204 and 221(d)(2) of the National Housing Act, 12 U.S.C. 1709, 1710 and 1715*l*(d)(2). The insurance contract provides that HUD will pay an insurance claim to a mortgagee upon the assignment of the mortgage or conveyance of the property to HUD after a default. As a condition to the receipt of mortgage insurance benefits in connection with a foreclosure or a deed in lieu of foreclosure, a mortgagee must ensure that the property is vacant, and must transfer good marketable title to the property to the Secretary of HUD. HUD regulations at 24 CFR Part 203, Subpart B contain the terms of the contract of mortgage insurance, as well as provisions for the conveyance of a one- to four-family property to HUD upon the foreclosure of a HUD-insured mortgage.

In certain circumstances, HUD will accept transfer of the property with tenants or former mortgagors in occupancy. The criteria and procedures governing the "occupied conveyance" are set out at 24 CFR 203.670 through § 203.683. This rule proposes to make a number of changes to these criteria and procedures.

II. Proposed Amendments

A. Properties Eligible for Occupied Conveyance

Current §§ 203.670 and 203.671 provide for occupied conveyance in the following cases:

1. (a) Occupancy of the property is essential to protect it from vandalism; *or* HUD owns a number of vacant homes in the area; *or* (in the case of two- to four-unit dwellings) the property's marketability would be enhanced by occupied conveyance; *or*

(b) A resident suffers from a temporary illness or injury that would be aggravated by the process of moving from the property; *and*

2. The property is habitable; *and*

3. The occupant meets specified eligibility criteria.

The proposed rule would eliminate the criteria pertaining to vandalism and the presence of HUD-owned vacant properties. In the peramble accompanying publication of HUD's current regulations (45 FR 59561, September 10, 1980), HUD stated that occupied conveyance could make a positive contribution to property disposition where it significantly reduces vandalism or the adverse effect

of a large number of vacant properties in a given area. Hence, the Department included consideration of the effect of vandalism and numerous vacant, HUD-owned properties in an area under its property disposition function in § 203.671 of the current regulations.

The Department's current policy is the same as it was in 1980—to reduce the inventory of acquired properties, in order to ensure the maximum return to the insurance funds under the National Housing Act, consistent with the need to maintain urban residential areas and communities. At the time the current regulations became effective in 1980, HUD's turnover rate for acquired one- to four-family properties was approximately 20 months. (The turnover rate approximates the average time that a property stays in HUD's inventory.) By September 30, 1985, the turnover rate had been reduced to approximately five months. In addition, the size of HUD's inventory of acquired properties has decreased in absolute terms nationwide (from approximately 22,000 in September 1980 to 16,000 in September 1985, including approximately 7,000 properties under contract of sale but not yet closed) and in individual areas where the inventory had been particularly large (e.g., from approximately 4,200 properties to 700 in Detroit, 3,000 to 1,200 in Chicago, 1,800 to 700 in Philadelphia, 1,900 to 400 in New York City, 1,700 to 200 in Atlanta). This change has been accompanied by a significant shift in the location of HUD's inventory of acquired properties from concentrations in large central cities of older metropolitan areas of the eastern United States to less densely populated communities and suburban areas in the western United States. This trend is seen in the fact that in September 1980, 93 percent of HUD's inventory was located in Regions I–V; in September 1985, those eastern regions accounted for 50 percent of the national inventory.

As a result of these trends, vandalism and concentrations of vacant, unsold HUD properties have decreased to the point that there is a decreased need for occupied conveyance as a means of protecting HUD's interest in acquired properties and preventing the decline of neighborhoods, which suggests the elimination from occupied conveyance determinations of the criteria with respect to vandalism and the presence of other HUD-owned properties.

At the same time, the significant incidence and magnitude of rental delinquencies in HUD-owned properties impel HUD to minimize the occurrence of occupied conveyances. In September 1985, more than 40 percent of the current occupants of HUD-owned properties were delinquent in their rent. Further, delinquent accounts of former tenants of HUD-owned properties totalled more than $2.75 million, after a write-off of $1 million of delinquent accounts as uncollectible.

Under § 203.670(c) of the proposed rule, occupied conveyance of a two- to four-family dwelling would be permitted if an otherwise eligible resident suffers from a temporary illness or injury that would be aggravated by moving, or if all of the following conditions are met: (1) The property's marketability would be enhanced by retaining occupancy in one or more of the units, (2) the property is habitable, and (3) the occupant is eligible. Section 203.607(d) would make clear that the conveyance of properties with one or more units occupied would be allowed only to the extent each unit or its occupants (as appropriate) meet the relevant occupied conveyance criteria.

The proposed rule (§ 203.670(b)) would limit the occupied conveyance of one-family properties to situations involving a temporary illness or injury. This limitation and the proposed different treatment to two- to four-family dwellings reflect HUD's experience that occupied one-family properties result in decreased marketability. Despite the favorable general trend in HUD's turnover rate for acquired properties, the Department continues to experience difficulty in selling occupied one-family properties. Unlike two- to four-family properties, the principal purchasers of one-family properties are potential mortgagors who desire to reside in the property, rather than use it for investment purposes.

Section 203.672(a) would limit occupancy based on illness or injury to three months (unless extended by the Secretary). Given the temporary nature of this ground for occupied conveyance, the Department believes that it is not appropriate to mandate that each property meet all the habitability requirements in proposed § 203.671 as a condition of occupied conveyance. The Department intends, however, to issue instructions to its field offices to assure that any habitability deficiency that could have an adverse impact on the occupants of the unit will be repaired, within the otherwise applicable dollar limitations.

The proposed rule would remove current §§ 203.671 and 203.672 as unnecessary under the revised occupied conveyance criteria.

B. Modification of the Habitability and Eligibility Criteria for Occupied Conveyances

Concerning the habitability criterion, the proposed rule would prohibit the occupied conveyance of properties requiring repair costs in excess of $500 for each residential unit and $500 for the external or common area (including the cost of abating any lead-based paint hazards) to bring the property up to minimum standards of habitability. These standards would be defined in terms of a list of structural, utility, and health and safety factors that is similar to the current regulations. The proposed rule reflects the Department's concern that occupied HUD-acquired properties should be conveyed by the mortgagee without the need for expensive repairs. HUD's experience under the current regulations is that the amount spent on repairs has been excessive and has resulted in unwarranted demands on the insurance funds. The current regulations (§ 203.673) set the maximum repair cost at 15 percent of the repaired value of the property (excluding the abatement of lead-based paint hazards). For two- to four-family dwellings, the current regulations (§ 203.681) state that the repair cost to be conveyed occupied may not exceed five percent of the estimated value of the property and, for the common areas, the cost of repair may not exceed 10 percent.

Section 203.673(b) of the current regulations provides for various assurances under the habitability criterion for mechanical systems in acquired properties. HUD has determined that the protections in proposed § 203.671(b)—requiring that the property be free from hazards that may adversely affect the health and safety of the occupants—are adequate to meet necessary habitability concerns. This protection would be sufficient to protect against hazards ensuing from defective mechanical systems, but would not be as far-reaching as the current regulation's provision that mechanical systems "have reasonable durability and economy, and have adequate capacity and quality" (§ 203.673(b)). Because the Department believes that such protections primarily relate to the long-term soundness of the mechanical systems of a residence and may not be necessary to provide for a habitable dwelling, proposed § 203.671 would not continue this feature.

Concerning the eligibility criterion, proposed § 203.672 would continue the substance of current § 203.674. Thus, those remaining in occupancy after conveyance would be required to

VOL 51
ISS 37
FE 25
1986
UMI

execute a month-to-month lease with HUD, to pay a "fair market rent" determined by HUD based on comparable properties, and to permit access to HUD staff or contractors for inspections and repairs.

The proposed rule would also continue use of an affordability test for all occupied conveyances. Current § 203.674(c) requires that the rent to be charged not exceed 40 percent of the occupant's total income, unless the occupant has been paying the required rental amount for the dwelling unit or there are other "compensating factors". Section 203.672(a)(3) of the proposed rule would reduce this percentage to 35 percent of the occupant's net effective income, defined as gross income, less city, State, and Federal income and Social Security taxes. The proposed standard is similar to one of the measures in § 203.33 of the Department's mortgage insurance eligibility regulations. The Department believes that the 35 percent standard is more consistent with current policy on an occupant's ability to afford a dwelling unit than the current 40 percent standard. In addition, the rule includes, as a possible "compensating factor" for a higher percentage of the occupant's net effective income to meet housing costs, situations where the occupant is able to rely on cash savings or contributions from family members. The rule also would make clear that the affordability test is to be applied against "total housing cost", defined as rent plus tenant-purchased utilities, rather than just "rent".

Because occupied conveyance on grounds of illness or injury if for a brief period (three months, unless extended by HUD), the proposed rule would not require the occupant to pay one month's rent in advance for this type of occupied conveyance. Unlike other occupied conveyances, there is no anticipated long-term tenancy that would warrant additional security protection against property damages during the term of the lease. Similarly, the proposed rule would not require an ill or injured occupant to have occupied the property for 60 days before HUD acquired it; the Department believes that such a requirement would impose an undue hardship on the occupant.

C. Procedural Requirements for Notice of Pending Acquisition, Requests for Continued Occupancy, and the Department's Final Decision on Requests

The proposed rule would retain, in modified form, the procedural guarantees of the current regulations for full notice and participation by occupants of HUD-acquired properties. Under proposed 24 CFR 203.673, notice of pending acquisition must be transmitted by the mortgagee to the mortgagor or to the person (head of household) who is actually occupying each unit of the property of the affected property 60 to 90 days before acquisition, and to the HUD Field Office. (Under the current regulations (§ 203.675) this 60- to 90-day advance notification is only required to be given to the HUD Field Office.) HUD believes that direct notification from the mortgagee to the occupant would generally provide more expeditious actual notice than the current practice of the HUD Field Office's contacting the occupant. The Department will provide guidance on the appropriate format for this notice by the mortgagee.

Currently, HUD procedures require that title to property be acquired by the mortgagee, and thereafter conveyed to HUD, as a prerequsite to the payment of a mortgage insurance claim. In 1983, Congress authorized the payment of mortgage insurance benefits on foreclosed single family properties without acquisition of title to the properties by the Secretary (see section 426, Housing and Urgan-Rural Recovery Act of 1983, amending section 204(a) of the National Housing Act, 12 U.S.C. 1710(a)). On Janaury 10, 1985, HUD published a proposed rule which would implement this authority (see 50 FR 1233). The aspect of such authority which is relevant to this proposed rule is that it would increase the potential for foreclosed HUD-insured properties to be purchased at the foreclosure sale by a party other than the foreclosing lender, thereby lessening the certainty of acquisition of the property by HUD. HUD anticipates publication of a final rule regarding payment of insurance claims without acquisition of title in the near future. The potential for acquisition of title at foreclosure by a party other than the mortgagee would be reflected in the notice given to the occupant under proposed § 203.673.

The proposed rule would maintain the substance of other procedural safeguards in the current regulations providing for full participation of occupants in HUD's determination whether to grant occupied conveyances (see proposed §§ 203.674 and 203.675). Included amoung these procedures are: (1) Provision for the request by an occupant for continued occupancy in the event of acquisition of the property by the Secretary; (2) a requirement that HUD inform a requesting occupant if the request is denied, with a statement of the reason or reasons for the decision and of the occupant's right to appeal the decision, including the right to an informal conference on the matter; (3) availability of pertinent material in HUD's possession for the occupant's review for purposes of an appeal of the Department's denail of a request for continued occupancy; (4) required consideration by HUD in its final decision of all issues raised by an occupant; and (5) procedural due process protections in § 203.677(c) of the current regulations.

The current regulations (§ 203.677(a)) permit occupants to review relevant information in HUD's possession after a request for continued occupancy is denied, without regard to whether an appeal is filed. The proposed rule (§ 203.675) would limit access to material that directly pertains to the conditions for continued occupancy, and would make it available only after an appeal or request for a conference has been filed. The Department believes that these provisions would continue basis due process protections contained in the current regulations, while focusing the scope and time of occupants' review to avoid unnecessary burdens on HUD Field Offices.

D. Procedures for the Disposition of HUD-Acquired Properties

Proposed §§ 203.676 and 203.677 would provide for a streamlined process for the disposition of HUD-acquired one- to four-family properties. Proposed § 203.676 provides for the conveyance of vacant HUD-acquired property where the occupant fails to request permission for continued occupancy within the time period specified in the rule. Proposed § 203.677 substantially maintains the grounds set out in the current regulations for the Department's commencement of eviction action.

E. Notice Requirements for the Inspection of HUD-Acquired Properties

Sections 203.672(a)(4) and §§ 203.672(b)(4) of the proposed rule would provide that, as a part of the eligibility requirements for continued occupancy, occupants must agree to allow access to the property, during normal business hours upon two days' advance notice, of HUD Field Office staff or by a HUD contractor, so that the property may be inspected and any necessary repairs accomplished. This notice may consist of a telephone communication with the occupant or a member of the occupant's family, a letter addressed to the occupant, or other method of actual notice. The proposed change in the timing of the notice (from 15 days in advance to two

days) would provide adequate notice to the occupant and would facilitate the HUD Field Office's scheduling of inspections and repairs.

III. Miscellaneous

This rule does not constitute a "major rule" as that term is defined in § 1(b) of the Executive Order on Federal Regulations issued by the President of February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, D.C. 20410.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned has determined that this rule would not have a significant economic impact on a substantial number of small entities. The rule would set a revised structure for the Department's decisions on occupied conveyances and does not have a significant economic impact on small business as mortgagors or mortgagees.

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) and have been assigned OMB control number 2502–0266.

This rule was listed as item number 768 in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 44166) under Executive Order 12291 and the Regulatory Flexibiltiy Act.

The Catalog of Federal Domestic Assistance program numbers affected by this rule are 14.108, 14.117, 14.119, 14.120, 14.121, 14.122, 14.123, 14.130, 14.132, 14.133, 14.140, 14.154, 14.159, 14.161, 14.163, 14.165, 14.166, 14.172, and 14.175.

List of Subjects in 24 CFR Part 203

Home improvement, Loan programs, Housing and community development, Mortgage insurance, Solar energy.

Accordingly, 24 CFR Part 203 is proposed to be amended as follows:

1. The authority citation for Part 203 would continue to read as follows:

Authority: Secs. 203 and 211, National Housing Act (12 U.S.C. 1709 and 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). In addition, Subpart C also issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

2. The Table of Contents for Part 203 would be amended by revising the §§ 203.670 through 203.679 to read as follows:

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

* * * * *

Subpart C—Servicing Responsibilities

203.679 Authority of HUD field office managers.

* * * * *

Subpart C—Servicing Responsibilities Occupied Conveyance

3. Sections 203.670 through 230.679 would be reissued to read as follows:

§ 203.670 Conveyance of occupied property.

(a) It is HUD's policy to reduce the inventory of acquired properties in a manner that will ensure the maximum return to the mortgage insurance funds, consistent with the need to preserve and maintain urban residential areas and communities.

(b) The Secretary shall accept conveyance of an occupied one-family residence only if the Secretary finds that an individual residing in the property: (1) Suffers from a temporary illness or injury that would be aggravated by the process of moving from the property and (2) meets the eligibility criteria set forth in § 203.672(a).

(c) The Secretary shall accept conveyance of a property containing two to four residential units with one or more of the units occupied if the Secretary finds that:

(1) An individual residing in the property: (i) Suffers from a temporary illness or injury that would be severely aggravated by the process of moving from the property and (ii) meets the eligibility criteria set forth in § 203.672(a); or

(2) All of the following conditions are satisfied:

(i) The property's marketability would be enhanced by retaining occupancy in one or more of the units;

(ii) The property is habitable as defined in § 203.671; and

(iii) The occupant or occupants meet the eligibility criteria set forth in § 203.672(b).

(d) Conveyance of a property under paragraph (c) with one or more units occupied shall be allowed only to the extent that each unit or its occupants (as appropriate) meet the criteria of that paragraph.

§ 203.671 Habitability.

(a) For purposes of § 203.670, a property is "habitable" if it meets the requirements of this section in its present condition, or will meet such requirements with the expenditure of not more than $500 per residential unit and $500 for external and common areas.

(b)(1) Each residential unit must contain:

(i) Heating facilities adequate for healthful and comfortable living conditions, taking into consideration the local climate;

(ii) Adequate electrical supply for lighting and for equipment used in the residential unit;

(iii) Adequate cooking facilities;

(iv) A continuing supply of hot and cold water; and

(v) Adequate sanitary facilities and a safe method of sewage disposal.

(2) The property shall be structurally sound, reasonably durable, and free from hazards that may adversely affect the health and safety of the occupants or may impair the customary use and enjoyment by the occupants. Unacceptable hazards include, but are not limited to, subsidence, erosion, exposure to the elements, exposed or unsafe electrical wiring, or an accumulation of minor hazards.

(c) If repairs are to be made while the property is occupied, the occupant must hold the Secretary harmless from any personal injury or property damage that may occur during the process of making

VOL
51
ISS
37
FE
25
1986
UMI

repairs. If temporary relocation of the occupant is necessary during the process of repair, no reimbursement for relocation expenses will be provided to the occupant.

§ 203.672 Eligibility for continued occupancy.

(a) Temporary occupancy because of illness or injury of an individual residing in the property will be limited to three months (unless extended by the Secretary), and will be permitted only if:

(1) A timely request is made in accordance with § 203.674, including documentation as required by § 203.673(b)(4).

(2) The occupant agrees to execute a month-to-month lease, at the time of acquisition of the property by the Secretary and on a form prescribed by HUD, and to pay fair market rent as determined by the Secretary. The rental rate shall be established on the basis of rents charged for other properties in comparable condition after completion of repairs (if any).

(3) The occupant's total housing cost (rent plus utility costs to be paid by the occupant) does not exceed 35 percent of the occupant's net effective income (gross income, less city, State and Federal income and Social Security taxes). However, a higher percentage may be permitted if the occupant has been paying at least the required rental amount for the dwelling or if there are other compensating factors (e.g., where the occupant is able to rely on cash savings or contributions from family members to cover total housing costs).

(4) The occupant agrees to allow access to the property, during normal business hours and upon a minimum of two days' advance notice, by HUD Field Office staff or by a HUD contractor, so that the property may be inspected and any necessary repairs accomplished.

(b) For a property with two to four units, an occupant who does not meet the temporary illness or injury criteria is eligible for continued occupancy only if:

(1) A timely request is made in accordance with § 203.674;

(2) The occupant agrees to execute a month-to-month lease, at the time of acquisition of the property by the Secretary and on a form prescribed by HUD to pay fair market rent as determined by the Secretary and to pay the rent for the first month in advance at the time the lease is executed. The rental rate shall be established on the basis of rents charged for other properties in comparable condition after completion of repairs (if any);

(3) The occupant will have been in occupancy at least 60 days before the date the mortgage acquires title to the property;

(4) The occupant agrees to allow access to the property, during normal business hours and upon a minimum of two days' advance notice, by HUD Field Office staff or by a HUD contractor, so that the property may be inspected and any necessary repairs accomplished; and

(5) The occupant's total housing cost (rent plus utility costs to be paid by the occupant) does not exceed 35 percent of the occupant's net effective income (gross income, less city, State, and Federal income and Social Security taxes). However, a higher percentage may be permitted if the occupant has been paying at least the required rental amount for the dwelling, or if there are other compensating factors (e.g., where the occupant is able to rely on cash savings or contributions from family members to cover total housing costs).

§ 203.673 Notice to occupants of pending acquisition.

(a) At least 60 days, but not more than 90 days, before the date on which the mortgagee reasonably expects to acquire title to the property, the mortgagee shall notify the mortgagor or the person (head of household) who is actually occupying each unit of the property of its potential acquisition by HUD. The mortgagee shall send a copy of this notification to the appropriate HUD Field Office.

(b) The notice shall provide occupants with a brief summary of the conditions under which continued occupancy is permissible and advise them that:

(1) Potential acquisition of the property by the Secretary is pending;

(2) The Secretary requires that properties be vacant at the time of conveyance to the Secretary, unless the mortgagor or other occupant can meet the conditions for continued occupancy in §§ 203.670 through 203.672;

(3) The occupant may request permission to remain in occupancy in the event of acquisition of the property by the Secretary by notifying the HUD Field Office in writing, with any required documentation, within 20 days of the date of the mortgagee's notice to the occupant;

(4) If the occupant seeks to qualify for continued occupancy under the temporary illness or injury provisions of § 203.670, the occupant shall provide to the HUD Field Office, at the time of the occupant's request for permission to remain in occupancy, documentation to support this claim. Documentation shall include an estimate of the time when the patient could be moved without severely aggravating the illness or injury, and a statement by a State-certified physician establishing the validity of the occupant's claim. HUD may require more than one medical opinion or may arrange an examination by a physician approved by HUD; and

(5) If the occupant fails to make a timely request, the property must be vacated before the scheduled time of acquisition.

(Approved by the Office of Management and Budget under OMB control number 2502-0268.)

§ 203.674 Request for continued occupancy.

An occupant may request permission to continue to occupy the property following conveyance to the Secretary by notifying the HUD Field Office in writing, within 20 days after the date of the mortgagee's notice of pending acquisition. Where appropriate, verification of temporary illness or injury as described in § 203.673(b)(4) shall be submitted within this time period. The HUD Field Office shall notify the mortgagee in writing that an occupied conveyance has been requested.

(Approved by the Office of Management and Budget under OMB control number 2502-0268.)

§ 203.675 Decision to approve or deny a request.

(a) HUD shall provide written notification of its decision to an occupant who makes a timely request to continue to occupy the property. If the decision is to deny the request, the notice to the occupant shall include a statement of the reason or reasons for the decision and of the occupant's right to appeal. The occupant may appeal HUD's decision within 20 days after the date of HUD's notice. The appeal shall be in writing, and the occupant may provide documentation intended to refute the reasons given for HUD's decision. The occupant may also request an informal conference with a representative of the HUD Field Office Manager. A request for an informal conference shall be made in writing within 10 days after the date of HUD's notice. The occupant may be represented at the conference by counsel or by other persons with pertinent expert knowledge or experience.

(b) After notification that HUD had denied a request for continued occupancy, the occupant, on his or her request, shall be permitted to review all appropriate material in HUD's possession (including a copy of the inspection report if the request is denied because the property is not habitable as defined in § 203.671). Only material in HUD's possession that directly pertains to conditions for continued occupancy under §§ 203.670 through 203.672 may be considered material appropriate for an occupant's review under this paragraph. This review shall be limited to a review of material for purposes of the informal conference or the appeal of the Department's decision.

(c) After consideration of an appeal, the HUD Field Office shall notify the applicant in writing of HUD's final decision. If the decision is to deny the occupant's request, the notice to the occupant shall reflect consideration of the issues raised by the occupant.

(d) If, after consideration of an appeal, the Field Office Manager denies the request for new or additional reasons, the occupant shall be afforded an opportunity to appeal the Field Office Manager's decision under the procedures of paragraphs (a)–(c) of this section.

§ 203.676 Conveyance of vacant property.

(a) HUD shall require that the property be conveyed vacant if the occupant fails to request permission to continue to occupy within the time period specified in § 203.674, or fails to appeal a decision to deny occupied conveyance within the time period specified in § 203.675(a).

(b) If the mortgagee has not been notified by HUD within 45 days of the date of the notification of pending acquisition that a request for continued occupancy is under consideration, the mortgagee shall convey the property vacant.

§ 203.677 Continued occupancy after conveyance.

(a) Occupancy of HUD-owned property is subject to termination when necessary to facilitate preparing the property for sale and completing the sale.

(b) HUD shall notify the occupant to vacate the property and, if necessary, will take appropriate eviction action in any of the following cases:

(1) Failure of the occupant to execute the lease required by § 203.672, or failure to pay the rental amount required and to comply with the terms of the lease;

(2) Failure of the occupant to allow access to the property upon request in accordance with § 203.672;

(3) Necessity to prepare the property for sale; or

(4) Assignment of the property by the Secretary to a different use or program.

§ 203.678 Approval of occupancy after conveyance.

Where HUD has accepted an occupied conveyance, HUD may, at any time after conveyance of the property, make a determination regarding continued occupancy in accordance with the conditions for the initial approval of occupied conveyance. This determination shall be in accordance with HUD's obligations under the terms of the month-to-month lease.

§ 203.679 Authority of HUD Field Office Managers.

Field Office Managers shall act for the Secretary in all matters relating to assignment and occupied conveyance determinations. The decision of the Field Office Manager shall be final and not subject to further administrative review.

2. Sections 203.680 through 203.683 would be removed.

Dated: February 12, 1986.

Silvio J. DeBartolomeis,

Acting General Deputy Assistant Secretary for Housing-Deputy, Federal Housing Commissioner.

[FR Doc. 86-3906 Filed 2-24-86; 8:45 am]

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 34

Yosemite National Park, CA; El Portal Administrative Site Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: These regulations are proposed to provide for use and management, protection of natural and cultural resources and fire protection within the El Portal Administrative Site. The action will promote the orderly use and management of the administrative site in furtherance of the implementation of the Yosemite General Management Plan and assure a timely and effective official response to law enforcement and fire emergencies in this isolated rural community.

DATES: Written comments, suggestions, or objections will be accepted until March 27, 1986.

ADDRESS: Comments should be addressed to: Superintendent, NPS Administration Building, Room No. 6, Yosemite National Park, P.O. Box 577, Yosemite National Park, CA 95389.

FOR FURTHER INFORMATION CONTACT: Robert O. Binnewies, Superintendent, Yosemite National Park, Telephone: (209) 372-4461.

SUPPLEMENTARY INFORMATION:

Background

The Act of September 2, 1958, (72 Stat. 1772; 16 U.S.C. 47-1(*e*)) established the El Portal Administrative Site, west of Yosemite National Park, directing the Secretary of the Interior to administer the site so that certain facilities and services could be located outside the park. The legislation provided that the administrative site would not be subject to the laws and regulations governing the park. To this end, the legislation further provided that the Secretary shall have supervision, management and control of the area and shall make and publish such rules and regulations as he/she may deem necessary and proper for its use and management.

The proposed regulations set forth below are the product of a process that began with the Yosemite General Management Plan. As currently envisioned, El Portal will serve as a combined residential area, administrative site and visitor information area. The concepts for the development of the El Portal Administrative Site have been considered and, as appropriate, incorporated into the regulations.

Generally, the proposed rules for the administrative site follow the intent of the regulations used within other National Park Service areas.

Natural and cultural resource protection rules, such as those relating to camping, the use of firearms, fishing, sanitation, scientific specimens and wildlife use, follow closely the wording of similar regulations in effect within park boundaries or are adopted from the general regulations. The proposed section on fire prevention and fire protection is being promulgated to protect residents, visitors, property and resources within the administrative site. Visitor protection rules, keeping of the peace, orderly management, special events, property security, controlled substances, and boating also follow the rules in effect within other National Park Service areas or adopt the same. The El Portal Administrative Site is not part of the park so the level of restriction is generally lower than would apply within Yosemite National Park.

Boating regulations are those necessary to provide for the protection of aquatic resources, safety of persons and orderly management of boating activities.

Protective custody regulations parallel those applicable elsewhere in the state

VOL 51
ISS 37
FE 25
1986
UMI

of California and assure that the National Park Service will handle these situations in a manner consistent with California codes which are necessary to provide for the safety and protection of juveniles and mentally impaired persons.

Vehicle and traffic rules are those necessary to provide for the safe and orderly management of the administrative site road system and the vehicular traffic thereon.

The adopted regulations for commercial and private operations are those necessary only to achieve the objectives of the Act of September 2, 1958; namely, to support and provide necessary services for the administration of Yosemite National Park. Accordingly, a permit is required for certain business activities.

Public Participation

The policy of the National Park Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed regulations to the address noted at the beginning of this proposed rulemaking.

Drafting Information

The following individuals participated in the drafting of these regulations: Steve Hickman, Harry Steed, James Tucker and Don Cross; all of Yosemite National Park.

Paperwork Reduction Act

The information collection requirements needed to issue permits under this Part have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1024–0026.

Compliance with Other Laws

The Department of the Interior has determined that this is not a major rule under Exective Order 12291 (February 19, 1981), and certifies that the document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This conclusion is based on the finding that while several businesses already operate within El Portal under permit or contract from the National Park Service, little should change under the proposed regulations. Security and fire protection should be enhanced, creating a more secure business environment. The National Park Service has determined that this proposed rulemaking will not have a significant effect on the quality of the human environment, health and safety because it is not expected to:

(a) Increase public use to the extent of compromising the nature and character of the area or causing physical damage to it;

(b) Introduce noncompatible uses which might compromise the nature and characteristics of the area, or cause physical damage to it;

(c) Conflict with adjacent owners or occupants; or

(d) Cause a nuisance to adjacent owners or occupants.

Based on this determination, this proposed rulemaking is categorically excluded from the procedural requirements of the National Environmental Policy Act (NEPA) by Departmental regulations in 516 DM 6, (49 CFR 21438). As such, neither an Environmental Assessment nor an Environmental Impact Statement has been prepared.

List of Subjects in 36 CFR Part 34

National parks, Administrative site, Penalties, Traffic regulations.

In consideration of the foregoing, it is proposed to amend 36 CFR Chapter I by adding a new Part 34, to read as follows:

PART 34—EL PORTAL ADMINISTRATIVE SITE REGULATIONS

Sec.
34.1 Purpose.
34.2 Applicability and scope.
34.3 Definitions.
34.4 Applicable regulations.
34.5 Fires.
34.6 Cultivation of controlled substances.
34.7 Preservation of natural, cultural and archeological resources.
34.8 Protective custody.
34.9 Saddle and pack animals.
34.10 Boating operations.
34.11 Information collection.

Authority: 16 U.S.C. 1, 3, 47–1.

§ 34.1 Purpose.

These regulations provide for the protection of persons, property and natural and cultural resources within the El Portal Administrative Site.

§ 34.2 Applicability and scope.

(a) The regulations in this part apply to all persons entering, using, visiting, residing on or otherwise within the boundaries of the El Portal Administrative Site. All regulations apply throughout the site, with certain specific exceptions provided for leased lands.

(b) The regulations in this part may be enforced only by persons authorized to enforce the other provisions of this chapter.

§ 34.3 Definitions.

When used in regulations in this part: "Administrative site" means all of the federally owned or controlled lands and waters administered by the National Park Service pursuant to 16 U.S.C. 47–1 (72 Stat. 1772), in the vicinity of El Portal, California.

"Leased lands" means all lands within the administrative site in when there is a lawful possessory interest in addition to that of the National Park Service, which have been leased, permitted or otherwise assigned by the Superintendent. All other lands within the administrative site are nonleased lands.

§ 34.4 Applicable regulations.

The following sections and paragraphs of this chapter apply to the administrative site and are hereby incorporated and made a part of this part except as modified by the regulations in this part:

(a) General Provisions.

(1) 1.2(e) Applicability and scope; exception for administrative activities.
(2) 1.3 (a) and (d) Penalties.
(3) 1.4 Definitions.
(4) 1.5 Closures and public use limits.
(5) 1.6 Permits.
(6) 1.7 Public notice.
(7) 1.8 Information collection.

(b) Resource Protection, Public Use and Recreation.

(1) 2.1 Preservation of natural, cultural and archeological resources.
(2) 2.2 Wildlife protection.
(3) 2.3 (a), (c) and (f) Fishing.
(4) 2.4 Weapons, traps and nets.
(5) 2.5 Research specimens.
(6) 2.10 Camping and food storage.
(7) 2.11 Picnicking.
(8) 2.12 Audio disturbances.
(9) 2.13 Fires.
(10) 2.14 Sanitation.
(11) 2.15 (a) (1), (3), (4) and (5); (c); (d); (e) and (f) Pets.
(12) 2.17 Aircraft and air delivery.
(13) 2.21 Smoking.
(14) 2.22 Property.
(15) 2.23 Recreation fees.
(16) 2.30 Misappropriation of property and services.
(17) 2.31 Trespassing, tampering and vandalism.
(18) 2.32 Interfering with agency function.
(19) 2.33 Report of injury or damage.
(20) 2.34 Disorderly conduct.
(22) 2.35 Alcoholic beverages and controlled substances.
(23) 2.36(a) Gambling.
(24) 2.37 Noncommercial soliciting.

(25) 2.38 Explosives.
(26) 2.50 Special events.
(27) 2.51 Public assemblies, meetings.
(28) 2.52 Sale or distribution of printed matter.
(29) 2.61 Residing on Federal lands.
(30) 2.62 Memorialization.

(c) Boating and Water Use Activities.

(1) 3.1 Applicable regulations.
(2) 3.3 Permits.
(3) 3.4 Accidents.
(4) 3.5 Inspections.
(5) 3.6 (a) and (b) Prohibited operations.
(6) 3.21 (a) (1), (2) and (b) Swimming and bathing.

(d) Vehicles and Traffic Safety.

(1) 4.1 State law applicable.
(2) 4.11 (a) and (b) Load, weight, length, and width limitations.
(3) 4.14 Reckless or careless driving.
(4) 4.15 Report of vehicle accident.
(5) 4.17 Speed limits.
(6) 4.18 Traffic control and signs.
(7) 4.19 (a) and (c)(2) Travel on roads and designated routes.

(e) Commercial and Private Operations.

(1) 5.1 Advertisements.
(2) 5.2 Alcoholic beverages; sale of intoxicants.
(3) 5.3 Business operations.
(4) 5.5 Commercial photography.
(5) 5.7 Construction of buildings or other facilities.
(6) 5.8 Discrimination in employment practices.
(7) 5.9 Discrimination in furnishing public accommodations and transportation services.
(8) 5.13 Nuisances.
(9) 5.14 Prospecting, mining, and mineral leasing.

§ 34.5 Fires.

(a) All wildland, vehicular or structural fires shall be reported to the Superintendent immediately.

(b) Nonconflicting provisions of the California State Forest and Fire Laws and Regulations are adopted as a part of this Part. Violation of any of these regulations is prohibited.

(c) The kindling of any open fire, including the burning of debris, is prohibited without a permit from the Superintendent. Designated burning days and burning procedures may be established by the Superintendent.

(d) On undeveloped, untended or otherwise open land, operating any equipment powered by an internal combustion engine without a spark arrestor maintained in effective working order is prohibited. Such spark arrestor shall also meet either the USDA Forest Service Standard 5100-1*a* or the Society of Automotive Engineers Recommended Practice J335 or J350.

(e) The Superintendent may, during periods of high fire danger or diminished water supply, temporarily limit use and consumption of domestic water. These limitations shall be published. Violation of a limitation established by the Superintendent is prohibited.

(f) An owner or operator of a commercial establishment located within the administrative site shall comply with applicable standards prescribed by the National Fire Codes, Federal OSHA, CAL OSHA and other applicable laws, regulations and standards.

§ 34.6 Cultivation of controlled substances.

In addition to the provisions of § 2.35 of this chapter, the planting, cultivating, harvesting, drying or processing of a controlled substance, or any part thereof, is prohibited.

§ 34.7 Preservation of natural, cultural and archeological resources.

In addition to the provisions of § 2.1 of this chapter, the following are in effect:

(a) Upon nonleased lands, the cutting or removal of any tree, plant, or shrub or part thereof is prohibited without a permit from the Superintendent.

(b) Upon leased lands, the cutting or removal of any tree, plant, shrub or part thereof that is six inches or less in diameter, for the purpose of maintaining its proper health and appearance or for reasons of public safety, is allowed. Cutting or removing any vegetation exceeding six inches in diameter without a permit from the Superintendent is prohibited.

(c) Upon leased lands, the planting of personal gardens or domestic trees is allowed subject to all applicable Federal, State, and County agricultural regulations. *Provided, however:* the Superintendent may temporarily suspend this general privilege in the event of a water shortage or agricultural pest or disease emergency.

(d) Wood gathering is prohibited except in accordance with conditions and within areas designated by the Superintendent. Violation of such conditions or gathering wood outside of designated areas is prohibited.

§ 34.8 Protective custody.

(a) An authorized person, with reasonable cause to believe that a juvenile found within the administrative site has been unlawfully abused or neglected by any person living in the juvenile's place of residence, may take such juvenile into protective custody. An authorized person taking protective custody action pursuant to this paragraph shall deliver the juvenile to the care and custody of the appropriate state or local authorities.

(b) An authorized person, with reasonable cause to believe that a person found within the administrative site is either temporarily or permanently psychologically or mentally impaired to a degree that the person is gravely disabled or that presents a clear danger to that person or another, may take such person into protective custody. An authorized person taking protective custody action pursuant to this paragraph shall deliver the person to the care of the Mariposa County Mental Health Authorities for an initial 72-hour evaluation in accordance with applicable provisions of the California Welfare and Institutions Code.

(c) An authorized person may take into protective custody any juvenile found within the administrative site who is deemed to be a runaway according to applicable provisions of the California Welfare and Institutions Code. An authorized person taking protective custody action pursuant to this paragraph shall deliver the juvenile to the care and custody of the Mariposa County Sheriff's Office.

(d) An authorized person may take into protective custody any adult person found within the administrative site who is under the influence of alcohol only. Such persons shall be detoxified and upon attaining a blood alcohol reading of less than .05, may be released without further proceeding in a manner consistent with applicable sections of the California Penal Code.

§ 34.9 Saddle and pack animals.

The use of saddle and pack animals is prohibited without a permit from the Superintendent.

§ 34.10 Boating operations.

The launching or operation of a motor boat is prohibited.

§ 34.11 Information collection.

The information collection requirements contained in §§ 34.5, 34.7 and 34.9 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, and assigned clearance number 1024–0026. This information is being collected to solicit information necessary for the Superintendent to issue permits and other benefits, and to gather information. This information will be used to grant administrative benefits. The obligation to respond is required to obtain a benefit.

BILLING CODE [illegible]

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-8-FRL-2974-2]

South Dakota; New Source Review in Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: In this action EPA proposes to disapprove South Dakota Regulations for New Source Review in nonattainment areas and to re-impose a moratorium on the issuance of permits for major new sources of particulates in the Rapid City nonattainment area. These actions are necessary because the South Dakota regulations do not meet the requriements of Part D of the Clean Air Act. The effect of the proposed actions would be that no sources of particulate matter greater than 100 tons per year may be constructed, or modified to increase emissions by more than 25 tons per year within the Rapid City nonattainment area.

DATES: Comments are due March 27, 1986.

ADDRESSES: Written comments should be addressed to: Robert R. DeSpain, Chief, Air Programs Branch, Environmental Protection Agency, One Denver Place, Suite 1300, 999 18th Street, Denver, Colorado 80202-2413.

Copies of the state submittal are available for public inspection between 8:00 a.m. and 4:00 p.m., Monday through Friday at the following location: Environmental Protection Agency, Region VIII, Air Programs Branch, One Denver Place, 999 18th Street, Denver, Colorado 80202-2413.

FOR FURTHER INFORMATION CONTACT: Dale Wells, Air Program Branch, One Denver Place, 999 18th Street, Denver, Colorado 80202-2413, (303) 293-1773.

SUPPLEMENTARY INFORMATION:

In 1977, Congress amended the Clean Air Act to remedy widespread persistence of violations of national ambient air quality standards. Congress called upon EPA in a new section 107(d), 42 USC 7407(d), to designate those areas of the country that were still experiencing violations, and then upon the States in a new Part D, 42 USC 7501-07, to revise their state implementation plans (SIPs) to assure attainment as expeditiously as practicable but no later than certain deadlines. Under sections 172(b)(6) and 173 of new Part D, these SIP revisions were also to include permit programs for the preconstruction review of new stationary sources. Congress further provided that a ban on construction was to take effect in a designated nonattainment area on July 1, 1979, if the State had not submitted and received approval of the necessary Part D SIP revision before then. *See* section 110(a)(2)(I), 42 USC 7410(a)(2)(I); 40 CFR 52.24 (1985).

In 1978, EPA designated the Rapid City area of South Dakota as nonattainment for particulate matter. It designated no other area in South Dakota as nonattainment. 43 FR 8962 (March 3, 1978); 43 FR 40412 (September 11, 1978). The Rapid City area continues to be the only nonattainment area in the State. 40 CFR 81.342 (1985).

In July 1, 1979, the construction ban came into effect, because the State had not received full EPA approval for its Part D SIP for the Rapid City area. Shortly thereafter, on July 30, EPA disapproved a new source review (NSR) program that the State had submitted to meet the requirements of sections 172(b)(6) and 173. 44 FR 44494.

The State subsequently adopted a new NSR program, which took effect on July 28, 1980. About a week later, on August 7, 1980 (45 FR 52676), EPA promulgated extensive revisions to its regulations governing new source review in nonattainment areas. States were to submit by May 1981 such amendments to their NSR programs as would conform them to the new federal provisions.

In April 1981 (46 FR 21199), EPA proposed action on the new NSR program. Evaluating it against the federal requirements in effect prior to August 1980, EPA found several deficiencies. Nevertheless, it proposed to approve the program on an interim basis, inasmuch as the State was under an obligation to conform it shortly to the new federal requirements and the program would operate only in one narrow area, the Rapid City area. EPA warned, however, that, if the State failed to submit any necessary conforming amendments, it would propose to disapprove the program. 46 FR 21200 (col. 2).

On November 3, 1981 (46 FR 54542), EPA, having received no comments on the proposal, approved the NSR program and consequently lifted the ban on construction in the Rapid City area. EPA repeated its rationale, as follows:

> EPA is approving the South Dakota submittal in spite of minor deficiencies in the New Source Review rules which were identified in EPA's proposed rulemaking notice. The State is in the process of revising these regulations to comply with EPA's August 7, 1980 rulemaking and EPA believes that use of the rules being approved today in the interim will have no adverse impact on air quality. [46 FR 54542 (col. 1).]

On December 21, 1981, the State submitted revisions to its NSR program that it had adopted to conform them to the new federal requirements. These revisions also contained several deficiencies in relation to the new requirements, namely: 1) The definition of "contemporaneous" did not include a specific time period for crediting decreases in emissions; 2) there was no requirement pursuant to 40 CFR 51.18(j)(5)(ii) concerning the relaxation of enforcement limitations established after August 7, 1980 (such as restrictions on the hours of operation of sources) which would make sources with relaxed limitations major sources and thus subject to New Source Review; and 3) emission credits for shutdown sources were not limited to those with replacement units and those which were shut down after August 7, 1977.

Following identification of the above deficiencies, the State agreed by letter to administer its NSR regulations in conformity with EPA requirements and to address the deficiencies in a subsequent rulemaking. With respect to the relaxation of operating limitations identified in (2) above, the State concluded that the relaxation language was not necessary since no existing source had escaped NSR review as a result of such a relaxation and the State had committed to administer its program to avoid the problem in the future. However, the state's regulation also included a plant-wide definition of source, as promulgated by EPA on October 14, 1981 (46 FR 50771). As a result, EPA's action on the December 21, 1981, submittal was delayed by litigation relating to this definition. On June 25, 1984, the Supreme Court unanimously ruled that EPA has the discretion to allow states to use a single, plantwide definition of source for new source review purposes in nonattainment areas. *Chevron U.S.A., Inc. v. NRDC*, 104 S.Ct. 2778 (1984). As a result of this ruling, EPA is now able to act on South Dakota's submittal.

A reanalysis of the State's NSR regulation and actual program operation since the revision was submitted indicates that the previously identified problems are more serious than originally thought. For instance, the State has issued a permit to a source located in the Rapid City nonattainment

area and has classified the source as minor by limiting the operating hours to hold particulate emissions under 100 tons per year. The source now wants to amend the permit to increase the hours of operation, and nothing in the State regulation appears to prevent such a relaxation. This permit action would conflict with the EPA requirements that a source becoming a major source as a result of a relaxation be subject to NSR as if it were a new source. Without New Source Review of such relaxation, the increased emissions may interfere with attainment or maintenance of the National Ambient Air Quality Standards. Furthermore, the other minor problems EPA identified with the State's regulation (for example, the definition of "contemporaneous") were never corrected. While these deficiencies may have been acceptable on an interim basis, they are not acceptable for the long run.

As a result, EPA is now proposing to disapprove the South Dakota nonattainment area NSR regulations because they do not meet the requirements of 40 CFR 51.18. Section 110(a)(2)(I) of the Clean Air Act requires that unless there is an approvable NSR regulation for nonattainment areas, no major stationary sources of the nonattainment pollutant may be constructed or modified within such areas. A moratorium on the issuance of permits for major stationary sources of particulates (sources emitting 100 tons per year or more) in the Rapid City nonattainment area is, therefore, proposed to be re-established until an acceptable NSR regulation is approved or the area is redesignated as attainment for particulates.

Under the Regulatory Flexibility Act 5 U.S.C. 605(b), EPA must assess the impact of proposed or final rules on small entities. If EPA takes final action as proposed today, a moratorium on the construction and modification of major stationary sources will go into effect in the nonattainment areas of the State affected. EPA does not have sufficient information to determine the impacts such a moratorium may have on small entities, because it is difficult to obtain reliable information on future plans for business growth. Even if this action, when promulgated, were to have a significant impact, the Agency could not modify its action. Under the CAA, the imposition of a construction moratorium is automatic and mandatory whenever the Agency determines that an implementation plan for a nonattainment area fails to meet the requirements of Part D of the CAA.

Under Executive Order 12291, today's action is not "Major." It has been submitted to the Office of Management and Budget for review.

This rulemaking is being proposed pursuant to sections 110(a)(2)(A)-(K), 110(a)(3), 172, 173, and 301(a) of the Clean Air Act, as amended.

Authority: 42 U.S.C. 7401-7642.

40 CFR Part 261

[SW-FRL-2970-8]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to amend its regulations under the Resource Conservation and Recovery Act (RCRA) by listing as hazardous three wastes generated during the production of diphenylamine by the condensation of aniline. The Agency also is proposing to add diphenylamine and quinoline to the list of commercial chemical products which are hazardous wastes when discarded and to add quinoline to the list of hazardous constituents identified in Appendix VIII of Part 261. The effect of this proposed regulation, if promulgated, is that all of these wastes would be subject to regulation as hazardous under 40 CFR Parts 262-266, and Parts 270, 271, and 124.

DATES: EPA will accept public comments on this proposed rule until April 11, 1986. Any person may request a hearing on this amendment by filing a request with Eileen B. Claussen, whose address appears below, by March 12, 1986.

ADDRESSES: Comments should be sent to the Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments should identify the regulatory docket "Listing Diphenylamine." Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. The public docket for this amendment is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: The RCRA Superfund Hotline at (800) 424-9346 or at (202) 382-3000. For technical information contact Edwin F. Abrams, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-4787.

SUPPLEMENTARY INFORMATION:

I. Background

On May 19, 1980, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published a list of hazardous wastes generated from specific sources. This list has been amended several times and is published in 40 CFR 261.32. EPA today is proposing to add to the list three wastes from the production of diphenylamine by the condensation of aniline. The hazardous wastes from the process described below are wastewaters from catalyst regeneration, an ammonia by-product stream from the condenser in the aniline recycle loop, and a heavy and light ends stream from the distillation process.

The hazardous constituents in these wastes (aniline, benzene, diphenylamine, and quinoline) are carcinogenic, teratogenic, and are otherwise chronically toxic organic compounds. They typically are present in the wastes at significant concentrations. The hazardous constituents also are mobile and persistent, to varying extents, and can reach environmental receptors in harmful concentrations if these wastes are mismanaged. Evaluated against the criteria for listing hazardous wastes (40 CFR 261.11(a)), EPA has determined that these wastes are hazardous because they are capable of posing a substantial present or potential threat to human health and the environment when improperly treated, stored, transported, disposed of, or otherwise managed.

II. Summary of the Regulation

A. List of Wastes

The proposed regulation would list as hazardous three wastes generated

VOL 51
ISS 37
FE 25
1986
UMI

during the production of diphenylamine by the condensation of aniline. These wastes are:

- K122—Wastewater from steam regeneration of activated alumina catalyst used in the production of diphenylamine by the condensation of aniline.
- K133—Ammonia produced as a by-product in the production of diphenylamine by the condensation of aniline.
- K134—Heavy and light ends [1] from the distillation/purification of diphenylamine by the condensation of aniline.

In 1983, one domestic company produced diphenylamine on a regular basis at one location; the annual production volume is confidential. The total annual volume of the organic residual wastes generated from diphenylamine production by the process described here is approximately 3750 kkg: 1800 kkg of waste K122, 650 kkg of waste K133, and 1300 kkg of waste K134. These wastes are formed as residuals at several points in the production process.

Diphenylamine production is typically a continuous process involving one distinct chemical step—the condensation of two moles of aniline to form one mole of diphenylamine and one mole of ammonia. The wastes are formed as residuals at three points in the production of diphenylamine by the condensation of aniline. The by-product stream (K133) is formed during the condensation of aniline in the aniline recovery and recycle loop while the wastewater stream (K122) is formed when the catalyst is regenerated with steam. The distillation/purification of diphenylamine results in both heavy and light ends from the still, and this constitutes the third residual (K134).

The listing background document (available from the public docket at EPA Headquarters—see "ADDRESSES" section—and from the EPA Regional Libraries) and the sources cited there describe this production process in detail. Sections of the background document, however, are confidential business information (CBI); these CBI sections are not available to the public.

As derived from industry-supplied data and sampling and analysis data, these wastes typically contain significant concentrations of the hazardous constituents: aniline, benzene, diphenylamine, and quinoline. Table 1 lists the constituents of concern in each waste stream along with their effects of concern, concentrations in the waste, exposure pathways of concern, water solubility, mobility in soil, log octanol/water partition coefficient (K_{ow}), soil adsorption coefficient (K_{oc}), and their persistence in the medium of concern; these parameters enable the Agency to estimate a chemical's mobility and persistence in the environment.

TABLE 1.—CONSTITUENTS OF CONCERN IN WASTE STREAMS

Waste stream	Const. of concern	Effects of concern	Conc. range (ppm)	Exposure pathway of concern	Water solub. mg/L	Mobility [a] (soil)	Log K_{ow} [b]	K_{oc} [b]	Persistence [a] (ground water)
K122	Aniline	Carcinogenic Toxic	10,000–100,000	gw	36,000	High	0.9	12.3	Moderate.
K133	Aniline	Carcinogenic Toxic	100–1000	gw	36,000	High	0.9	12.3	Moderate.
	Benzene	Carcinogenic	100–1000	gw	1,800	Moderate	2.15	56	Moderate.
K134	Aniline	Carcinogenic Toxic	10,000–100,000	gw	36,000	High	0.9	12.3	Moderate.
	Diphenylamine	Teratogenic	100,000–500,000	gw	36	Moderate	3.45	266	Moderate.
	Quinoline	Carcinogenic	10,000–100,000	gw	6,000	Moderate	2.04	49	Moderate.

[a] See Appendix A of the listing background document for the descriptors for solubility, mobility in soil, and persistence in ground water.
[b] Lyman, 1982.

1. Effects of Concern

These hazardous constituents have carcinogenic or other chronic systemic effects on laboratory animals or humans. In particular, the hydrochloride salt of aniline has been shown to be carcinogenic in long-term feeding studies on female Fisher 344 rats, producing unusual splenic tumors (NCI, 1978). In humans, aniline absorption causes anoxia due to the formation of methemoglobin. Symptoms of methemoglobinemia include fatigue, headache, irritability, and dizziness (Proctor and Hughes, 1979). In addition, direct effects of aniline on the human nervous system have been observed, including insomnia and paresthesia, as well as cardiotoxic effects (Patty, 1979; Sax, 1979). Splenic hemosiderosis also has been observed in Fisher 344 rats after chronic oral administration of aniline hydrochloride (NCI, 1978). Quinoline has been shown to be carcinogenic to Sprague-Dawley rats (Hirao *et al.*, 1976) and to be carcinogenic to Wistar rats and ddY mice (Shinohara *et al.*, 1977). Benzene has been identified by the Agency's Carcinogen Assessment Group as a human carcinogen (USEPA, 1985). Chronic exposure of humans to benzene also has caused pancytopenia (reduction of blood erythrocytes, leukocytes, and platelets) (Browing, 1965; Goldstein, 1977b; International Labour Office, 1968; Snyder and Kocsis, 1975) and can impair the immunological system (Lange *et al.*, 1973a; Smolik *et al.*, 1973). Diphenylamine is a teratogen, causing cystic abnormalities of the kidneys in the offspring of Sprague-Dawley rats, when administered by gavage or in food seven days before delivery (Crocker and Vernier, 1970). These compounds, therefore, exhibit toxicological properties of regulatory concern. (For additional information on the toxicity of the hazardous constituents see the Health and Environmental Effects Profiles (HEEPs), available from the public docket at EPA Headquarters—see "ADDRESSES" section—and from the EPA Regional Libraries.)

The Agency has determined that these constituents are present in the wastes at significant concentrations which are capable of posing a substantial present or potential threat to human health and the environment. For example, Ambient Water Quality Criteria (AWQC) have been established for benzene (see 45 FR 79318, November 28, 1980). The benzene concentration which may result in an incremental increase of cancer risk, over a lifetime, of 10^{-6} is calculated as 0.66 μg/. As seen above, this constituent is present in the wastes at concentrations up to one and one-half million times as high as the AWQC; in addition, its solubility in water is 2.7 million times

---

[1] The one company that uses this process combines the heavy and light ends and uses the mixed wastes as a fuel on-site. The individual streams were not characterized.

greater than the AWQC. Although aniline and quinoline do not have AWQC established at the present time, their 10^{-6} upper limit of risk estimates (ULORE) were calculated from their $q1^{*}$ [2] values. In the case of diphenylamine, which is not a carcinogen, an allowable daily intake (ADI) was calculated. EPA's estimates for the 10^{-6} ULORE's and ADI are given in column 6 of Table 2. Based on these values, diphenylamine, aniline, and quinoline are present in the wastes in concentrations ranging up to 280,000, to 100 million, to 30 billion times, their estimated allowable drinking water concentrations, respectively. Thus, even though soil attenuation factors, such as soil binding, biodegradation, and other environmental degradative processes are expected to decrease the amount of these constituents available for migration, they are expected to present a substantial hazard since only a small fraction need migrate from the wastes and reach environmental receptors to pose the potential for substantial harm. To illustrate this point, consider a general disposal scenario [3] in which exposure occurs only through consumption of contaminated ground water and the concentration of the constituents in the drinking water well has been reduced to 0.1 percent of what it was in the waste by such factors as soil binding, biodegradation, hydrolysis, etc. Column 4 presents the concentrations of the constituents of concern in a drinking water well, using this assumption. The allowable drinking water concentration estimates, assuming a 70 kg person drinks 2 liters per day, are shown in column 7. Column 8 shows the ratio of the assumed drinking well concentrations of the constituents of concern to their respective estimates of allowable drinking water concentrations. The concentrations of aniline, benzene, diphenylamine, and quinoline present in these wastes are of concern to the Agency because they suggest that, if mismanaged, these constituents could pose a present or future hazard to human health.

TABLE 2.—10^{-6} ULOREs AND ADIs

Waste stream No.	Constituent of concern	Maximum waste concentration (mg/L)	Assumed drinking well concentration (mg/L) [a]	Q_1^* (mg/kg/day)	10^{-6} ULORE dose (mg/day)	Allowable drinking water concentration (mg/L) [b]	Column 4 [c] / Column 7
K122	Aniline	100,000	100	0.026	0.0027	0.001	100,000
K133	Aniline	1,000	1	0.026	0.0027	0.001	1,000
	Benzene	1,000	1	0.053	0.00132	0.00066	2,000
K134	Aniline	100,000	100	0.026	0.0027	0.001	100,000
	Diphenylamine	500,000	[d]36	N/A	[e]3.5	1.8	20
	Quinoline	100,000	100	12.5	5.6×10^{-6}	3×10^{-6}	30,000,000

[a] Assumes that the concentration of the constituent in the drinking well is 0.1 percent of its concentration in the waste.
[b] Assumes that a 70 kg person drinks 2 liters of water per day.
[c] Values presented to one significant figure.
[d] Concentration limited by solubility.
[e] 3.5 mg/day is the allowable daily intake (ADI) for diphenylamine.

NOTE.—q_1^* is an estimate of the limit of the slope of the dose-response data obtained from an animal cancer assay, and/or epidemiological studies. It enables an assessment of the excess cancer risk to humans resulting from life-time exposure to a carcinogen.

In addition to the constituents of concern listed in Table 1, there are other contaminants present in the waste streams. The Agency, however, has elected at this time not to consider them as constituents of concern. For example, waste stream K122 may contain up to 1000 mg/L of diphenylamine. Largely because of diphenylamine's relatively low solubility in water (36 mg/L; Lyman, 1982), the estimated concentration that would be expected to reach a drinking water well would be less than the allowable drinking water standard. Waste stream K133 may contain up to 1000 mg/L of acetonitrile, which is teratogenic to Syrian hamsters both by ingestion and by inhalation when administered on the eighth day of gestation in relatively high concentrations (5000 ppm *via* inhalation or 100 mg/kg by gavage) (Willhite, 1983). Although acetonitrile is miscible with water, it hydrolyzes and biodegrades so as to limit its concentration in water to a level below that of concern to the Agency. Waste stream K134 also may contain up to 500,000 ppm of carbazole. The Agency has examined the toxicological data (Tsuda *et al.*, 1982) available on this chemical, and has concluded that currently there is insufficient information on its toxicity to list it as a constituent of concern in this waste. If further studies are more substantive and adequately demonstrate the chronic toxicity of carbazole, the Agency may include this chemical as a constituent of concern at a later date.

2. Mobility of Constituents of Concern

These constituents have mobilities through soil that range from moderate to high, as indicated in Table 1. The exposure pathway of principal concern is leaching to ground water. The water solubility of a given hazardous constituent is indicative of its mobility potential (*i.e.* the likelihood that it will be released from a management site and become dissolved in a water resource of concern). The water solubilities of the hazardous constituents range from 36 mg/L for diphenylamine, to 1,800 mg/L for benzene, to 6,000 mg/L for quinoline, to 36,000 mg/L for aniline (Windholz, 1976; Lyman, 1982; and Verschueren, 1983). The mobility of non-polar organic compounds also can be estimated by their soil adsorption coefficients (see Appendix A to listing background document). The soil adsorption coefficients for benzene (56), aniline (12.3), diphenylamine (266), and quinoline (49) indicate that soil and sediment binding would be insufficient to immobilize these constituents. Accordingly, these constituents are mobile enough to leach out of the wastes, potentially contaminating ground water.

3. Persistence of the Constituents of Concern

The Agency considers a material to be persistent if it persists in the environment long enough to be detected since it also may result in exposure to

---

[2] $q1^{*}$ is an estimate of the limit of the slope of the dose-response data obtained from an animal cancer assay, and/or epidemiological studies. It enables an assessment of the excess cancer risk to humans resulting from life-time exposure to a carcinogen.

[3] The Agency is currently developing a more sophisticated disposal and ground-water dispersion model as part of the land disposal restrictions rule and the extension of the toxicity characteristics to organic constituents. This model is not yet ready for use. This model, when available, may be adopted and used in decisions to list certain waste streams.

VOL 51
ISS 37
FE 25
1986
UMI

humans in the same period of time. All the constituents of concern in waste streams K122, K133, and K134 are adequately persistent to result in human exposure if they are released into ground water. The principal processes that limit the persistence (half-life) of chemicals in ground water are hydroloysis and biodegradation. None of the constituents are expected to hydrolyze in water between pH 2 and 12 at ambient temperature at a rate fast enough to be a factor in limiting human exposure. This is because none of the constituents of concern have molecules attached to their structure that would be expected to react with water under those conditions.

Biodegradation is probably the most important pathway of degradation for each of the constituents of concern. Under aerobic conditions (*i.e.*, conditions in which oxididing microorganisms are capable of metabolism), benzene (Callahan *et al.*, 1979), aniline (Engelhardt *et al.*, 1977; Kauffman *et al.*, 1973; Kao *et al.*, 1978); and quinoline (Grant and Al-Najjar, 1976; Bohonos *et al.*, 1977; Chou and Bohonos, 1979) are all know to be biodegradable. Because of the large and varied microbial population and aerobic environment in surface water, these compounds are not expected to persist for more than a few days or weeks in streams or lakes.

Little is known, however, about the degradation of these compounds in anaerobic environments. Under anaerobic conditions (*i.e.* those in which microorganisms capable only of oxidative metabolism cannot survive), these compounds may persist for very long periods. For example, Furlong and Carpenter (1982) presented evidence that quinoline has persisted in Puget Sound sediments for over a hundred years, although Grant and Al-Najjar (1976) showed that it is rapidly degraded by soil bacteria. In ground water, where microbial populations, sunlight, and oxygen are all limited, biodegradation of these constituents is expected to be slow or non-existent.

In substantiation of the persistence of these compounds in water, it is noted that:

- Benzene is frequently detected in water, and has been designated as a priority pollutant by EPA (Callahan *et al.*, 1979); furthermore, benzene mismanagement has been widespread and it has been detected at numerous sites of toxic waste mismanagement.
- Aniline has been found in soil (Nelson and Hites, 1980) and waste water (Jungclaus *et al.*, 1978).
- Quinoline has been detected in ground water (Leenheer and Stuber, 1981).
- Diphenylamine has been found in sediments from the Buffalo River in New York (Parris and Poppiti, 1980).

In summary, because of the significant concentrations of the hazardous constituents in these wastes, the toxic effects of these constituents, their potential to migrate from the waste and reach environment receptors at levels of regulatory concern (*i.e.*, above a health-based standard), and their persistence in ground water, the Agency has determined that these wastes pose a substantial present or potential hazard to human health and the environment, when improperly stored, transported, disposed of, or otherwise managed. The Agency, therefore, is proposing to add these wastes to the hazardous waste list in 40 CFR 261.32.

B. Addition of Diphenylamine and Quinoline to 40 CFR 261.33(f)

40 CFR 261.33(f) is a list of commercial chemical products or manufacturing chemical intermediates which are identified as hazardous wastes when discarded. Substances are listed as hazardous in § 261.33(f) if they exhibit one or more of the hazardous waste characteristics identified in 40 CFR 261.21, 261.22, 261.23, and 261.24, or have been shown in reputable scientific studies to be toxic, carcinogenic, mutagenic, or teratogenic to humans or other life forms, unless the Administrator concludes after considering certain factors that the waste is not capable of posing a substantial present or potential hazard to human health or the environment even when improperly managed (see 40 CFR 261.11(a)(3)). These commercial chemicals satisfy the criteria for listing contained in § 261.11(a)(3). (See the discussion of diphenylamine and quinoline as constituents of concern). When sold as commercial products, diphenylamine and quinoline have a purity generally in excess of 85% (technical grade). They are moderately mobile and moderately persistent.

Therefore, the unsupervised disposal of diphenylamine and quinoline could pose a substantial threat to human health and the environment. (Indeed, these chemicals could present a far greater hazard when disposed of in a commercial form than when disposed of in lower concentrations, such as in the waste stream we are proposing to list today.) Accordingly, we are proposing to add them to the list of commercial chemical products in 40 CFR 261.33(f) that are hazardous wastes when discarded.

C. Hazardous Constituent Added to Appendix VIII

This action also proposes to add quinoline to Appendix VIII of Part 261. As noted above, in the listing background document, and in the Health and Environmental Effects Profiles, this substance is carcinogenic to humans and other life forms (see 40 CFR 261.11(a)(3)); this forms the basis for adding it to Appendix VIII of Part 261.

D. Test Methods for Compounds Added to Appendices VII and VIII

In 49 FR 38786–38809, Monday, October 1, 1984, the Agency proposed test methods (both those newly designed, as well as those previously available in SW–846—see below) for use in detecting specified substances by applicants who wish to conduct waste evaluations in support of delisting petitions, and by owners or operators of hazardous waste management facilities who must conduct ground-water monitoring (see 40 CFR 264.99) or incinerator monitoring (see 40 CFR 264.341). These test methods will, upon promulgation, be included in 40 CFR Part 261, Appendix III. In the October 1, 1984 proposal, Method Number 8250 was designated for testing for aniline and diphenylamine. Benzene already is included in 40 CFR Part 261, Appendix III; the methods to use for detecting the presence and concentration of benzene are Method Numbers 8020 and 8024.

Quinoline is the only constituent of concern in today's proposed listing that does not already have a designated or previously proposed Agency method for its determination. Quinoline may be separated by gas chromatographic (GC) methods with subsequent mass spectrometric (MS) or flame ionization detection (FID). Method Numbers 8280, 8250, and 8100 are considered appropriate methods for the determination of quinoline. Its polynuclear aromatic structure suggests that this compound also may be amenable to determination by method 8310, high pressure also may be amendable to determination by method 8310, high pressure liquid chromatographic separation and ultraviolet detection. The Agency is proposing that these existing analysis methods be used for the detection of quinoline. The Agency is requesting comments on industrial experience with the determination of quinoline in industrial and environmental media.

The above methods are in "Test Methods for Evaluating Solid Waste: Physical/Chemical Methods," SW–846, 2nd ed., July 1982, as amended; available from: Superintendent of Documents, Government Printing Office, Washington, DC 20402, (202) 783–3238, Document number: 055–002–81001–2.

III. CERCLA Impacts

All hazardous wastes designated by today's proposed rule will, upon the effective date of promulgation, automatically become hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). (See CERCLA section 101(14).) CERCLA requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (at (800) 424–8802 or (202) 426–2675) of the release. (See CERCLA section 103 and 50 FR 13456–13522, April 4, 1985).

Except as noted below, all hazardous wastes newly designated under RCRA will have a statutorily imposed RQ of one pound under section 102 of CERCLA until adjusted by regulation. If the newly listed F or K hazardous waste stream has only one constituent of concern, the waste will have the same RQ as that of the constituent. (The RQ to be considered for this purpose would be the final RQ of the constituent as promulgated on April 4, 1985, whether statutorily imposed or adjusted by regulation.) If the waste has more than one constituent of concern, the lowest RQ assigned to any one of the constituents present in the waste represents the RQ for the waste stream.

Although CERCLA does not require that persons in charge of vessels or facilities test spilled wastes, if a person does completely analyze the waste spilled and determines that the amount spilled of each constituent is below the RQ established for each of those compounds, no notification is required (see 50 FR 13463 and 40 CFR 302.6(b)).

Finally, it should be noted that this action is not proposing to change Table 302.4 of 40 CFR 302.4; however, the RQs stated in the table below are those that will be assigned at the time of its next publication in the **Federal Register**. Since the methodology for carcinogens is currently being assessed, both benzene's RQ and the RQ for waste K133 are subject to change when the assessment is completed.

Waste No.	Constituent of concern	RQ of constituent (pounds)	RQ of waste (pounds)
K122	Aniline	5,000	5,000
K133	Aniline	5,000	1,000
K134	Benzene	1,000	1
	Aniline	5,000	
	Diphenylamine	1	
	Quinoline	5,000	

IV. State Authority

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (See 40 CFR Part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under sections 3008, 7003, and 3013 of RCRA, although authorized States have primary enforcement responsibility.

Prior to the Hazardous and Solid Waste Amendments of 1984 (HSWA), a State with final authorization administered its hazardous waste program entirely in lieu of EPA administering the Federal program in that State. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any facilities in the State that the State was authorized to permit. When new, more stringent Federal requirements were promulgated or enacted, the State was obliged to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under newly enacted section 3006(g) of RCRA, 42 U.S.C. 6926(g), new requirements and prohibitions imposed by the HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to carry out those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain final authorization, the HSWA applies in authorized States in the interim.

B. Effect on State Authorizations

Today's announcement proposes hazardous waste listings that would not be effective in authorized States since the requirements would not be imposed pursuant to the Hazardous and Solid Waste Amendments of 1984. Thus, the requirements will be applicable only in those States that do not have interim or final authorization. In authorized States, the requirements will not be applicable until the State revises its program to adopt equivalent requirements under State law.

40 CFR 271.21(e)(2) requires that States that have final authorization must revise their programs to include equivalent standards within a year of promulgation of these standards if only regulatory changes are necessary, or within two years of promulgation if statutory changes are necessary. These deadlines can be extended in exceptional cases (40 CFR 271.21(e)(3)). Once EPA approves the revision, the State requirements become Subtitle C requirements.

States with authorized RCRA programs already may have regulations similar to those proposed in today's rule. These State regulations have not been assessed against the Federal regulations being proposed today to determine whether they meet the tests for authorization. Thus, a State is not authorized to implement these requirements in lieu of EPA until the State program modification is submitted to EPA and approved. Of course, States with existing regulations may continue to administer and enforce their standards as a matter of State law.

States that submit official applications for final authorization less than 12 months after promulgation of these standards may be approved without including equivalent standards. However, once authorized, a State must modify its program to include equivalent standards within the time period discussed above. The process and schedule for revision of State programs is described in 40 CFR 271.21.

V. Regulatory Status of Hazardous Wastewaters

Under the existing hazardous waste water regulations, tanks that are treating or storing hazardous wastewater are exempt from the Parts 264 and 265 management standards/when the treatment unit is part of a wastewater treatment facility that is subject to regulation under either section 402 or section 307(b) of the Clean Water Act. Treatment units, such as concrete basins, which may or may not be in-ground, routinely provide for certain steps in a wastewater treatment process such as equalization, neutralization, aeration (in biological treatment facilities), settling (in both biological and physical/chemical treatment facilities), flocculation or treated wastewater storage before recycling. Where such units are constructed primarily of non-earthern materials designed to provide structural support,

VOL
51
ISS
37
FE
25
1986
UMI

they are defined as tanks for purposes of the hazardous waste regulations. See 40 CFR 260.10 (definition of "tank"). In applying this definition, the Agency has provided guidance that a unit is to be evaluated as if it were free-standing and filled to its design capacity with the material it is intended to hold. If the walls or shell of the unit alone provide sufficient structural support to maintain the structural integrity of the unit under these conditions, the unit is considered to be a tank. Alternatively, if the unit is not capable of retaining its structural integrity without supporting earthern materials, it is considered to be a surface impoundment.

When wastewaters, including those covered by the listings proposed today, are stored or treated in containment devices which qualify as tanks, they are presently exempt from the Parts 264 and 265 management standards.

VI. Regulatory Impact Analysis

Under Executive Order 12291, EPA must determine whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. The additional incurred annualized cost of disposal of these wastes as hazardous is less than $1,000, well under the $100 million constituting a major regulation. This cost is insignificant, and results from minimal additional compliance requirements, such as reporting, waste analyses, and permit modification for these wastes.

The addition of the new hazardous constituents to Appendix VIII also will not result in any significant increased burden in ground-water monitoring or incineration monitoring requirements since the analytical techniques currently employed to test for the presence and concentration of other Appendix VIII hazardous constituents also would detect these additional compounds.

Furthermore, the cost of adding diphenylamine and quinoline to 40 CFR 261.33(f), the list of commercial chemical products which are hazardous wastes when discarded, also will be minimal, since commercial chemical products are rarely discarded because of their inherent value.

In addition, we do not expect that there will be an adverse impact on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This proposal is not a major regulation; therefore, no Regulatory Impact Analysis is being conducted.

VII. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a General Notice of Rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the head of the agency certifies that the rule will not have a significant impact on a substantial number of small entities.

The hazardous wastes proposed for listing here are not generated by small entities (as defined by the Regulatory Flexibility Act), and the Agency believes that small entities will not dispose of them in significant quantities. Accordingly, I hereby certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling.

For the reasons set out in the preamble, it is proposed to amend Title 40 of the Code of Federal Regulations as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6922).

§ 261.32 [Amended]

2. In 2§ 261.32, add the following waste streams to the subgroup 'Organic Chemicals':

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
*	* * * *	
Organic chemicals:		
	* * * *	
K122	Wastewater from steam regeneration of activated alumina catalyst used in the production of diphenylamine by the condensation of aniline.	
K133	Ammonia produced as a by-product in the production of diphenylamine by the condensation of aniline.	(T)
K134	Heavy and light ends from the distillation/purification of diphenylamine produced by the condensation of aniline.	(T)
*	* * * *	

§ 261.33 [Amended]

3. In § 261.33(f), add the following listings to the table in alphabetical order by substance:

Hazardous waste No.	Substance
* * *	* *
U368	1-Azanaphthalene.
U367	Diphenylamine.
U368	Quinoline.
* * *	* *

Appendix III—[Amended]

4. Add the following hazardous constituents in alphabetical order to Table 1 of Appendix III of Part 261:

TABLE 1—ANALYSIS METHODS FOR ORGANIC CHEMICALS CONTAINED IN SW—846

Compounds	Method No.
* * * *	*
Quinoline	8100, 8250, 8260, 8310
* * * *	*

Appendix VII—[Amended]

5. Add the following entries in numerical order to Appendix VII of Part 261:

EPA hazardous waste No.	Hazardous constituents for which listed
* * *	* *
K122	Aniline.
K133	Aniline, benzene.
K134	Aniline, diphenylamine, quinoline.
* * *	* *

Appendix VIII—Hazardous Constituents [Amended]

6. Add the following hazardous constituent in alphabetical order, to Appendix VIII of Part 261:

Quinoline (1-Azanaphthalene)

[FR Doc. 86–3833 Filed 2–24–86; 8:45 am]

Correction

In FR Doc. 86–1661 beginning on page 3738 in the issue of Wednesday, January 29, 1986, make the following corrections:

1. On page 3746, second column, first complete paragraph, third line, "replaced" should read "replace".

2. On page 3747, first column, first complete paragraph, second line from the bottom, "then" should read "than".

3. On page 3750, third column, third complete paragraph, fifth line, "reguirement" should read "requirement".

4. On page 3755, first column, third line from the bottom of the column, "the" should read "that". On the same page, second column, fourth paragraph, third line from the bottom, "of" should read "or".

50 CFR Part 652

[Docket No. 60229-6029]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues a proposed rule to implement a revised Amendment 6 (amendment) to the Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fisheries, which was submitted following partial disapproval by the Secretary. The rule establishes quarterly quotas and effort control measures for Nantucket Shoals surf clams, clarifies the quota adjustment provisions for the Nantucket Shoals and Georges Bank Areas between quarterly periods and years, and prohibits more than one surf clam trip during an authorized surf clam fishing period in the Mid-Atlantic Area. The intended effect of the rule is to augment the management program for surf clams on Nantucket Shoals and Georges Bank, and to foreclose opportunities for fishing outside of authorized Mid-Atlantic surf clam fishing periods.

DATE: Comments on the proposed rule must be received on or before March 11, 1986.

ADDRESSES: Comments on the proposed rule, the revised amendment, or supporting documents should be sent to Bruce Nicholls, Surf Clam Management Coordinator, National Marine Fisheries Service, 2 State Fish Pier, Gloucester, Massachusetts 01930–3097. Clearly mark the outside of the envelope "Comments on Surf Clam and Ocean Quahog Amendment 6."

Copies of the revised amendment, environmental assessment, and the draft regulatory impact review/initial regulatory flexibility analysis are available from Mr John C. Bryson, Executive Director, Mid-Atlantic Fishery

SUPPLEMENTARY INFORMATION: Amendment 6 to the FMP was prepared by the Mid-Atlantic Fishery Management Council (Council) in consultation with the New England Fishery Management Council. A notice of availability for Amendment 6 was published in the Federal Register on April 25, 1985 (50 FR 16326). A proposed rule with request for comments was published in the Federal Register on May 29, 1985 (50 FR 21910). A final rule implementing approved portions of Amendment 6 was published in the Federal Register on August 14, 1985 (50 FR 32700). The Council has reviewed the reasons for partial disapproval and has submitted a revised amendment. This proposed rule would implement three provisions of Amendment 6 which were partially disapproved.

The regulations implementing the approved portions of Amendment 6 establish surf clam quotas for the Nantucket Shoals Area at § 652.21(b) and provisions for management of the surf clam fishery in the Nantucket Shoals Area at § 652.22(b). The quota range for the Nantucket Shoals Area is 25,000 to 200,000 bushels annually. Quotas are set following procedures established in § 652.21(a).

This proposed rule divides the annual quota for the Nantucket Shoals Area into quarterly quotas, and allows the Regional Director to impose trip landing limits after fifty percent of a quarterly harvest quota has been caught to minimize the possibility of fishery closures. The first and fourth quarters (January–March and October–December) are each allocated 20 percent of the annual quota; the second and third quarters (April–June and July–September) are each allocated 30 percent of the annual quota. The unused portion of any quarterly quota is transferred into the next quarter, except no more than 10 percent of the annual quota may be carried over from one year to the next if it has not been harvested.

These regulations continue management of the Mid-Atlantic Area surf clam fishery unchanged, with the exception that § 652.7(n) and § 652.22(a)(2)(iii) are revised to add a provision prohibiting vessels from making more than one surf clam trip during an authorized surf clam fishing period in the Mid-Atlantic Area. The Council has included this measure as part of its revised amendment to foreclose opportunities to fish outside of authorized surf clam fishing periods. If operators can make more than one surf clam fishing trip during an authorized fishing period, they may be enconuraged to fish earlier or later than that period. The prohibition on more than one trip per authorized fishing period will make enforcement of the fishing time restrictions more direct by limiting the number of contacts required between enforcement agents and vessels.

By limiting fishing trips to one per authorized period, the Regional Director may be able to establish longer fishing periods, which should tend to promote selective fishing and reduce harvest and mortality of undersized surf clams.

The regulatory language implementing this limit on fishing trips prohibits harvesting or landing of surf clams during an authorized period if the vessel has already landed surf clams during that period. The provision does not, and is not intended to, require that fishermen land their catch during their authorized period. The provision merely prohibits fishermen from engaging in harvesting or landing after the completion of their first trip during an authorized period.

The regulations continue management of the Georges Bank Area surf clam fishery unchanged, with the exception that § 652.21(c) is reorganized by placing its present, undivided text into new paragraphs (1), (2), and (3). Section 652.21(c)(3) was added to eliminate the reference to § 652.21(a) in the present rule and to make quarterly quota adjustments consistent throughout the fisheries.

The regulatory changes included in the revised amendment required reorganization and subdivision of existing regulatory text in §§ 652.7, 652.21, and 652.22. This reorganization has not resulted in any substantive changes beyond those discussed in this preamble and the revised amendment.

Classification

Section 304(b)(3)(B) of the Magnuson Act, as amended, requires the Secretary, after partial disapproval of a plan or amendment, to publish regulations proposed by a Council upon receipt of a revised amendment and proposed regulations. At this time the Secretary has not determined that the revised amendment these rules would implement is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the information, views, and comments received during the comment period.

The Council prepared an environmental assessment for this revised amendment which analyzes the consequences of this action. The Assistant Administrator concluded that there will be no significant impact on the human environment. A copy of the assessment is available from the Council at the address listed above.

The NOAA Administrator determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the draft regulatory impact review prepared by the Council, which demonstrates positive net short-term and long-term economic benefits to the fishery under the proposed management measures. A copy of the review can be obtained from the Council at the address listed above.

The review procedures of E.O. 12291 do not apply to this proposed rule under Section 8(a)(2) of that order because of the deadlines imposed under the Magnuson Act, as amended by Pub. L. 97–453. The proposed rule is being reported to the Director of the Office of Management and Budget with an explanation of why it is not possible to follow review procedures of the order.

The Council prepared an initial regulatory flexibility analysis as part of the regulatory impact review. NOAA has concluded that this proposed rule, if adopted, could have a significant effect on small entities. A copy of this analysis may be obtained from the Council at the address listed above.

This existing rule contains collection of information requirements previously approved by the Office of Management and Budget (OMB) under control numbers 0648–0013, –0016, –0097, and –0014. This rule does not contain any additional collection of information requirements for purposes of the Paperwork Reduction Act.

The Council determined that this rule wil be implemented in a manner that is consistent to the maximum extent practicable State agencies under Section 307 of the Coastal Zone Management Act.

List of Subjects in 50 CFR Part 652

Fisheries, Recordkeeping and reporting requirements.

Dated: February 20, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, NOAA proposes to amend 50 CFR Part 652 as set forth below:

PART 652—[AMENDED]

1. The authority citation for 50 CFR Part 652 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 652.7 is amended by revising paragraphs (a)(3) and (a)(4), adding a new paragraph (a)(5), redesignating paragraph (n) as (o), and adding a new paragraph (n), to read as follows:

652.7 Prohibitions.

(a) * * *

(3) On days of the week in which fishing for these species is not authorized;

(4) Without having provided the notice required by § 652.5(b)(7); or

(5) In excess of applicable trip landing limits.

* * * * *

(n) No person or vessel may harvest or land surf clams in the Mid-Atlantic Area during or after an authorized surf clam fishing period if they have landed surf clams during that authorized period.

* * * * *

3. In § 652.21, paragraphs (b) and (c) are revised to read as follows:

§ 652.21 Catch quotas.

* * * * *

(b) *Surf Clams: Nantucket Shoals Area.* (1) *Annual quota.* The amount of surf clams which may be harvested in the Nantucket Shoals Area by fishing vessels subject to these regulations will be specified annually within the range of 25,000 to 200,000 bushels, using the procedures and criteria set forth in § 652.21(a) (1), (2) and (4).

(2) *Quarterly quotas.* This annual quota will be divided into quarterly quotas in the following proportions: January 1—March 31, 20 percent; April 1—June 30, 30 percent; July 1—September 30, 30 percent; and October 1—December 31, 20 percent. Each fishing quarter will begin on the first Sunday of the new calendar quarter.

(3) *Adjustments.* If the actual catch of surf clams falls more than 5,000 bushels short of a quarterly quota, the Regional Director will add the amount of the shortfall to the succeeding quarterly quota. If the actual catch of surf clams exceeds a quarterly quota, the Regional Director will subtract the amount of the excess from the succeeding quarterly quota. The last quarterly period would be carried over to the first quarterly period of the next year, except that no more than 10 percent of the annual quota may be carried over into the next year.

(c) *Surf Clams: Georges Bank Area.* (1) *Annual quota.* The amount of surf clams which may be harvested in the Georges Bank Area by fishing vessels subject to these regulations will be specified annually within the range of 25,000 to 300,000 bushels, using the procedures and criteria set forth in § 652.21(a) (1), (2) and (4).

(2) *Quarterly quotas.* This annual quota will be divided into quarterly quotas, the quarters and proportion of the quota being January 1–March 31, 10 percent; April 1–June 30, 40 percent; July 1–September 30, 40 percent; and October 1–December 31, 10 percent. Each fishing quarter will begin on the first Sunday of the new calendar quarter.

(3) *Adjustments.* If the actual catch of surf clams falls more than 5,000 bushels short of a quarterly quota, the Regional Director will add the amount of the shortfall to the succeeding quarterly quota. If the actual catch of surf clams exceeds a quarterly quota, the Regional Director will subtract the amount of the excess from the succeeding quarterly quota. The last quarterly period would be carried over to the first quarterly period of the next year, except that no more than 10 percent of the annual quota may be carried over into the next year.

* * * * *

4. In § 652.22, paragraphs (a)(2) and (b)(2) are revised to read as follows:

§ 652.22 Effort restrictions.

(a) * * *

(2) *Hours.* (i) *Selection.* The Regional Director will notify each owner or operator of a fishing vessel engaged in the Mid-Atlantic Area surf clam fishery concerning the allowable combinations of fishing periods for varying levels of allowable fishing time. The vessel owner or operator must send the Regional Director written notice of the owner or operator's selection or cancellation of allowable surf clam fishing periods for that vessel. All selections or cancellations must be provided to the Regional Director no less than 15 days prior to the intended effective date.

(ii) *Letter of authorization.* The Regional Director will send a letter of authorization to each owner or operator, stating the periods during which the vessel is authorized to fish for surf clams. The letter of authorization must be kept aboard the vessel at all times. Fishing may be conducted only during the times and under those conditions authorized by the Regional Director in the letter of authorization.

(iii) *Authorized periods.* fishing for any part of an authorized period will be counted as one day of fishing. Only one surf clam fishing trip is allowed per authorized fishing period. Fishermen who land surf clams during an authorized period may not continue to harvest or land surf clams during or after that authorized period.

(iv) *Fishing activity.* In this paragraph, "fishing" means the actual or attempted catching of fish, but not activities in preparation for fishing, such as traveling to or from the fishing grounds. The presence of a vessel's fishing gear in the water at a time which is more than one-half hour before the beginning, or one-half hour after the end, of the vessel's authorized fishing period will be *prima facie* evidence that the vessel is fishing in violation of these regulations.

* * * * *

(b) * * *

(2) *Management measure adjustments.* The Regional Director will monitor the rate of harvest using logbook and other information.

(i) If the Regional Director determines that harvests will remain within the quarterly quotas, no action will be taken.

(ii) When harvest reaches, or is likely to reach, 50 percent of any quarterly quota, the Regional Director will consult with the Councils to determine the range of trip landing limits to control catch adequately to keep the fishery open for the balance of the quarter. The Secretary may impose trip landing limits, provided those limits are not less than the following:

(A) For vessels between 0 and 50 gross registered tons (Class I), 224 bushels/trip.

(B) For vessels between 51 and 100 gross registered tons (Class II), 416 bushels/trip.

(C) For vessels greater than 101 gross registered tons (Class III), 768 bushels/trip.

(iii) The closure provisions specified in paragraph (d) of this section may be invoked by the Secretary, as required, without consulting the Council.

(iv) Once initial trip limits have been established in consultation with the Councils, the Regional Director will notify the Councils in advance of any proposed action to further specify trip limits or close the fishery.

(v) The Regional Director will consider any comments received from the Councils or the public before implementing any adjustments in the management program.

* * * * *

Notices

Federal Register
Vol. 51, No. 37
Tuesday, February 25, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Judicial Review; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States, to be held at 9:30 a.m. on Wednesday, March 5, 1986, at Cadwalader, Wickersham & Taft, 1333 New Hampshire Avenue, NW., 7th Floor Conference Room, Washington, DC.

The Committee will meet to discuss the following projects:

(a) The desirability and feasibility of establishing an administrative tribunal to resolve Freedom of Information Act and other public access disputes, studied by Professor Mark Grunewald, Washington and Lee University School of Law;

(b) The use of specialized courts for judicial review of administrative action, studied by Leland E. Beck, Esq.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference by Tuesday, March 4. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting, contact Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC. (Telephone: 202–254–7065.) Minutes of the meeting will be available on request.

Richard K. Berg,
General Counsel.
February 21, 1986.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Cooperative Agreement; Colorado

AGENCY: Department of Agriculture.

ACTION: Notice of Intent to Award a Cooperative Agreement.

Activity: The Office of International Cooperation and Development intends to award a cooperative agreement to Colorado State University to provide partial support funding for collaborative international agricultural research on "Soil Interactions of Chlorsulfuron."

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

The Office of International Cooperation and Development (OICD) announces the availability of funds for fiscal year 1986 to enter into a cooperative agreement with Colorado State University to collaborate on international research on "Soil Interactions of Chlorsulfuron." Approximately $10,000 will be available in fiscal year 1986 to Colorado State University to conduct collaborative research with Italy's University of Bologna, National Research Council.

Assistance with be provided only to Colorado State University which is contributing resources and experience to conduct the research. Funds provided by OICD will be used for supplies, a research technician, computer time, and international travel. Italy's University of Bologna and National Research Council will support their portion of the research.

Based on the above, this is not a formal request for applications. It is estimated that approximately $10,000 will be available in fiscal year 1986 to support this work. A total of $20,036 is anticipated to be provided for this cooperative research effort over a three year period, subject to the availability of federally appropriated funds in future fiscal years.

Information may be obtained from: Ms. Calvina Dupre, International Research Division, Office of International Cooperation and Development, U.S. Department of Agriculture, (58–319R–6–023).

Dated: February 20, 1986.

Allen Wilder,
Chief, Management Services Branch.

Cooperative Agreement; Langston University

AGENCY: Department of Agriculture.

ACTION: Notice of Intent to Award a Cooperative Agreement.

ACTIVITY: The Office of International Cooperation and Development intends to award a cooperative agreement to Langston University to provide partial support funding for collaborative international agricultural research on "Utilization of Crop Residues and Agro-Industrial By-products by Goats".

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

The Office of International Cooperation and Development (OICD) announces the availability of funds for fiscal year 1986 to enter into a cooperative agreement with Langston University to collaborate on international research on "Utilization of Crop Residues and Agro-Industrial By-products by Goats." Approximately $20,000 will be available in fiscal year 1986 to Langston University's American Institute for Goat Research to conduct collaborative research with the Brazilian National Goat Research Center.

Assistance will be provided only to Langston University, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for supplies, materials, a lab technician, and international travel. Brazil's National Goat Research Center will support their portion of the research.

Based on the above, this is not a formal request for applications. It is estimated that approximately $20,000 will be available in fiscal year 1986 to support this work. A total of $60,000 is anticipated to be provided for this cooperative research effort over a three year period, subject to the availability of federally appropriated funds in future fiscal years.

Information may be obtained from: Ms. Calvina Dupre, International Research Division, Office of International Cooperation and Development, U.S. Department of Agriculture, (58–319R–6–022).

Dated: February 20, 1986.

Allen Wilder,
Chief, Management Service Branch.

Cooperative Agreement; University of Georgia

AGENCY: Department of Agriculture.

ACTION: Notice of Intent to Award a Cooperative Agreement.

ACTIVITY: The Office of International Cooperation and Development intends to award a cooperative agreement to the University of Georgia to provide partial support funding for collaborative international agricultural research on "Biological Control: Investigations of Beneficial Insect Foraging Behavior Mediated by Semiochemicals."

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 USC 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

The Office of International Cooperation and Development (OICD) announces the availability of funds for fiscal year 1986 to enter into a cooperative agreement with the University of Georgia for collaboration on international research on "Biological Control: Investigations of Beneficial Insect Foraging Behavior Mediated by Semiochemicals." Approximately $12,000 will be available in fiscal year 1986 to the University of Georgia to include collaborative research with France's National Institute for Agronomic Research. Assistance will be provided only to the University of Georgia to be used for additional research assistants, and international and domestic travel.

Based on the above, this is not a formal request for applications. It is estimated that approximately $12,000 will be available in fiscal year 1986 to support this work. A total of $23,000 is anticipated to be provided over a two-year period for this amended cooperative research effort, subject to the availability of federally appropriated funds in future fiscal years.

Information may be obtained from: Ms. Calvina Dupre, International Research Division, Office of International Cooperation and Development, U.S. Department of Agriculture. (58–319R–6–021).

Dated: February 20, 1986.

International Trade Administration

President's Export Council; Meeting

A meeting of the President's Export Council's Trade Laws and Distincentives Subcommittee will be held March 10, 1986, 8:00 a.m., at the Herbert C. Hoover Building, Room 6802, 14th Street and Constitution Avenue, NW., Washington, DC. The Council's purpose is to advise the President on matters relating to United States export trade.

Agenda: Opening remarks; extraterritoriality: export controls, antitrust, environmental issues, Foreign Corrupt Practices Act; international tax issues; omnibus trade legislation; and discussion of future meeting plans.

The meeting will be open to the public with a limited number of seats available. For further information or copies of the minutes contact Amy Dale (202) 377–1125, Room 3213, U.S. Department of Commerce, Washington, DC 20230.

Dated: February 19, 1986.

Henry Misisco,
Director, Office of Planning and Coordination.

President's Export Council; Partially Closed Meeting

A meeting of the President's Export Council (PEC) will be held March 10, 1986, 10:00 a.m.–3:00 p.m., Herbert C. Hoover Building, Room 4830, 14th and Constitution Avenue, NW., Washington, DC. The Council's purpose is to advise the President on matters relating to United States export trade.

General Session: 10:00 a.m.–11:50 a.m. Opening remarks; discussion of federal budget impacts on trade development programs, including an overview of agency budgets with respect to the Gramm-Rudman-Hollings bill, and impacts on specific agencies; presentation of PEC subcommittees' status reports.

Executive Session: 1:15 p.m.–3:00 p.m. discussion of matters properly classified under Executive Order 12356, dealing with unfair trade practices, multilateral negotiations, and relations with trading partners in view of Legislative or Executive Branch initiatives, and other classified issues.

A Notice of Determination to close meetings or portions of meetings of the Council to the public on the basis of 5 U.S.C. 552b (c)(1) has been approved in accordance with the Federal Advisory Committee Act. A copy of the notice is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, (202) 377–4217.

For further information or copies of the minutes contact Sylvia Lino, (202) 377–1125, Room 3213, U.S. Department of Commerce, Washington, DC 20230.

Dated: February 13, 1986.

Henry P. Misisco,
Acting Director, Office of Planning and Coordination.

Applications for Duty-Free Entry of Scientific Instruments; University of Wyoming, et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 85–084R. Applicant: University of Wyoming, University Station, Laramie, WY 82071. Instrument: Thermal Ionization Mass Spectrometer, Model IS 117. Manufacturer: VG-Isotopes, Ltd., United Kingdom. Original notice of this resubmitted application was published in the **Federal Register** of February 27, 1985.

Docket No.: 85–145R. Applicant: University of Oklahoma, 660 Parrington

VOL 51
ISS 37

UMI

Oval, Norman, OK 73019. Instrument: Gas Chromatograph/Mass Spectrometer with Data System, Model ZAB-HS (11/250). Manufacturer: VG Analytical Instruments, Ltd., United Kingdom. Original notice of this resubmitted application was published in the **Federal Register** of May 8, 1985.

Docket No.: 85-160R. Applicant: U.S. Department of Agriculture, Agricultural Research Service, W-321 Turner Hall, 1102 S. Goodwin, Urbana, IL 61801. Instrument: Oxygen Electrode Unit, Model DWI. Manufacturer: Hansatech Limited, United Kingdom. Intended Use: The instrument will be used to measure the oxygen exchange of chloroplasts, leaf protoplasts, and algae to better understand photosynthesis. Original notice of this resubmitted application was published in the **Federal Register** of May 24, 1985.

Docket No.: 86-100. Applicant: State University of New York, College of Environmental Science and Forestry, Syracuse, NY 13210. Instrument: Electron Microscope, Model JEM-2000EX with Accessories. Manufacturer: JEOL, Ltd., Japan. Intended Use: The instrument will be used to conduct investigations of the following: wood structure function relationships, synthetic membranes, polymer-polymer interactions, biodegradable macromolecules, structure of crown ether polymers, conformational analysis of polysaccharides, structure of imperfect fungi, reaction wood, plant virology, source apportionment of air particulates, morphophysiology of neuromuscular junctions, intercellular communication, and hepatic disposition of xenobiotics. The specific objectives of these studies vary but each is an attempt to improve the environment through an understanding of the relationships of ultrastructure and function. In addition, the instrument will be used for educational purposes in the courses Transmission Electron Microscopy and Special Topics. Application Received by Commissioner of Customs: January 24, 1986.

Docket No.: 86-110. Applicant: Ohio State University, Department of Geology and Mineralogy, 125 South Oval Mall, Room 107 Mendenhall Laboratory, Columbus, OH 43210. Instrument: Mass Spectrometer, Model 261V with Accessories. Manufacturer: Finnigan MAT, West Germany. Intended Use: The instrument will be used by geochemists to study the isotopic compositions of natural and experimental materials and phenomena which range from the history and evolution of the Earth and solar system to the ages of rocks and minerals to the processes by which natural materials are formed. In addition, the instrument will be used to teach the theory, practice, and application of isotope geochemistry in the following courses: Introduction to Isotope Geology; Isotope Geology of Sedimentary Rocks; Isotope Geology of Igneous and Metamorphic Systems; Independent Study in Geochemistry, and Thesis Research.

Application Received by Commissioner of Customs: February 4, 1986.

Docket No.: 86-112. Applicant: Northwestern University, 633 Clark Street, Evanston, IL 60201. Instrument: Stopped-Flow Fluorescence Spectrophotometer, Model SF-51. Manufacturer: Hi-Tech Scientific Ltd., United Kingdom. Intended Use: Studies of the kinetics of association or dissociation of the protein and nucleic acid components. These investigations are to learn the basic biochemical mechanism by which this protein (recA protein) catalyses various reactions such as DNA renaturation and DNA strand assimilation. The instrument will also be used in Post-candidacy Research (E-99), a research course for students accepted to Ph.D. program. Application Received by Commissioner of Customs: February 4, 1986.

Docket No.: 86-113. Applicant: Georgetown University, 3800 Reservoir Road, NW., Washington, DC 20007. Instrument: Kidney Lithotripter. Manufacturer: Dornier System, GmbH, West Germany. Intended Use: The instrument will be used in the training programs of medical students and Urology and Radiology residents. In addition, the instrument will be used for research on causes, diagnosis, and treatment or kidney stone disease. Application Received by Commissioner of Customs: February 4, 1986.

Docket No.: 86-115. Applicant: University of Maine at Orono, Laboratory for Surface Science and Technology, Barrows Hall, Orono, ME 04469. Instrument: Custom Surface Analysis System, Model LHS-10. Manufacturer: Leybold-Heraeus GmbH, West Germany. Intended Use: The instrument is to be used in research programs which focus on (1) the thermodynamic properties of weakly chemisorbed adsorbate phase up to high temperatures, (2) the pressure dependence of heterogeneous catalytic reactions, (3) the study of liquid metals and alloys having a low vapor pressure (4) the chemical characterization of model membranes and biological membranes, and (5) the influence of gas pressures on the stability and performance of very large scale integrated circuit devices. Application Received by Commissioner of Customs: February 4, 1986.

Docket No: 86-118. Applicant: Johns Hopkins University, School of Medicine, 720 Rutland Avenue, Baltimore, MD 21205. Instrument: NMR Spectrometer, Model AM 360 WB. Manufacturer: Bruker Instruments, West Germany. Intended Use: The instrument is intended to be used for study of the following: (1) Cardiac high energy metabolism, function, and myocardial ischemia; (2) cardiotoxicity induced by specific antineoplastic agents; (3) tumors and tumor response to therapy; (4) tumor metabolism; (5) human corneas by NMR spectroscopy, microscopy, and imaging in order to improve corneal transplantation; (6) intraocular malignancy; (7) conformation-activity and structure-activity relationships of various biomolecules as well as pharmacologically active agents; and (8) mechansims of action of both metal-activated enzymes and metalloenzymes. The instrument will be an integral part of both the thesis research of graduate students and the training of postdoctoral fellows. Application Received by Commissioner of Customs: February 5, 1986.

Docket No: 86-119. Applicant: The Regents of the University of California, Physics Department, Davis, CA 95616. Instrument: Far infrared spectrometer with Accessories. Manufacturer: SPECAC, Analytical Accessories Ltd., United Kingdom. Intended Use: Research focused on the effects of extrinsic disorder on the paraelectric to ferroelectric phase transition, conduction mechanisms in fast ionic conductors, and the effects of disorder and reduced dimensionality on lattice dynamics and intermolecular interactions in polymeric ultra-thin films. Specifically, the instument will be used to measure the reflectance and transmission spectra of single crystal and polycrystalline samples of materials. Graduate student will use the intrument for doctoral thesis research in Physics 299—Independent Research. Application Received by Commissioner of Customs: February 5, 1986.

Docket No: 86-120. Applicant: Colorado State Univesity, Department of Pathology, Fort Collins, CO 80523. Instrument: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany, Intended Use: The instrument will be used for examination of diseased and normal animal tissue and fluid specimens, as well as bacterial and viral culture fluids. Experiments will be conducted to identify infectious agents, particularly viruses, determine the structural features of infectious agents and investgate antigens in virus and bacterial agents. The instrument will also be used for educational purposes in the Professional Veterinary Curriculum course, VM 786, which contains a segment of Infectious Disease Agents. Application Received by Commissioner of Customs: February 6, 1986.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Western Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Western Pacific Fishery Management Council's Scientific and Statistical Committee (SSC) will convene a public meeting, February 20–21, 1986 at 9 a.m. at the Conference Center, Southwest Fisheries Center, National Marine Fisheries Service, 2570 Dole Street, Honolulu, HI. The SSC will: (1) Discuss progress on a limited entry concept for the bottomfish fisheries of the Northwestern Hawaiian Islands (NWHI); (2) review recommendations of the Lobster Planning Team on management of the NWHI fisheries, i.e., measuring for slipper lobsters, restructuring the fishery management plan into a framework document, closed season and, (3) review the 1985 lobster annual report, make recommendations to the Council, as well as discuss other SSC business. For further information contact Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813; telephone: (808) 523-1368.

Dated: February 18, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Marine Mammals; Application for Permit: Mr. Brendan P. Kelly (P101A)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name Mr. Brendan P. Kelly

b. Address Institute of Marine Science, University of Alaska, Fairbanks, Alaska 99775-1080.

2. Type of Permit: Scientific Research.

3. Name of Marine Mammals:

Ringed seals (*Phoca hispida*)
Bearded seals (*Erignathus barbatus*)
Harbor seals (*Phoca vitulina*)

4. Type of Take and Number: Up to 60 ringed seals, 30 bearded seals, and 30 harbor seals will be taken annually for scientific research. The ringed and bearded seals will be captured, filmed, instrumented with radio-tags and/or time depth recorders, tagged between hind flipper digits and released. Harbor seals will be captured, filmed and released.

5. Location of Activity: Ringed and Bearded seals—Bering, Chukchi and/or Beaufort Seas. Harbor seals—Gulf of Alaska and/or Bering Sea.

6. Period of Activity: 5 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

Dated: February 18, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Marine Mammals; Permit Modification; Dr. Warren M. Zapol, Dr. Robert C. Schneider, and Dr. Donald B. Siniff; Modification No. 2 to Permit No. 526

Notice is hereby given that pursuant to the provisions of §§ 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Scientific Research Permit No. 526 issued to Drs. Warren M. Zapol and Robert C. Schneider, Department of Anesthesia, Massachusetts General Hospital, Boston, Massachusetts 02114, and Dr. Donald B. Siniff, Department of Ecology and Behavioral Biology, 108 Zoology Building, University of Minnesota, Minneapolis, Minnesota 55455, on October 11, 1985 (50 FR 42747), as modified on January 23, 1986 (51 FR 3643) is further modified as follows:

Section B is modified by deleting Conditions B.5 through B.9 issued in Modification No. 1 and substituting therefor the following:

5. In addition to the drugs described in the application, animals may be immobilized using the Taser device described in the modification request and subsequent telephone conversations.

6. Of the animals authorized in Sections A and B.5, up to four (4) of each species may be taken initially to determine the probable utility and possible adverse effects. This initial testing shall be conducted under as carefully controlled conditions as possible. The testing shall include observations to compare the behavior, activity patterns, and movements of animals immobilized by physical restraint, by drugs, and by the Taser device.

7. The Holders shall submit a report of the initial testing of the device on each species authorized as soon as possible to the National Marine Fisheries Service (NMFS). The report may be made by radio and may be oral. This report shall describe the nature and results of, and conclusions drawn from the initial test, and the proposed plan and rationale for additional testing or operational use of the Taser device. The report will serve as a basis for NMFS, in consultation with the Commission, to authorize continued use.

VOL
51
ISS
37
FE
25
1986
UMI

8. No attempt to use the Taser immobilization device shall be made on animals that have been actively pursued and are in a stressed or excited condition. Attempts shall be made to remove the barbed electrodes to avoid infection, and to disentangle animals that have become entangled in the wires.

9. Testing of the Taser device must be suspended if any animal dies or is seriously injured during testing, pending submission of a report and subsequent authorization by the Service, in consultation with the Commission, to continue testing.

10. Animals killed as a result of the use of the Taser device shall be counted against the number of animals authorized in Sections A.1.b., A.2.b and A.3.b.

11. The summary report requried by Section B.2 shall include a detailed description of the use the Taser immobilization device.

This modification is effective as of January 31, 1986.

Documents submitted in connection with the above modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930–3790.

Dated: February 19, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

Endangered Species; Application for Permit; Lawler, Matusky & Skelly Engineers (P291A)

Notice is hereby given that an Applicant has applied in due form for a Permit to take endangered species as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–22).

1. Applicant:

a. Name: Lawler, Matusky & Skelly Engineers.

b. Address: One Blue Hill Plaza, Pearl River, New York 10965.

2. Type of Permit: Scientific Purposes under the Endangered Species Act.

3. Name of Fish: Shortnose Sturgeon (*Acipenser brevirostrum*)

4. Type of Take: Up to 75 shortnose sturgeon will be gill netted, tagged with an Atkins tag on a dorsal scute and immediately released to identify the reproductive population in the study area which is a known spawning site.

5. Location of Activity: Connecticut River, immediately downstream of the Holyoke Dam.

6. Period of Activity: 2 Years.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.;

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: February 18, 1986.

Richard B. Roe,

National Technical Information Service

Intent To Grant Exclusive Patent License; Cetus Corp.

The National Technical Information Service (NTIS), U.S. Department of Commerce, Intends to Grant to Cetus Corporation, having a place of business at 1400 Fifty-Third Street, Emeryville, CA 94608 an exclusive right in the United States and selected foreign countries to manufacture, use, and sell products embodied in the inventions entitled "Adoptive Immunotherapy As A Treatment Modality in Humans," U.S. Patent Application S.N. 6–763,657, and "Human Monocytes Cultured in Suspension in Serum Free Medium," U.S. Patent Application S.N. 6–743,570. The patent rights in these inventions are being assigned to the United States of America, as represented by the Secretary of Commerce.

The proposed exclusive licenses will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The proposed licenses may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the proposed licenses would not serve the public interest.

Inquiries, comments and other materials relating to the proposed licenses must be submitted to Robert P. Auber, Director, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas J. Campion,

Office of Federal Public Licensing, U.S. Department of Commerce, National Technical Information Service.

BILLING CODE 3510-04-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Bilateral Textile Consultations With the Government of Malaysia

Dated: February 20, 1986.

On January 30, 1986, the Government of the United States requested consultations with the Government of Malaysia with respect to Category 337 (cotton playsuits and sunsuits). This request was made on the basis of the agreement between the Governments of the United States and Malaysia relating to trade in cotton, wool, and man-made fiber textile products, effected by exchange of notes dated July 1 and July 11, 1985. The agreement provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market disruption, or the threat thereof.

The purpose of this notice is to advise the public that, pending agreement on a mutually satisfactory solution concerning this category, the Government of the United States has decided to control imports during the ninety-day consultation period which began on January 30, 1986 and extends through April 29, 1986 at a level of 9,948 dozen. If no solution is agreed upon in consultations between the two governments, CITA, pursuant to the agreement, may establish a prorated specific limit of 22,989 dozen for Category 337 for the entry and withdrawal from warehouse for consumption of textile products, produced or manufactured in Malaysia and exported during the period beginning on April 30, 1986 and extending through December 31, 1986.

In the event the limit established for the ninety-day period is exceeded, such excess amounts, if allowed to enter, may be charged to the levels established during the subsequent restraint period.

A summary market statement for this category follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 337 under the agreement with Malaysia, or on any other aspect thereof, or to comment on

domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. Ronald I. Levin, Acting Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Category 337—Cotton Playsuits, Sunsuits and Washsuits—Malaysia

January, 1986.

Summary and Conclusions

U.S. Imports of Category 337 from Malaysia were 43,539 dozens for the year ending November 1985, compared with 4,488 dozens during year ending November 1984. Full year 1984 imports from Malaysia totalled 6,893 dozens, a 138 percent increase over 1983.

The sharp and substantial increase of low-valued imports of Category 337 from Malaysia is disrupting the U.S. market for cotton playsuits.

U.S. Production and Market

U.S. production of Category 337 has declined steadily and significantly in the past decade. Between 1981 and 1984, U.S. production went from 3,550,000 dozens to 2,531,000 dozens, a 29 percent decline.

The U.S. market for domestically produced and imported playsuits remained relatively flat between 1981 and 1984. However, the domestic producer's share of that market dropped from 67.4 percent to 47.8 percent.

U.S. Imports and Import Penetration

Until 1984, U.S. imports of Category 337 had been growing at a moderate pace from 1,718,000 dozens in 1981 to 1,829,000 dozens in 1983. However, in 1984, imports soared to 2,768,000 dozens, a 51 percent increase in one year. The import to production ratio reflects this surge, increasing from 61.3 percent in 1983 to 109.4 percent in 1984.

Import Values and Domestic Prices

Approximately 78 percent of Malaysia's January–October 1985 imports entered under TSUSA No. 384.3428 (previously 383.3030)—WGI cotton knit other play, sun and wash suits, not ornamented. These garments entered the U.S. at duty-paid values below U.S. producers' prices for comparable items.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

February 20, 1986.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated July 1 and July 11, 1985, between the Governments of the United States and Malaysia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on February 28, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 337, produced or manufactured in Malaysia and exported during the ninety-day period which began on January 30, 1986 and extends through April 29, 1986, in excess of 9,948 dozen.[1]

Textile products in Category 337 which have been exported to the United States prior to January 30, 1986 shall not be subject to this directive.

Textile products in Category 337 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1985).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Department of the Army

Intent To Prepare Environmental Impact Statement; Biological Aerosol Test Facility, Dugway, UT

AGENCY: Department of the Army, DoD.

ACTION: Notice of Intent to prepare an Environmental Impact Statement for the (Proposed) Construction and Operation of a Biological Aerosol Test Facility (BATF) in an existing building at Dugway Proving Ground, Dugway, Utah.

1. On January 31, 1985, the Army completed an Environmental Assessment for construction of a Biological Aerosol Test Facility (BATF) at Dugway Proving Ground (DPG), Utah. A U.S. District Court later ruled that the assessment was not adequate (U.S. District Court for the District of Columbia, Civil Action No. 84–3542, May 31, 1985). The Army has decided to address the deficiencies by preparing an Environmental Impact Statement (EIS).

2. The Department of the Army, as Executive Agent for the Department of Defense, is responsible for research, development, test, and evaluation for biological defense. The BATF will be used to test and evaluate the effectiveness of protective equipment such as detection/warning devices, and decontamination techniques against known and suspected Soviet and other threat biological materials, and to conduct other protection testing as may be necessary.

3. The BATF is a small aerosol chamber consisting of 18 cubic feet volume in an immediate work area of 400 square feet. The total facility, including entry and exit areas, change rooms, and support equipment will occupy 1,400 square feet. The entire facility will be constructed in an existing building of 4,000 square feet. It will be designed and constructed to National Institutes of Health Bio-Safety Level 4 (BL4) guidelines for occupational safety reasons and to maximize mission support flexibility, but this EIS will limit operation of the facility to level 3 (BL3) or below. The Army has no plans to include recombinant DNA (genetic

---

[1] The limit has not been adjusted to account for any imports exported after January 29, 1986.

VOL 51 ISS 37 FE 25 1986 UMI

engineering) research and/or testing with genetically engineered microorganisms. If any such testing becomes necessary the Army will prepare the appropriate environmental analysis and documentation.

4. Dugway Proving Ground will obtain the services of a contractor with demonstrated expertise to prepare the EIS in its behalf. Alternatives to be developed in the document include, but are not limited to, the following:

a. The "no action" alternative which is considered to be continued use of the present facilities at DPG.

b. The use of biological simulants instead of pathogenic microorganisms.

c. The use of existing facilities within the Department of Defense.

d. Construction and operation of a BATF elsewhere.

5. The Army will conduct a scoping process to aid in determining the significant issues related to the proposed action. Public as well as Federal, State, and local agency participation and input are desired. To provide an opportunity for public input to the scoping process, interested individuals, governmental agencies, and private organizations are invited to submit information and comments for consideration by the Army and possible incorporation into the EIS. Particularly solicited is information that would assist the Army in analyzing the potential environmental consequences of the proposed action. This includes information on other environmental studies, issues and alternatives which the EIS should consider, major impacts and recommended mitigating measures associated with the proposed action.

6. Individuals or agencies can express their concern either by writing or participating in a public scoping meeting which will be held approximately May 1986. Adequate notice will be published in local area newspapers to inform the interested public of when and where the meeting will be conducted. The notice will also be mailed to select groups and individuals, agencies, and anyone responding to this Notice of Intent desiring to be informed on the details of this upcoming public participation meeting. Questions and comments regarding the scope of the environmental analyses should be submitted to Commander, U.S. Army Dugway Proving Ground, ATTN: STEDP-PA, Dugway, Utah 84022-5000. Comments and suggestions should be received not later than 15 days following the public scoping meeting to be considered in the Draft EIS (DEIS).

7. The DEIS is expected to be available to the public in December 1986. When the DEIS is completed, a public notice of its availability for review will be announced in order that interested persons may comment on the document. Comments received will be considered in preparation of the Final Environmental Impact Statement (FEIS). Persons desiring to be placed on a mailing list to receive additional information regarding the public scoping process and copies of the DEIS and FEIS may contact Mr. Dave Easter at the address above.

Lewis D. Walker,

Deputy for Environment, Safety and Occupational Health, OASA (I&L).

BILLING CODE 3710-08-M

Military Traffic Management; Minimum Levels of Security for Arms, Ammunition, and Explosives Shipments

AGENCY: Department of the Army, Military Traffic Management Command, DOD.

ACTION: Notice of Revision to Minimum Levels of Security for DOD Shipments of Arms, Ammunition and Explosives within the Continental United States.

SUMMARY: Effective June 1, 1986, carriers transporting sensitive arms, ammunition and explosives for the DOD will be required to provide new levels of transportation protective service. Definitions for these services must be reflected in the carrier's Uniform Tender of Rates and/or Charges for Transportation Service (Optional Form 280) or governing tariff. Qualified carriers must submit a new tender or amend their existing tender or tariff containing the revised definitions prior to the effective date in order to be considered for shipments of sensitive arms, ammunition or explosives. Tenders should be submitted to: Headquarters, Military Traffic Management Command, Attn: Mt-INNT, 5611 Columbia Pike, Falls Church, VA 22041-5050.

Copies of transportation protective service definitions may be obtained by writing to same or by calling Ms. Betty Yanowsky at (202) 756-1565 or Mr. Kirby at (202) 756-1149.

John O. Roach, II,

Army Liaison Officer with the Federal Register.

BILLING CODE 3710-08-M

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Soviet Submarine Threat will meet on March 13-14, 1986 at the Office of the Chief of Naval Research, 800 North Quincy Street, Arlington, Virginia. The meeting will commence at 9:00 A.M. and terminate at 6:00 P.M. on March 13, and commence at 8:00 A.M. and terminate at 3:00 P.M. on March 14. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to assess the potential of U.S. defensive systems now in the pipeline to meet the Soviet submarine threat, as well as from an overall system approach, determine the major elements required to match the threat and recommend modifications, if required, to current Navy programs in order to maintain technological superiority. The agenda of the meeting will consist of technical briefings addressing the Soviet submarine threat. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T.C. Fritz, U.S. Navy, Office of the Chief of Naval Research (Code OONR), 800 North Quincy Street, Arlington, VA 22217-5000, Telephone number (202) 696-4870.

Dated: February 20, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Application Notice Inviting Requests for Noncompeting Continuation Awards for Certain Projects of Transitional Bilingual Education for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Notice.

Programmatic and Fiscal Information

The Secretary invites requests for certain fiscal year 1986 noncompeting continuation awards under the program of Transitional Bilingual Education (TBE) administered by the Department of Education, Office of Bilingual Education and Minority Languages Affairs. The name of each grantee and current grant number covered by this notice are listed in a chart at the end of the notice. A separate notice inviting requests for all other noncompeting continuation awards under the TBE program will be announced in the future. (Requests for noncompeting continuation awards under the TBE program are treated as continuation award applications under 34 CFR 75.100).

An estimated $4.6 million will be authorized for noncompeting continuation awards for the 32 grantees covered by this notice, in FY 1986. The estimated average continuation award is $144.000. These estimates do not bind the U.S. Department of Education to a specific number of noncompeting continuation awards or the amount of any award, unless the amounts are otherwise specified by state or regulations.

Closing Date for Transmittal of Requests

To be assured of consideration for funding, requests for noncompeting continuation awards should be mailed or hand delivered on or before March 27, 1986.

If a request is late, the Department of Education may lack sufficient time to review it with other requests for noncompeting continuation awards and may decline to accept it.

Requests sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.003B, 400 Maryland Avenue, SW., Washington, DC 20202.

Requests that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program are the Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78, and 79.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79.

The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by April 28, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181 (CFDA No. 84.003B), 400 Maryland Avenue, SW., Washington, DC 20202.

Proof of mailing will be determined on the same basis as applications.

Please note that the above address is not the same address as the one to which the applicant submits its completed application. *Do not send applications to the above address.*

Noncompeting continuation awards for the following projects are covered by this application notice:

BILLING CODE 4000-01-M

Application Notice for New Awards Under the Migrant Education Basic State Formula Grant Program for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Notice.

Programmatic and Fiscal Information

Applications are invited for new grants under the Migrant Education Basic State Formula Grant Program, which provides financial assistance to State educational agencies (SEAs) for State and local projects designed to meet the special educational needs of migratory children of migratory agricultural workers and migratory fishers.

The Secretary awards grants to SEAs to establish or improve State educational programs designed to meet the special educational needs of migratory children or migratory agricultural workers and migratory fishers. Information to be submitted in the application is contained in 34 CFR 201.11 and 201.12.

The original 1986 amount of $257,458,000 made available for this activity has been reduced by $11,071,000 pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99-177. As a result, $246,387,000 will be available for fiscal year 1986 to support 51 State ongoing programs during the program year 1986-1987. These estimates do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand delivered by April 28, 1986, unless the Secretary has given the SEA an extension of the deadline. In the event that a SEA is unable to mail or hand deliver its application by April 15, 1986, the SEA should request an extension of time as soon as possible, stating in the request the reason that an extension is necessary.

The SEA is advised, however, that any delay in submitting its application may defer the processing and awarding of its fiscal year 1986 grant.

Applications sent by mail must be addressed to Dr. John F. Staehle, Acting Director, Office of Migrant Education, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 5044, ROB-3), Washington, DC 20202.

An applicant SEA must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legibly mail receipt with the date of mailing stamped by the U.S. Postal Services.

(3) A dated shipping label, invoice, or receipt from a commerical carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an applicant SEA sends its application through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark; or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant SEA should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant SEA should check with its local post office.

The Secretary encourages applicants to use registered or at least first class mail. Each late applicant will be notified that its application may not be considered unless that SEA has been granted an extension of the closing date.

Applications that are hand delivered must be taken to the Office of Migrant Education, Office of Elementary and Secondary Education, U.S. Department of Education, Room 5044, ROB-3, 7th and D Streets, SW., Washington, DC. The Office of Migrant Education will accept a hand-delivered application between 8:00 a.m and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

The Office of Migrant Education may not accept an application that is hand delivered after 4:30 p.m. on the closing date—unless the SEA has been granted an extension of the closing date.

Applicable Regulations

Regulations applicable to this program include the following:

(a) Chapter 1, Migrant Education Program Regulations in 34 CFR Part 201.

(b) General Definitions and Administrative, Project, Fiscal, and Due Process Requirements for Chapter 1 Programs in 34 CFR Part 204.

(c) 34 CFR 74.62 of the Education Department General Administrative Regulations (EDGAR) concerning fiscal accountability.

(d) 34 CFR Part 79 of EDGAR (Intergovernmental Review of Department of Education Programs and Activities).

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by June 27, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181 (CFDA No. 84.011), 400 Maryland Avenue, SW., Washington, DC 20202. Proof of mailing will be determined on the same basis as for applications.

Please note that the above address is not the same address as the one to which the applicant submits its complete application. *Do not send applications to the above address.*

Application Forms

The U.S Department of Education's Office of Migrant Education will mail application forms and instructions to all eligible SEAs. A SEA may obtain additional forms and instructions by writing to the Office of Migrant Education, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 5044, ROB-3), Washington, DC 20202.

Further Information: For further information, contact Dr. John F. Staehle, Acting Director, Office of Migrant Education, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 5044, ROB-3), Washington, DC 20202. Telephone (202) 245-2722.

Program Authority: 20 U.S.C. 3803(a).

(Catalog of Federal Domestic Assistance No. 84.011; Migrant Education—Basic State Formula Grant Progam)

Dated: February 20, 1986.

Lawrence F. Davenport,

Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000-01-M

Pell Grant Program; Deadline Dates for Receipt of Applications, Reports, and Other Documents for the 1985-86 Award Year

AGENCY: Department of Education.

ACTION: Notice.

SUMMARY: The Secretary announces the deadline dates for the receipt of documents from persons applying for financial assistance under, and from institutions participating in, the Pell Grant Program during the 1985-86 award year.

SUPPLEMENTARY INFORMATION: The purpose of the Pell Grant Program is to assist students in the continuation of their training and education at the postsecondary level by providing financial aid to help pay for their educational costs. Authority for the Pell Grant Program is contained in section 411 of the Higher Education Act of 1965, as amended (20 U.S.C. 1070a). The regulations for the Pell Grant Program are codified in 34 CFR Part 690.

I. Applications for Determination of Expected Family Contribution—Table I

As a prerequisite to receiving a Pell Grant, each applicant is responsible for submitting to an institution of higher education—or to the Secretary of Education in the case of institutions participating under the Alternate Disbursement System (ADS)—A valid Student Aid Report (SAR) that states the amount of the student's expected family contribution (referred to on the SAR as the "SAI" [student aid index]) and the information used in calculating that amount. Therefore, each applicant must first submit to an agency listed in Table I of this notice his or her application for determining the expected family contribution. That application—referred to in this notice as the original application—must be submitted on one of the forms shown in Table I and be received by the designated agency at the agency's address shown in Table I no later than the deadline date, May 1, 1986, shown in Table I.

It should be noted that an application sent to the Federal Student Aid Programs must be received at the U.S. Postal facility indicated in the table. Indivduals at the processing center are not authorized to personally accept hand delivered documents.

(Approved by the Office of Management and Budget under these OMB Control Numbers—Application: 1840-0110; Special Condition Application; 1840-0111)

TABLE I.—DEADLINE DATE FOR RECEIPT OF APPLICATION FORMS FOR DETERMINING EXPECTED FAMILY CONTRIBUTION: MAY 1, 1986

Type of form	Address for submission
Application for Federal Student Aid (AFSA).	Federal Student Aid Programs, P.O. Box 4150, Iowa City, IA 52244.
Special condition application for Federal Student Aid.	Federal Student Aid Programs, P.O. Box 4151, Iowa City, IA 52244.
Spanish application for Federal Student Aid and Spanish special condition application for Federal Student Aid.	Federal Student Aid Programs, P.O. Box 4155, Iowa City, IA 52244.
Family Financial Statement (FFS).	ACT Student Need Analysis Services, P.O. Box 4005, Iowa City, IA 52243.
Financial Aid Form (FAF)	College Scholarship Service, Box 6300, Princeton, NJ 08541, or College Scholarship Service, Box 380 Berkeley, CA 94701.
Pennsylvania Higher Education Assistance Agency (PHEAA).	Pennsylvania Higher Education Assistance Agency, P.O. Box 3157, Harrisburg, PA 17105.
Student aid application for California (SAAC).	College Scholarship Service, Box 70 Berkely, CA 94701-0070.

(34 CFR 690.12)

II. Other Documents—Table II

Once an applicant has filed his or her original application, additional information may be necessary. In some cases the agency receiving the original application (the processing agency) may request the information. In other cases, the applicant is responsible for initiating a request that additional or alternative information be considered.

The type of information and the forms to be used to report that information are listed in Table II of this notice. Each category designates an address to which the specified information or request must be sent, and the deadline date by which that information or request must be received at that address. The applicant must submit to the Federal Student Aid Programs, any changes that he or she wants to be reflected on his or her SAR. The following explains each category:

Correction Application—If an original application lacks sufficient information for it to be processed, the Secretary will send a correction application to the applicant. In addition, if an applicant has misreported his or her dependency status on the original application, the applicant has the responsibility for requesting a correction application either from the processing agency or through the financial aid administrator. The correction application must be returned to the address listed in Table II and received at that address no later than the deadline date, July 30, 1986, shown in Table II.

Student Aid Report (SAR)

- *Correction/Verification of Information Requested by the Secretary*—If the Secretary returns an SAR to an applicant for correction or verification of correct information on the SAR, the SAR, either corrected or with the verification statement checked, must be returned to the appropriate address listed in Table II and received at that address no later than the deadline date, July 30, 1986, shown in Table II. A student attending an institution participating in the Pell Grant Electronic Pilot Program must submit that SAR, either corrected or with the verification statement checked, to the institution by July 30, 1986.
- *Correction of Inaccurate Information*—If the SAR reflects information that was inaccurate when the application was signed, the applicant must correct that information on the SAR and send the SAR to the address listed in Table II. The SAR must be received no later than the July 30, 1986 deadline date shown in Table II. A student attending an institution participating in the Pell Grant Electronic Pilot Program must be submit that SAR, with the information corrected, to the institution by July 30, 1986.
- *Recomputation of Student Aid Index*—An applicant may request on the SAR, that the Secretary recompute his or her student aid index, if—(1) The student believes a clerical or arithmetic error has occurred or (2) The student or his or her family has suffered a loss of or damage to assets resulting from a natural disaster in an area that has been declared a national disaster area by the President of the United States. The applicant must send the SAR to the address listed in Table II. The SAR must be received no later than the July 30, 1986 deadline date. A student attending an institution participating in the Pell Grant Electronic Pilot Program must submit a request for recomputation to the institution by July 30, 1986.
- *Request for Duplicate SAR*—If an applicant wishes to receive a duplicate SAR, the applicant may write to one of the addresses listed in Table II, or call one of the phone numbers listed in Table II. A written request must be

VOL 51
ISS 37
FE 25
1986
UMI

received at either address no later than July 30, 1986 deadline date. All telephone requests must also be made no later than July 30, 1986. It should be noted that a written request sent to the Iowa City application processing center must be received at the U.S. Postal facility indicated in Table II. Individuals at that site are not authorized to personally accept hand delivered documents.

(Approved by the Office of Management and Budget under OMB Control Number 1840-0132)

TABLE II.—DEADLINE DATES FOR RECEIPT OF OTHER DOCUMENTS

Type of form/information	Address for submission	Deadline date
Correction Application: Application for Federal Student Aid correction application.	Federal Student Aid Programs, P.O. Box 4152, Iowa City, IA 52244.	July 30, 1986.
Student Aid Report (SAR):		
Correction/Verification of Information Requested by the Secretary: Request for verification of corrected information.	Federal Student Aid Programs, P.O. Box 4152, Iowa City, IA 52244.	July 30, 1986.
Correction of Inaccurate Information: Request for correction of inaccurate information.	Federal Student Aid Programs, P.O. Box 4152, Iowa City, IA 52244.	July 30, 1986.
Recomputation of Student Aid Index: Request for recomputation of a student aid index because of (1) clerical or arithmetic errors or (2) loss of or damage to assets in Presidentially-declared national disaster area.	Federal Student Aid Programs, P.O. Box 4152, Iowa City, IA 52244.	July 30, 1986.
Request for Duplicate SAR: Request in writing or request by phone.	Federal Student Aid Programs, P.O. Box 4154, Iowa City, IA 52244 (319) 337-3736 or Federal Student Aid Programs, P.O. Box 84, Washington, DC 20044 (301) 984-4070.	July 30, 1986.

Note.—Although the Pell application processing site will accept and process corrections through July 30, 1986, this does not extend the deadline by which the student must submit his or her valid SAR to the institution's financial aid office. If the student does not submit a valid SAR to the financial aid office, showing that he or she is eligible (an SAI between 0 and 1900), by his or her last date of enrollment or June 30, 1986, whichever is earlier, he or she will not be eligible for a Pell Grant payment.

III. Verification (Validation) Procedures and Deadline Dates—Regular Disbursement System (RDS) and Alternate Disbursement System (ADS)

The information provided on an application and included on an SAR may be subject to verification (validation). In that case, in order to receive a Pell Grant award for the 1985-86 award year, the applicant—and his or her parents, if applicable—must submit the necessary verification documents in accordance with the following procedures. The documents must be received no later than the deadline dates specified below. These dates do not conflict with nor supersede the deadline dates specified in Tables I and II of this notice.

Verification (Validation) of Information on Application. If an applicant is selected to have the information on his or her application verified under the validation procedures set forth in § 690.77 of the Pell Grant Program regulations, and if the applicant attends an institution that participates in the Pell Grant Program under the Regular Disbursement System (RDS) or Alternate Disbursement System (ADS), he or she must submit the requested documents as specified below. The deadline date for completing the validation process is the earlier of 60 days from the applicant's last date of enrollment in the case of an applicant who leaves school because of graduation, completion of an academic term, or withdrawal, or September 2, 1986. A student who will still be enrolled in a course of study in the 1985–86 award year after September 2, 1986 must submit the requested documents by September 2, 1986.

This process is complete when the applicant has:

(1) Submitted all requested verification documents to his or her institution;

(2) Made all necessary corrections on Part 2 of the SAR;

(3) Signed & submitted the corrected Part 2 of the SAR to the Department of Education's processing center at the address indicated in the lower left hand corner on the back of Part 2 of the SAR—the same address indicated under the first four categories shown in Table II—by the deadline date listed for these categories in Table II; and

(4) Submitted to the institution the corrected/reprocessed SAR received from the Department of Education's processing center. (34 CFR 690.77)

IV. ADS Payment Procedures—Table III

Initial Request for Payment for an Award Year. The applicant who attends an institution participating in the Pell Grant Program under the Alternate Disbursement System (ADS) must comply with the deadline dates shown in Tables I and II. Additionally, in order to receive an initial Pell Grant payment for an award year, the applicant must submit a completed ED Form 304 and Part 3 (Pell Grant Payment Document) of the valid SAR, (and a copy of the applicant's financial aid transcript or ED Form 304-1, if applicable), to the address listed in Table III. The documents must be received no later than the July 15, 1986 deadline date.

Additional or Corrected Request for Payment. A student attending an ADS institution must submit an additional or corrected request for payment on ED Form 304-1, and submit the form to the address listed in Table III. The document must be received by no later than the August 26, 1986 deadline date.

(Approved by the Office of Management and Budget under OMB Control Number 1840-0008.)

Receipt of Payment by Validated Students Attending ADS Institutions. If a student completes the validation process on or before June 16, 1986:

(1) The student's completed ED Form 304, Part 3 of the validated SAR, (and a copy of the student's financial aid transcript, if applicable), must be received at the ADS payment processing site, as stated in § 690.61, on or before July 15, 1986,

(2) All corrections to prior payment requests and/or additional payment requests (completed ED Forms 304-1) must be received at the ADS payment processing site as stated in § 690.61, on or before August 26, 1986.

If a student completes the validation process after June 16, 1986: The student's completed ED Form 304, Part 3 of the validated SAR, (and a copy of the student's financial aid transcript, if applicable) and all additional payment requests must be received at the ADS payment processing site within 30 days after the date the student completed validation, or September 30, 1986, whichever is earlier. (34 CFR 690.77, 690.96)

Note.—If a student has been unable to file an ED Form 304 because of delays caused by the verification process and the student has completed the first term or payment period at the institution, ADS procedures allow the student to apply for more than one disbursement at the same time. See pages 51–53 of the *1985–86 Alternate Disbursement System Handbook* for instructions.

TABLE III.—DEADLINE DATES FOR RECEIPT OF ALTERNATE DISBURSEMENT SYSTEM FORMS

Type of form/information	Address for submission	Deadline date
Initial Request for Payment for an Award Year: ED Form 304 "Request for Payment" and Part 3 of SAR (Payment Document) and a copy of the student's financial aid transcript or ED Form 304-1 (if applicable).	ADS Payment Processing Center, P.O. Box 8547, Silver Spring, MD 20907.	July 15, 1986.
Additional and/or Corrected Request for Payment for an Award Year: ED Form 304-1.	ADS Payment Processing Center, P.O. Box 8547, Silver Spring, MD 20907.	Aug. 26, 1986.

(34 CFR 690.14, 690.61 and 690.95.)

Note.—ED Forms 304 and 304-1 do not apply to students enrolled in institutions that participate in the Pell Grant Program under the Regular Disbursement System (RDS).

V. Institutional Payment Summary (IPS)—Table IV

An institution participating in the Pell Grant Program under the Regular Disbursement System (RDS) is required to provide the Secretary with an Institutional Payment Summary (IPS) and Part 3 of the SARs (Payment Documents) by the deadline dates established in Table IV. This material should be sent to the following address, in the manner described below: Pell Grant Program, P.O. Box 1400, Merrifield, Virginia 22116-1400.

- Each institution must submit an IPS either with Student Payment Documents or with SAR Data Tapes reflecting the information contained on Part 3 of the SAR.
- An institution may submit an IPS withour a batch of Payment Documents or SAR Data Tape, only under one of these circumstances:

(1) The institution has no Pell recipients, or

(2) The institution has no new Pell recipients or payment data changes to submit within a given reporting period for previously reported students.

An institution must submit two signed Institutional Payment Summaries. Photocopies of the IPS may be submitted provided that each copy contains the original handwritten signature of the institutional administrator officially responsible for the accuracy and completeness of the IPS. Although an institution may make a submission as often as necessary during each of the required reporting periods shown in Table IV, it must make *at least* one submission within each of those periods, even if it submits only an IPS. Submissions must be made no later than the deadline date for each reporting period noted in Table IV.

An institution participating in the Pell Grant Electronic Pilot must either:

(1) Submit the documents to the above address in the manner described above; or

(2) Provide to the Pell Grant Central Disbursement System a properly certified and acceptable electronic payment data submission via the Pell Grant Electronic Pilot. This submission must be made at least once during each of the stated periods.

TABLE IV.—DEADLINE DATES FOR RECEIPT OF INSTITUTIONAL PAYMENT SUMMARY (IPS) DOCUMENTS

Reporting periods	Deadline date
Institutions with a 1984–85 Pell Grant Authorization of $750,000 or more:	
July 1, 1985 thru Oct. 15, 1985	Oct. 15, 1985.
Oct. 16, 1985, thru Dec. 15, 1985	Dec. 16, 1985.
Dec. 16, 1985 thru Feb. 15, 1986	Feb. 17, 1986.
Feb. 16, 1986 thru Apr. 15, 1986	Apr. 15, 1986.
Apr. 16, 1986 thru June 15, 1986	June 16, 1986.
June 16, 1986 thru Aug. 15, 1986	Aug. 15, 1986.
Institutions with a 1984–85 Pell Grant Authorization under $750,000:	
July 1, 1985 thru Dec. 15, 1985	Dec. 16, 1985.
Dec. 16, 1985 thru Apr. 15, 1986	Apr. 15, 1986.
Apr. 16, 1986 thru Aug. 15, 1986	Aug. 15, 1986.

(34 CFR 690.12.)

(Approved by the Office of Management and Budget under OMB Control Number IPS Form 1840-0540.)

Failure of an institution to comply with these requirements may result in the initiation of a proceeding to fine, suspend, limit, or terminate the institution in accordance with Subpart G of the Student Assistance General Provisions regulations in 34 CFR Part 668.

VI. Submission to the Secretary of Student Aid Reports by Institutions

As noted above, Table IV requires an institution to submit at least one IPS (and SAR Payment Documents, if applicable) within each of the required reporting periods. However, because 34 CFR 690.83 requires an institution to submit 1985–86 SAR Payment Documents to the Secretary of Education by December 31, 1986, an institution with additional IPS's and Payment Documents may submit them until the end of the year.

Institutions will not be permitted to adjust their Pell Grant accounts after December 31, 1986 for award year 1985–86 or any award years prior to 1985–86 except under the circumstances listed below. This deadline has been established to permit an orderly closing of accounts from previous years.

- Adjustments are required after a program review of the institution's records by an official or employee of the Department of Education.
- Adjustments are required by an audit conducted under the requirements of 34 CFR 690.84.
- The institution is required to adjust a student's award because of a court order.
- The institution discovers that a student has been overpaid.
- Validation cases referred to the Department where the student has only received partial payment or no payment, and validation cannot be completed in time to meet the December 31 deadline.

Note.—This means that an institution will not be allowed to adjust its accounts for any underpayment it discovers after December 31 *unless* the case meets the conditions described above. If an institution discovers and underpayment, and submits to the Secretary 1985–86 Payment Documents or SAR's for years prior to 1985–86, no adjustment will be made; that is, the institution will not receive additional Pell Grant funds. If it appears that an adjustment must be made because of the above circumstances, the institution should contact an area desk representative at (202) 245-1271.

Application Forms and Information

Student aid application forms, correction application forms, and information brochures may be obtained through college and university financial aid administrators, Educational Opportunity Center counselors, or by writing to: Federal Student Aid Programs, P.O. Box 84, Washington, D.C. 20044.

Applicable Regulations

The regulations applicable to this program are the Pell Grant Program regulations in 34 CFR Part 690 as published in the **Federal Register** on March 15, 1985 (50 FR 10710-10731), and the Student Assistance General Provisions regulations in 34 CFR Part 668.

DEPARTMENT OF ENERGY

Amendment to Announcement of a Program Opportunity Notice for a Clean Coal Technology Program

AGENCY: Office of Fossil Energy, DOE.

ACTION: Amendment to Program Announcement for a Program Opportunity Notice for a Clean Coal Technology Program.

Introduction

On January 27, 1986, the United States Department of Energy (DOE), Office of Fossil Energy (FE), published in the **Federal Register** (51 FR 3398) a Program Announcement for a Program Opportunity Notice for a Clean Coal Technology Program. The present Notice amends that Program Announcement as follows:

The date of the Preproposal Conference for the Clean Coal Technology program is amended to March 6, 1986, at 10:00 a.m., local Washington DC time.

The location of the Preproposal Conference for the Clean Coal Technology program is amended to the Departmental Auditorium, 1301 Constitution Avenue, NW., located midway between 12th and 14th Streets, NW., Washington, DC., 20024.

FOR FURTHER INFORMATION CONTACT: Mr. E. Stephen Logan, Tel (202) 252-1028.

Dated: February 20, 1986.

Barton J. Roth,

Director, Procurement and Assistance Management Directorate.

BILLING CODE 6450-01-M

Conduct of Employees; Waiver of Divestiture Requirements

Section 602(a) of the Department of Energy Organization Act (Pub. L. 95-91, hereinafter referred to as the "Act") prohibits a "supervisory employee" (defined in section 601(a) of the Act) of the Department from knowingly receiving compensation from, holding any official relation with, or having any pecuniary interest in any "energy concern" (defined in section 601(b) of the Act).

Section 602(c) of the Act authorizes the Secretary of Energy to waive the requirements of section 602(a) in cases of exceptional hardship or where the interest is a pension, insurance, or other similarly vested interest.

Mr. John E. Notestein is under consideration for the position of Associate Director of the Office of Basic and Applied Sciences in the Morgantown Energy Technology Center of the Department of Energy. Mr. Notestein has an interest in the General Electric Company Pension Plan as a result of his past employment by the company.

It has been established to my satisfaction that Mr. Notestein's interest in the General Electric Pension Plan is a vested pension interest, within the meaning of section 602(c) of the Act. Accordingly, I have granted Mr. Notestein a waiver of the divestiture requirements of section 602(a) of the Act, for the duration of his employment as a supervisory employee of the Department of Energy, with respect to his interest in the General Electric Pension Plan.

In accordance with section 208 of title 18, United States Code, Mr. Notestein will be directed not to participate personally and substantially, as a Government employee, in any particular matter the outcome of which could have a direct and predictable effect upon the General Electric Company unless his supervisory and the Counselor agree that his financial interest in the particular matter is not so substantial as to be deemed likely to affect the integrity of the services which the Government may expect of him.

Dated: February 19, 1986.

John S. Herrington,

Secretary of Energy.

[FR Doc. 86-4056 Filed 2-24-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, U.S. Refinery Capability Task Group; Meeting

Notice is hereby given that the U.S. Refinery Capability Task Group will meet in March 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The U.S. Refinery Capability Task Group will address previous Council refining studies and evaluate future refinery operations and their impact on petroleum markets. Its analysis and findings will be based on information and data to be gathered by the various task groups.

The U.S. Refinery Capability Task Group will hold its twelfth meeting on Tuesday, March 18, 1986, starting at 8:30 a.m., in the Pecos Room of the Houston Airport Marriott Hotel, 18700 Kennedy Boulevard, Houston, Texas.

The tentative agenda for the U.S. Refinery Capability Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review of the work of the Task Group.
3. Discussion of any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the U.S. Refinery Capability Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the U.S. Refinery Capability Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on February 19, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-4060 Filed 2-24-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, U.S. Petroleum Refining, Coordinating Subcommittee on U.S. Petroleum Refining; Meeting

Notice is hereby given that the Coordinating Subcommittee on U.S. Petroleum Refining will meet in March 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Coordinating Subcommittee on U.S. Petroleum Refining will address

previous Council refining studies and evaluate future refinery operations and their impact on petroleum markets. Its analysis and findings will be based on information and data to be gathered by the various task groups.

The Coordinating Subcommittee on U.S. Petroleum Refining will hold its tenth meeting on Friday, March 14, 1986, starting at 8:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the Coordinating Subcommittee on U.S. Petroleum Refining meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss study assignments.
3. Review task group assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee on U.S. Petroleum Refining is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee on U.S. Petroleum Refining will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on February 19, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-4055 Filed 2-24-86; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 86-09-NG]

Receipt of Application To Import Natural Gas From Canada for Short-Term and Spot Sales; HNG/InterNorth Gas Marketing, Inc.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Application for Blanket Authorization To Import Natural Gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on February 6, 1986, of an application from HNG/InterNorth Gas Marketing, Inc. (HNGMI), a wholly-owned subsidiary of InterNorth, Inc., for blanket authorization to import Canadian natural gas for short-term sales in the domestic spot market. Authorization is requested to import up to 250 Bcf of Canadian natural gas annually and a maximum of 500 Bcf for a two-year term beginning on the date of first delivery of the import. HNGMI proposes to purchase individual volumes of natural gas from various reliable Canadian suppliers and producer associations and arrange for delivery of the gas to U.S. border points of entry. Since HNGMI intends to utilize existing pipeline facilities for the transportation of the volumes imported, the proposal does not contemplate the construction of any new domestic facilities. HNGMI proposes to submit quarterly reports giving details of individual transactions within 30 days following each calendar quarter.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than March 27, 1986.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-8162

Michael T. Skinker, Office of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION: HNGMI requests that its application be considered on an expedited basis by not providing an opportunity for additional written comments because the application essentially duplicates other existing blanket authorizations. An ERA decision on whether addition written comments or other procedures will be necessary in this case will not be made until all responses to this notice have been received.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public comment procedures: In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.s.t., March 27, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request

VOL 51
ISS 37
FE 25
1986
UMI

for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of HNGMI's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m, Monday through Friday, except holidays.

Issued in Washington, DC, February 19, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER86-291-000, et al.]

Electric Rate and Corporate Regulation Filings; the Cleveland Electric Illuminating Co., et al.

February 19, 1986.

Take notice that the following filings have been made with the Commission:

1. The Cleveland Electric Illuminating Company

[Docket No. ER86-291-000]

Take notice that on Feb. 10, 1986, The Cleveland Electric Illuminating Company (CEI) tendered for filing certain revisions to its FERC Electric Tariff, Original Volume No. 1, pursuant to which CEI provides transmission service to municipalities and rural electric cooperatives in the Combined CAPCO Company Territories. CEI states that the revisions, which eliminate the requirement that it file a Service Agreement with the FERC for each separate reservation of transmission service, is necessary because of the increase in filing fees recently adopted by the FERC. CEI has proposed to make these revisions effective on October 1, 1985.

Comment date: February 27, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. El Paso Electric Company

[Docket No. ER 86-72-002]

Take notice that on February 6, 1986, El Paso Electric Company tendered for filing its refund report pursuant to Commission order dated December 27, 1985. The report details the refund computation for Texas-New Mexico Power Company (TNP), Rio Grande Electric Cooperative, Inc. (Rio Grande) and Imperial Irrigation District (IID).

By letter date January 27, 1986, EPE refunded by check to TNP and Rio Grande all mounts at issue with interest calculated through January 27, 1986. El Paso and IID also agreed on the method of calculating interest through January 27, 1986.

The refund encompasses the period June 10 through December 28, 1985, the period the proposed fuel clause was to be in effect. The refund computation includes a December 1985 nuclear fuel amount that was excluded in computing the fuel adjustment factor. In light of the pending refund, EPE did not factor in either the actual December nuclear fuel cost or displacement cost fuel in fuel adjustment factor computation.

Comment date: February 28, 1986, in accordance with Standard Paragraph H at the end of this notice.

3. Florida Power & Light Company

[Docket No. ER 86-290-000]

Take notice that on February 10, 1986, Florida Power & Light Company (FPL) tendered for filing a document entitled Amendment Number Eighteen to Revised Agreement to Provide Specified Transmission Service Between Florida Power & Light Company and Fort Pierce Utilities Authority (Fort Pierce) (Rate Schedule FERC No. 68).

FPL states that under Amendment Number Eighteen, FPL will transmit power and energy for Fort Pierce as is required in the implementation of its interchange agreement with Seminole Electric Cooperative, Inc.

FPL requests that waiver of § 35.3 of the Commission's Regulations be granted and that the proposed Amendment be made effective immediately. FPL states that copies of the filing were served upon Fort Pierce Utilities Authority.

Comment date: February 27, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Florida Power & Light Company

[Docket No. ER 86-292-000]

Take notice that on February 10, 1986, Florida Power & Light Company (FPL) tendered for filing a document entitled Amendment Number Eleven to Revised Agreement to Provide Specified Transmission Service Between Florida Power & Light Company and Tampa Electric Company (TECO) (Rate Schedule FERC No. 57).

FPL states that under Amendment Number Eleven, FPL will transmit power and energy for TECO as is required in the implementation of its interchange agreement with City of Lake Worth, Florida.

FPL requests that waiver of § 35.3 of the Commission's Regulations be granted and that the proposed Amendment be made effective immediately. FPL states that copies of the filing were served upon Tampa Electric Company.

Comment date: February 27, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Public Service Company of New Hampshire

[Docket No. ER85-655-001]

Take notice that on December 24, 1985, Public Service, Company of New Hampshire (the Company) tendered for filing a request for an extension of a previously granted waiver of the fuel adjustment clause regulations. The relief sought and basis for relief are stated as follows:

On July 30, 1985, PSNH tendered for filing revisions to its fuel adjustment clause to defer the pass-through of fuel cost savings from generation of test power by treating such savings as a reduction in plant investment rather than as a reduction in current fuel costs, in accordance with Commission policy. The Company requested waiver of the fuel clause regulations to permit the deferral. The filing was unopposed and was accepted to become finally effective by letter order of September 27, 1985 in Docket No. ER85-655-000.

The revisions to the fuel adjustment clause are cast in broad enough terms to permit deferral of fuel cost savings from any test generation regardless of source. However, the request for waiver was related to test generation at the Company's Schiller Station upon conversion of three oil-burning units to coal.

The Company is a joint owner of the Millstone No. 3 and Seabrook No. 1 nuclear units which are expected to comence generating test power in January and June of 1986, respectively.

The Company wishes to continue to defer fuel cost savings from test generation at those units under the same revisions to its fuel adjustment clause which are already in effect. It is here requesting the Commission to extend the waiver of the regulations allowed in Docket No. ER85-655-000 to permit the Company to calculate its fuel adjustment according to those revision.

Comment date: February 28, 1986, in accordance with Standard Paragraph E at the end of this document.

6. San Diego Gas & Electric

[Docket No. ER86-40-000]

Take notice that on February 10, 1986, San Diego Gas & Electric (SDG&E) tendered for filing information intended to supplement language contained in an Interconnection Agreement between Public Service Company of New Mexico and SDG&E submitted for filing in the above docket number.

Additionally, SDG&E included in this amended filing fully allocated cost information regarding SDG&E's generating stations.

Comment date: February 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. Tampa Electric Company

[Docket No. ER86-294-000]

Take notice that on February 11, 1986, Tampa Electric Company (Tampa Electric) tendered for filing Service Schedule J providing for negotiated interchange service between Tampa Electric and Florida Power Corporation (Florida Power). Tampa Electric states that Service Schedule J is submitted for inclusion as a supplement under the existing contract for interchange service between Tampa Electric and Florida Power, designated as Tampa Electric's Rate Schedule FPC No. 6, and Florida Power's Rate Schedule FPC No. 80. Tampa Electric's filing includes a Certificate of Concurrence submitted by Florida Power in lieu of an independent filing.

Tampa Electric also tendered for filing, as a supplement to the Service Schedule J under its rate schedule, a Letter of Commitment providing for the sale by Tampa Electric to Florida Power of energy from up to 300 megawatts of reserved, coal-fired capacity. Tampa Electric states that the energy thus provided would assist in meeting Florida Power's need for another source of low-cost energy. The commitment of reserved capacity and energy is for the period February 6 through March 31, 1986, and from month to month thereafter unless canceled by either party.

Tampa Electric proposes an effective date of February 6, 1986 for the Service Schedule J and Letter of Commitment, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served on Florida Power and the Florida Public Service Commission.

Comment date: February 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-4014, Filed 2-24-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86-295-000, et al.]

Electric Rate and Corporate Regulation Filings, Dayton Power & Light Co., et al.

February 19, 1986.

Take notice that the following filings have been made with the Commisison:

1. Dayton Power and Light Company

[Docket No. ER86-295-000]

Take notice that on February 12, 1986, the Dayton Power and Light Company (DP&L) tendered for filing an executed Purchase and Resale Agreement (Agreement) between DP&L and the Village of Arcanum (Arcanum], Ohio.

The proposed agreement allows Arcanum to purchase energy requirements from third parties who will use existing Interconnection Agreement Rate schedules to deliver the energy requiremens to DP&L for delivery to Arcanum.

Comment date: March 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Dayton Power and Light Company

[Docket No. ER86-296-000]

Take notice that on February 12, 1986, The Dayton Power and Light Company (DP&L) tendered for filing an executed Purchase and Resale Agreement (Agreement) between DP&L and the Village of Jackson Center (Jackson Center), Ohio.

The proposed Agreement allows Jackson Center to purchase energy requirements from third parties who will use existing Interconnection Agreement Rate schedules to deliver the energy requirements to DP&L for delivery to Jackson Center.

Comment date: March 5, 1986, in accordance with Standard Paragraph E at the end of the this notice.

3. Idaho Power Company

[Docket No ER86-297-000]

Take notice that on February 13, 1986, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summay of sales under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during December 1985, along with cost justification for the rate charged. This filing includes the following supplements:

Sierra Pacific Power Company, Supplement 46
Portland General Electric Company, Supplement 42
Southern California Edison Company, Supplement 38
San Diego Gas & Electric Company, Supplement 31
Washington Water Power Company, Supplement 35
Los Angeles Water & Power Company, Supplement 31
Pacific Gas & Electric Company, Supplement 17
Western Area Power Administration, Supplement 10
City of Burbank, Supplement 27

Comment date: March 5, 1986, in accordance with Standard Paragraph H at the end of this noitce.

VOL 51
ISS 37
FE 25
1986
UMI

4. Iowa Southern Utilities Company

[Docket No. EC86-14-000]

Take notice that Iowa Southern Utilities Company (Iowa Southern) on January 31, 1986, filed an application for an order of the Commission approving a merger and disclaiming jurisdiction under Section 203 of the Federal Power Act with respect to a corporate reorganization under which Iowa Southern will become a wholly-owned subsidiary of Iowa Southern Inc., a newly created holding company, and for an order of the Commission alternatively approving issuance of Preferred Stock and common stock by a newly formed company into which Iowa Southern will be merged.

Iowa Southern is engaged in the generation, distribution and sale of electirc energy and in the distribution of natural gas in Iowa. Iowa Southern's rates and charges are subject to regulation by the Iowa State Commerce Commission and by this Commission. Iowa Southern is a "public utility" as that term is defined in section 201(e) of the Federal Power Act.

Iowa Southern states that the only element of corporate reorganization that may be suject to Commission jurisdiction under section 203 of the Federal Power Act is the merger of Iowa Southern with an Iowa corporation for the sole purpose of reincorporating Iowa Southern's interests in Iowa. Otherwise the transactions do not involve any disposition by Iowa Southern of its jurisdictional facilities, nor any merger or consolidation of Iowa Southern's jurisdictional facilities with those of any other person, and no acquisition of Iowa Southern's securities by another "public utility." Iowa Southern states that apart from the first step merger, the type of corporate reorganization involved in this case is the same type that was involved in *Texas-New Mexico Power Company*, Docket No. ES84-46-000, 28 FERC ¶ 61,079 (1984); *Sierra Pacific Power Company*, Docket No. EL84-5-000, 27 FERC¶ 61,081 (1984); and *Iowa Power & Light Company*, Docket No. EL79-13, 9 FERC ¶ 61,099, at p. 61198 (1979), where the Commission granted the utilities' requests for disclaimer of jurisdiction under section 203.

Iowa Southern states that the corporate reorganization will not impair effective regulatory control in the public interest. Iowa Southern also states that the securities transactions will not adversely affect the rights or interests of its shareholders or the public interest.

Comment date: March 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-4015 Filed 2-24-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-317-000, et al.]

Natural Gas Certificate Filings; Panhandle Eastern Pipe Line Co., et al.

Take notice that the following filings have been made with the Commission:

1. Panhandle Eastern Pipe Line Company

[Docket No. CP86-317-000]

February 14, 1986.

Take notice that on February 11, 1986, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP86-317-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Yankee International Company (Yankee) and amendment, if necessary, of Applicant's permit authorizing its River Rouge, Michigan, facilities to export natural gas to Canada, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

It is stated that pursuant to a transportation agreement dated February 4, 1986, Applicant has agreed to transport up to 50,000 Mcf of natural gas per day on behalf of Yankee. Applicant would transport up to 50,000 Mcf of gas per day from existing points of receipt in Kansas, Oklahoma and Texas to the existing interconnection of Applicant's facilities and the facilities of Union Gas Ltd. (Union) at the international boundary between the United States and Canada, in River Rouge, Wayne County, Michigan (River Rouge).

Applicant proposes to provide the service on an interruptible basis for a term of two years from the date of the agreement and month to month thereafter unless terminated. Applicant requests authorization to continue transportation for Yankee consistent with the authorization granted to Yankee to export natural gas for sale to Union by the Economic Regulatory Administration (ERA).

It is stated that Yankee has received export authorization from ERA under section 3 of the Natural Gas Act in ERA Docket No. 85-38-NG in Order No. 99, dated December 30, 1985.

Applicant states that the proposed transportation would not displace sales by United States companies since Applicant would provide this service on an interruptible basis. It is further stated that Applicant filed in Docket No. CP86-232-000 for authorization to transport up to 67,000 Mcf of gas per day on an interruptible basis on behalf of National Steel Corporation (National Steel) which utilizes common portions of Applicant's system. Article VI of Applicant's transport agreement with Yankee is said to provide expressly that in the event of capacity limitations, Applicant would have the right to interrupt service to Yankee prior to interrupting National Steel.

Applicant also requests a determination by the Commission whether an amendment is required to the existing Presidential Permit for Applicant's River Rouge border facilities connecting with Union pursuant to Executive Orders 10485 and 12038 and Delegation Order 0204-55 of the Secretary of Energy.

It is stated that by orders issued April 23 and August 20, 1946 (5 FPC 472 and 718 (1946)), the FPC issued a Presidential Permit to Applicant to construct, operate, maintain and connect natural gas transmission facilities at the international boundary between Canada and the United States at River Rouge as part of the authorization for sales to Union of up to 5,500,000 Mcf per year

pursuant to the 1944 contract. It is explained that the exportation of gas for sale to Union concluded with the expiration of a 1954 contract on November 5, 1976.

It is explained that the original Presidential Permit was amended from time to time to increase deliveries and facilitate additional agreements, most recently for the import of gas on behalf of Transcontinental Gas Pipe Line Corporation. Such importation terminated on October 31, 1985 as conditioned in the order dated December 19, 1980, in Docket No. CP80-521.

Applicant submits that the existing Presidential Permit already covers the transaction proposed herein—the physical exportation of gas for sale to Union within the existing capacity of Applicant's border facilities and that the Commission should conclude, therefore, that further amendment of Applicant's Presidential Permit is not required.

If the Commission determines that amendment of the Presidential Permit is required, Applicant requests an amended general authorization to use its River Rouge border facilities for export or import, up to the design capacity of facilities, 86,000 Mcf per day. It is alleged that Applicant has received several other requests to use these facilities for exports for sale to Union or for imports into the United States on a short-term or "spot market" basis, similar to the Yankee transaction described herein. Applicant states that the actual use of the facilities under a generally amended Presidential Permit would be subject to an explicit condition that each underlying transaction has received all necessary authorizations from the Commission and ERA and would be performed subject to the terms and conditions of those authorizations.

If amendment of the Presidential Permit is required, Applicant also requests that it be issued initially on an interim basis to be effective on the date of issuance of the Commission's order herein. It is alleged that this interim permit would be conditioned upon examination and concurrence by the Departments of State and Defense. It is further alleged that use of the interim permit procedure will enable the export to proceed expeditiously pending final approvals by those Departments.

Comment date: February 28, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Natural Gas Pipeline Company of America

[Docket No. CP86-310-000]

February 13, 1986.

Take notice that on February 7, 1986, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP86-310-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to a maximum of 85 billion Btu equivalent of natural gas per day on an interruptible basis for Columbia Gas Transmission Corporation (Columbia Gas), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Natural states that it is presently performing a limited-term transportation service for Columbia Gas pursuant to Subpart G of Part 284 of the Commission's Regulations as reported in Docket No. ST84-694-000 and that such transportation service would terminate on March 1, 1986.

Natural requests authority to provide an interruptible transportation service for Columbia Gas for a period of 2 years from the date of first delivery and month-to-month thereafter, pursuant to the terms and conditions contained in a gas transportation agreement between Natural and Columbia Gas, dated February 3, 1986. It is explained that Columbia Gas has informed Natural that said gas is to be used for either Columbia Gas' system supply or to be delivered on behalf of various local distribution companies which have purchased or would be purchasing gas from Columbia Gas under a settlement agreement between Columbia Gas and such local distribution companies dated April 4, 1985.

Natural states that gas for Columbia Gas' account would be delivered to Natural at the existing point of interconnection between the measurement facilities of Columbia Gas' designee, Ozark Gas Transmission System, at the suction side of Natural's compressor station No. 307 in White County, Arkansas.

Natural proposes to redeliver gas for the account of Columbia Gas less 0.5%, initially, for lost and unaccounted-for gas. It is explained that redelivery would occur at the following points of delivery: (1) The existing point of interconnection between the measurement facilities of Natural and the pipeline facilities of Columbia Gas' designee, Columbia Gulf Transmission Company (Columbia Gulf), near Pecan Lake in Cameron Parish, Louisiana, (2) the existing point of interconnection between the measurement facilities of Natural and the pipeline facilities of Columbia Gulf at the inlet of Texaco's Henry gas plant in Vermilion Parish, Louisiana (Columbia Gas would cause Texaco Inc. to deliver the gas to Columbia Gulf for Columbia Gas' account) and (3) at a proposed point of interconnection between the measurement facilities of Natural and the pipeline facilities of Columbia Gulf near Erath in Vermilion Parish, Louisiana.

Natural proposes to charge Columbia Gas a negotiated transportation rate of 15.1 cents for each million Btu equivalent of gas received in White County, Arkansas, for transportation and redelivery to Cameron and Vermilion Parishes, Louisiana.

Natural states that new facilities required at Natural's proposed delivery point near Erath in Vermilion Parish, Louisiana, would be constructed pursuant to Natural's blanket certificate issued in Docket No. CP82-402. Natural requests authorization to add and delete additional receipt and/or delivery points in the future that may be necessary to support this service.

Comment date: February 24, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Columbia Gas Transmission Corp., Columbia Gulf Transmission Co.

[Docket No. CP83-452-047]

February 12, 1986.

Take notice that on February 5, 1986, [1] Columbia Gas Transmission Corporation (Petitioner), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP83-452-047 on behalf of itself and its producer-suppliers a petition to amend the order issued November 15, 1985, in Docket No. CP83-452-033 pursuant to section 7 of the Natural Gas Act so as to continue the authorization to abandon sales temporarily to Petitioner for resale and to make sales of natural gas for resale, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

On behalf of its producer-suppliers Petitioner proposes to extend, until March 31, 1987, the authority to make sales for resale in interstate commerce of gas of which the maximum lawful

---

[1] The petition to amend was tendered for filing on January 31, 1986; however, the fee required by § 381.207 of the Commission's Rules (18 CFR 381.207) was not paid until February 5, 1986. Section 381.103 of the Commission's Rules provides that the filing date is the date on which the fee is paid.

BEST COPY AVAILABLE

VOL 51 ISS 37 FE 25 1986 UMI

price is higher than the Natural Gas Policy Act of 1978 (NGPA) section 109 price, and to abandon sales temporarily to Petitioner for resale of gas for which the maximum lawful price is higher than the NGPA section 109 price and which were previously authorized by the Commission, to the extent that such gas is released by Petitioner pursuant to such conditions as may be imposed by the Commission.

It is claimed that the one-year extension would provide Petitioner with take-or-pay relief, provide lower-cost gas to consumers, and provide producers of certain higher-priced NGPA categories of gas additional market outlets.

It is stated that on November 15, 1985, the proposed activity was authorized for the period beginning November 1, 1985, and ending March 31, 1986. It is claimed that during November and December 1985, Petitioner released approximately 3,200,000 Mcf of gas from Appalachian take-or-pay contracts and that during November 1985 approximately 3,800,000 Mcf of gas was released from Southwest take-or-pay contracts. It is contended that substantial take-or-pay relief has been realized from the release of this gas and that released gas has in turn been sold on the spot market at substantial cost savings to Petitioner's purchasers.

It is asserted that without the authority granted by the November 15, 1985, order, producers would have been subject to substantially reduced takes under Petitioner's least-cost purchasing policy. It is claimed that producers have received the benefit of market outlets for gas they would have otherwise been unable to sell and increased cash flow generated from these sales. The release program has also facilitated the settlement of take-or-pay and other contractual disputes between Petitioner and its producer-suppliers, as well as the renegotiation of these contracts to provide more flexible and market responsive terms, it is stated.

It is further asserted that under the authority heretofore granted, released gas has been sold directly to resale customers and end-users at market clearing prices, furthering the goal of enhancing direct communication of market signals between the wellhead and burnertip.

It is stated that Columbia Gulf Transmission Company and Petitioner have filed in Docket Nos. CP86-239-000 and CP86-240-000, respectively, applications to transport gas pursuant to the terms of Order No. 436. It is claimed that all such released gas would be transported by Petitioner to its wholesale customers, end-users and other parties on a non-discriminatory basis.

Petitioner avers that because substantial benefits would accrue to all sectors of the economy from the wellhead to the burnertip, the public convenience and necessity requires that the limited-term abandonment and sales authority previously granted continue for an additional term. It is claimed that even a short-term interruption would be harmful because take-or-pay liabilities would again be incurred and end-users and customers would not have access to lower cost suppliers.

Comment date: March 3, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-18303-002, et al.]

Sun Exploration & Production Co.; Applications for Certificates, Abandonments of Service and Petitions To Amend Certificates[1]

February 19, 1986.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 5, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI68-1103-000]

A.G. Hill; Application for Partial Limited-Term Abandonment Authorization

February 10, 1986.

Take notice that on February 11, 1986, A.G. Hill (Applicant), Thanksgiving Tower, Dallas, Texas 75201 filed an application for an expedited partial limited-term abandonment of a sale of gas to Natural Gas Pipeline Company of America (Natural) certificated in Docket No. CI68-1103 pursuant to a September 1, 1967, contract, on file as Applicants' FERC Gas Rate Schedule No. 7. Applicant proposes to abandon for a limited-term sales of gas from its interest in the following wells:

ARCO Operated Tubb Estate #1-25
Heritage Resources Operated Tubb Estate #1-22
Heritage Resources Operated Tubb Estate #1-22R

Applicant states that although the Tubb Estate #1-25 has been completed for over 15 months and the other wells have been completed for quite some time, Natural has not hooked them into its system. Applicant further states that

VOL 51 ISS 37 FE 25 1986 UMI

the gas is coming out sour and Natural has applied for an EPA permit for a 1.5 MMcf/d sweetening facility. However, a local land owner has protested the proposed facility and it is unknown when, if ever, Natural will be granted a permit for such facility. Applicant states that the Tubb Estate #1–25 is an NGPA section 104 recompletion well with an expected optimal flow rate of 18–24 MMcf/d. The Tubb Estate #1–22R is an NGPA section 104 flowing gas well and is expected to flow 2 MMcf/d. The Tubb Estate #1–22 is expected to flow 3 MMcf/d. This well is an NGPA section 107(c)(1) deep new well below 15,000 feet and is not subject to the Commission's Natural Gas Act jurisdiction under NGPA section 601(a)(1)(B). Applicant states that this filing is being made with Natural's knowledge and consent and is pursuant to a part of the seller's reservations section of the referenced contract that reads:

> Seller shall have the right to take gas from the gas reserves for the sale of gas to others on an interim basis, provided that any arrangement entered into by Seller pursuant thereto shall be intra-state in nature, and shall, by its terms, be expressly terminable by Seller and shall be terminated by Seller on or before the date Pipeline completes the construction of facilities adequate to enable the receipt of the applicable quantity hereunder.

Applicant further states that the Urantia Corporation has a transportation line already hooked up to the Tubb Estate #1–22 and the Tubb Estate #1–22R. It is also within 25 to 50 feet of the Tubb Estate #1–25, and they have informed Applicant that hooking up to that well would take approximately eight hours. Applicant states that the interim purchasers to which Applicant proposes to sell are Lone Star Gas Company and Enserch Gas Company, both of which are intrastate purchasers. The agreements with both provide that they are terminable by Applicant as required in the above-quoted section of the referenced contract. Applicant states that it is in the public interest that, on an iterim basis, the expedited partial release be granted so that this gas can flow to market.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 4, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP84-59-000 (Phase II)]

Northwest Pipeline Corp. v. Colorado Interstate Gas Co.; Denying Motion for Extension of Time and Motion To Suspend Procedural Schedule

February 14, 1986.

On February 11, 1986, Northwest Pipeline Corporation (Northwest) filed a motion for a suspension of the dates for filing briefs on exceptions to the Initial Decision issued December 16, 1985, in the above-docketed proceeding. In its motion, Northwest further requests an extension of time to file briefs opposing any exceptions which have already been filed in this docket. Northwest requests that the dates for filing briefs on exceptions and briefs opposing any such exceptions be suspended pending Commission consideration of a Joint Offer of Settlement filed February 11, 1986, in this docket. Northwest further states that because of the lengthy nature of one of the briefs on exceptions which was already filed in this docket and because of the press of other business, the company requires additional time to file a brief opposing those exceptions. Northwest finally states that Colorado Interstate Gas Company and Commission Staff support this motion.

Upon consideration, notice is hereby given that the motion is denied.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-199-000]

Stephens Production Co., Application by Stephens Production Company To Abandon Service

February 19, 1986.

Take notice that on February 11, 1986 Stephens Production Company (Applicant), 623 Garrison Avenue, Fort Smith, Arkansas, filed, pursuant to section 7(b) of the Natural Gas Act (NGA) and §§ 157.30 and 250.7 of the Commission's regulations, 18 CFR 157.30 and 250.7, an application for abandonment of sales service to Arkla Energy Resources, a division of Arkla, Inc. (Arkla) from the Kinta Field (Moffett Area), Sequoyah County, Oklahoma, all as more fully described in the application and exhibits filed therewith which are on file with the Commission and open to public inspection.

Applicant states that the acreage which is the subject of its abandonment application had previously been subject to a gas sales contract, dated August 12, 1966, between Continental Oil Corporation, now Conoco, Inc. (Conoco), as seller, and Arkla, as purchaser. Applicant further states that by order issued November 22, 1966 in Docket No. CI67-332, the Commission granted Conoco a certificate of public convenience and necessity authorizing Conoco's sale to Arkla, and designated the August 12, 1966 contract as Conoco's Rate Schedule No. 319.

It is further asserted by Applicant that the subject acreage was transferred by Conoco to Applicant by way of assignment dated January 21, 1969. However, Applicant also states that until recently, it did not know, and had no reason to believe, that the subject acreage may have been subject to Conoco's certificate and rate schedule. Accordingly, Applicant states that in 1969 it commenced sales of the gas produced from the E. Coan #2 Well located in the subject acreage to Arkansas Oklahoma Gas Corporation (AOG).

Applicant states that Arkla has agreed to release the well from the August 12, 1966 contract. Applicant has attached a copy of the release as Attachment A to its application.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 3, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER86-257-000]

Tapoco, Inc.; Filing

February 21, 1986.

Take notice that on February 11, 1986, Tapoco tendered for filing six copies of an October 7, 1985 letter from Robert C. Steffy, Manager of Power and Engineering of the Tennessee Valley Authority (TVA) addressed to George J. Myers, President of Tapoco.

The October 7th letter relates to the exchange agreement between TVA and Tapoco dated December 22, 1982, which has been designated as Tapoco FERC Rate Schedule No. 6 and is under review in Dockets ER83-209-000, *et al.* The October 7th letter interprets section 2 of Article I of the exchange agreement and extends Tapoco's exercise of its termination rights thereunder to July 2, 1988. No other provision of the exchange agreement is in any way affected by the October 7th letter.

The October 7th letter does not in any way affect service, charges, classifications or rates provided in Rate Schedule No. 6. Therefore, Tapoco believes that it requires no action by the Commission. In the event that the Commission determines that the letter constitutes a change or modification in the filed Rate Schedule, Tapoco respectfully submits that all necessary information has been supplied and would request a waiver of any additional filing requirements.

Any person desiring to be heard or to protest the application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before February 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Certain Pesticide Products; Intent To Cancel Registrations; Bonide Chemical Co. et al.

Correction

In FR Doc. 86-850, beginning on page 2959 in the issue of Wednesday, January 22, 1986, make the following corrections in the table of product registration cancellations:

1. On page 2960, the twenty-first entry under "Date registered" should read "Nov. 13, 1967".
2. On the same page, in the forty-first entry under "Registrant", "Shenandoah" was misspelled.
3. On page 2961, the twenty-fifth from last entry under "Product Name" should read "Aerosol Concentrate".
4. On the same page, in the forty-first entry under "Registrant", "740 S. Alabama St." should not appear.
5. On the same page, in the forty-second entry under "Registrant", "740 S. Alabama St." should appear between "Co." and "Indianapolis".
6. On the same page, in the thirtieth from last entry under "Registrant", "Boonton" was misspelled.
7. On page 2962, the twenty-ninth entry under "Registration No." should read "6772-5".
8. On the same page, in the fourth from last entry under "Registrant", "Nashville, TN 37214" should appear after the post office box number.
9. On page 2963, in the second entry under "Product name", the word "Insecticide" should appear after "Carbaryl".
10. On the same page, the sixth from last entry under "Registration No." should read "48516-5".

Farmworker Protection Standards for Agricultural Pesticides Negotiated Rulemaking Advisory Committee; Open Meeting

As required by section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), we are giving notice of a two-day open meeting of the Advisory Committee negotiating Farmworker Protection Standards for Agricultural Pesticides.

The two-day meeting will be held on Thursday, March 6, and Friday, March 7, 1986. The meeting was tentatively scheduled and was later confirmed for these dates less than 15 days prior to the meeting itself. The Agency issued this Notice promptly once the meeting dates were confirmed. The Committee has notified interested parties on its mailing list of the meeting dates.

Both March 6th and 7th, the meeting will be held in Conference Room No. 1112, Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia. Both days, the meeting will start at 10:00 a.m. and run until completion.

The purpose of the meeting is to address any procedural matters that have arisen since the last meeting, and to continue work, as appropriate, on the substantive issues which the Committee has identified for resolution.

If interested in attending, or in receiving more information, please contact Chris Kirtz at (202) 382-7565.

Dated: February 20, 1986.

Milton Russell,

Assistant Administrator for Policy, Planning and Evaluation.

FEDERAL MARITIME COMMISSION

[Docket No. 85-24]

Matson Navigation Company, Inc. Proposed Overall Rate Increase of 2.5 Percent Between United States Pacific Coast Ports and Hawaii Ports; Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission Office of Energy and Environmental Impact has determined that the Commission's investigation of Docket No. 85-24 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of an environmental impact statement is not required.

Docket No. 85-24 is a Commission investigation of Matson Navigation Company, Inc.'s proposed overall rate increase of 2.5 percent between United States Pacific Coast ports and Hawaii ports.

This Finding of No Significant Impact (FONSI) will become final within 10 days of publication of this notice in the **Federal Register** unless a petition for review is filed pursuant to 46 CFR 504.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523-5725.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Research and Demonstration Grants Relating to Occupational Safety and Health; Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC), National Institute for Occupational Safety and Health (NIOSH), announces the availability of funds in Fiscal Year 1986 for research and demonstration project grants relating to occupational safety and health. The objective of this program is to award funds to eligible institutions or agencies to establish, discover, elucidate, or confirm information relating to occupational safety and health, including innovative methods, techniques, and approaches for dealing with occupational safety and health problems. The Catalog of Federal Domestic Assistance number is 13.262.

Authority

This program is authorized under section 20(a)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 669(a)(1)) and section 501(c) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 951). Program regulations applicable to these grants are in Part 87, "National Institute for Occupational Safety and Health Research and Demonstration Grants," of Title 42, Code of Federal Regulations.

Eligibility Requirements

Eligible applicants include non-profit and for-profit organizations. Thus universities, colleges, research institutions and other public and private organizations including State and local governments and small, minority and/or woman-owned businesses are eligible for these research and demonstration grants. For-profit organizations will be required to submit a certification as to their status as part of their application.

Availability of Funds

There is $6,221,000 available in Fiscal Year 1986 to fund individual project grants, Special Emphasis Career Award (SERCA) grants, small grants, and Small Business Innovation Research (SBIR) grants. For individual project grants, it is expected that 33 continuation grants will

be awarded totaling approximately $4.116 million and ranging from approximately $42,000 to $200,000 with the average award being approximately $120,000; and that approximately 10 new and competing renewal project grants will be awarded totaling approximately $1.1 million and ranging from approximately $50,000 to $180,000 with the average award being approximately $120,000. For SERCA grants, it is expected that approximately $350,000 will be awarded for continuation grants and $120,000 for new grants. For small grants, it is expected that approximately $150,000 will be awarded for continuation grants and $250,000 for new grants. For SBIR grants, the total available funds for phase I and II awards is approximately $135,000.

Grants are usually funded for 12 months in project periods of up to 5 years for individual project grants, 3 years for SERCA grants, and 2 years for small grants. Continuation awards within the project period are made on the basis of satisfactory progress and on the availability of funds.

Reviews

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs, and are not subject to review under regulations (42 CFR Part 122, as amended, and Part 123) implementing the National Health Planning Resources Development Act of 1974.

Applications will be evaluated by a dual review process. The primary (peer) review is based on scientific merit and significance of the project, competence of the proposed staff in relation to the type of research involved, feasibility of the project, likelihood of its producing meaningful results, appropriateness of the proposed project period, adequacy of the applicant's resources available for the project, and appropriateness of the budget request.

Demonstration grant applications will be reviewed additionally on the basis of the following criteria:

- Degree to which project objectives are clearly established, obtainable, and for which progress toward attainment can and will be measured.
- Availability, adequacy, and competence of personnel, facilities, and other resources needed to carry out the project.
- Degree to which the project can be expected to yield or demonstrate results that will be useful and desirable on a national or regional basis.
- Extent of cooperation expected from industry, unions, or other participants in the project, where applicable.

SERCA grant applications will be reviewed additionally on the basis of the following criteria:

- The review process will consider the applicant's scientific achievements, evidence of demonstrated commitment to a research career in occupational safety and health, and supportive nature of the research environment (including letter(s) of reference from adviser(s) which should accompany the application).

Small grant applications will be reviewed additionally on the basis of the following criterion:

- The review process will take into consideration the fact that the applicants do not have extensive experience with the grant process.

A secondary review of all grant applications will also be conducted in which the factors to be considered will include:

- The results of the initial review.
- The significance of the proposed study to the research programs of NIOSH.
- National needs and program balance.
- Policy and budgetary considerations.

Information

Information on business matters and copies of application forms may be obtained from Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, CDC, 255 East Paces Ferry Road, NE, Room 321, Atlanta, Georgia 30305, or by calling (404) 262-6575 or FTS 236-6572.

Information on programmatic interest may be obtained from Roy M. Fleming, Sc.D., Associate Director for Grants, NIOSH, CDC, Atlanta, Georgia 30333, or by calling (404) 329-3343 or FTS 236-3343.

Dated: February 18, 1986.

L.W. Sparks,
Executive Officer, NIOSH.

[FR Doc. 86-3976 Filed 2-24-86; 8:45 am]

BILLING CODE 4160-19-M

Health Care Financing Administration

Privacy Act of 1974; Report of New System

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of New System of Records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we are proposing to establish a new system of records, Evaluation of Competitive Bidding for Durable Medical Equipment Demonstration, HHS/HCFA/ORD No. 09-70-0036. We have provided background information about the proposed system in the "Supplementary Information" section below. Although the Privacy Act requires only that the portion of the system which describes the routine uses of the system be published for comment, HCFA invites comment on all portions of this notice. Please note that comments with respect to routine uses must be received by March 27, 1986.

DATES: HCFA filed a new system report with the Speaker of the House, the President of the Senate, and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on February 20, 1986. The new system of records, including routine uses, will become effective April 21, 1986, unless HCFA receives comments which would convince us to make a contrary determination.

ADDRESS: The public should address comments to Richard A. De Meo, Privacy Act Officer, Office of Management and Budget, Health Care Financing Administration, Room G-A-1, East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Jeff McCombs, Ph.D., Division of Hospital Experimentation, Office of Research and Demonstrations, Health Care Financing Administration, Room 2302 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone 301-597-2363.

SUPPLEMENTARY INFORMATION: HCFA proposes to initiate a new system of records collecting data under the authority of section 402 of the 1967 Amendments to the Social Security Act, Pub. L. 90-248 as amended by section 222(b) of the Amendments to the Social Security Act, Pub. L. 92-603. The purpose of this system of records is to provide data necessary to evaluate HCFA's demonstration of competitive bidding for durable medical equipment (DME). The demonstration will assess the effects of competitive bidding systems for DME. It will be conducted for 5 years in approximately six demonstration sites. The system will furnish information necessary to study the effects of the bidding systems on the costs, utilization and quality of DME services. The system of records will include data collected from the claims files, Medicare Statistical Systems, and a patient survey. The States that are

VOL 51
ISS 37
FE 25
1986
UMI

scheduled to participate in the demonstration are to be determined.

HCFA signed a contract in September 1985 with Abt Associates, Inc., Suite 500, 4250 Connecticut Avenue, NW, Washington, D.C. 20008.

In order to fulfill the objective and complete tasks in this project, the contractor must have individually-identified records. Since we are proposing to establish this system of records in accordance with the requirements and principles of the Privacy Act, we do not anticipate that it will have an unfavorable effect on the privacy or other personal rights of individuals.

The Privacy Act permits us to disclose information without the consent of the individual for "routine uses"—that is, disclosure for purposes that are compatible with the purpose for which we collected the information. The proposed routine uses in the new system meet the compatibility criteria since the information is collected for administering the Medicare program for which we are responsible. We anticipate that disclosures under the routine uses will not result in any unwarranted adverse effects on personal privacy.

Dated: February 14, 1986.

Henry R. Desmarais,

Acting Administrator, Health Care Financing Administration.

09-70-0036

SYSTEM NAME

Evaluation of Competitive Bidding for Durable Medical Equipment Demonstration.

SECURITY CLASSIFICATION

None.

SYSTEM LOCATION

Abt Associates, Inc., Suite 500, 4250 Connecticut Avenue, NW., Washington, D.C. 20008

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM

Medicare beneficiaries residing in approximately six demonstration sites and three control sites who receive DME services.

CATEGORIES OF RECORDS IN THE SYSTEM

Demographic characteristics (e.g., age, education, income), measures of health and functional status, cost and utilization of health services, and satisfaction with services.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM

Section 402 of the Social Security Amendments of 1967, Pub. L. 90-248, as amended by section 222(b) of the Social Security Amendments of 1972, Pub. L. 92-603, 42 U.S.C. 1395b-1.

PURPOSE OF THE SYSTEM

To provide data necessary to evaluate the impact of HCFA's competitive bidding for durable medical equipment demonstration on the cost, utilization, and quality of DME services.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES

Disclosure may be made:

1. To the evaluation contractor, to be selected by HCFA, who will use this information to evaluate HCFA's competitive bidding for durable medical equipment demonstration. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

2. To a congressional office, from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

3. To the Department of Justice, to a court or other tribunal, or to another party before such tribunal, when:

(a) HHS, or any component thereof; or

(b) any HHS employee in his or her official capacity; or

(c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components,

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or the other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

4. To an individual or organization for a reseach, demonstration, evaluation, or epidemiological project related to the prevention of disease or disability, the restoration or maintenance of health, or the efficacy or efficiency of HCFA programs if HCFA:

a. Determines that the proposed use does not violate legal limitations under which the record was provided, collected, or obtained, including such limitations as may be imposed or provided under the Privacy Act;

b. Determines that the purpose for which the proposed use is to be made:

(i) Cannot be reasonably accomplished unless the record is provided in a form that identifies individuals,

(ii) Is of sufficient importance to warrant the effect on or risk to the privacy of the individual by such limited additional exposure that unauthorized disclosure of the record might bring, and

(iii) There is a reasonable probability that the objective of the use will be accomplished;

c. Requires the recipient of the information to:

(i) Establish appropriate administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(ii) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the project, unless the recipient receives written authorization from HCFA that is justified based on research objectives for retaining such information, and

(iii) Make no further use of the record except:

(a) For use in emergency circumstances affecting the health or safety of any individual following written authorization of HCFA.

(b) For disclosure to a person, identified in advance by HCFA, for the purpose of conducting an audit of the research project, provided information which would identify research subjects is destroyed by the person authorized to conduct the audit at the earliest opportunity, consistent with the purpose of the audit, or

(c) When further approved by HCFA.

d. Secures a written, legally binding statement by the recipient of the information attesting that the recipient understands the provisions of paragraph 4(c) and all terms and conditions of the Privacy Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM

STORAGE:

Paper and magnetic tape.

RETRIEVABILITY:

Information will be retrieved by beneficiary's name and health insurance claim number.

SAFEGUARDS:

Employees who maintain records in this system are instructed to grant access only to authorized users. Data stored in computers are accessed through the use of passwords/keywords/numbers known only to the authorized personnel. These passwords/keywords are changed as needed.

Contractors who maintain records in this system are instructed to make no further disclosures of the records except as authorized by the system manager in accordance with the Privacy Act. Privacy Act requirements are specifically included in contracts related to this system. The project officer and contract officer oversee compliance with these requirements. The particular safeguards implemented are developed in accordance with the DHHS *ADP Systems Manual,* Part 6, ADP Systems Security (e.g., use of passwords), and the National Bureau of Standards Federal Information Processing Standards.

RETENTION AND DISPOSAL:

Hardcopy data collection forms and magnetic tapes with identifiers will be retained in secure storage areas. The disposal technique of degaussing will be used to strip magnetic tape of all identifying names and numbers in December 1989. Hardcopy records will be destroyed at this time.

SYSTEM MANAGER(S) AND ADDRESS

Director, Office of Research and Demonstrations, Health Care Financing Administration, 2230 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

NOTIFICATION PROCEDURE

To determine if a record exists, write to the System Manager at the address indicated above, specify name, address, and health insurance number.

RECORD ACCESS PROCEDURES

Same as notification procedures. Requestors should reasonably specify the record contents being sought.

CONTESTING RECORD PROCEDURES

Contact the System Manager named above and reasonably identify the record and specify the information to be contested. State the reason for contesting it (e.g., why it is inaccurate, irrelevant, incomplete, or not current).

RECORD SOURCE CATEGORIES

Information contained in these records is obtained from surveys to be conducted of Medicare beneficiaries by HCFA's evaluation contractor.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT

None.

[FR Doc. 86-3966 Filed 2-24-86; 8:45 am]

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Tetlin National Refuge Comprehensive Conservation Plan; Environmental Impact Statement and Wilderness Review

AGENCY: Fish and Wildlife Service.

ACTION: Notice of availability; supplement to the draft plan.

SUMMARY: The U.S. Fish and Wildlife Service has prepared, for public review, a supplement to the draft Comprehensive Conservation Plan, Environmental Impact Statement (CCP/EIS), and Wilderness Review for the Tetlin National Wildlife Refuge, Alaska, pursuant to section 304(g)(1) of the Alaska National Interest Lands Conservation Act of 1980 (ANILCA) and section 102(2)(C) of the National Environmental Policy Act of 1969. The supplement to the draft CCP/EIS focuses on the impacts of allowing geologic and geophysical studies (including seismic) throughout the refuge under all four alternatives analyzed in the plan and on the impacts of leasing in areas of the refuge under intensive and moderate management. This supplement was required in order to incorporate the Fish and Wildlife Service's policy on oil and gas studies and leasing on Alaska refuges under sections 1008 of the Alaska National Interest Lands Conservation Act into the draft CCP/EIS for the Tetlin National Wildlife Refuge. The draft CCP/EIS, as initially released in July, 1985, allowed seismic activities in all alternatives. Oil and gas leasing was not addressed in the draft.

Remarks on the supplement be must submitted on or before April 1, 1986, to receive consideration by the Regional Director in preparing the final CCP/EIS.

FOR FURTHER INFORMATION CONTACT: William Knauer, Wildlife Resources, U.S. Fish and Wildlife Service, 1011 East Tudor Road, Anchorage, Alaska 99503; telephone (907) 786-3399.

A supplement to the draft CCP/EIS has been prepared for general distribution. Copies of the supplement will be sent to all persons, organizations, and agencies which participated in either scoping, the alternative workshop, and/or the public review process. Copies of the supplement will be sent to all agencies and persons who have already requested copies. Those wishing to review the supplement and the draft CCP/EIS may obtain copies by contacting Mr. Knauer.

Copies of the supplement and the draft CCP/EIS are available for public review at the above location, at the Tetlin National Wildlife Refuge Office, at the Federal Building, 101-12th Avenue, Fairbanks, Alaska and at the following locations:

U.S. Fish and Wildlife Service, Division of Refuge Management, Interior Building, 18th and C Streets, NW, Washington, DC 20240

U.S. Fish and Wildlife Service, Wildlife Resources, Lloyd 500 Building, Suite 1692, 500 NE Multnomah Street, Portland, OR 97232

U.S. Fish and Wildlife Service, Wildlife Resources, 500 Gold Avenue SW, Room 1306, Albuquerque, NM 87103

U.S. Fish and Wildlife Service, Wildlife Resources, Federal Building, Fort Snelling, Twin Cities, MN 55111

U.S. Fish and Wildlife Service, Wildlife Resources, Richard B. Russell Federal Building, 75 Spring Street, Atlanta, GA 30303

U.S. Fish and Wildlife Service, Wildlife Resources, One Gateway Center, Suite 700, Newton Corner, MA 02158

U.S. Fish and Wildlife Service, Wildlife Resources, 134 Union Boulevard, Lakewood, CO 80225

SUPPLEMENTARY INFORMATION: The supplement contains only those sections of the draft CCP/EIS where changes or additions were necessary to reflect the oil and gas policy. Where necessary to completely rewrite sections or where numerous substantial changes were made in the original text, the sections have been included in their entirety, replacing the section as it was printed in the draft CCP/EIS.

Due to the fact that oil and gas potential is probably very low on Tetlin Refuge, the Draft CCP/EIS did not address leasing for oil and gas, and dealt only minimally with oil and gas studies. Current Fish and Wildlife Service policy requires that geophysical and geological studies of potential be permitted on all parts of the refuge where stipulations can ensure compatibility with refuge purposes. A decision on whether to permit oil and gas leasing will only be made after several further steps have been taken to evaluate potential on the refuge, determine the national interest in any leasing program, and determine the compatibility of such a program with Refuge purposes. These steps will not be completed for Tetlin Refuge until after the Final CCP/EIS has been issued; in the meantime, no oil and gas leasing will be permitted on the refuge. The supplement explains the Fish and Wildlife Service policy on studies of potential and on oil and gas leasing.

BILLING CODE 4310-MR-M

Minerals Management Service

Outer Continental Shelf Development Operations Coordination Document; Minatome Corp.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Minatome Corporation has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 1812, Block 71, High Island Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Sabine Pass, Texas.

DATE: The subject DOCD was deemed submitted on February 7, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: February 14, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

[FR Doc. 86-3990 Filed 2-24-86; 8:45 am]

BILLING CODE 4310-MR-M

National Park Service

National Register of Historic Places; Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the National Park Service before February 15, 1986. Pursuant to § 60.13 of 36 CFR Part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the National Register, National Park Service, U.S. Department of the Interior, Washington, DC 20243. Written comments should be submitted by March 12, 1986.

Beth Grosvenor,

Acting Chief of Registration, National Register.

BILLING CODE 4310-70-M

Management Plans; Upper Delaware Scenic and Recreational River

AGENCY: National Park Service, Interior.

ACTION: Notice of Public Hearings and Opportunity to Comment on Draft River Management Plan, Incorporating the Revised Guidelines for Land and Water Use Controls and the Land Protection Plan.

SUMMARY: This notice sets forth the schedule of public hearings and opportunity for written comment on the draft River Management Plan and on the revised Guidelines for Land and Water Use Controls. Public hearings are required pursuant to the Upper Delaware Segment Special Provisions (section 704 (b) to (j) of Pub. L. 95-625). The draft River Management Plan also incorporates a land protection plan for the area, in conformance with National Park Service rules (48 FR 21121, May 11, 1983).

DATES AND ADDRESSES:

March 5, 1986, 7:30 pm, Damascus School, Damascus, Pennsylvania
March 6, 1986, 7:30 pm, Delaware Valley Central School, Route 97, Callicoon, New York
March 7, 1986, 7:30 pm, Eldred School, Eldred, New York
March 8, 1986, 1:00 pm, Shohola Firehouse, Shohola, Pennsylvania

Written comments should be submitted to either James W. Coleman, Jr., Regional Director, National Park Service, 143 South Third Street,

VOL 51 ISS 37 FE 25 1986 UMI

Philadelphia, Pennsylvania 19106 (215/597–7013) or Craig Stewart, Chairman, Conference of Upper Delaware Townships, P.O. Box 41, Fosterdale, New York 12735 (914/932-8707) and must be received by April 30, 1986.

FOR FURTHER INFORMATION CONTACT: J. Glenn Eugster, Chief, Park and Resource Planning, National Park Service, Mid-Atlantic Regional Office, 143 South Third Street, Philadelphia, Pennsylvania 19106 (215/597–7386).

SUPPLEMENTARY INFORMATION: The draft River Management Plan and the revised Guidelines for Land and Water Use Controls have been prepared pursuant to the National Wild and Scenic Rivers Act of 1968 (Pub L. 90–542, as amended) and the 1978 special provisions for management of the Upper Delaware defined in section 704 of Pub. L. 95–625. The draft plan and the revised Guidelines were prepared by the Conference of Upper Delaware Townships and the National Park Service, with the advice and participation of the Commonwealth of Pennsylvania, the State of New York, the Delaware River Basin Commission, the Upper Delaware Citizens' Advisory Council, and many other interested parties. Copies of the draft plan and the revised Guidelines are available on request.

The draft River Management Plan contains detailed maps showing the boundaries of the Upper Delaware Scenic and Recreational River, a program for the management of existing and future land and water uses, an assessment of the impacts of the plan on the revenues and cost of local government, and a program providing for coordinated implementation and administration of the plan. The draft document also includes proposed revisions to the existing Land and Water Use Guidelines for the Upper Delaware (published in 46 FR 45433, September 11, 1981). Additionally, the draft plan incorporates, through its "land management program" a land protection plan for the area, as required by National Park Service rules (48 FR 21121, May 11, 1983).

A draft Enviromental Impact Statement (EIS) is also being prepared by the National Park Service for this draft plan. The EIS will describe in detail the environment of the Upper Delaware and will identify environmental impacts of the proposed plan and alternatives. Comment opportunity will also be provided on the draft EIS when it is released for review. The final River Management Plan and final EIS will be issued simultaneously.

The draft plan will be revised based upon comments received during public review. Upon completion of the plan and EIS both will then be submitted to the Secretary of the Interior for consideration and decision, following which the plan will be transmitted to the Governors of New York and Pennsylvania, and to the House Interior and Insular Affairs Committee, and the Senate Committee on Energy and Natural Resources of the Congress. The plan will become effective ninety days after its transmittal to the Congress.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

BILLING CODE 4310-70-M

Illinois & Michigan Canal National Heritage Corridor Commission; Meeting

Notice is hereby given, in accordance with the Federal Advisory Committee Act, 86 Stat. 770, 5 U.S.C. App. 1, as amended by the Act of September 13, 1976, 90 Stat. 1247, that a meeting of the Illinois & Michigan Canal National Heritage Corridor Commission will be held March 10, 1986, at 10 a.m. The meeting will be held at the John C. Kluczynski Building, Room 220, 230 South Dearborn Street, Chicago Illinois 60603.

The Commission was originally established on August 24, 1984, pursuant to provisions of the Illinois & Michigan Canal National Heritage Corridor Commission Amendments Act of 1984, 98 Stat. 1469, 16 U.S.C. 450jj-6, to implement and support the conceptual plan.

Matters to be discussed at the March 10 meeting will include the discussion of the Graphic Solutions contract to develop signs, logos, and interpretive displays; the hiring of a Director; and the discussion of official I&M Canal boundaries.

The meeting will be open to the public. Interested persons may submit written statements to the official listed below prior to the meeting.

Further information concerning the meeting may be obtained from Alan M. Hutchings, Chief, Division of External Affairs, Midwest Region, National Park Service, 1709 Jackson Street, Omaha, Nebraska 68102, telephone 402–221–3481 (FTS 864–3481). Minutes of the meeting will be available for public inspection at the Midwest Regional Office 3 weeks after the meeting.

Dated: February 12, 1986.

Randall R. Pope,

Acting Regional Director, Midwest Region.

[FR Doc. 86-3982 Filed 2-24-86; 8:45 am]

BILLING CODE 4310-70-M

Jefferson National Expansion Memorial Commission; Meeting

Notice is hereby given, in accordance with the Federal Advisory Committee Act, 86 Stat. 770, 5 U.S.C. App. 1, as amended by the Act of September 13, 1976, 90 Stat. 1247, that a meeting of the Jefferson National Expansion Memorial Commission will be held March 24, 1986, at 9:30 a.m. The meeting will be held at the Old Courthouse, Jefferson National Expansion Memorial National Historic Site, 11 North Fourth Street, St. Louis, Missouri 63102.

The Commission was originally established on August 24, 1984, pursuant to provisions of the Jefferson National Expansion Memorial Amendments Act of 1984, 98 Stat. 1469, 16 U.S.C. 450jj–6, to implement and support the conceptual plan.

Matters to be discussed at the March 24 meeting will include the selection of a firm or agency that will conduct the development and management plan for the East St. Louis expansion site, the establishment of site boundaries, the discussion of the architectural/design competition for the site, and the update on efforts to extend the time for planning and to modify the charter of the commission.

The meeting will be open to the public. Interested persons may submit written statements to the official listed below prior to the meeting. Further information concerning the meeting may be obtained from Alan M. Hutchings, Chief, Division of External Affairs, Midwest Region, National Park Service, 1709 Jackson Street, Omaha, Nebraska 68102, telephone 402–221–3481 (FTS 864–3481). Minutes of the meeting will be available for public inspection at the Midwest Regional Office 3 weeks after the meeting.

Dated: February 12, 1986.

Randall R. Pope,

Acting Regional Director, Midwest Region.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-16,452]

Bara, Inc., Newark, NJ; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on September 30, 1985 in response to a worker petition received on June 19, 1985 which was filed on behalf of workers at Bara, Incorporated, Newark, New Jersey.

The petitioner has requested that the petition be withdrawn. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, DC this 13th day of February 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 86-4049 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-85-203-C]

Big Hill Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Big Hill Coal Company, H.C. 61, Box 1310, Hatfield, Kentucky 41514 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its No. 4 Mine (I.D. No. 1511612) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electric face equipment.
2. The mining height ranges from 38" to 54" with rolls and dips which cause both visibility and safety problems.
3. For the reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the petition are available for inspection at that address.

Dated: February 13, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-4043 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-43-M

[Dokect No. M-81-252-C]

Freeman United Coal Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Freeman United Coal Mining Company, P.O. Box 100, West Frankfort, Illinois 62896, has filed an amendment to a petition for modification. On December 9, 1981, Freeman United Coal Mining Company submitted a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment maintenance) to its Orient No. 4 Mine (I.D. No. 11–00628) located in Williamson County, Illinois, its Crown No. 2 Mine (I.D. No. 11–02236) located in Macoupin County, Illinois, its Crown No. 3 Mine (I.D. No. 11–02632) located in Montgomery County, Illinois, and its Orient No. 6 Mine (I.D. No. 11–00599) located in Jefferson County, Illinois. On February 5, 1982, MSHA published notice of the petition in the **Federal Register** (47 FR 5493), allowing interested parties 30 days to submit comments. On August 13, 1982, MSHA granted the petition with conditions. On February 4, 1986, the petitioner submitted a request to amend the original petition for modification to extend the proposed alternate method of compliance.

A summary of the petitioner's statements follows:

1. The petition concerns the use of a locked padlock to lock the battery plug to the receptacle on mobile battery powered machines.
2. On August 13, 1982, MSHA granted the petition allowing the petitioner to use the following fasteners in lieu of the locked padlock: (a) Threaded bolt and nut or wing nut, (b) Safety snap ring, (c) Metal pin, and (d) Hair pin device. The petitioner wants to extend the provisions to include the "OBOE Plug Box Option".
3. Petitioner states that the "OBOE Plug Box Option" has been designed so that when the battery plugs have been secured, and when the plug door is subsequently closed, the threaded rings securing the battery plugs cannot become loose.
4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this amendment to the petition for modification may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the amendment and the original petition for modification are available for inspection at that address.

Dated: February 14, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-4044 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-200-C]

Mathies Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Mathies Coal Company, One Riverfront Center, Pittsburgh, Pennsylvania 15222 has filed a petition to modify the application of 30 CFR 75.1101–8(a) (water sprinkler systems; arrangement of sprinklers) to its Mathies Mine (I.D. No. 36–00963) located in Washington County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that at least one sprinkler be installed above each belt drive, belt takeup, electrical control, and gear-reducing unit, and individual sprinklers be installed at intervals of no more than 8 feet along all conveyor branch lines.
2. Petitioner states that providing a sprinkler over the electrical belt starter box would result in a diminution of safety to the miners affected in that it would increase the likelihood of electrical shock.
3. In support of this petition, petitioner states that:
   - a. The belt starter controls are fully enclosed in fireproof steel housings that are located in well rockdusted areas more than four feet from any combustible materials.
   - b. All belt starter boxes that transform power are properly ventilated with the intake air coursed directly into the return aircourse.
   - c. Every belt starter box is provided with at least one ABC type dry chemical

VOL 51 ISS 37 FE 25 1986 UMI

fire extinguisher and at least 240 pounds of dry rockdust.

d. Every belt starter box is provided with under current, over current and short circuit protection to insure the integrity of the electrical components.

e. Each belt starter box is examined, tested and properly maintained, with a record of each examination kept in a book provided for that purpose.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the petition are available for inspection at that address.

Dated: February 13, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-4045 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-29-M]

Pea Ridge Iron Ore Co.; Petition for Modification of Application of Mandatory Safety Standard

Pea Ridge Iron Ore Company, Route 4, Sullivan, Missouri 63080 has filed a petition to modify the application of 30 CFR 57.4760 (shaft mines) to its Pea Ridge Mine (I.D. No. 23-00454) located in Washington County, Missouri. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that shaft mines by provided with control doors to control the spread of fire, smoke, and toxic gases underground in the event of a fire.

2. The petitioner states that if the control doors are closed at the No. 2 shaft on the 1375 and 1675 levels it would be endangering the lives of employees in the rest of the mine by cutting off the mine exhaust air system.

3. As an alternate method, petitioner proposes to have a temporary room adjacent to the No. 2 shaft on the 1375 and 1675 levels. The room would provide employees a safe environment until the rescue personnel's arrival. The room would be supplied with compressed air which would provide an air supply and pressurize the room, thus eliminating inflow of smoke and gas.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the petition are available for inspection at that address.

Dated: February 13, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-4046 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-85-197-C]

Peabody Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Peabody Coal Company, R.R. #5, P.O. Box 550, Morganfield, Kentucky 42437 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Camp No. 2 Mine (I.D. No. 15-02705) located in Union County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return air courses be examined in their entirety on a weekly basis.

2. The conditions in the return air courses and seals have deteriorated, resulting in adverse roof conditions which have made these return air courses hazardous to travel and examine. Rehabilitation of the affected area would expose miners to hazardous working conditions.

3. As an alternate method, petitioner proposes to monitor the seals and air courses on a daily basis from a safe location between the seals and the exhaust shaft.

4. There is adequate ventilation passing by these seals to prevent any gas build up. There is minimal liberation from these seals and any gasses from these seals would go directly to the exhaust airshaft.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the petition are available for inspection at that address.

Dated: February 13, 1986.

[Docket No. M-85-30-M]

Western Nuclear, Inc., Petition for Modification of Application of Mandatory Safety Standard

Western Nuclear, Inc., P.O. Box 630, Jeffrey City, Wyoming 82310 has filed a petition to modify the application of 30 CFR 57.19023 (examinations) to its Sheep Mountain Operations Mine (I.D. No. 48-00969) located in Fremont County, Wyoming. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that at least once every fourteen calendar days, each wire rope in service be visually examined along its entire active length for visible structural damage, corrosion, and improper lubrication or dressing.

2. As an alternated method, petitioner proposes a visual inspection on a bi-monthly basis in lieu of every fourteen calendar days.

3. Petitioner operates four mine shafts. The only activity at the mines consists of pumping water from the four mine shafts and related service and maintenance. The primary use of the hoist is for these activities since there is no ore production or transportation.

4. The mines operate one shift per day, four days a week. By inspecting the hoist ropes every other month on this schedule, the frequency by operating shifts will be comparable to a fourteen day frequency for a shaft which

operates three shifts per day, five or six days per week.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before March 27, 1986. Copies of the petition are available for inspection at that address.

Dated: February 13, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-4048 Filed 2-24-86; 8:45 am]

BILLING CODE 4510-19-M

Wage and Hour Division

[Administrative Order No. 658]

Special Industry Committee for All Industry in American Samoa; Appointment, Convention, Hearing

1. Pursuant to section 5 and 6(a(3) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 205, 206(a)(3)), and Reorganization Plan No. 6 of 1950 (3 CFR, 1949-53 Comp., p. 1004) and 29 CFR Part 511, I hereby appoint special Industry Committee No. 17 for American Samoa.

2. Pursuant to section 6(a)(3) and section 8 of the Act, as amended (29 U.S.C. 206(a)(3), 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and 29 CFR Part 511, I hereby:

(a) Convene the above-appointed industry committee.

(b) Refer to the industry committee the question of the minimum rate or rates for all industry in American Samoa to be paid under section 6(a)(3) of the Act, as amended.

(c) Give notice of the hearing to be held by the committee at the time and place indicated.

The industry committee shall investigate conditions in such industry, and the committee, or any authorized subcommittee thereof, shall hear such witnesses and receive such evidence as may be necessary or appropriate to enable the committee to perform its duties and functions under the Act.

The committee shall meet in executive session to commence its investigation at 9 a.m. and begin its public hearing at 11 a.m. on April 28, 1986, in the Senate Chambers, Fono Building, Pago Pago, American Samoa.

3. The rate or rates recommended by the committee shall not exceed the rates prescribed by sections 6(a) and 6(b) of the Act, as amended by the Fair Labor Standards Amendments of 1977, currently $3.35 an hour.

The committee shall recommend to the Administrator of the Wage and Hour Division of the Department of Labor the highest minimum rate or rates of wages for such industry which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in such industry, and will not give any industry in American Samoa a competitive advantage over any industry in the United States outside of Puerto Rico, the Virgin Islands, and American Samoa.

4. Where the committee finds that a higher minimum wage may be determined for employees engaged in certain activities or in the manufacture of certain products in such industry than may be determined for other employees in such industry, the committee shall recommend such reasonable classifications within such industry as it determines to be necessary for the purpose of fixing for each classification the highest minimum wage rate that can be determined for it under the principles set forth herein and in 29 CFR 511.10, which will not substantially curtail employment in such classification and will not give a competitive advantage to any group in the industry. No classification shall be made, however, and no minimum wage rate shall be fixed solely on a regional basis or on the basis of age or sex. In determining whether there should be classifications within industry, in making such classifications and in determining the minimum wage rates for such classifications, the committee shall consider, among other relevant factors, the following: (a) Competitive conditions as affected by transportation, living, and production costs; (b) wages established for work of like or comparable character by collective labor agreements negotiated between employers and employees by representatives of their own choosing; and (c) wages paid for work of like or comparable character by employers who voluntarily maintain minimum wage standards in the industry.

5. The Administrator of the Wage and Hour Division, U.S. Department of Labor, shall prepare an economic report containing the information which has been assembled pertinent to the matters referred to the committee. Copies of this report may be obtained at the Office of the Governor, Pago Pago, American Samoa, and the National Office of the Wage and Hour Division, U.S. Department of Labor, Washington, DC 20210, as soon as it is completed. The committee will take official notice of the facts stated in this report. Parties, however, shall be afforded an opportunity to refute such facts by evidence received at the hearing.

6. The procedure of this industry committee will be governed by the provisions of Title 29, Code of Federal Regulations, Part 511. Copies of this part of the regulations will be available at the Office of the Governor, Pago Pago, American Samoa, and at the National Office of the Wage and Hour Division. The proceedings will be conducted in English but in the event a witness should wish to testify in Samoan, an interpreter will be provided. As a prerequisite to participation as a party, interested persons shall file six copies of a prehearing statement at the aforementioned Office of the Governor of American Samoa and six copies at the National Office of the Wage and Hour Division, U.S. Department of Labor, Washington, DC 20210. Each prehearing statement shall contain the data specified in 29 CFR 511.8 of the regulations and shall be filed not later than April 18, 1986. If such statements are sent by airmail between American Samoa and the mainland, such filing shall be deemed timely if post-marked within the time provided.

Signed at Washington, D.C. this 14th day of February 1986.

William E. Brock,

Secretary of Labor.

BILLING CODE 4510-27-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 86-13]

National Commission on Space; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the National Commission on Space.

DATE: Date and time: February 28-March 1, 1986, 8:30 a.m. to 5:30 p.m. each day.

VOL 51
ISS 37
FE 25
1986
UMI

ADDRESS: 490 L'Enfant Plaza East SW, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Hartman, National Commission on Space, Suite 3212, 490 L'Enfant Plaza East SW, Washington, DC 20024 (202/453/8685).

SUPPLEMENTARY INFORMATION: The National Commission on Space was established to study existing and proposed U.S. space activities; formulate an agenda for the U.S. civilian space program; and identify long-range goals, opportunities, and policy options for civilian space activity for the next 20 years. The Commission, chaired by Dr. Thomas O. Paine, consists of 15 voting members.

The meeting must be held at this time in order to meet the published deadline of the final report. This is the earliest opportunity to assemble the Commissioners subsequent to the distribution of the final draft report for review. The meeting will be closed to the public in order to control the premature disclosure of information in the case of the Commission report that would be likely to significantly frustrate the implementation of the proposed Commission action pursuant to the exemption contained in 5 U.S.C. 552b(c)(9)(B).

Type of Meeting: Closed.

Richard L. Daniels,
Advisory Committee Management Officer, National Aeronautics and Space Administration.
February 10, 1986.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published January 21, 1986 (51 FR 2778). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the Federal Register approximately 15 days (or more) prior to the meeting. It is expected that the sessions of the full Committee meeting designated by an asterisk(*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the March 1986 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634-3265, ATTN: Barbara Jo White) between 8:15 a.m. and 5:00 p.m., Eastern Time.

ACRS Subcommittee Meetings

Class 9 Accidents (Severe Accident Phenomena), February 24, 1986, Washington, DC. The Subcommittee will review the NRR implementation plan for the Severe Accident Policy.

Advanced Reactors, February 25, 1986, Washington, DC. The Subcommittee will review the advanced liquid metal reactor (LMR) design concept submitted by DOE and its contractors.

B&W Water Reactors, February 25, 1986—POSTPONED to early April.

Emergency Core Cooling Systems, February 26, 1986—CANCELLED.

Metal Components, February 27 and 28, 1986, Washington, DC. The Subcommittee will review, but not necessarily be limited to, the following items: (1) NUREG-0313, Revision 2, entitled, "Technical Report on Material Selection and Processing Guidelines for BWR Coolant Pressure Boundary Piping," and (2) Regulatory Guide XXX entitled, "Guide for License Preparation and NRC Staff Review of Plant Specific Analysis Required by PTS Rule," (if available). The Subcommittee will also review a report of GDC-4 (leak-before-break broad scope rule, which is applicable to all LWR high energy piping systems).

Standard Plant Design, March 12, 1986, Washington, DC. The Subcommittee will continue its discussion of standard plants. Particularly, FAA certification, GE power worthiness, industry perceptions, DOE views, and an update on a policy statement.

Joint Safety Philosophy, Technology, and Criteria (SPTC) and Extreme External Phenomena (EEP), March 12, 1986, Washington, DC. The Subcommittee on SPTC will discuss the status of the EDO's review of the two-year trial use of the 1983 proposed Safety Goal Policy and recommendations for the future use of a safety goal policy. The Subcommittee will also review the NRC Staff's proposed resolution for USI A-17, "Systems Interaction in Nuclear Power Plants." The EEP Subcommittee will discuss the 1986 Ohio earthquake and the implications for the Perry Nuclear Power Plant.

Spent Fuel Storage Facility Design, March 12, 1986, Washington, DC. The Subcommittee will review a proposed revision to 10 CFR 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste."

Decay Heat Removal Systems, March 18, 1986, Washington, DC. The Subcommittee will continue its review of NRR resolution position for USI A-45, "Shutdown Decay Heat Removal Requirements."

Human Factors, March 19 and 20, 1986, Washington, DC. The Subcommittee will meet to: (1) Examine the potential for automating more of the monitoring and control functions in nuclear power plants to relieve the work burden on plant operators, (2) review 1985 progress on the Human Factors Program Plan, and (3) be briefed on the status of EOP implementation.

Ad Hoc Subcommittee on TVA, March 27, 1986 (tentative), Washington, DC. The Subcommittee will discuss TVA reorganization and related technical and management issues.

Reliability Assurance, April 1, 1986, Washington, DC. The Subcommittee will prepare a report on its investigation into motor-operated valves. An update of Oak Ridge work on MOV as well as a presentation on check valves is expected.

Fort St. Vrain, April 2 and 3, 1986, near Longmont, CO. The Subcommittee will tour the facility, explore technical problems addressed during the recent extended outage, and discuss management changes made as a result of the licensee's independent assessment of management controls.

Long Range Plan for the NRC, April 9, 1986, Washington, DC. The Subcommittee will review the proposed NRC Five Year Plan and prepare to address Committee comments to the Commission.

Reactor Operations, April 9, 1986, Washington, DC. The Subcommittee will review recent significant events.

Waste Management, April 24 and 25, 1986, Washington, DC. The Subcommittee will review various topics in the High-Level and Low-Level Radioactive Waste Programs agreeable to the ACRS, the NMSS Division of Waste Management and the RES Waste

Management Branch. Topics currently identified for review at the April meeting are: Staff Reviews and Generic Technical Positions on Modeling Strategy and Quality Assurance, and the Salvaging of Contaminated Smelted Alloys.

Emergency Core Cooling Systems, April 29 and 30, 1986, Washington, DC. The Subcommittee will: (1) Continue its review of the NRC's proposal to revise 10 CFR 50.46 and Appendix K and (2) continue discussions on defining the thermal hydraulic safety issues of most importance that need to be addressed in the future.

Scram Systems Reliability, May 6, 1986, Washington, DC. The Subcommittee will continue its review of the ATWS Rule implementation effort.

Safety Research Program, May 7, 1986, Washington, DC. The Subcommittee will discuss the proposed NRC Safety Research Program and Budget for FY 1988 and 1989, and gather information for use by the ACRS in its preparation of the annual report to the Commission on the related matter.

Safety Research Program, June 4, 1986, Washington, DC. The Subcommittee will continue its discussion on the proposed NRC Safety Research Program and Budget for FY 1988 and 1989. It will discuss also a Draft ACRS report to the Commission on this matter.

South Texas Units 1 and 2, Date to be determined (March, Bay City, TX. The Subcommittee will review Houston Lighting and Power Company's application for an operating license.

Metal Components, Date to be determined (March/April, tentative), Pittsburgh, PA or Charlotte, NC. The Subcommittee will review the status of NDE of cast stainless steel.

B&W Water Reactors, Date to be determined (early April), Washington, DC. The Subcommittee will consider the implications of operating experience on the adequacy of B&W plant designs, including consideration of the severe overcooling event at Rancho Seco on October 2, 1985. The Subcommittee will review the B&W Owner Group's plans to reassess the long-term safety of B&W reactors.

Davis-Besse (Restart), Date to be determined (April), Washington, DC. The Subcommittee will continue its review of the Davis-Besse restart.

Decay Heat Removal Systems, Date to be determined (May/June), Washington, DC. The Subcommittee will reveiw NRR's Action Plan to address concerns with the reliability of certain plants' AFW systems.

Emergency Core Cooling Systems, Date to be determined (May/June), Washington, DC. The Subcommittee will review General Electric's application for use of the SAFER/CORECOOL ECCS Code on BWR nonjet pump plants.

Reliability and Probabilistic Assessment, Date and location to be determined. The Subcommittee will review the probabilistic risk assessment for Millstone 3.

ACRS Full Committee Meeting

March 13-15, 1986: Items are *tentatively* scheduled.

*A. *Quantitative Safety Goals*—Evaluation of 2-year trial use period of proposed NRC quantitative safety goals.

*B. *ACRS Effectiveness*—Discuss proposed ACRS report regarding implementation of the recommendations of the panel to improve ACRS effectiveness as an advisory body to the NRC.

*C. *Revisions to NRC Rules*—Discuss proposed revision of NRC rules and practices related to the integrity of primary system piping.

*D. *Advanced Reactor Designs*—Discuss advanced reactor designs being proposed by the U.S. Department of Energy.

*E. *Perry Nuclear Power Plant Unit 1*—Discuss impact of nearby seismic event on plant operability.

*F. *Meeting with NRC Commissioners (tentative)*—Discuss ACRS comments and recommendations regarding regulatory and safety related matters such as standardized nuclear power plant designs for the future, the NRC safety research program, anticipated ACRS activities, and training facilities for nuclear power plant operators.

*G. *ACRS Subcommittee Activities*—Discuss status of assigned subcommittee activities including proposed revisions of 10 CFR Part 20, Licensing Requirements for the Storage of Spent Fuel in an Independent Spent Fuel Storage Facility, nomination of candidates for appointment to the ACRS, emergency core cooling systems, requirements for standard plant designs and safety features for future standardized nuclear power plant designs, and USI A-46, Seismic Qualification of Equipment in Operating Nuclear Power Plants.

*H. *Future Activities*—Discuss anticipated ACRS subcommittee activity and proposed items for consideration by the full Committee.

*I. *Activities of Members*—Discuss non-ACRS activities of ACRS members.

April 10-12, 1986—Agenda to be announced.

May 8-10, 1986—Agenda to be announced.

Dated: February 19, 1986.

John C. Hoyle,
Advisory Committee Management Officer.

BILLING CODE 7590-01-M

OMB Review of Documents Containing Reporting or Recordkeeping Requirements

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: Request for Visit or Access Approval.

3. The form number if applicable: NRC-277.

4. How often the collection is required: Occasionally.

5. Who will be required or asked to report: Approximately 22 NRC licensees and 35 contractors.

6. An estimate of the number of responses: 30.

7. An estimate of the total number of hours needed to complete the requirement of request: 5.

8. An indication of whether section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: The NRC Form 277 affects employees of licensees and contractors who: (1) Hold an NRC access authorization; and (2) need to make a visit to NRC, other contractors/licensees or government agencies involving access to classified information. The completed NRC Form 277 contains a signature certification of the individual's official need-to-know and NRC access authorization. The use of the NRC Form 277 affords some assurance that only properly cleared and authorized individuals, who require access as part of their official duties, will have such access during visits to other facilities and agencies

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 395-7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492-8585. Dated at

BILLING CODE 7590-01-M

[Docket Nos. 50-443-OL, 50-444-OL (ASLBP No. 82-471-02-OL) (Offsite Emergency Planning)]

Public Service Co. of New Hampshire et al.; (Seabrook Station Units 1 and 2); Extension of Time in Board's Schedule for Offsite Emergency Planning Contentions—New Hampshire Plans Denied and Prehearing Conference Location Established

February 19, 1986.

Before Administrative Judges: Helen F. Hoyt, Chairperson, Emmeth A. Luebke, Jerry Harbour.

This Board's Order of January 17, 1986 established a schedule for filing of new contentions based on the revised State of New Hampshire Plans transmitted to the Board and the parties by the NRC Staff on January 10, 1986. Various objections to the schedule have been filed by both the political representatives of the New Hampshire towns, parties and their counsel [1] in addition to intervenors NECNP and SAPL.[2]

Applicants' Response [3] refuted the various objections and concluded the Board schedule should not be altered. NRC Staff opposes the various objections and requests for schedule modification and urged denial.

The Board agrees with the NRC Staff and the Applicant. The Board had set a previous schedule for this proceeding on May 23, 1983, and there was no objection to similar time frames from these same parties at that time. As it is readily apparent to all, the Board's Order issued on January 17, 1986 provided nearly five weeks for interested parties to revise or file contentions based on these New Hampshire State Plans. Absent *any showing* that additional time is needed as opposed to desirable, the Board finds that the time provided is sufficient for the parties to file contentions.

The Board advises that the Prehearing Conference scheduled for 9:00 a.m. (EST), March 25-28, 1986 will be held at Howard Johnson's Lodge, Interstate Traffic Circle, Salons A and B, Portsmouth, NH 03801.

It is so ordered.

Dated at Bethesda, Maryland this 19th day of February, 1986.

For the Atomic Safety and Licensing Board.

Helen F. Hoyt,

Chairperson.

BILLING CODE 7590-01-M

---

[1] For Hampton Falls, New Hampshire—State Representative Pevear and Robert Backus. On January 24, 1986, Attorney Backus had filed with this Board a notice of appearance on behalf of the Town of Hampton Falls. The Board has considered both pleadings in this case. The Board will, however, in future pleadings accept only one pleading filed by a party of record.

[2] In *NRC Staff's Response to Objections filed by Towns of Rye, Hampton and Hampton Falls, and SALP and NECNP* filed February 11, 1986, the Staff listed these pleading at p. 2 in nn. 3-7. We will not repeat them here.

[3] Filed February 5, 1986, *Applicants' Response to (1) Objection to Motion for Establishment of a Schedule filed by Town of Rye; (2) Hampton Falls Joinder and Objection; (3) Request filed on behalf of Hampton and Hampton Falls by 4 New Hampshire Representatives; and (4) New England Coalition on Nuclear Pollution's Objection to Board Order of January 17, 1986 and Motion for Reconsideration.*

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

Section 15 Reporting System Advisory Committee; Meeting

AGENCY: Urban Mass Transportation, DOT.

ACTION: Notice of Section 15 Reporting System Advisory Committee Meeting.

SUMMARY: In this Notice, the Urban Mass Transportation Administration (UMTA) announces a meeting of the Section 15 Reporting System Advisory Committee. The Committee provides advice concerning the quality and usefulness of the Section 15 Reporting System.

DATE: March 13-14, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald J. Fisher, Office of Information Services, Room 6419, 400 Seventh Street, SW., Washington, DC 20590, (202) 426-9157.

SUPPLEMENTARY INFORMATION:

Background

Section 15 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1611), requires the development of a national reporting system for public mass transportation financial and operating data. On August 27, 1981, UMTA issued a Notice in the **Federal Register** (46 FR 43352) announcing the establishment of the Section 15 Reporting System Advisory Committee. The Committee reviews the quality and usefulness of the Section 15 Reporting System to assure that it provides meaningful information for the analysis of the transit industry.

All Committee meetings are open to the public. With the Chairman's approval, members of the public may speak at meetings in accordance with procedures established by the Committee. A written statement may be filed with the Committee at any time.

Meeting Information:

Dates: Thursday, March 13, 1986; Friday, March 14, 1986
Time: 8:30 a.m.—5:00 p.m.
Place: James L. Knights International Center, 400 SE. Second Avenue, Miami, Florida 33131.

Issued on: February 19, 1986.

Ralph L. Stanley,

Administrator, Urban Mass Transportation Administration.

[FR Doc. 86-4064 Filed 2-24-86; 8:45 am]

BILLING CODE 4910-57-M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 86-51]

Guidelines for Release of Seized and Forfeited Property to State and Local Law Enforcement Agencies

AGENCY: Customs Service, the Treasury.

ACTION: Notice of guidelines for disposition of seized and forfeited property.

SUMMARY: This document sets forth the Customs policy regarding the disposition of seized and foreited property. This action is necessary to implement those provisions of the Comprehensive Crime Control Act of 1984 and the Trade and Tariff Act of 1984 concerning the transfer of seized and forfeited property to state and local law enforcement agencies that assisted Customs in the seizure or forfeiture. This action is consistent with Customs efforts to enhance and promote cooperation with state and local law enforcement agencies.

EFFECTIVE DATE: February 25, 1986.

FOR FURTHER INFORMATION CONTACT: Stuart P. Seidel, Assistant Chief Counsel (Enforcement and Operations), Office of the Chief Counsel, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229 ((202) 566-2482.

SUPPLEMENTARY INFORMATION:

Background

I. Statement of Policy

Customs is authorized by various

laws enforced or administered by the Customs Service to seize property for violations of the Customs, navigation and related laws. Pursuant to section 618, Tariff Act of 1930, as amended (19 U.S.C. 1618), any person with an interest in the seized property may petition for relief and the Secretary of the Treasury may mitigate or remit any fine, penalty or forfeiture incurred with respect to the violation. Property which is not released in response to a petition under 19 U.S.C. 1618 or other provisions of law may be disposed of in accordance with the provisions of section 616, Tariff Act of 1930 (19 U.S.C. 1616, 1616a), which was added to the United States Code by the Comprehensive Crime Control Act of 1984 (Pub. L. 98-473) and the Trade and Tariff Act of 1984 (Pub. L. 98-573). The guidelines contained in this document implement the asset forfeiture provisions of section 616.

Customs statutory authority regarding releasing seized and forfeited property to state and local agencies is nearly identical to that of the Department of Justice. Customs participated in the drafting of the Department of Justice guidelines which were published in the **Federal Register** on June 7, 1985 (50 FR 24052), and the following guidelines and procedures correspond to the Justice guidelines and procedures as closely as possible.

Section 616 directs the Secretary of the Treasury to "ensure the equitable transfer * * * of any forfeited property to the appropriate state or local law enforcement agency so as to reflect generally the contribution of any such agency participating directly in any of the acts which led to the seizure or forfeiture of such property."

This authority is consistent with Customs purpose of promoting cooperative law enforcement efforts. Customs intends to manage it asset forfeiture program in a manner designed to enhance this federal, state and local cooperation.

Customs is authorized to dispose of forfeited property by (1) retaining the property for official use; (2) transferring custody or ownership of the property to any federal, state of local agency pursuant to section 616 or (3) placing the forfeited cash or proceeds of sale of forfeited property in a special Customs forfeiture fund. A decision of the appropriate Customs offical regarding placing the forfeited property into official use or transferring the property to another agency is not subject to judicial review.

Local Customs officials will inform state and local law enforcement agencies as to the procedures for requesting an equitable transfer of forfeited property, help facilitate the application for transfer of such property, and see that the spirit and letter of the forfeiture provisions of the Comprehensive Crime Control Act of 1984 and the Trade and Tariff Act of 1984 are implemented.

II. Definitions

A. *"Commissioner"* means the Commissioner of Customs or his designee.

B. *"Local Customs official"* means the special agent in charge if the Customs officers participating in the seizure were assigned to the Office of Enforcement, or the district director if the Customs officers participating in the seizure were assigned to the Office of Inspection and Control. In rare cases, if the participating Customs officers are from offices which do not report to the special agent in charge or the district director, the term refers to the equivalent field office (if there is one) or the regional or Headquarters office which supervises the participating Customs officers. In case of doubt, requests for equitable distribution may be submitted by other law enforcement agencies directly to Customs Headquarters, but no action will be taken until the local Customs official has reviewed the request.

C. *"Regional Customs official"* means the Regional Commissioner of Customs or the individual designated by the Regional Commissioner (usually the Assistant Regional Commissioner (Enforcement)) to review requests for equitable distribution of seized property.

D. *"Appropriate Headquarters official"* means the Assistant Commissioner of Customs who supervises the Customs officers participating in the seizure. If the seizure involved Customs officers in different functional areas, the Assistant Commissioners for the concerned functional areas must jointly approve any transfer.

E. *"Property or assets"* means tangible property and cash.

F. *"Cash"* means currency, negotiable instruments and securities.

G. *"State and local agencies"* means law enforcement agencies of a state, the District of Columbia, Puerto Rico or any territory or possession of the U.S. or of any local government within the listed governments.

H. *"Appraised value"* means fair market value.

III. Transfer of Seized and Forfeited Property to State and Local Law Enforcement Agencies

A. Customs Service Seizures

1. Commissioner's Authority for Equitable Transfer of Seized Property:

a. Section 616, Tariff Act of 1930, as amended, authorizes the Commissioner to transfer property seized by Customs officers to any other Federal agency, or to state or local law enforcement agencies that directly participated in the act which led to the seizure and forfeiture.

b. Tangible property not retained for official use by the federal seizing agency may be equitably transferred.

c. Where a participating law enforcement agency petitions for a share in the forefeited property, the Commissioner shall determine an equitable transfer of the property that generally reflects the relative contribution of the participating agencies.

2. Procedure for Determining Equitable Transfer:

a. Any state or local law enforcement agency that participates in the acts leading to a Customs seizure for forfeiture may file a request for an equitable transfer of the property.

b. The criteria for determining the equitable transfer of the property will be the same for all requests.

c. In all cases the final decision-making authority rests with the Commissioner.

3. Requests from Participating Law Enforcement Agencies:

a. Within 30 days following the seizure for forfeiture, the state or local agency should submit a written request for an equitable transfer of the property subject to forfeiture to the local Customs official responsible for the Customs law enforcement effort resulting in the seizure for forfeiture.

b. If more than one local Customs office was involved in the law enforcement effort resulting in the seizure, the request should be forwarded by the local office receiving the request to the appropriate regional Customs official. If more than one region was involved, the request should be forwarded by the local office receiving the request through his regional office to the appropriate Customs Headquarters official.

c. The request must include the following information:

(1) Identification of the property against which the claim is made;

(2) Details regarding the requesting agency's participation, including the amount of money and manpower

VOL 51 ISS 37 FE 25 1986

expended by the state or local agency in pursuing the case;

(3) A statement of the intended use for the property;

(4) A designation of the proper fiscal officer to whom cash or check disbursements can be made;

(5) A designation of the proper official to whom transfer documents should be delivered by the U.S.;

(6) A designation of the proper party to whom possession should be delivered;

(7) A statement indicating that the transfer is not prohibited under the applicable state or local law;

(8) In instances of a joint application by several state or local agencies, the relative share of each state or local agency;

(9) A statement that all fees and expenses necessary to effect transfer of title will be paid by or on behalf of the requesting agency not later than the time of transfer; and

(10) The extent to which transferred funds will be credited directly to the budget of the state or local agency involved, resulting in an increase of law enforcement resources for that state or local agency.

d. The requesting agency must certify that the information contained in items 3.c. (4) and (7) above is true and correct.

e. An information copy of the request for an equitable transfer will be forwarded by the local Customs official to the Fines, Penalties and Forfeitures Officer in the district office responsible for processing for forfeiture and a copy to the Seized Property Division in the Office of the Comptroller at Headquarters.

f. If a request for the property has been made, no report of seizure should be made by Customs to the General Services Administration.

4. Procedure for Processing Requests for Equitable Transfer:

a. In all cases, the local Customs official receiving the request will prepare a written report that will evaluate the degree of assistance provided by the requesting agency or agencies in the underlying law enforcement action resulting in the seizure for forfeiture. Where more than one local or regional office participated, the request should be expeditiously sent through the other Customs participants for their approval or comment.

b. The equitable share for a participating state or local agency should generally reflect the contribution of the agency participating directly in any of the acts which led to the seizure for forfeiture of the property including, but not limited to, the following factors:

(1) Which agency initiated the case;

(2) Which agency identified the asset;

(3) The amount of money and manpower expended by the state or local agency in pursuing the case;

(4) Whether or not the state or local agency seized other assets during the course of the same investigation and whether such seizures were made pursuant to state or local law; and

(5) Whether or not the state or local agency could have achieved forfeiture under state law, with favorable consideration given to a state or local agency which would have forfeited the asset(s) on its own but joined forces with the U.S. to make a more effective investigation.

c. In cases in which a state or local agency has filed a request for an equitable share of that property, the Commissioner may still decide to place property forfeited administratively or judicially into official use or transfer the property to any other federal agency.

(1) In making this decision, the following factors must be considered:

(a) The relative needs of the requesting law enforcement agency, Customs, and any other federal agency for the particular asset;

(b) The uniqueness of the asset and the likelihood of securing such an asset through other seizures in the near future;

(c) The relative significance of the requesting law enforcement agency's participation in the case, as well as all other factors pertinent to the determination of equitable distribution as set forth in item 4.b. above;

(d) The likelihood that the requesting agency will be eligible for an equitable share of property from additional seizures arising from the same investigation or from other seizures in the near future;

(e) The impact that a decision to place the property into official use might have on federal, state or local relations; and

(f) Any extraordinary expenses associated with the seizure, including any informants awards which may be payable.

5. Decision-Making Authority for Determining Equitable Transfer.

a. Except as indicated in item 5.c. below, the equitable distribution of a forfeited asset with an appraised value of $250,000 or less will be determined by the appropriate Headquarters official.

(1) The local Customs official receiving a request shall forward his report and recommendation through the appropriate regional official to the appropriate Headquarters official.

(2) In making this decision, consideration will be given to the report and recommendation forwarded by the local Customs official, and a written ruling on the request will be issued by the appropriate Headquarters official through the appropriate regional official and the local Customs official to the requesting party.

(3) A copy of the written ruling will be forwarded to the district director having custody of the seized or forfeited asset and the Seized Property Division in the Office of the Comptroller at Headquarters.

b. In the case of property valued at greater than $250,000, the evaluation and recommendation will be forwarded to the appropriate Headquarters official who will forward a final recommendation to the Commissioner. The Commissioner will determine the equitable distribution of those assets.

(1) In making this decision, the Commissioner will consider the reports and recommendations forwarded by the appropriate Headquarters official and, in the case of assets with an appraised value of $750,000 or greater, will consult with the Assistant Secretary of the Treasury (Enforcement and Operations). A written ruling on the request will be prepared by the Assistant Commissioner (Enforcement) and, after signature by the Commissioner, will be issued through the appropriate regional official and sent to the local Customs official for delivery to the requesting party.

(2) A copy of the written ruling will be forwarded to the district director having custody of the seized or forfeited asset and the Seized Property Division in the Office of the Comptroller at Headquarters.

c. The appropriate regional Customs official may make an equitable distribution of a forfeited conveyance with an appraised value of $25,000 or less if the participating Customs officers were assigned to his/her region.

(1) In making this decision, the regional Customs official will consider the reports and recommendations forwarded by the local Customs official and issue a decision through that official to the requesting party.

(2) A copy of the decision document will be forwarded to the district director having custody of the seized or forfeited asset and to the Seized Property Division in the Office of the Comptroller at Headquarters.

6. Proceeds Placed in the Customs Forfeiture Fund:

a. If the federal forfeiture action is not deferred, and the property is not placed into official use or transferred to a state or local agency, it will be sold and the proceeds of sale, after deducting expenses, etc., will be placed in the Customs Forfeiture Fund.

UMI

b. Forfeited cash will be placed in a suspense account pending deposit in the Customs Forfeiture Fund.

7. Disposition of Forfeited Property:

a. State or local agencies may share in seized and forfeited tangible property, and seized and forfeited cash. In the case of seized and forfeited cash, the equitable share of any state or local agency shall be determined after applying the criteria in items 4.b. and 4.c. above.

b. Any property that cannot be used for official Customs, federal, state or local purposes must be destroyed or sold or otherwise disposed of in accordance with law.

c. Where tangible property is transferred to qualifying state or local agencies, the Customs Forfeiture Fund and appropriated monies will not be used to pay liens or mortgages on the transferred property, to equip the property for law enforcement purposes, or to pay salaries.

d. The recipient state or local agency must pay the valid liens and mortgages on the forfeited tangible property prior to the transfer of such property.

e. The recipient state or local agency may be required to pay expenses pertaining directly to the seizure prior to the transfer of tangible property.

f. Prior to any interlocutory or immediate sale of property pending forfeiture, the district director having custody of the property must consult with any other involved local Customs official and the U.S. Attorney, Criminal Division section chief, or the Director of the Asset Forfeiture Office, Department of Justice, to determine the evidentiary status of the property and the status of any state or local law enforcement agency requests for equitable sharing.

g. All Customs officers will promptly notify the district director having custody of seized property of any facts affecting such seized property. Relevant facts would include bills, invoices, orders of mitigation and remission, orders of designation for official use, and appraisals. Based upon these and other factors, the district director's office should ensure the proper disposition of the property.

B. *Seizures involving the participation of other federal agencies.*

1. Where a state or local agency requests equitable distribution of property which was seized through the participation of a federal agency other than Customs, the local Customs official shall send a copy of the request to the other agency for its review and recommendation.

2. Where a state or local agency requests equitable distribution of property which was seized as part of an OCDETF (Organized Crime/Drug Enforcement Task Force) or joint Customs/DOJ (Department of Justice) case, the request should be reviewed by the U.S. Attorney (or DOJ attorney-in-charge) and submitted to Customs Headquarters with their recommendations. If Customs Headquarters disagrees with the U.S. Attorney (or DOJ attorney-in-charge) recommendations, the matter shall be referred to the Assistant Secretary of the Treasury (Enforcement and Operations). If necessary, the Assistant Secretary and the appropriate Justice Department official shall review the recommendations and make the decision.

3. Where the only participating federal agency is an agency other than Customs (the Coast Guard, for example), and Customs is merely the custodian, the other agency shall review the request and make the recommendation to Customs Headquarters.

Inapplicability of Public Notice and Delayed Effective Date Provisions

This document provides guidelines concerning internal Customs procedures and is designed to promote efficient use of personnel, facilities, and resources and to promote cooperative law enforcement efforts. It has no effect on the general public. Accordingly, pursuant to 5 U.S.C. 553(b)(B) and (d)(3), notice and solicitation of comments is unnecessary and good cause is found for dispensing with a delayed effective date for adoption of the new guidelines.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

John P. Simpson,
Acting Commissioner of Customs.

Approved: January 14, 1986.

Francis A. Keating, II,
Assistant Secretary of the Treasury.

[T.D. 86-53]

Petitioner's Desire To Contest Decision Denying Domestic Interested Party Petition Concerning Reclassification of Operatic and Theatrical Costumes

AGENCY: Customs Service, Treasury.

ACTION: Notice of petitioner's desire to contest decision on domestic interested party petition.

SUMMARY: This document advises the public of the desire of an interested party to contest Customs decision denying its petition requesting reclassification of certain imported operatic and theatrical costumes rented to U.S. opera and theater companies. The petitioner has advised Customs of its intention to file an action in the U.S. Court of International Trade.

DATE: February 25, 1986.

FOR FURTHER INFORMATION CONTACT: Harold Singer, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-2938).

SUPPLEMENTARY INFORMATION:

Background

On November 23, 1984, a notice was published in the Federal Register (49 FR 46162) indicating that Customs had received a petition from a domestic interested party filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), requesting that imported operatic and theatrical costumes rented to U.S. opera and theater companies be classified as dutiable under the appropriate provisions of Schedule 3, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), for wearing apparel.

The costumes are imported for the use of certain opera and theater companies in the U.S. They are rented by the U.S. companies for the duration of a particular production, and then returned to the foreign exporter. They are currently classifiable under the provision for "regalia" in item 851.30, TSUS, and entitled to entry free of duty. This provision exempts from duty any articles imported for the use of any public library, any other public institution, or any nonprofit institution established for educational, scientific, literary, or philosophical purposes, or for the encouragement of the fine arts. It is Customs opinion that opera and theater companies are such nonprofit institutions established to encourage the fine arts.

In support of its position that imported operatic and theatrical costumes are not classifiable as "regalia" under item 851.30, TSUS, the petitioner made the argument that past Customs rulings do not support the use of item 851.30, TSUS, for the duty-free importation of the costumes. The petitioner stated that these rulings apply item 851.30, TSUS, specifically to situations in which: (1) The costumes are the property of the non-profit institution using them; (2) only a nominal admission admission fee to defray expenses will be charged; or

UMI

(3) the performers using the costumers are not reimbursed for their services. The costumes, it was claimed, cannot therefore be used in any commercial activity. The petitioner contended that the costumes are the property of the foreign rental companies, not the opera and theater companies using them, that more than nominal fees to defray expenses are charged for opera and theater performances, that the opera and theater performers are often handsomely reimbursed for their services, and that the costumes are used in a commercial activity. Petitioner therefore concluded that the importation of the costumes under the duty-free provisions of item 851.30, TSUS, was a misapplication of that provision.

Six comments were received in response to the November 23, 1984, notice. Three of the commenters supported the current classification of opera and theater costumes as regalia. The arguments of the other commenters, including the petitioner's, challenging Customs current classification, are as follows:

(1) Operatic and theatrical costumes do not meet the plain and ordinary definition of "regalia";

(2) The term "regalia" is defined by Headnote 2, Part 4, Schedule 8, TSUS, as "only such insignia of rank or office, emblems or other articles as may be worn upon the person or borne in the hand during public exercises of the institution . . ." and commercial performances of operas and plays, albeit by a nonprofit organization, for which substantial admission charges are made, cannot be equated with "public exercises";

(3) The legislative history of item 851.30, TSUS, indicates that regalia is to symbolize a given organization as an institution and costumes rented out to different organizations do not symbolize any particular organization;

(4) Most imported costumes are used in profit-making theatrical productions for which performers receive enormous salaries and for which ticket prices are very expensive; and

(5) The requirement under item 851.30, TSUS, that regalia may be imported as the property of a nonprofit institution is not met where the costumes re rented.

Decision on Petition and Notice of Petitioner's Desire To Contest

After careful analysis of the comments received in response to the notice and further review of the matter, by letter dated November 6, 1985 (CLA-2 CO:R:CV:V, 553575 HS), the petitioner was informed through its counsel that Customs is of the opinion that the current classification is correct, and that the petition was therefore denied.

Item 851.30, TSUS, provides for the duty-free treatment of regalia imported for the use of "any library, any other public institution, or any nonprofit institution established for educational, scientific, literary or philosophical purposes, or for the encouragement of the fine arts. In reaching its decision affirming the classification of the costumes as regalia, Customs found the petitioner's and the other commenters' arguments challenging the current classification to be unpersuasive. First, it was noted that the definition of regalia in Headnote 2, Part 4, Schedule 8, TSUS, rather than the plain and ordinary definition, governs the use of the term in term 851.30, TSUS. That headnote specifically includes articles other than insignia or emblems and, according to the Tariff Classification Study of 1960, "almost any article which is worn upon the person or borne in hand during public exercises of the institution is regalia if it is not an article of furniture or fixtures, regular wearing apparel, or personal property of individuals." While some performances may require clothing that is indistinguishable from ordinary wearing apparel, it is clear that these types of costumes should not be treated as regalia as the headnote specifically excludes regular wearing apparel.

Secondly, it is clear to us that a nonprofit opera or theatrical company is a nonprofit institution for the encouragement of the fine arts and that performances of such organizations are "public exercises" of such institutions. If performances of such organizations are not "public exercises" of such organizations, we are at a loss at determining what would be considered a public exercise of these organizations. The regalia provisions would have no meaning for nonprofit theatrical and opera companies if their performances were not considered public exercises.

Thirdly, the cost of tickets for a performance and payments made by opera companies to outstanding performers who further the nonprofit objectives of the institution are irrelevant to the question of whether an institution is engaged in commercial activity as long as the institution is nonprofit. We do emphasize, however, that for an opera or theatrical company to take advantage of the regalia provision, it msust be shown that the institution is registered as a nonprofit organization under section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)).

Fourthly, regarding the argument that the legislative history of item 851.30, TSUS, indicates that regalia is to symbolize a given organization as an institution, we could find no language in the legislative history that supports this assertion.

Finally, regarding the comment that regalia that is rented is not the property of the nonprofit institution, the requirement set forth in the TSUS entitling regalia to duty-free treatment is that the articles be imported for the use of the nonprofit institution. It is our view that rental use is sufficient and purchase is not necessary as long as the importer acquires the proprietary economic interest in the articles.

In response to Customs decision to deny the petition, on December 5, 1985, the petitioner filed notice of its desire to contest the decision in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

Customs has reconsidered the matter in light of the petitioner's letter of notice off its desire to contest the November 6, 1985, decision. We remain of the opinion that the decision is correct. That decision will stand in the absence of a contrary judgment rendered by the U.S. Court of International Trade or the U.S. Court of Appeals for the Federal Circuit.

Authority

This notice is published under the authority of section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

FEDERAL RESERVE SYSTEM

Board of Governors

TIME AND DATE: 11:00 a.m., Monday, March 3, 1986

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting

Dated: February 21, 1986.

William W. Wiles,
Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

(Agency Meetings)

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of February 24, 1986.

Closed meetings will be held on Tuesday, February 25, 1986, at 2:30 p.m. and on Thursday, February 27, 1986, following the 2:30 p.m. open meeting.

Open meetings will be held on Wednesday, February 26, 1986, at 2:00 p.m. and on Thursday, February 27, 1986, at 10:00 a.m. and 2:30 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Peters, as duty officer, voted to consider the items listed for the closed meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, February 25, 1986, at 2:30 p.m., will be:

Formal orders of investigation.
To amend formal order of investigation.
Institution of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of administrative proceedings of an enforcement nature.

The subject matter of the open meeting scheduled for Wednesday, February 26, 1986, at 2:00 p.m., will be:

The Commission will meet with representatives of self-regulatory organizations and state securities commissions to discuss issues of mutual interest and concern, including, but not limited to, coordination of enforcement and surveillance programs. For further information, please contact Alan D. Dye at (202) 272-2014.

The subject matter of the open meeting scheduled for Thursday, February 27, 1986, at 10:00 a.m., will be:

1. Consideration of whether to grant an application filed by David Lerner Associates, Inc. for an order exempting it from the provisions of Section 9(a) of the Investment Company Act. For further information, contact Gary Sundick at (202) 272-2344.
2. Consideration of whether to adopt rules to require registrants to: (1) Present certain industry segment information for interim periods; and (2) focus on reportable segments within Management's Discussion and Analysis of Financial Condition and Results of Operations. The Commission will also consider whether to adopt certain other amendments to its requirements for interim financial reporting. For further information, please contact John W. Albert at (202) 272-2130.

VOL 51
ISS 37
FE 25
1986
UMI

The subject matter of the open meeting scheduled for Thursday, February 27, 1986, at 2:30 p.m., will be:

The Commission will hear oral argument on an appeal by Owen V. Kane, the vice president of a registered broker-dealer, from an administrative law judge's initial decision. For further information, please contact R. Moshe Simon at (202) 272-7400.

The subject matter of the closed meeting scheduled for Thursday, February 27, 1986, following the 2:30 p.m. open meeting, will be:

Post oral argument discussion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Judith Axe at (202) 272-2092.

John Wheeler,
Secretary.
February 20, 1986.

Part II

Department of the Interior

National Park Service

National Registry of Natural Landmarks; Annual Supplemental Listing of Natural Landmarks; Notice

VOL 51 ISS 37 FE 25 1986 UMI

DEPARTMENT OF THE INTERIOR

National Park Service

National Registry of Natural Landmarks

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: This notice lists all natural landmarks designated by the Secretary of the Interior between October 1, 1984 and September 30, 1985 and included on the National Registry of Natural Landmarks. The listing published in the **Federal Register** on March 1, 1983 (48 FR 8682) contains all natural landmarks designated prior to that date and should be retained for reference purposes. The listing published in the **Federal Register** on February 7, 1984 (49 FR 4605) contains all natural landmarks designated between March 1, 1983 and September 30, 1983. The listing published in the **Federal Register** on March 5, 1985 (50 FR 8846) contains all natural landmarks designated between October 1, 1983 and September 30, 1984. All listings provide information on each landmark's location, natural values, designation date, ownership, and the owner's voluntary commitment to protect the landmark's natural resources. Federal agencies should consider the existence and location of natural landmarks when assessing the impact of their actions on the environment under Section 102(2)(c) of the National Environmental Policy Act of 1969 (83 Stat. 42 U.S.C. 4321).

FOR FURTHER INFORMATION CONTACT: Mr. Arthur L. Stewart, Acting Chief, Natural Areas Survey Branch, Interagency Resources Division, National Park Service, P.O. Box 37127, Washington, D.C. 20013–7127, (202) 343–9525.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior established the National Natural Landmarks Program in 1962 to identify and encourage the preservation of nationally significant examples of the full array of ecological and geological features that represent the Nation's natural heritage. Potential natural landmarks are identified through studies conducted by the National Park Service, evaluated by natural scientists, and, if judged nationally significant, designated as National Natural Landmarks by the Secretary of the Interior. Areas so designated are included on the National Registry of Natural Landmarks. Through September 30, 1985 there were 562 sites listed on the National Registry of Natural Landmarks. The National Natural Landmarks Program is administered by the National Park Service.

Natural landmark designation is not a land withdrawal and affects neither the ownership nor management and use of a site. Natural landmark preservation is often ensured through cooperative commitment of public and private owners toward protection of the area's nationally significant features. This commitment is voluntary and is exercised through a nonbinding agreement with the National Park Service to protect the National Natural Landmark. Owners who elect to enter into such an agreement are eligible to receive a certificate signed by the Secretary of the Interior which recognizes the special status of the area. A bronze plaque may also be presented for appropriate display on the site.

In addition, Federal agencies must consider the existence and location of National Natural Landmarks when they assess the effects of their actions on the environment under Section 102(2)(c) of the National Environmental Policy Act of 1969 (83 Stat. 852; 42 U.S.C. 4321).

The Secretary of the Interior transmits annually to the Congress a report on those National Natural Landmarks with known damage or threats to the integrity of their nationally significant features (90 Stat. 1940; 16 U.S.C. 1a–5). This report is prepared for the Secretary by the National Park Service.

National Registry of Natural Landmarks

The National Registry of Natural Landmarks is the Nation's official list of those nationally significant natural areas representative of the ecological and geological heritage of this country. Of the 562 sites listed on the National Registry of Natural Landmarks, over one-half are administered solely by public agencies at the Federal, State, county, or municipal government levels. Almost one-third of the National Natural Landmarks are owned entirely by private parties. The remaining National Natural Landmarks are owned or administered by a mixture of public and private owners.

The following list contains all National Natural Landmarks added to the National Registry of Natural Landmarks between October 1, 1984 and September 30, 1985. The sites are arranged alphabetically by State and county. A description of each landmark's location, significance, designation date and ownership is provided. Designation dates are enclosed in parentheses. Ownership data are arranged in the following arbitrary order and do not reflect the relative amount of land owned by any party: Federal, State, County, Municipal, Private. An asterisk (*) indicates that the owner(s) of a landmark have voluntarily agreed to protect the nationally significant features.

Because many natural landmarks are privately owned and/or not managed for public access, landowner permission must first be obtained before visits are planned to those areas. The specific locations of certain landmarks are not provided because of owner requests for minimum publicity and/or because of the fragility of the natural features.

Dated: November 29, 1985.

Jerry L. Rogers,

Acting Director, National Park Service.

CALIFORNIA

Shasta County

Burney Falls—60 miles northeast of Redding within the McArthur-Burney Falls State Park. It is one of the best examples in the western United States of river drainage regulated by stratigraphically-controlled springs, and also of waterfall due to undercutting of horizontal rock layers. (December 1984) Owner: State

Kern County

Sand Ridge Wildflower Preserve—Located 10 miles southeast of Bakersfield. It is significant due to its botanical diversity. Native Bakersfield cactus is becoming increasingly rare in this locality. The site is a remnant natural area displaying scores of spectacular floral species. (December 1984) Owner: Private

INDIANA

Crawford County

Marengo Cave—Textbook example of a cave in its middle stage of development. It is the most profusely decorated cave known in the Interior Lowlands with cave features of the highest quality. This cave is the location where five organisms were first identified. It has had an extensive and continuous history research, as well as protective custody over the last century. (December 1984) Owner: Private

MICHIGAN

Ontonagon and Gogebic Counties

Porcupine Mountain—Large tract of White Pine containing the best and largest stand of virgin northern hemlock in the Lake states, and is the largest relatively undisturbed northern hemlock hardwood forest west of the Adirondacks. Lake of the Clouds is nestled within the virgin forest and presents a spectactular view from the escarpment. Mirror and Lily Pond lakes remain unspoiled. The Presque Isle River, which cascades over falls and rapids into Lake Superior, adds outstanding scenic beauty. The area contains excellent examples of wavecut beaches marking former glacial lake shorelines. (December 1984) Owner: State

NEBRASKA

Grant County

Nebraska Sand Hills—Located immediately south of Hyannis. It is the largest sand dunes complex in the Western Hemisphere. The site differs from other large dunes of the world because it is almost completely stabilized by vegetation. (December 1984) Owner: State, Private

OREGON

Wasco County

Lawrence Memorial Grassland Preserve—Located 27 miles northeast of Madras, this site is an excellent illustration of topography known as "biscuit and scabland," formed in the Columbia Plateau by frost action during the Wisconsin glaciation period of the Pleistocene. This area is also known for its diverse plant communities. (December 1984) Owner: Private

WASHINGTON

Whitman County

Rose Creek Preserve—10 miles northwest of Pullman, this site is considered to be the only protected site of rare successional stands of quaking aspen and hawthorn, is therefore highly valuable for scientific research. (December 1984) Owner: Private

WYOMING AND COLORADO

Albany County, WY and Larimer County, CO

Sand Creek—Located some 20 miles southwest of Laramie, this site possesses the most spectacular examples of cross-bedded sandstone and "topple blocks" in North America. Excellent geological, paleontological and botanical features mark this area as an important national natural resource. (December 1984) Owner: State, Private

The following is a correction to the list of natural landmarks included on the National Registry of Natural Landmarks and published in the **Federal Register**, Part III, March 1, 1983.

ALASKA

*Clarence Rhode National Wildlife Range—Owner: Federal, State, Private—(previously listed as—Owner: Federal)

ARIZONA

Mohave County

Grapevine Mesa Joshua Trees—(previously listed as Hualapai Valley Joshua Trees)

GUAM

*Mount Lamlam—Owner: Federal, Government of Guam—(previously listed as Owner: Government of Guam)

ILLINOIS

Johnson County

Lower Cache River Swamp—Owner: State, Private—(previously listed as Buttonland Swamp)

INDIANA

Montgomery County

Calvert and Porter Woods Nature Preserve—(previously listed as Beckville Woods)

The following is a list of natural landmarks which should be added because they were not included on the National Registry of Natural Landmarks and published in the **Federal Register**, Part III, March 1, 1983.

ARIZONA

Coconino County

Kaibab Squirrel Area—Located 30 miles south of Fredonia, the Kaibab Plateau Pine Forest contains approximately 200,000 acres of pure ponderosa pine in the north section of Kaibab National Forest and provides habitat for the Kaibab Squirrel. This rare and restricted species represents a unique form that evolved by geographic isolation, and so is found nowhere else in the world. (October 1965) Owner: Federal

MISSOURI

Oregon County

Grand Gulf—A spectacular dolomite chasm located 6 miles west of Thayer, formed by the roof collapse of a ¾-mile long cave passage as a result of coalescence of adjacent sinkholes. Illustrates a variety of processes through which karst topography develops, including subterranean stream piracy. (June 1971) Owner: Private

NORTH CAROLINA

Brunswick and New Hanover Counties

Smith Island—A 12,000-acre barrier island complex representing one of the wildest and most primitive areas remaining on the Atlantic Coast. Contains a relict live oak forest, which is one of the best unaltered examples of sand strand forest in existence, and a system of stable sand dunes. Salt marshes, tidal creeks, bays, and mudflats are used extensively by aquatic birds, and island beaches provide breeding habitat for loggerhead turtles. (October 1967) Owner: State, Private

DEPARTMENT OF THE INTERIOR

National Park Service

National Register of Historic Places; Annual Listing of Historic Properties

The National Historic Preservation Act of 1966, as amended (80 Stat. 915, 16 U.S.C. 470 et seq.), authorizes the Secretary of the Interior to expand and to maintain a National Register of districts, sites, buildings, structures and objects significant in American history, architecture, archeology, engineering and culture. The National Park Service expands and maintains the National Register of Historic Places for the Secretary.

It is the purpose of this notice, through publication of the information included herein, to apprise the public, as well as governmental agencies, associations, and all other organizations and individuals interested in historic preservation, of the properties added to the National Register between October 1, 1984 and September 30, 1985, and those omitted from the list published March 5, 1985.

For a cumulative listing comprising all properties on the National Register, we recommend that users retain the Federal Register listings from February 6, 1979 (Vol. 44, No. 26, Part II); March 18, 1980 (Vol. 45, No. 54, Part II); February 3, 1981 (Vol. 46, No. 22, Part II); February 2, 1982 (Vol. 47, No. 22, Part III); March 1, 1983 (Vol. 48, No. 41, Part II); February 7, 1984 (Vol. 49, No. 26, Part IV) and March 5, 1985 (Vol. 50, No. 43, Part III). Together, these listings provide information for all National Register properties and for properties determined eligible for inclusion on the National Register through September 1985. A limited number of copies of the 1979, 1980, 1981, 1982, 1983, 1984, and 1985 issues of the Federal Register are available from the Department of the Interior, National Park Service, National Register of Historic Places, P.O. Box 37127, Washington DC 20013–7127.

Dated: November 29, 1985.

Jerry L. Rogers,
Acting Director.

ALABAMA

Baldwin County

Fairhope, *Whittier Hall*, 201 Magnolia Ave. (03/07/85)

Silverhill, *Svea Land Company Office*, S. Sixth St. (03/07/85)

The following properties have been determined to be eligible for inclusion in the "National Register". Determinations of eligibility are made at the request of the concerned Federal Agency under the authority in section 2(b) and 1(3) of Executive Order 11593, and the National Historic Preservation Act of 1966, as amended. Determinations of eligibility are also made on nominations for privately owned property where the owner or a majority of owners for properties with multiple owners object to listing.

Historic properties which are determined to be eligible for inclusion in the National Register of Historic Places are entitled to protection pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, and the procedures of the Advisory Council of Historic Preservation, 36 CFR, Part 800. Before an agency of the Federal Government may undertake any project which may have an affect on such an eligible property, the Advisory Council on Historic Preservation shall be given an opportunity to comment on the proposal.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of the Northern Aplomado Falcon To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the northern aplomado falcon, *Falco femoralis septentrionalis*, to be an endangered species under provisions of the Endangered Species Act of 1973, as amended. This subspecies historically occurred in southeastern Arizona, southern New Mexico, southern Texas, much of Mexico, and the western coast of Guatemala. It has been extirpated as a breeding species from the United States, and at present is known to nest only in portions of eastern Mexico. This falcon is threatened by continued habitat loss and by contamination with organochlorine pesticides. No critical habitat has been proposed. This rule will implement the protection provided by the Endangered Species Act of 1973, as amended, for *Falco femoralis septentrionalis*.

DATE: The effective date of this rule is March 27, 1986.

ADDRESSES: The complete file for this rule is available for public inspection during normal business hours, by appointment, at the Service's Regional Office of Endangered Species, 500 Gold Avenue, S.W., Room 4000, Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Hoffman, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103 (505/766–3972 or FTS 474–3972).

SUPPLEMENTARY INFORMATION:

Background

The northern aplomado falcon is perhaps one of our most colorful birds of prey. ("Aplomado" in Spanish means gray or lead-colored.) Adults are characterized by rufous underparts, a gray dorsum, a long and banded tail, long legs, and a distinctive black and white facial pattern. *Falco femoralis septentrionalis* (family Falconidae) was first described by Todd in 1916; the type specimen had been taken in 1887 near Ft. Huachuca, Arizona. This subspecies is the largest form of *Falco femoralis* and weighs about 9–14 ounces (250–400 grams) (Hector 1981). Aplomados are intermediate in size between American kestrels (*Falco sparverius*) and peregrine falcons (*Falco peregrinus*). The northern aplomado falcon does not seem to be migratory, since most collected adults were taken in winter months in the United States (Hector 1981). Hector (1980, 1981, 1982, 1983) summarized the literature dealing with the northern aplomado falcon and reported on the historic and recent distributions of the species, and on its habitat, diet, and behavior. Kiff *et al.* (1978) documented eggshell thinning and pesticide contamination in the subspecies.

Egg laying has been recorded between the months of January and September; eggs are usually laid in April or May. Aplomado falcons feed on birds, insects, rodents, small snakes, and lizards (Hector 1981). In eastern Mexico, the majority of prey items are insects; however, birds make up over 90 percent of the dietary biomass (Hector 1981).

Typical northern aplomado falcon habitat is open rangeland and tropical savanna containing scattered mesquites (*Prosopis juliflora*), yuccas (*Yucca elata* and *Yucca treculeana*), oaks (*Quercus oleoides*), acacias (*Acacia farnesiana*), or palms (*Sabal mexicana*). In central Mexico, the falcon has also been found in open pine woodland (*Pinus montezumae*). The most recent reported United States nesting occurred in yucca/mesquite grassland near Deming, New Mexico, in 1952. In the same year, a second nest was found in northern Chihuahua, Mexico; this is the most recent documented nesting attempt for northern Mexico. The essential components of northern aplomado falcon habitat are open terrain with scattered trees, relatively low ground cover, an abundance of small to medium-sized birds, and a supply of nesting platforms (stick nests or large bromeliads) (Hector 1983).

The historic breeding range of the northern aplomado falcon, as represented by museum specimens or eggs, included southeastern Arizona, southern New Mexico, and southern Texas in the United States, the States of Tamaulipas, Chiapas, Campeche, Tabasco, Chihuahua, Coahuila, Sinaloa, Jalisco, Guerrero, Veracruz, Yucatan, and San Luis Potosi in Mexico, and the western coast of Guatemala. It is now extirpated as a breeding species from the United States and is presently known to nest regularly only in portions of northern and central Veracruz, northern Chiapas, western Campeche, and eastern Tabasco, mostly in palm and oak savanna (Hector 1981.).

Considered together, the habitat preferences of the subspecies and the timing of its decline in the United States implicate habitat degradation due to brush encroachment as the main factor responsible for the disappearance of the subspecies from the United States. Secondarily, overcollecting of the falcons and their eggs may have temporarily reduced their numbers in some parts of the United States. However, collecting pressure, by itself, could not account for the continued absence of the aplomado falcon north of Mexico. Currently, the most serious threat to this falcon is the continued use of DDT and other persistent pesticides within the ranges of the falcon and some of its prey species.

Falco femoralis septentrionalis was first considered by the Service in 1973 as a possible candidate for endangered status (United States Department of the Interior 1973); however, more information was needed to support such a determination. Additional information is now available to the Service to support a determination of endangered (Kiff *et al.* 1978, Hector 1980, 1981, 1982, 1983). The northern aplomado falcon is presently listed by the State of Arizona as extirpated from that State (Arizona Game and Fish Commission 1982) and by the State of Texas as a protected nongame species (Texas Park and Wildlife Code 127.70.12.001–.008). A 1983 status report for this subspecies was prepared by Dean P. Hector of the University of California at Los Angeles, under contract with the Service. Upon evaluation of that report, the Service has concluded that the status of this species most closely fits endangered as defined in Section 3 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Falco femoralis septentrionalis was included in category 2 of the December 30, 1982, Vertebrate Notice of Review (47 FR 58454). Category 2 includes those taxa that are thought to possibly warrant listing, but for which more information is needed to determine biological status and to support listing. That information is now available for this subspecies in the current status report (Hector 1983) and the Service published a proposed rule to list this subspecies as endangered on May 20, 1985 (50 FR 20810).

Summary of Comments and Recommendations

In the proposed rule and associated notifications, all interested parties were requested to submit factual reports on information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested

parties, including the government of Mexico, were contacted and requested to comment. Newspaper notices that invited general public comment were published in the *Sun-News* in Las Cruces, New Mexico, on June 7, 1985; *The Brownsville Herald* in Brownsville, Texas, on June 14, 1985; the *Arizona Daily Star* in Tucson, Arizona, on June 13, 1985; and the *Hudspeth County Herald-Dell Valley Review* in Del Rio, Texas, on June 21, 1985.

Sixteen letters were received in support of the proposal and one letter expressed neither support nor opposition. Summaries of the comments follow:

The Arizona State Clearinghouse had no comments on the proposal. The New Mexico Wildlife Federation, the Raptor Research Foundation, the Texas Natural Heritage Program, Fort Huachuca (U.S. Army), and Roland Wauer (Assistant Superintendent, Great Smoky Mountains National Park) supported the proposal. The Arizona Game and Fish Department, W. Grainger Hunt (Senior Ecologist, BioSystems Analysis, Inc.), and the Rob and Bessie Welder Wildlife Foundation supported the proposal and offered comments and/or suggestions for recovery efforts. Gale Monson supported the proposal and stated that there are no records of this falcon for the Mexican State of Sonora.

The Texas Department of Water Resources stated that review of planned and/or potential water resource projects located in the species's habitat indicated no significant conflicts with the Service's proposal to list this species.

The Texas Parks and Wildlife Department stated that this species has been listed as the equivalent of threatened by the State of Texas since 1977 and is recommended for elevation to State endangered status. It also stated that there have been recent reports of isolated aplomado falcons occasionally being seen along the barrier islands adjacent to the Laguna Madre in south Texas.

The National Wildlife Federation supported the proposal and attached a copy of biological information that it had earlier supplied during preparation of the proposal. That information had been incorporated as part of the proposal.

The National Audubon Society supported the listing and offered suggestions for recovery efforts. In addition, it commented that reasons for the species decline could be identified as follows: (1) the loss of open grassland habitat due to overgrazing and other excessive range practices; and (2) reduced breeding success due to organochlorine contamination. This society also stated that it appears unlikely that pesticide contamination played a major role in the northern aplomado falcon's extirpation in the U.S., because the heavy use of pesticides such as DDT began shortly after World War II and did not receive widespread application in the Southwest until after 1952. The proposed rule stated that the reasons for decline were mainly habitat degradation due to brush encroachment and secondarily overcollecting of the falcons and their eggs. The rule stated that currently, the most serious threat to the falcon is the continued use of DDT and other persistent pesticides.

Dean P. Hector supported listing of the northern aplomado falcon but believed that it should be listed as threatened rather than endangered. His comments and the Service's responses follow.

1. Agricultural development probably improves availability of prey such as doves, cowbirds, blackbirds, grackles, etc., that are common in farming areas. Agricultural development, however, was certainly detrimental in that it led to increased contamination of prey species by pesticide residues. Service response: Some birds do increase, but most species decrease. A large portion of the prey of this falcon is composed of insects, most of which are eliminated in farming operations (e.g., cotton). The Service could find no reports for this species being regularly found in or around agricultural fields, only in open rangelands. It has not adapted to such alterations in the habitat, while the two other falcons in the same area (American kestrel, *Falco sparvarius*, and prairie falcon, *Falco mexicanus*) regularly are found in and around agricultural areas within the former range of the aplomado falcon.

2. There is little or no evidence regarding the occurrence of the aplomado falcon on the Central Plateau of Mexico. In addition, nothing is known about the effect of brush encroachment on the habitat of the aplomado falcon on the Central Plateau of Mexico. Service response: More research is needed. There have been no reports of active nests in this area for several decades.

3. "No data presently exist that show conclusively that '. . . remaining populations *are* threatened by reproductive failure due to pesticide contamination.' At present, we know only that the species is showing signs of heavy contamination in eastern Mexico. It seems likely, however, that pesticide contamination is having a detrimental effect on reproductive output, in view of the effect of DDT on other upper-trophic-level raptors." Service response: Levels of DDE and DDT in aplomado eggs (Kiff *et al.* 1978) and data on eggshell thinning in the aplomado (Hector 1981), when compared with the occurrence of eggshell thinning in peregrine falcon populations that declined due to pesticide contamination (Peakall and Kiff 1979), offer sufficient evidence to indicate that aplomado populations are threatened by reproductive failure due to pesticide contamination. Actual reproductive failure in the past or now taking place has not been documented, but the threat clearly remains so long as such contaminants remain in the ecosystem.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the northern aplomado falcon, *Falco femoralis septentrionalis*, should be classified as an endangered species. Procedures found at Section 4(a)(1) of the Act and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424) were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to the northern aplomado falcon are as follows:

A. The present or threatened destruction, modification, or curtailment of its habitat or range. The northern aplomado falcon has suffered severe population declines in the United States (Hector 1981). These declines appear to have resulted primarily from brush encroachment on open rangelands, which eliminated the open grasslands with scattered trees preferred by this species and provided better concealment for prey species. Brush encroachment involves the proliferation in open savanna or grassland of woody vegetation, such as mesquite and creosote bush, and has been fostered by severe overgrazing, suppression of range fires, and other vegetative disturbances (Humphrey 1958). Such encroachment has been well documented for southeastern Arizona (Hastings and Turner 1965), for south-central New Mexico (Buffington and Herbel 1967), and for the southern Texas coastal plains (Johnston 1973). Brush encroachment is probably still a factor limiting the distribution of the northern aplomado falcon. In addition, agriculture development may have also contributed to the decline of the falcon by eliminating nesting sites.

VOL 51
ISS 37
FE 25
1986
UMI

B. Overutilization for commercial, recreational, scientific, or educational purposes. The collection of northern aplomado falcons for scientific purposes has been minimal for the past 50 years. In addition, the species has rarely been used for falconry purposes. Falconry is not known to have had much effect on the aplomado falcon due to the difficulty of obtaining the species in the United States. Some overcollecting of northern aplomado falcons and their eggs may have occurred in the early 1900s and may have contributed to a temporary decline of the species in the United States, but collecting is not likely to be a significant factor now and cannot account for the continued absence of the aplomado north of north-central Mexico. At least one falcon has been found shot in eastern Mexico (Hector pers. comm.). The frequency with which this occurs is unknown.

C. Disease or predation. Nothing is known about the effect of disease or predation on population productivity. One parasite, a botfly, has been reported (Hector 1982). This fly infests young aplomado falcons; however, it is not known under what conditions this insect could cause high mortality rates among nestlings. It is very unlikely that botfly parasitism has played a role in past declines of the aplomado. No instances of animal predation on northern aplomado falcons have been documented.

D. The inadequacy of existing regulatory mechanisms. The Migratory Bird Treaty Act (16 U.S.C. 701–711) establishes provisions regulating the taking, killing, possessing, transporting, and importing of migratory birds, including all subspecies of *Falco femoralis.* The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) includes all members of the family Falconidae, including *Falco femoralis,* on Appendix II that are not on Appendix I. CITES provides for regulation of import and export of its listed species.

In Texas, *Falco femoralis septentrionalis* is classified by the State as a protected nongame species (Texas Parks and Wildlife Code 127.70.12.001–.008). In Arizona, it is included in Group 1 of the State list of threatened native wildlife, which comprises those species that are known to be extirpated from Arizona, but that still exist elsewhere (Arizona Game and Fish Commission 1982). This species is not listed in New Mexico (New Mexico State Game Commission 1985).

These classifications call attention to the plight of this subspecies in the United States. They also provide some protection by regulating taking and exploitation of the aplomado; however, they do not provide any protection to the habitat of the subspecies. The northern aplomado falcon is not subject to damaging levels of direct exploitation. Instead, the species is sensitive to habitat degradation and chemical contamination, and needs the type of active management and protective measures provided for in the Endangered Species Act.

E. Other natural or manmade factors affecting its continued existance. The most important threat to the present survival of the northern aplomado falcon is the continued use of persistent organochlorine pesticides within the range of this falcon and some of its prey species. Recent data strongly suggest that such pesticide use is causing extreme eggshell thinning in some populations of northern aplomado falcons (Kiff *et al.* 1978). Levels of DDE and DDT in membranes of 20 clutches of aplomado eggs collected in Veracruz (1957–1966) averaged 390 parts per million. In a more recent sample (1977), collected along a 500-mile transect from northern Veracruz to western Campeche, DDE (DDT not reported) residue levels averaged 297 parts per million for seven samples of eggshell fragments (Kiff *et al.* 1978). The eggshell thickness index for eggs in these 1957–66 and 1977 samples averaged 25 and 24 percent less, respectively, than pre-DDT eggs from the same populations. Eggshell thinning of greater than 20 percent of pre-DDT levels is likely to result in nesting failure. In 1977, two nestings in Veracruz were observed to have failed due to eggshell breakage during incubation (Hector 1981). On the average, eggs of the northern aplomado falcon collected in eastern Mexico are proportionately thinner than eggs collected from peregrine falcon populations that declined due to pesticide contamination (Peakall and Kiff 1979).

The aplomado falcon has undergone severe losses in range and numbers in the past, and remaining populations are threatened by reproductive failure due to pesticide contamination. Experiences with the endangered peregrine falcon show that pesticide contamination can lead to severe, rapid population declines, and to the eventual extirpation of such populations of the affected species. The levels of pesticide contamination and rates of eggshell thinning found in the remaining populations of the northern aplomado falcon exceed those found to have been the cause of nesting failure in populations of the peregrine falcon in the 1960's and 1970's.

The Service has carefully assessed the best scientific and commercial information available, as well as the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list the northern aplomado falcon as endangered throughout its historic range. The above factors make it apparent that this subspecies is in danger of extinction throughout all or a significant portion of its range and, consequently, that the appropriate status for this subspecies is endangered, as defined in Section 3 of the Act. Therefore, either no action or listing as threatened would be contrary to the Act's intent.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for the northern aplomado falcon at this time, because there are no known active nesting areas within the past 25 years in the United States. Critical habitat is not designated in areas outside U.S. jurisdiction (50 CFR 424.12(h)).

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required by Federal agencies, and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983).

Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species, or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. No Federal involvement is known or expected.

The northern aplomado falcon is already covered under the provisions of the Migratory Bird Treaty Act (16 U.S.C. 701–711), that regulate the taking, killing, possession, transport, and import of covered species. It is also included on Appendix II (as a member of the family Falconidae) of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, which controls the import and export of subject species. International trade of this species and its products is minimal.

The Act and its implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been illegally taken. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered animal species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not available. Since this falcon is not in commercial trade to any extent, such hardship permits are not expected to be issued.

The Service will determine whether this species should be placed upon the Annex of the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, which is implemented through section 8A(e) of the Act, and whether it should be considered for other appropriate international agreements.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in conjunction with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Oxypolis Canbyi (Canby's Dropwort) To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines *Oxypolis canbyi* (Canby's dropwort) to be an endangered species. This plant will now be provided the protection of the Endangered Species Act of 1973, as amended. This species is known from one site in Maryland, one site in North Carolina, five sites in South Carolina, and three sites in Georgia. Its continued existence is threatened by the loss of wetland habitats in the coastal plain of the mid-Atlantic region, highway improvements, and insect predation. Critical habitat is not being designated.

DATES: The effective date of this rule is March 27, 1986.

ADDRESS: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Service's Regional Office, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

FOR FURTHER INFORMATION CONTACT: Richard W. Dyer at the above address (617/965-5100 or FTS 829-9316).

SUPPLEMENTARY INFORMATION:

Background

Canby's dropwort is a plant of the parsley family (Apiaceae) found at only ten locations in Maryland, Georgia, North Carolina, and South Carolina. The perennial plants have a slight dill fragrance, stand 0.8–1.2 meters (2.6–3.9 feet) tall, have slender "quill-like" leaves, and bear compound umbels of small flowers. The five-parted flowers appear from May through early August and have white petals and pale green sepals, some of which are tinged with red. The species' habitats include swamps, shallow pineland ponds, and wet pine savannas.

Oxypolis canbyi was originally described as a variety of a more common species, *Oxypolis filiformis*, by Coulter and Rose in 1900; however, Meritt L. Fernald elevated the taxon to a full species in 1939. Recent studies by Tucker *et al.* (1983) and Kral (1981) support Fernald's treatment. Although superficial examination has been cause for some confusion between the two taxa, *Oxypolis canbyi* is clearly distinguishable from *Oxypolis filiformis* on analysis of the mature fruit, leaves, and, most notably, the rootstock. *Oxypolis canbyi* has a strong colonizing habitat and spreads vigorously by a pale, fleshy rhizome. The most significant threat to *Oxypolis canbyi* has been and continues to be the loss of wetland habitats on the lowland plain of the mid-Atlantic coast. Several populations have been lost as shallow ponds and wetlands were ditched and drained for conversion to lowland pasture, pine plantations, soybean fields, and other agricultural uses. Alteration of groundwater tables as a result of suburban development, road construction, and other forms of human encroachment is also believed to be a cause of the species' decline.

Ten populations are known to occur in the States of Maryland, North Carolina, South Carolina, and Georgia; the species is believed extirpated from Delaware. A brief State-by-State summary of the species' status follows.

Delaware: Oxypolis canbyi has not been known to occur in the State since 1894. At least seven visits to collect specimens of the plant were made in the "swamps and meadows" east of Ellendale in Sussex County between the years 1867 and 1894. No other historical collections are known to exist from the State. Much of the area east of Ellendale, where the population is believed to have occurred, have been ditched and drained for agricultural purposes. Recent intensive field searches of the historical site and other suitable sites have failed to locate any *Oxypolis canbyi*. The ditching and draining with subsequent changes in vegetative succession and land use has greatly modified the area, and the plant is now considered extirpated from the State.

Maryland: One population of approximately 36 stems (Boone *et al.* 1984) was found within the Chester River watershed in Queen Annes County in 1982. Previously, the species had not been known to occur in the State. The population, however, is within the area of the proposed Upper Chester River Watershed Channelization Project. The Soil Conservation Service (SCS) has been officially advised of the species' occurrence in the project area and of the proposed status of the species. The U.S. Fish and Wildlife Service (FWS) and SCS are optimistic that proper project design and implementation will provide solutions to protecting the species and its habitat. The site of this single extant Maryland population was acquired by the Maryland Chapter of The Nature Conservancy in early 1984.

Georgia: Oxypolis canbyi is officially listed by the State of Georgia as an endangered species. Extant populations are known in Burke, Lee, and Sumter Counties. There is a record for Dooly County near Unadilla but the last known collection from that site was in 1953. Two Burke County records exist from the vicinity of Waynesboro.

North Carolina: Oxypolis canbyi is recorded for one site in North Carolina. The population occurs in a Carolina bay (a physiographic land form that typically appears as a shallow egg-shaped depression) in Scotland County. The site was first discovered in 1984 and is owned in part by The Nature Conservancy.

South Carolina: Five extant populations of *Oxypolis canbyi* are known to occur in the State. There are two additional, historical, sites where the species no longer exists. A vigorous population of approximately 600 stems occurs on private land in Bamberg County and a second population of about 500 stems in colonies of 10–20 stems each, exists in Colleton County. The Colleton site is now owned by The Nature Conservancy. Protection efforts are also underway for the Bamberg site; however, both populations could be threatened by possible roadside maintenance or improvements. Three new populations were found in 1984 as a result of intensive field work. One population was discovered in Richland County and two were found in Barnwell County. The South Carolina Heritage Trust Program is working to protect the sites.

The historical Hampton County population is along a railroad near Luray. It has not been observed since 1956 and is believed extirpated. The former Berkeley County population near Pineville was last confirmed in 1961. The Berkeley County habitat, a grass-sedge Carolina bay, is now bisected by a small secondary road. Although *Oxypolis canbyi* was positively identified at the site in 1961, recent investigations have determined that only *Oxypolis filiformis* now occurs there. Road construction may have possibly altered the hydrology and vegetative succession of the site, as the area is no longer suitable for *Oxypolis canbyi*.

Oxypolis canbyi was first recommended for Federal listing as a threatened plant species by the Smithsonian Institution in its December 15, 1974, report to Congress, "Report on Endangered and Threatened Plant Species of the United States." On July 1, 1975, the Service published a notice of review in the Federal Register (40 FR 27823-27924) of its acceptance of the Smithsonian report as a petition within the context of Section 4(c)(2) of the Act (petition acceptance is now covered by Section 4(b)(3) of the Act, as amended). Canby's dropwort was recognized as a "category-2" candidate in the Service's Federal Register notice of December 15, 1980 (45 FR 82480). Category-2 candidates are defined as taxa for which existing information indicates the possible appropriateness of proposing to list as endangered or threatened, but for which sufficient information is not presently available to biologically support a proposed rule.

In recent years, intensive field investigations have been undertaken by State natural resource agencies, private conservation groups, and professional botanists to more thoroughly assess this species' status throughout its range. As a result of this work, *Oxypolis canbyi* was determined to be a "category-1" plant in the Service's November 28, 1983, supplement (48 FR 53640) to the 1980 notice. Category 1 taxa are defined as species for which sufficient information is on hand to support the biological appropriateness of proposing to list.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. The species listed in the December 15, 1980, Notice of Review were considered to be petitioned and the deadline for a finding on those species, including *Oxypolis canbyi* was October 13, 1983. On October 13, 1983, and again on October 13, 1984, the petition finding was made that listing *Oxypolis canbyi* was warranted but precluded by other pending listing actions, in accordance with Section 4(b)(3)(B)(iii) of the Act. Such findings require a recycling of the petition, pursuant to Section 4(b)(3)(C)(i) of the Act. The proposed rule of March 28, 1985 (50 FR 12345), constituted the Service's most recent positive finding on this species.

Summary of Comments and Recommendations

In the March 28, 1985, proposed rule (50 FR 12345) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, conservation and scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices inviting general public comments were published in six different papers in the vicinity of known populations. Fifteen comments were received, all of which supported the proposed rule. The comments are discussed below.

Favorable comments were received from each of the five State natural resource agencies. The Delaware Department of Natural Resources and Environmental Control stated that, although *Oxypolis canbyi* is believed to be extirpated from the State, it would continue to conduct periodic surveys for the plant. The Maryland Forest, Park and Wildlife Service supported the rule, suggesting that establishing additional populations on State-owned land within the species' potential range be considered as part of the species' recovery strategy. The North Carolina Department of Agriculture and Department of Natural Resources and Community Development expressed strong support for the Service's proposed rule and indicated they anticipate the plant soon being added to the official North Carolina Protected Plant List. The South Carolina Wildlife and Marine Resources Department stated it has looked at many potential sites for the species but has found very few new populations. It also commented that insect predation by the larvae of the black swallowtail butterfly may be seriously limiting the species' reproductive success.

Two Federal agencies commented. The Department of the Army submitted comments from two Corps of Engineers divisions. Their comments were supportive and indicated their willingness to consider the dropwort with regard to the Upper Chester River Watershed (UCRW) project. The U.S. Department of Agriculture's Soil Conservation Service commented that it is aware of the occurrence of the dropwort in the UCRW project area and will continue to work with the Service and the State of Maryland to protect the plant.

The Nature Conservancy Chapters in Maryland, North Carolina, and South Carolina all favored the proposed rule and stated they were actively working to protect the known sites in their respective States. Three other comments were received, all supportive and from conservation organizations and private individuals. All comments are now incorporated into this rule and the Service greatly appreciates the assistance of all parties.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Oxypolis canbyi* should be classified as an endangered species. Procedures found at Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to *Oxypolis canbyi* (Coulter and Rose) Fernald (Canby's dropwort) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The most significant threat to *Oxypolis canbyi* is the direct loss or alteration of its wetland habitats. Ditching and draining of lowland areas has altered the groundwater table and changed the vegetative composition in many areas of the mid-Atlantic coastal plain where the species historically occurred. Most of the ditching and draining has been for agricultural purposes, including increasing acreage for soybean production, lowland pasture, and pine plantations. Some shallow ponds and depressions have also been dredged to create small reservoirs and "tanks" for watering livestock. In addition to causing direct loss of wetland habitats, the lowering of the water table enables other plants to become established, modifies vegetative succession, and

VOL 51
ISS 37
FE 25
1986
UMI

makes sites less conducive to the growth and reproduction of *Oxypolis canbyi*. Road construction at the Berkeley County, South Carolina, site may have altered the water table and thus eliminated the dropwort. Roadside maintenance or improvements could also threaten other remaining South Carolina populations.

The only known Maryland population is within the area of the SCS Channelization Project for the Upper Chester River Watershed. The purposes of the project are to provide watershed protection, flood protection, and agricultural drainage on approximately 12,141 hectares (30,000 acres) of farmland, forests, and wetlands in both Maryland and Delaware. The project is evaluating 327 kilometers (203 miles) of drainage channel and would be completed over a seven-year period. Flexibility in final project design and fulfillment of the provisions of an interagency agreement signed by the SCS and the FWS on January 13, 1983, will assist in developing solutions to potential conflicts.

The extant populations in southwestern Georgia and North Carolina are also threatened by the continued loss or drainage of shallow wetlands and wet pineland savannas. The draining of areas for pine plantations and soybean fields causes the most significant impacts. Although The Nature Conservancy has acquired or in some way protected the sites of four extant populations, activities beyond the boundaries of the sites could still have serious adverse impacts on these areas.

B. *Overutilization for commercial, recreational, scientific or educational purposes.* Many collections were made for educational and scientific purposes at the now extirpated Ellendale, Delaware, site. Scientific collecting does not appear to have been the major cause of the species' decline. However, since only ten populations are now known to occur and most of these are located in easily accessible sites, the existing populations could be harmed if exploited for educational or scientific purposes.

C. *Disease or predation.* Canby's dropwort appears to be a favored food plant for the larvae of the black swallowtail butterfly. Some of the South Carolina sites have been subject to predation, but the degree of predation among populations and its overall effects on seed set and plant viability are not yet clear. Recent work by a graduate student has suggested that predation by the butterfly larvae might have a major adverse impact on the viability of known populations.

D. *The inadequacy of existing regulatory mechanisms.* Georgia presently lists *Oxypolis canbyi* as an endangered species under protection of the Georgia Wild Flower Preservation Act of 1973, which prohibits digging, removal, or sale of State-listed plants from public lands without the approval of the State management authority (Georgia Department of Natural Resources). North Carolina's legislation to protect rare plants (N.C. General Statute 19–B, 202.12–202.19) provides protection from intrastate trade and provisions for monitoring and proper management. The State of North Carolina anticipates that the dropwort will soon be added to the official State list.

Section 404 of the Federal Water Pollution Control Act could potentially provide some protection to the species' habitats; however, many of the sites where the plants occur do not meet "wetlands" criteria under Section 404. South Carolina, Maryland, and Delaware do not have State legislation officially protecting rare and endangered plants. The Endangered Species Act will provide additional protection.

E. *Other natural or manmade factors affecting its continued existence.* Alteration or modification of groundwater by increasing suburban development and resultant drawdowns for water supply, and site drainages could indirectly impact the species' habitats. There are indications that roads and highways have altered the groundwater regime where *Oxypolis canbyi* historically occurred. Although it is difficult to state with certainty that one specific factor caused the plant's demise, the impacted areas no longer provide the plant's needed life requirements.

The Service has carefully assessed the best scientific information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Oxypolis canbyi* as endangered. Due to the immediate and continuing loss of wetland habitats, the remaining populations are particularly vulnerable and in need of protection. In addition, the protection of the local areas where the plants occur may not provide sufficient protection if development or actions in other areas of the watershed (i.e., tributary streams) affect the local flow regime or groundwater table. An understanding of the groundwater flow regime and total watershed management considerations, therefore, become particularly crucial to properly protecting existing *Oxypolis* sites.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. The Service, the natural resource agencies of the States in which the species occur, and The Nature Conservancy believe that publication of specific areas in which *Oxypolis canbyi* occurs would likely subject the species to increased disturbance by curiosity seekers and vandals. These potential threats are of particular significance since the sites are easily accessible, the habitats are fragile, and increased public access would be difficult to control under existing authorities. Consequently, no critical habitat is proposed for this plant species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal and State agencies, private conservation organizations, and individuals. Because of the precarious status of *Oxypolis canbyi*, The Nature Conservancy has already made significant contributions to conserving the species by acquiring the habitat of three of the known populations, and is actively working to protect other sites as well. Other conservation measures, including required protection efforts by Federal agencies and prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990, June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely

modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible agency must enter into formal consultation with the Service. The only known current Federal action that may affect *Oxypolis canbyi* is the SCS Channelization Project for the Upper Chester River Watershed. Cooperative discussions between the FWS and the SCS have been initiated and field inspections are currently being planned.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Oxypolis canbyi*, all trade prohibitions of Section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions in part make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. There is no known commercial trade in *Oxypolis canbyi* and the Service therefore anticipates few, if any, requests for such permits.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. Permits for exceptions to this prohibition are available through regulations published September 30, 1985 (50 FR 39681, to be codified at 50 CFR 17.62). This prohibition will apply to *Oxypolis canbyi*, although no known populations exist on Federal lands. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

National Environmental Policy Act

The Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to Section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

DEPARTMENT OF AGRICULTURE

7 CFR Part 3201

Competitive Research Grants Program for Forest and Rangeland Renewable Resources; Administrative Provisions

AGENCY: Office of Grants and Program Systems, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to establish Part 3201 of Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations, for the purpose of administering the Competitive Research Grants Program for Forest and Rangeland Renewable Resources conducted under authority of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644). The issuance of this rule will establish the procedures to be followed annually in the solicitation of research grant proposals, the evaluation of such proposals, and the award of competitive research grants under this program.

DATE: Written comments concerning this proposed regulation are invited from interested individuals and organizations. To be considered, all relevant material must be received on or before March 27, 1986.

ADDRESS: Written comments must be submitted to: Grants Administrative Management, Office of Grants and Program Systems, U.S. Department of Agriculture, Room 112, Justin Smith Morrill Building, 15th and Independence Avenue, SW., Washington, DC 20251. All comments received will be available for public inspection at said office on weekdays between the hours of 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Terry J. Pacovsky, (202) 475-5024.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information requirements contained in this rule have been approved under OMB Document No. 0525-0001.

Classification

This rule has been reviewed under Executive Order 12291, and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96-534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this rulemaking.

Environmental Impact Statement

This regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969.

Catalog of Federal Domestic Assistance

This program/activity is scheduled to appear in the 1986 edition of the Catalog of Federal Domestic Assistance as 10.213, Competitive Research Grants Program for Forest and Rangeland Renewable Resources. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V, 48 CFR 29115, June 24, 1983, when the authority to administer this program resided in the Forest Service, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended, the Secretary of Agriculture is authorized to make competitive research grants to further research activities related to the protection, management and utilization of forest and rangeland renewable resources to Federal, State, and other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States.

This proposed rule will establish Part 3201 of Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations, for the purpose of administering the Competitive Research Grants Program for Forest and Rangeland Renewable Resources.

List of Subjects in 7 CFR Part 3201

Grant programs—agriculture, Grant administration.

It is therefore proposed to amend Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations by adding Part 3201 to read as follows:

CHAPTER XXXII—OFFICE OF GRANTS AND PROGRAM SYSTEMS, DEPARTMENT OF AGRICULTURE

PART 3201—COMPETITIVE RESEARCH GRANTS PROGRAM FOR FOREST AND RANGELAND RENEWABLE RESOURCES

Sec.
3201.1 Applicability of regulations.
3201.2 General regulations.
3201.3 Eligibility requirements.
3201.4 Signatures required on grant application.

Authority: Sec. 5 of the Forest and Rangeland Renewable Resources Act of 1978, as amended (16 U.S.C. 1644).

§ 3201.1 Applicability of regulations.

(a) The regulations of this part apply to competitive research grants awarded under the provisions of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644), to Federal, State, or other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States. The Secretary, or his or her designee, shall determine and announce, through publication of a Notice in the Federal Register each year, research program areas for which proposals will be solicited to the extent that funds are available. Research under this program will be in those areas having a significant impact on the protection, management and utilization of forest and rangeland renewable resources.

(b) The regulations of this part do not apply to research grants awarded under any other authorization.

§ 3201.2 General regulations.

For purposes of this part, the provisions found at Part 3200 of this chapter, excluding the provisions listed in (a) through (e) below, are applicable to the administration of this research program.

(a) Section 3200.1.

(b) Section 3200.3(a).

(c) Section 3200.4(c).

(d) The material found in the second sentence of 3200.6(c)(3) beginning with "the results of which" and ending with "food and agricultural sciences,."

(e) The parenthetical phrase in the last sentence of 3200.7(c).

§ 3201.3 Eligibility requirements.

Except where otherwise prohibited by law, any Federal, State or other governmental agency, public or private

agency, institution, university, or organization, and business or individual in the United States shall be eligible to apply for and receive a project grant under this part, provided that the applicant qualifies as a responsible grantee under the criteria set forth in § 3200.3(b).

§ 3201.4 Signatures required on grant application.

(a) Any research proposal submitted by an agency, institution, university, organization, or business must be signed by the principal investigator(s) and endorsed by the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources.

(b) Any research proposal submitted by an individual who lacks organizational affiliation need only be signed by the principal investigator.

Done at Washington, DC, this 11th day of February 1986.

John Patrick Jordan,

Acting Administrator, Office of Grants and Program Systems.

7 CFR Part 3401

Rangeland Research Grants Program Administrative Provisions

AGENCY: Cooperative State Research Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to establish Part 3401 of Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations, for the purpose of administering the Rangeland Research Grants Program conducted under authority of section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, (7 U.S.C. 3333). The issuance of this rule will establish the procedures to be followed annually in the solicitation of research grant proposals, the evaluation of such proposals, and the award of research grants under this program.

DATE: Written comments concerning this proposed regulation are invited from interested individuals and organizations. To be considered, all relevant material must be received on or before March 27, 1986.

ADDRESS: Written comments must be submitted to: Grants Administrative Management, Office of Grants and Program Systems, U.S. Department of Agriculture, Room 112, Justin Smith Morrill Building, 15th and Independence Avenue, SW., Washington, DC 20251. All comments received will be available for public inspection at said office on weekdays between the hours of 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Terry J. Pacovsky, (202) 475-5024.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information requirements contained in this rule have been approved under OMB Document No. 0525-0001.

Classification

This rule has been reviewed under Executive Order 12291, and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96-534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this rulemaking.

Environmental Impact Statement

This regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969.

Catalog of Federal Domestic Assistance

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.200. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of Section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, (7 U.S.C. 3333), the Secretary of Agriculture is authorized to make grants to land-grant colleges and universities, State agricultural experiment stations, and colleges, universities, and Federal laboratories having a demonstrable capacity in rangeland research.

This proposed rule will establish Part 3401 of Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations, for the purpose of administering the Rangeland Research Grants Program.

List of Subjects in 7 CFR Part 3401

Grant programs—agriculture, Grant administration.

It is therefore proposed to amend Title 7, Subtitle B, Chapter XXXIV of the Code of Federal Regulations by adding Part 3401 to read as follows:

CHAPTER XXXIV—COOPERATIVE STATE RESEARCH SERVICE, DEPARTMENT OF AGRICULTURE

PART 3401—RANGELAND RESEARCH GRANTS PROGRAM

Sec.
3401.1 Applicability of regulations.
3401.2 General regulations.
3401.3 Eligibility requirements.
3401.4 Matching fund requirement.
3401.5 Indirect costs and tuition remission costs.

Authority: Sec. 1470 of the National Agricultural Research, Extension and Teaching Policy Act of 1977 (7 U.S.C. 3316)

§ 3401.1 Applicability or regulations.

(a) The regulations of this part apply to rangeland research grants awarded under the provisions of section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3333) to land-grant colleges and universities, State agricultural experiment stations, and colleges, universities, and Federal laboratories having a demonstrable capacity in rangeland research. The Secretary, or his or her designee, shall determine and announce, through publication of a Notice in the **Federal Register** each year, research program areas for which proposals will be solicited to the extent that funds are available.

(b) The regulations of this part do not apply to research grants awarded under any other authorization.

§ 3401.2 General regulations.

For purposes of this part, the provisions found at Part 3400 of this chapter, excluding the provisions listed in (a) through (g) below, are applicable to the administration of this research program.

(a) Section 3400.1.

(b) Paragraph 3400.3(a).

(c) The last sentence of Paragraph 3400.4(c)(11).

(d) The parenthetical phrase in the last sentence of Paragraph 3400.7(c).

(e) Paragraph 3400.7(d)(1).

(f) Paragraph 3400.7(d)(2).

(g) Paragraph 3400.7(d)(3).

§ 3401.3 Eligibility requirements.

Except where otherwise prohibited by law, any land-grant college and university, State agricultural experiment station, and college, university, and Federal laboratory having a demonstrable capacity in rangeland research shall be eligible to apply for and receive a project grant under this part, provided that the applicant

qualifies as a responsible grantee under the criteria set forth in Paragraph 3400.3(b).

§ 3401.4 Matching fund requirement.

In accordance with section 1480 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3333), except in the case of Federal laboratories, each grant recipient must match the Federal funds expended on a research project based on a formula of 50 percent Federal and 50 percent non-Federal funding.

§ 3401.5 Indirect costs and tuition remission costs.

Pursuant to Section 1473 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3319), funds made available under this program shall not be subject to reduction for indirect costs or for tuition remission. Indirect costs and tuition remission costs are not allowable costs for purposes of this program.

Done at Washington, DC this 11th day of February 1986.

John Patrick Jordan,

Administrator, Cooperative State Research Service.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1900, 1924, and 1980

Administrative Appeal Procedure Revisions and Interest Rate Buydown Program and Appeals for Farmers Home Administration's Guaranteed Operating, Farm Ownership, and Soil and Water Loans To Implement Applicable Provisions of the Food Security Act of 1985

AGENCY: Farmers Home Administration, USDA.

ACTION: Interim rule with request for comments and finalization of previously published interim rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to: (1) Provide for revised time periods for handling appeals; (2) provide that farmer program borrowers who fail to attend a scheduled conference or supply necessary information still can appeal an adverse action; (3) provide for guarantees for operating, farm ownership, and soil and water loans for joint operations; (4) provide for family farm restrictions except for applicants related by blood and marriage for certain farmer program guaranteed loans; (5) provide for prompt approval of certain guaranteed farmer program loans; (6) provide for a different appeal procedure for guaranteed farmer program, economic emergency, emergency livestock, and rural housing loans; and (7) provide for interest rate buydown for guaranteed operating, farm ownership, and soil and water loans. The amendments are necessary to implement applicable provisions of the "Food Security Act of 1985" (Pub. L. 99-198). The major effects will be to ensure that the Agency provides for prompt handling by FmHA of appeals by most FmHA borrowers; provides for prompt service to applicants and borrowers of guaranteed farmer program loans; provide for additional ways that borrowers may continue to farm through a reduction in interest rates for guaranteed operating, farm ownership, and soil and water loans; provides an incentive to lenders to provide operating credit to farmers; and provides for appeal procedures for guaranteed operating, farm ownership, and soil and water loans for lenders and applicants similar to the insured program. These changes should assist in preserving the family farm, protect the national food supply, and strengthen rural farming communities.

DATES: Interim rule effective February 25, 1986. Comments must be submitted on or before March 27, 1986. The interim rule published September 30, 1985 (50 FR 39660) and adopted as final in this document is effective as of September 30, 1985.

ADDRESSES: Submit written comments, in duplicate, to the Office of the Chief, Directives Management Branch, Farmers Home Administration, USDA, Room 6348, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250. All written comments made pursuant to this date will be available for public inspection under regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: William Krause, Director, Emergency Loan Division, Farmers Home Administration, USDA, Room 5420, Washington, DC 20250, Telephone: (202) 382-1632.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291, and has been determined to be nonmajor, because there will not be an annual effect on the economy of $100 million or more; a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or significant adverse affects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Intergovernmental Consultation

1. For the reasons set forth in the final rule related to Notice 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940-J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), Emergency Loans, Farm Operating Loans, Farm Ownership Loans and Low Income Housing Loans are excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

2. The Soil and Water Loans Programs is subject to the provisions of Executive Order 12372 and FmHA Instruction 1940-J.

Programs Affected

These changes affect the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

10.404—Emergency Loans
10.406—Farm Operating Loans
10.407—Farm Ownership Loans
10.410—Low Income Housing Loans (Section 502 Rural Housing Loans)
10.416—Soil and Water Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, and Environmental Impact Statement is not required.

Paperwork Reduction Act

Under the Paperwork Reduction Act and 5 CFR Part 1320, the Farmers Home Administration has submitted the information collection requirements contained in this regulation for review by the Office of Management and Budget (OMB). The OMB has approved the information collection request and assigned OMB Control Nos. 0575-0024 and 0575-0079.

Discussion of Interim Rule

FmHA is implementing this interim rule immediately with a 30-day comment period. It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. The "Food Security Act of 1985," Pub. L. 99-198, required these provisions. They were effective on enactment into law. Field offices are already receiving inquiries regarding those provisions that were effective upon enactment of the law. The agency must provide immediate guidance by revising the regulations.

It is urgent that these regulations become effective on publication so that farmers and lenders can make plans for financing the spring planting. It will allow the lender to continue with many borrowers. It will allow many farmers to obtain credit through commercial lenders and continue their farming operations. It should be another valuable tool at a reduced cost to the Government.

Further, pursuant to the administrative procedure provisions in 5

U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule action are impractical, and good cause is found for making this interim rule effective less than 30 days after publication in the Federal Register.

Background

The loan making, supervision, and servicing of FmHA farm borrowers is governed mainly by the Consolidated Farm and Rural Development Act (CONACT) (7 U.S.C. 1921—*et seq.*) The major purpose for revising the FmHA regulations at this time is to implement various sections of the Food Security Act of 1985 (Pub. L. 99-198) mandating the handling of adminsitrative appeals and to certain actions relating to farmer program guaranteed loans. The sections are as follows:

1. Section 1301—Joint Operations.
2. Section 1303—Family Farm Restriction.
3. Section 1312—Prompt Approval of Loans and Loan Guarantees.
4. Section 1313—Appeals.
5. Section 1320—Interest Rate Reduction Program.

Due to the urgent need of the guarantee for operating and farm ownership loans by both lenders and farmers for credit for spring planting, FmHA has expedited the implementation of these changes. The suspension continues on the guaranteed emergency loan program. Therefore, no changes are being made in the guaranteed emergency loan regulations at this time.

Background—Guaranteed Loans

On September 30, 1985, FmHA published in the Federal Register (50 FR 39660) an interim rule giving interested parties until October 30, 1985, to submit comments on regulations of subparts A, B, C, D, E, and F of Part 1980 of this chapter.

Discussion of Comments Received

In response to the interim rule, 9 written comments were received. All comments were considered in developing the final rule. The following is a discussion of the comments received from 1 farmer, 6 lenders, 1 Banker's Association, and 1 FmHA employee.

One lender wrote that the line of credit should be expanded to restructure real estate equity, machinery, and breeding livestock. The primary purpose of implementing the line of credit authority is to recognize that lines of credit are widely used to finance annual production purposes and to prevent farmers going through a repetitive loan process if they were to receive several guaranteed annual production loans. The refinancing of real estate equity, machinery, and breeding livestock are inconsistent with this intention. After due consideration, we have decided not to adopt this change.

Other lenders wrote that they "welcome most of our proposals." However, FmHA should strive to give lenders quicker settlements in claims and modifying approved lender status in order to expedite application processing. Present regulations provide that FmHA may make an estimated loss payment to the lender prior to liquidation. In addition, we believe the time requirements set forth in the regulations to notify lenders of the status of their applications and the time frames required for approval will expedite processing.

A lender wrote that the 1% guarantee fee assessed upon the lender is excessive, and made it prohibitive for lenders to participate in the program. FmHA believes that the 1% fee should be charged to the lender to cover administrative costs of processing and monitoring the loan. The lender may pass this fee on to the borrower.

Two lenders wrote that the interest rate should be determined by a lender on the "basis of a risk rating system" rather than that charged the lender's average farm customer. FmHA believes that the interim rule adequately addressed this issue. Regulations provide that average farm customers do not include those high risk farmers with limited security and management ability that are generally charged a higher interest rate by conventional agricultural lenders, or those low risk customers who obtain financing on a secured or unsecured basis who have as collateral items such as savings accounts, time deposits, certificates of deposit, stocks and bonds, and life insurance which they are able to pledge for the loan.

Another lender wrote with concern that the requirement that variable interest rates be tied to a "base rate" which is published periodically in a financial publication was construed to mean that this rate would be based on the prime rate. This is not the case. The lender may tie the base rate to a rate reflecting the lending institution's cost of funds as long as the based rate is published periodically in a financial publication.

A Banker's Association wrote that FmHA regulations as set forth in the interim rule "will provide a far more effective set of guaranteed loan programs that will assist both farms and agriculture lenders through these difficult times." The respondent also suggested regulations should be revised to provide estimated loss payments to lenders equal to 75% of the loan guaranteed or 100% of the guaranteed portion of the estimated loss, whichever is less. FmHA regulations currently allow an estimated loss payment to the lender prior to liquidation of 100% of the estimated loss on the guaranteed portion of the loan, not to exceed however the guaranteed portion of principal advanced plus interest. Therefore, the suggested change would not be of benefit to lenders.

An FmHA employee wrote that the method calculating yields in connection with loan requests set forth in the interim rule should stipulate that this method will be used if the farm is an average farm in the county. FmHA believes that it would be difficult to determine what is considered an average farm in a county. Further, the requirements that ASCS proven yields be considered would virtually eliminate this situation.

The employee further wrote that the regulations would allow a borrower to have two applications on hand at one time, one insured and one guaranteed. This is not correct. The interim rule stipulates that the review for an insured loan would be consistent with the appropriate insured loan regulation. Therefore, the possibility of two simultaneous applications, one insured and one guaranteed is not possible.

The employee also commented that the requirement that Approved Lenders are notified of application completeness within 3 working days be changed to 5 working days to account for mail turnaround. The interim rule states that FmHA will notify applicants within 3 working days, not that applicants will receive such notification within 3 working days. FmHA does not believe it necessary to adopt this change.

Finally, the employee was concerned that lenders were authorized by the interim rule to charge 1% above the average interest rate. The employee stated that his experience indicates lenders will charge guarantee customers 1-1½ percent below the average farm customer rate to offset the guarantee fee and the benefit to the lender of the guarantee. FmHA believes that this provision will not change these situations since the lender is charging the borrower less than the average interest rate which he is authorized to charge. This change was made to encourage greater lender participation in the program. FmHA elects not to change this provision.

Therefore, FmHA is adopting as final without change the interim rule for

VOL 51 ISS 37 FE 25 1986 UMI

guaranteed loans published on September 30, 1985.

Background—Recreation Loans

This is a minor program. Since 1969 only 460 insured loans and three guaranteed loans for a total of $20,527,880 were made. As of October 21, 1985, only 210 loans for a total of $13,325,000 remain outstanding. The program has not been funded since Fiscal Year 1981. Indications are that it will not receive funding in the foreseeable future. Therefore, the Agency is not amending the guaranteed regulations or the Code of Federal Regulations to save the time and expense of updating the regulations.

Part 1900—General

Subpart B—Farmers Home Administration Appeal Procedure

Revisions required to comply with Pub. L. 99–198.

§ 1900.51 is partially revised to allow guaranteed Farmer Program, Emergency Livestock, and Rural Housing loans to be appealed under this Part and to require the lender and the applicant to jointly participate in an appeal of a guaranteed loan denial. Business and Industrial guaranteed loans will be covered by regulations which will be issued in the near future.

§ 1900.52 is partially revised to include an applicant or lender applying for or having a guaranteed loan or a line of credit loan in the definition of an appellant for farmer program, emergency livestock or rural housing loans.

§ 1900.53(a)(5) is revised for clarification only.

§ 1900.55(c) is revised to refer only to Rural Housing, Rural Rental Housing, Rural Cooperative Housing, Rural Housing Site, and Labor Housing Loans and Grants.

§ 1900.55(d) is revised to give the borrower the opportunity for a conference and/or hearing. Failure to attend the conference will not cancel the borrower's right to a hearing.

§ 1900.55(e) is revised to apply only to situations covered in §§ 1900.55 (c) and (d).

§ 1900.55(f) is added to apply to all appeals not covered under § 1900.55 (c) and (d) of this subpart and requires FmHA to give the appellant the opportunity for a conference and/or a hearing. Failure to schedule/attend the conference does not cancel the appellant's right to a hearing, if requested. FmHA cannot waive the right to a meeting or conference.

§ 1900.56(a) is revised to specify what Exhibits are used to advise borrowers of their appeal rights and to correct an error for a reference to Subpart A of Part 1965 of this chapter.

§ 1900.56(b) changes the time allowed the decision maker to notify the applicant of an adverse action.

§ 1900.56(e) this section now only applies to Rural Housing, Rural Rental Housing, Rural Cooperative Housing, Rural Housing Site, and Labor Housing Loan and Grant cases originating in Samoa, Guam, Alaska, and the Western Pacific Territories for appeal hearings.

§ 1900.59(c) is added to require the decisionmaker to resume processing of an application within 15 days after the decisionmaker is notified that the loan denial is reversed or modified as a result of the appeal and to notify the applicant.

Exhibit B–6 is revised so that borrowers who do not schedule or attend a meeting or conference do not forfeit their appeal rights.

Exhibit B–7 is added for use in informing certain borrowers and applicants of their appeal rights when a meeting with FmHA is optional prior to a hearing.

Part 1924—Construction and Repair

Subpart B—Management Advice to Individual Borrowers and Applicants

§ 1924.72(b) is revised to require FmHA to inform borrowers of their appeal rights even if they fail to attend the scheduled conference or provide the necessary information in connection with their request for servicing actions.

§ 1924.72(c) is revised to require FmHA to advise borrowers of their right to a conference in addition to a hearing when appealing FmHA's intended adverse action.

Part 1980—General

Subpart A—General

This regulation is partially revised to incorporate the applicable provisions of the Pub L. 99–198.

§ 1980.20 is revised to refer to § 1980.80 of this subpart for appeal rights when FmHA reduces the percentage of guarantee requested by the lender.

§ 1980.47 is added to stipulate various time requirements for taking actions on applications for Farmer Program loan guarantees.

§ 1980.60(a)(9) is revised to include joint operations for farmer program loans only.

§ 1980.61(e) is revised to refer to § 1980.80 of this subpart for appeal rights when FmHA determines it cannot execute the Loan Note Guarantee or Contract of Guarantee. This revision is for clarification only.

§ 1980.80 is revised to refer appeals for Farmer Program, Economic Emergency, Emergency Livestock, and Rural Housing loans to FmHA regulation 1900–B.

§ 1980.83 is revised to include FmHA Form 1980–58, "Interest Rate Buydown Agreement," and Form FmHA 1980–24, "Request for Interest Rate Buydown/Subsidy Payment to Guaranteed Loan Lender."

Appendix H is added for Form FmHA 1980–58, "Interest Rate Buydown Agreement."

Appendix I is added for Form FmHA 1980–24, "Request for Interest Rate Buydown/Subsidy Payment to Guaranteed Lender."

Subpart B—Farmer Program Loans

This regulation is revised to conform with Pub. L. 99–198. Revisions are:

§ 1980.101(a) is revised to reference Exhibit D to 1980–B for the Interest Rate Buydown Program.

§ 1980.106(b)(10) is revised to include joint operations.

§ 1980.106(b)(16) is added to define joint operations.

§ 1980.106(21)(b)(ii) is revised to correct a reference.

§ 1980.106(b)(28) is added to define related by blood and marriage.

§ 1980.108(a)(1)(iii) is added to clarify that guaranteed loans may be made to indebted FmHA insured borrowers when separate and identifiable security can be obtained by the guaranteed lender. This change is necessary because of the economic conditions for farming and the critical need to expand the availability of credit to financially distressed farmers.

§ 1980.108(a)(2)(i) is revised to require personal guarantees of individuals involved in joint operations and the rest of the paragraph is renumbered.

§ 1980.108(c) is revised to require the property of joint operations and joint operators as individuals to be considered to determine if credit elsewhere is available.

§ 1980.108(d) is revised only to clarify the relationship between FmHA insured and guaranteed loans.

§ 1980.109(a)(1) is added to require personal guarantees of individuals involved in joint operations and redesignate the numbers for the paragraph.

§ 1980.113(a)(5) is revised to add the provision for joint operators.

§ 1980.113(b) is revised to require a list of the names of joint operators, current financial statement from the joint operation and joint operators and a joint operation agreement.

§ 1980.113(c) is revised to delete the use of Form FmHA 449–18, and to require prompt FmHA review of the preliminary application and written notification of the applicant's and lender's right to appeal any unfavorable decision.

§ 1980.113 Administrative Section A is revised to require the County Supervisor to give joint operation applicants Form FmHA 410–9, "Statement Required by the Privacy Act." Section B is printed for convenience.

§ 1980.113 Administrative Section C is added to require County Supervisors to notify the borrower and lender of the Interest Rate Buydown Program.

§ 1980.114(a) is revised to provide for an appeal for the lender and applicant of the indication that a guarantee cannot be approved.

§ 1980.115 is revised to delete the use of Form FmHA 449–18 when informing the lender and the applicant of the County Committee's unfavorable action on their loan request, and to require prompt FmHA County Committee and FmHA loan approval or disapproval and written notification of their right to appeal any disapproval.

§ 1980.115 Administrative Section B is revised to require FmHA loan approval or disapproval not later than 60 days of receipt of completed applications and to clarify that approval determination will be made within 14 working days of County Committee certification for approved lenders and 30 days of County Committee certification for non-approved lenders.

§ 1980.119 is revised to require FmHA to inform the lender and applicant in writing within 10 days of a decision of the reasons for the decision and of their appeal rights in connection with a Conditional Commitment for Guarantee.

§ 1980.145(b) is revised to require notification of borrowers of the Interest Rate Buydown Program.

§ 1980.146, Part B of the Administrative section, is revised to clarify that if FmHA liquidates a guaranteed loan, it must follow the insured loan regulations.

§ 1980.146, Part E of the Administrative section, is revised to require FmHA to promptly advise the lender of its appeal rights when FmHA denies or reduces the amount of loss claims submitted by the lender.

§ 1980.148 is revised to refer to Part 1900, Subpart B for the method of appealing adverse actions by FmHA in connection with guaranteed farmer program loans.

§ 1980.175(b)(1)(i) is revised to correct a cross-reference.

§ 1980.175(b)(2) is revised to correct a cross-reference and to include joint operations.

§ 1980.175(b)(2)(vi) is added to allow entities to exceed a family size farm if certain conditions are met.

§ 1980.175(d)(1) is revised for clarification that the operating line of credit principal balance must never exceed the ceiling set out on the Contract of Guarantee. Also, the principal indebtedness cannot exceed $400,000 rather than principal and interest indebtedness to conform with insured loan regulations on this point.

§ 1980.175(e) is revised to add provisions relating to the Interest Rate Buydown Program.

§ 1980.175(f)(4) is revised to add provisions of the Emergency Agricultural Credit Act of 1984 which allows for rescheduling of loans other than NFE loans for up to 15 years.

§ 1980.180 (b)(1) and (c)(1) are revised to correct a cross-reference.

§ 1980.180(c)(2) is revised to correct a cross-reference and amended to include joint operations.

§ 1980.180(c)(2)(vi) is added to allow entities to exceed a family size farm providing certain conditions will be met.

§§ 1980.180(f)(2) is revised to add provisions relating to the Interest Rate Buydown Program.

§ 1980.180(f)(3) is revised to correctly refer to § 1980.124 (d) for deferrals.

§ 1980.185(b) and (c)(1)(i) are revised to correct a cross-reference.

§ 1980.185(c)(2) is revised to correct a cross-reference and amended to include joint operations.

§ 1980.185(f)(2) is revised to add provisions relating to the Interest Rate Buydown Program.

§ 1980.185(f)(3) is revised to correctly refer to § 1980.124 (d) for deferrals.

Exhibit A, Section II A is is revised to require prompt action by FmHA on a request for Approved Lender status. Exhibit C is being revised to include a reference to the "Request for Interest Rate Buydown."

Exhibit D is added to prescribe the policies and procedures for an Interest Rate Buydown Program. A brief summary of the "buydown" program is as follows:

Under the Interest Rate Buydown Program, FmHA may pay the lender up to 50 percent of the cost of reducing the interest rate to the borrower (not to exceed two percentage points) on guaranteed operating loans and lines of credit, farm ownership loans and soil and water loans. This could reduce the interest rate to the borrower by as much as four percent. A "buydown" will only be approved when there is no other means which will project a positive cash flow for a borrower's farm business. The "buydown" will be for a period not to exceed three years or the term of the loan, whichever is less, with a fixed interest rate for the buydown period. New loans, existing nonguaranteed loans, and existing FmHA guaranteed loans may be considered for the program. All "buydowns" must be approved by FmHA on or before September 30, 1988. The terms and conditions of the "buydown" are set out in the Form FmHA 1980–58, "Interest Rate Buydown Agreement." Congress has appropriated 490 million dollars for this program for over the next three years.

List of Subjects

7 CFR Part 1900

Appeals, Credit, Loan Programs—Housing and community development.

7 CFR Part 1924

Agriculture, Construction and repair, Loan programs—Agriculture.

7 CFR Part 1980

Agriculture, Loan Programs—Agriculture, Loan programs—Business and Industry—Rural development assistance, Loan Programs—Housing and community development.

Accordingly, the interim rule published September 30, 1985, (50 FR 39880) is adopted as a final rule with some changes and Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1900—GENERAL

1. The authority citation for Part 1900 continues to read as follows:

Authority: 7 U.S.C 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Farmers Home Administration Appeal Procedure

2. § 1900.51 is revised to read as follows:

§ 1900.51 General.

This subpart provides a uniform procedure whereby a person or organization may appeal any program administrative decision made by Farmers Home Administration (FmHA) which directly affects that person or organization. If an adverse decision is made by FmHA on a guaranteed loan application, the borower *and* the lender must participate jointly in any appeal. In cases where FmHA has denied or reduced the amount of final loss payment to the lender, the adverse decision may be appealed by the lender

VOL
51
ISS

1986
UMI

only. This subpart does not replace any existing procedures for handling discrimination complaints. This procedure does not apply to:

(a) Guaranteed loans made under Subpart E of Part 1980 of this chapter (Business and Industrial Loans).

(b) Debt settlement action found in Part 1864 of this chapter (FmHA Instruction 456.1).

(c) Freedom of Information Act appeals.

(d) Privacy Act appeals.

(e) Suspension and Debarment procedure in Subpart E of Part 1924 of this chapter.

(f) Procurement activity that may be appealed to the Department of Agriculture Board of Contract Appeals.

(g) Tenant appeals which are covered in Subpart L of Part 1944 of this chapter.

(h) Tax refunds offset based on Section 2653 of the Deficit Reduction Act of 1984 (P.L. 98–369).

(i) This procedure superocedes all other FmHA appeals procedures affecting applicants, borrowers, or grantees.

(j) The provisions of 5 U.S.C. 551–559, Administrative Procedure Act, as amended, are not applicable to proceedings under this subpart except for the requirements concerning public information. Accordingly, the Equal Access to Justice Act (Pub. L. 96–481) does not apply to these proceedings.

FmHA officials may not deny or delay approved assistance pending the outcome of an appeal of a partial adverse action. For borrowers with farmer program loans, as defined in § 1900.52(d) of this subpart, releases for certain family living and farm operating expenses cannot be terminated until the borrower has received Form FmHA 1924–25, "Notice of Intent to take Adverse Action," and Form FmHA 1924–26. "Borrower Acknowledgment of Notice to Take Adverse Action," in accordance with Subpart A of Part 1962 of this chapter *and* any appeal has been concluded *and* Exhibit D or E of Subpart A of Part 1955 of this chapter has been sent to the borrower.

3. §1900.52 is amended by revising paragraph (a) to read as follows:

§ 1900.52 Definitions.

(a) *Appellant* is an applicant for FmHA assistance or an FmHA borrower or grantee, either individual or organizational, that is directly and adversely affected by an administrative decision by FmHA. The appellant may also be a lender, which is an applicant or recipient of a farmer program, Emergency Livestock or Rural Housing guaranteed loan or line of credit, or the guaranteed loan applicant or borrower and such programs.

* * * * *

4. § 1900.53 is amended by revising paragraph (a)(5) to read as follows:

§1900.53 Decisions which are not appealable.

(a) * * *

(5) Decision not to release proceeds from the sale of security for unauthorized purpose.

* * * * *

5. § 1900.55 is amended by revising paragraphs (c), (d), and (e), and by adding paragraph (f) to read as follows:

§ 1900.55 FmHA actions to limit the need for appeals.

* * * * *

(c) For Rural Housing (RH), Rural Rental Housing (RRH), Rural Cooperative Housing (RCH), Rural Housing Site (RHS), and Labor Housing (LH) loans and grants, a meeting must be held between the affected parties and the decision maker to explain the adverse decision before the appeals process will begin. The required meeting may be waived by the decision maker if the decision maker previously met with or advised the affected parties of the specific reasons for the denial or the decision maker determines that a meeting would likely not avoid an appeal. The decision maker will document in the affected party's file the reasons for deciding to waive the meeting. In such cases, Exhibit B–2 with attachment Exhibit B–4 will be used without revision, except in cases involving acceleration of accounts which are provided for in § 1900.56(a) of this subpart. When a meeting is required, Exhibit B–1 will be used without revision to inform the appellant. If the appellant or appellant's representative (or legal counsel) without good cause, fails to schedule/attend this meeting, there will be no appeal.

(d) Farmer program loan borrowers who are sent Form FmHA 1924–25 and who complete Parts I, III, and IV of Form FmHA 1924–26 are entitled to a conference with the decision maker before the appeals process begins. The conference cannot be waived by FmHA. If the borrower or the borrower's representative fails to schedule or attend the conference, or if the borrower fails to bring the information requested, the borrower is still entitled to a hearing. If the borrower or the borrower's representative attends the conference but the request for servicing relief cannot be granted, Exhibit B–3 with attachment B–4 will be used to notify the borrower of the appeal rights. If the borrower or borrower's representative fails to attend the conference, Exhibit B–2 with attachment B–4 will be used.

(e) This paragraph applies only to those situations covered by § 1900.55 (c) and (d). When the person or organization officials attend a meeting or conference with the decision making official and the meeting or conference results in a resolution of the matter, the official will send the person or organization a letter within 7 calendar days of the meeting or conference, setting forth the conclusions reached. If the meeting or conference does not result in a resolution of the matter, Exhibit B–3 with attachment Exhibit B–4 will be sent without revision to notify the person or organization of appeal rights within 7 calendar days of the meeting or conference. If the person or organization has returned Form FmHA 1924–26 indicating no appeal is desired, Exhibit B–6 will be sent.

(f) Except in situations covered by § 1900.55 (c) and (d) of this subpart, FmHA must offer to meet with the affected parties to explain the adverse decision before the appeal process will begin. Exhibit B–7 with attachment Exhibit B–4 will be used for this purpose, except in cases involving acceleration of accounts which are provided for in § 1900.56 of this subpart. This meeting cannot be waived by FmHA. If the appellant or the appellant's representative requests a meeting and hearing but fails to schedule/attend this meeting, the appellant is still entitled to a hearing.

6. § 1900.56 is amended by revising paragraph (a), the introductory text of paragraph (b), and paragraph (e) to read as follows:

§ 1900.56 Appeal from an initial FmHA decision.

(a) Farmer program loan borrowers who are sent Forms FmHA 1924–25 and FmHA 1924–26 (in accordance with Subpart A of Part 1965, Subpart B of Part 1924, Subpart A of Part 1962, or Subpart C of Part 1950 of this chapter) are given an opportunity to appeal before the adverse action is taken unless Part II E or Parts III or IV of Form FmHA 1924–26 were completed. If the borrower requested servicing relief and such relief cannot be granted, the borrower will be sent Exhibit B–3 with attachment Exhibit B–4. If an appeal is taken and the decision to take adverse action is upheld, the final letter upholding the initial decision will contain the following statements:

This review concludes the administrative appeal of your case. FmHA will proceed to take the adverse action noted on Form FmHA 1924–25, "Notice of Intent to Take Adverse Action." You are not entitled to any further appeal in connection with the adverse action.

(b) If an applicant for FmHA assistance, an FmHA borrower (except those farmer program loan borrowers who are sent Forms FmHA 1924–25 and 1924–26), or an FmHA grantee is directly and adversely affected by an FmHA decision or action, the official taking action or making the decision will inform that person or organization by letter of the action taken within 10 calendar days of the decision. The term "directly and adversely affected" means having a request for FmHA assistance denied in whole or in part or having FmHA assistance reduced, cancelled, or not renewed. Letters, as indicated in § 1900.53 or § 1900.55 of this subpart, as appropriate, will be used to notify the applicant. The following actions will also be taken if the adverse action is an acceleration of an FmHA loan:

* * * * *

(e) This paragraph applies only to RH, RRH, RCH, RHS, and LH loans and grants. Cases originating in Samoa, Guam, remote areas of Alaska, and the Western Pacific Territories and submitted to the State Office for a hearing, may be acted upon without a hearing when circumstances due to travel and time involved preclude it. In those cases, the decision maker will allow a reasonable period of time for the appellant or the appellant's representative [or legal counsel] to, upon request, examine or copy documents pertaining to the case. The decision maker will advise the appellant within 7 calendar days of the request for appeal to provide written documentation to support the allegations and/or any written statements from other witnesses which support the appellant's position. Appellant is to provide the information to the decision maker within 30 calendar days from the date of request for appeal. Exhibit B–1 will be modified as necessary. The decision maker must obtain and mail to the hearing officer the complete FmHA file for the case, together with any available documents from the appellant supporting the appeal, and written statements from other witnesses who would have appeared at a hearing.

7. § 1900.59 is amended by adding paragraph (c) to read as follows:

§ 1900.59 Effect of appeal decision.

* * * * *

(c) *Timeliness.* Whenever an adverse decision concerning a loan or loan guarantee (except for RH, RRH, RCH, RHS, or LH loans and grants) is appealed and the hearing officer or review officer reverses or modifies the initial decision, the decision maker shall resume processing of the application and notify the applicant of this within 15 days after the decision maker is notified of the decision of the hearing or review officer. The decision maker will inform the applicant of any further information needed.

8. Part 1900, Exhibit B–6 to Subpart B is revised to read as follows:

Exhibit B–6 to Subpart B of Part 1900—Letter for Notifying Borrowers Who Received Form FmHA 1924–25 But Who Have Waived or Forfeited Their Appeal Rights

---

U.S. Department of Agriculture
Farmers Home Administration
[Insert Address]

[Date]

Dear ——————:

Your were sent Form FmHA 1924–25, "Notice of Intent to Take Adverse Action," and attachments, on [date]. You have [waived] [forfeited] your opportunity for an appeal hearing concerning the adverse action the Farmers Home Administration intends to take as indicated on Form FmHA 1924–25 because

[you failed to return Form FmHA 1924–26, "Borrower Acknowledgment of Notice of Intent to take Adverse Action," in response to Form FmHA 1924–25 during the time period provided.]

[you indicated on Form FmHA 1924–26, "Borrower Acknowledgment of Notice of Intent to Take Adverse Action," you did not wish to appeal.]

This is notice that FmHA is proceeding to take the adverse action shown on the Form FmHA 1924–25. You will receive no further appeal rights in connection with this adverse action.

Sincerely,
(County Supervisor) ——————————

9. Part 1900, Exhibit B–7 to Subpart B is added to read as follows:

Exhibit B–7 to Subpart B of Part 1900—Letter for Notifying Applicants and Borrowers of Adverse Decisions Where the Decision Is Appealable

(Use when meeting with decision maker is the option of the appellant.)

UNITED STATES DEPARTMENT OF AGRICULTURE
Farmers Home Administration
(Insert Address)
Date

Dear ——————:

After careful consideration, we [were unable to take favorable action on your application/request for Farmers Home Administration services] [are canceling/reducing the assistance you are presently receiving]. The specific reasons for our decision are:

(Insert here the adverse decision and all of the specific reasons for the adverse action.)

If you have any questions concerning the decision or the facts used in making our decision and desire further explanation, you may call the County Office (insert phone number) to request a meeting with [this office] [the County Committee] within 15 calendar days of the date of this letter. You should present any new information or evidence along with possible alternatives for our consideration. You may also bring a representative (or legal counsel) with you. You also have the right to appeal this decision to a hearing officer in lieu of or in addition to meeting with [this office] [the County Committee]. See attachment for your appeal rights.

The hearing officer will be (name and title). A request for a hearing should be sent to the hearing officer in care of this office:

(address)

(Use the following paragraph for individual applicants only): The Federal Equal Credit Opportunity Act prohibits creditors from discriminating against credit applicants on the basis of race, color, religion, national origin, sex, marital status, handicap, or age (provided that the applicant has the capacity to enter into a binding contract), because all or part of the applicant's income derives from any public assistance program, or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act. The Federal agency that administers compliance with the law concerning this creditor is the Federal Trade Commission, Equal Credit Opportunity, Washington, DC 20580.

Sincerely,
(Decision maker) (County Supervisor for County Committee)——————————
(Title)——————————

PART 1924—CONSTRUCTION AND REPAIR

10. The authority citation for Part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70

Subpart B—Management Advice to Individual Borrowers and Applicants

11. Section 1924.72 is amended by revising paragraphs (b) and (c) to read as follows:

§ 1924.72 Borrowers who receive Forms FmHA 1924–25 and 1924–26.

* * * * *

(b) *Borrower checks blocks in Part I.* Part I of Form FmHA 1924–26 contains a list of available servicing actions including rescheduling, reamortization, consolidation, deferral, subordination, limited resource loans, and the restructuring of the debt and business by selling a portion of the assets. If the borrower checks one or more of these blocks, the borrower must attend a conference with FmHA to develop

VOL 51
ISS 37
FE 25
1986
UMI

financial statements and proposed operating plans which FmHA will use as a basis for granting or denying the requested servicing relief. If the borrower attends the conference and the County Supervisor approves the request for servicing relief, then the notice of intent to take adverse actions will be considered terminated. If the borrower attends the conference but the County Supervisor denies the servicing request, then the County Supervisor will notify the borrower in writing of the denial with the reasons and facts supporting the denial. The borrower will be advised of appeal rights in accordance with Subpart B of Part 1900 of this chapter, and the appeal will cover both the denial of the request for servicing and the other adverse action FmHA intends to take. If the borrower (or representative) fails to attend the scheduled conference or fails to provide the necessary information, the borrower will be advised of the appeal rights in accordance with Subpart B of Part 1900 of this chapter.

(c) *Borrower checks blocks in Part II.* The borrower who does not want to be considered for any servicing options but who wants to request a conference with FmHA and/or an administrative appeal of FmHA's intended adverse action must so indicate by checking one of the appropriate blocks in Part II of Form FmHA 1924–26. Any appeal will be handled under Subpart B of Part 1900 of this chapter. If the borrower wants an appeal hearing, the borrower can be represented by counsel or by any other representative, and the hearing officer will be an FmHA employee who has not been previously involved in the borrower's case. The borrower can choose to have FmHA make a review on the record rather than hold a hearing. If the borrower prevails in the administrative appeal, no adverse action will be taken by FmHA. If instead the borrower completes Part II to show that no appeal is desired, then FmHA will take the adverse action.

* * * * *

PART 1980—GENERAL

12. The authority citation for Part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—General

13. Section 1980.20 is amended by revising the introductory text to read as follows:

§ 1980.20 Loan guarantee limits.

The maximum loss covered by the Loan Note Guarantee, Form FmHA 449–34 or Form FmHA 1980–27, "Contract of Guarantee (Line of Credit)," can never exceed the lesser of: (a) 90 percent of principal and interest indebtedness as evidenced by said note(s) or by assumption agreement(s), any loan subsidy due, and 90 percent of principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with FmHA's authorization; or (b) 90 percent of the principal advanced to or assumed by the borrower under said note(s) or assumption agreement(s) and any interest due (including any loan subsidy) thereon. Lenders and applicant will propose the percentage of guarantee. The lender and applicant will be informed in writing on Form FmHA 449–14 by FmHA of any percentage of guarantee less than proposed by the lender and applicant, and the reasons therefor. (See § 1980.80 of this subpart regarding appeals.) FmHA will determine the percentage of guarantee after considering all credit factors involved, including but not limited to:

* * * * *

14. Section 1980.47 is added to read as follows:

§ 1980.47 Time frame for processing loan guarantee applications.

All guaranteed loan applications must be approved or disapproved, and the lender notified in writing, not later than 60 days after receipt of a completed application.

(a) If an application is not complete, the lender will be notified, in writing, not later than 20 days after receipt of the application by FmHA, of the reason(s) the application is incomplete.

(b) When an application is disapproved, the written notification to the lender will state the reasons(s) for disapproval.

(c) When an application is disapproved and subsequent action, as the result of an appeal, reverses or revises the initial decision, FmHA will notify the lender of such action within 15 days after the reversal/revision decision is made.

15. Section 1980.60 is amended by revising paragraph (a)(9) to read as follows:

§ 1980.60 Conditions precedent to issuance of the loan note guarantee or contract of guarantee.

(a) * * *

(9) When required personal, joint operation (for Farmer Program loans only), partnership, or corporate guarantees have been obtained. Copies of the guarantees will be provided to FmHA.

* * * * *

16. Section 1980.61 is amended by revising paragraph (e) to read as follows:

§ 1980.61 Issuance of Lender's Agreement, Loan Note Guarantee, Contract of Guarantee and Assignment Guarantee Agreement.

* * * * *

(e) *Refusal to execute contract.* If FmHA determines that it cannot execute the Loan Note Guarantee or Contract of Guarantee because all requirements have not been met, it will promptly inform the lender on Form FmHA 449–13, "Denial Letter," of the reasons, and give the lender a reasonable period within which to satisfy FmHA objections. If the lender is unable to satisfy FmHA objections, then the lender will be informed of the appeal rights as set out in § 1980.80 of this subpart. If the lender writes FmHA within the period allowed requesting additional time to satisfy the objections, FmHA may, in writing, grant such additional time as it considers necessary and reasonable under the circumstances. If the lender satisfies the objections with the time allowed and otherwise complies with these regulations, the guarantee will be issued.

* * * * *

17. Section 1980.80 is revised to read as follows:

§ 1980.80 Appeals.

Any adverse decision made by FmHA which affects the borrower or lender may be appealed upon written request of the aggrieved parties in accordance with Subpart E of this part for Business and Industrial loans. Only the borrower and the lender can appeal an FmHA decision and they must jointly participate in the written request for review of the alleged adverse decision made by FmHA. In cases where FmHA has denied or reduced the amount of final loss payment to the lender, the adverse decision may be appealed by the lender only. Appeals from decisions involving Rural Housing, Farmer Program, Emergency Livestock, or Economic Emergency loan guarantees will be handled in accordance with directions set out in Subpart B of Part 1900 of this chapter.

18. Section 1980.83 is amended by revising paragraph (a) to read as follows and by removing the information regarding the third form, Form FmHA 1980–24, from all of the columns in the table of forms in paragraph (b):

§ 1980.83 FmHA Forms.

(a) *FmHA forms incorporated in this subpart.* Forms FmHA 449–34, "Loan Note Guarantee," FmHA 449–35, "Lender's Agreement," and FmHA 449–36, "Assignment Guarantee Agreement," are incorporated in this Subpart A, made a part hereof, and appear as Appendices A, B, and C in the Federal Register. Forms FmHA 1980–27, "Contract of Guarantee (Line of Credit)," FmHA 1980–38, "Lender's Agreement (Line of Credit)," FmHA 1980–15, "Conditional Commitment for Contract of Guarantee (Line of Credit)," FmHA 1980–25, "Request for Guarantee (Operating Loan Line of Credit, Emergency Livestock Loan, or Economic Emergency Loan)," Form FmHA 1980–58, "Interest Rate Buydown Agreement," and Form FmHA 1080–24, "Request for Interest Rate Buydown/Subsidy Payment to Guaranteed Loan Lender," are incorporated in this Subpart A and are made a part hereof and appear as Appendices D, E, F, G, H and I of 7 CFR Part 1980, Subpart A in the Federal Register. Copies of the forms may be obtained from any FmHA office.

☐Loan Note Guarantee
☐Contract of Guarantee

Type of Loan ________
7 CFR Part 1980
Subpart B

INTEREST RATE BUYDOWN AGREEMENT

State	
County	
Date of Note	

Borrower	FmHA Loan ID No.
Lender	Lender's IRS ID Tax No.
Lender's Address	Principal Amount of Loan

The principal amount of loan or line of credit is evidenced by ________________ note(s) or line of credit agreement(s) described below. This instrument is attached to note or line of credit agreement ________________ in the face amount (ceiling amount for a line of credit) and is number ________________ of ________________.

Copies of the lender's Loan Note Guarantee, or Contract of Guarantee for a line(s) of credit, and any Assignment Guarantee Agreement, if applicable (Loan Note Guarantee cases only) are attached to this Agreement as a part of it.

Lender's ID No.	*Face Amount of Note/Line of Credit Agreement*	*Interest Rate (If variable calculate in accordance with Part 1980, Subpart B Exhibit D, Paragraph IV I)*	*Lender Write Down*	*FmHA Interest Rate Buydown*

This agreement is effective beginning ________________ and expires on ________________.

In consideration of the subject lender's write down of interest rate on the above borrower's account by ________ percentage points, the United States of America, acting through the Farmers Home Administration of the United States Department of Agriculture (called FmHA) pursuant to the Consolidated Farm and Rural Development Act (7 U.S.C. et seq.) agrees that in accordance with and subject to the conditions and requirements in this agreement it will reimburse the lender for ________ percentage points of the write down.

CONDITIONS OF INTEREST RATE BUYDOWN

1. **Buydown Rates**
The buydown rate set forth in this agreement will remain constant during the term of this agreement.

2. **Interest Rate Buydown Payments**
FmHA's payments made in connection with the interest rate buydown will be calculated using 360 or 365 day year method on a declining balance. The lender will indicate on Form FmHA 1980-19, "Guaranteed Loan Closing Report," the preferred method, which may not change once established.

3. **Annual Interest Rate Buydown Claims and Payments**
The initial Interest Rate Buydown claim will be prepared by the lender using form FmHA 1980-24, "Request Interest Rate Buydown/Subsidy Payment to Guaranteed Loan Lender," on or about a date 12 months from the date of this agreement, unless it is the first or last claim which may be submitted in accordance with the first and last due date on the borrower's promissory note. Subsequent claims will be filed by the lender on or about a date 12 months thereafter but no later than the anniversary date of filing of the initial interest rate buydown claim. Upon full payment of the note or line of credit agreement the lender will immediately prepare Form FmHA 1980-24 and mail a copy to the FmHA servicing office.

4. **When Interest Rate Buydown Payments Cease**
For Loan Note Guarantee cases, when FmHA purchases a portion of a loan, interest buydown payments on that portion will cease. Interest rate buydown payments will cease upon termination of the Loan Note Guarantee or Contract of Guarantee, when the lender accelerates the borrower's account, upon reaching the expiration date set forth in this agreement or upon cancellation by the Government.

5. **Cash Flow**
The lender certifies that the interest rate reduction to the borrower results in a reduced, equally amortized payment schedule for the term of this agreement so that the borrower's operation projects a positive cash flow on all income and expenses including debt service for the term of this agreement. A loan/line of credit with a term greater than one year must show that a positive cash flow on all income and expenses including debt service can be demonstrated during each year of the buydown. In cases where the term of the loan or line of credit agreement exceeds the term of this agreement, the lender certifies that the borrower is projected to have a positive cash flow on all income and expenses including debt service after this agreement expires. Cash flow and positive cash flow are defined in Exhibit D to Subpart B of Part 1980 and must be calculated in accordance with §1980.113(d)(8) of Subpart B of Part 1980.

6. **Cancellation of Interest**
Lender certifies that the amount of interest written down on subject borrower's account will be permanently cancelled as it becomes due and no attempt will be made to collect that portion of the debt.

7. **Repurchase of loans presently guaranteed by FmHA eligible for interest rate buydown.** (Loan Note Guarantee Cases Only). **See also item 10 of Form FmHA 449-36.**

In the case of converting a guaranteed loan without an interest rate buydown to one with such a buydown, the lender must obtain the holder's consent in writing. If the holder does not consent to the interest rate reduction proposed by the lender, the lender must repurchase the unpaid portion of the loan from any holder(s) before the interest rate buydown can be granted. Any repurchase will only be made after the lender obtains FmHA's written approval. In the event the lender assigns the guaranteed portion of the loan to a holder(s) the Assignment Guarantee Agreement (Form FmHA 449-36) will be amended as provided in 7 CFR, Part 1980, Subpart B, Exhibit D, paragraph VI B2 to reflect the reduced interest rate.

8. **Regulatory Changes**
This Agreement is subject to the present regulations of the FmHA and its future regulations not inconsistent with any provisions of this agreement.

9. **Cancellation**
The Interest Rate Buydown Agreement is incontestable except for fraud or misrepresentation of which the lender has actual knowledge at the time this Agreement is executed or for which the lender participates in or condones.

10. **Excessive Interest Rate Buydown**
The Government may amend or cancel this agreement and collect from the lender any amount of reduction granted as a result of incomplete or inaccurate information, computation errors, or other circumstances which resulted in interest rate buydown payments that the lender was not entitled to receive.

11. **Access to Lender's Files**
Lender agrees to allow FmHA access to audit findings by the lender's supervising agency when examining interest rate buydown claims.

Subpart B—Farmer Program Loans

21. Section 1980.101 is amended by revising paragraph (a) to read as follows:

§ 1980.101 Introduction.

(a) *Policy.* This subpart supplemented by Subpart A of this part contains regulations for making the following Farmer Program loans guaranteed by the Farmers Home Administration (FmHA): Operating (OL) (both loans and lines of credit), Farm Ownership (FO), Soil and Water (SW), Recreation (RL), and Emergency (EM) loans. It is the policy of FmHA to make loans to any otherwise qualified applicant without regard to race, color, religion, sex, national origin, marital status, age or physical/mental handicap providing the applicant can execute a legal contract. The regulations apply to lenders, holders, borrowers, FmHA personnel, and other parties involved in making, guaranteeing, holding, servicing, or liquidating such loans. Exhibit A provides policies and procedures for an Approved Lender Program (ALP) for Guaranteed Operating (OL) loans and Guaranteed Farm Ownership (FO) loans. Exhibit B provides policies and procedures for the Guaranteed Debt Adjustment Program (DAP), for Guaranteed Operating (OL) loans (Loan Note Guarantee cases only), and Guaranteed Farm Ownership (FO) loans. Exhibit C (available in any FmHA office) provides an Application Processing guide for lenders packaging applications under this subpart. Exhibit D provides policies and procedures for an Interest Rate Buydown Program for Guaranteed Operating (OL) loans including lines of credit, Guaranteed Farm Ownership (FO) loans and Guaranteed Soil and Water (SW) loans.

* * * * *

22. Section 1980.106 is amended by revising paragraph (b)(10), by redesignating current paragraphs (b)(27) through (b)(31) as new paragraphs (b)(29) through (b)(33) respectively, by adding a new paragraph (b)(28), by redesignating current paragraphs (b)(16) through (b)(26) as new paragraphs (b)(17) through (b)(27) respectively, and by adding a new paragraph (b)(16), by revising the new paragarph (b)(21)(ii) to read as follows:

§ 1980.106 Abbreviations and definitions.

* * * * *

(b) * * *

(10) *Family farm.* A farm which:

(i) Produces agricultural commodities for sale in sufficient quantities so that it is recognized in the community as a farm rather than a rural residence.

(ii) Provides enough agricultural income by itself, including rented land, or together with any other dependable income to enable the borrower to:

(A) Pay necessary family living and operating expenses;

(B) Maintain essential chattel and real property; and

(C) Pay debts.

(iii) Is managed by:

(A) The borrower when a loan is made to an individual.

(B) The members, stockholders, partners, or joint operators responsible for operating the farm when a loan is made to a cooperative, corporation, partnership, or joint operation.

(iv) Has a substantial amount of the labor requirements for the farm and nonfarm enterprise provided by:

(A) The borrower and the borrower's family for a loan made to an individual.

(B) The members, stockholders, partners, or joint operators responsible for operating the farm, along with the families of these individuals, for a loan made to a cooperative, corporation, partnership, or joint operation.

(v) May use a reasonable amount of full-time hired labor and seasonal labor during peak load periods.

* * * * *

(16) *Joint operation.* A farming entity in which two or more farmers work together sharing equally or unequally land, labor, equipment, expenses, and/or income.

* * * * *

(21) * * *

(ii) If an applicant presents actual reliable records for at least 4 of the 5 years immediately preceding the disaster which verify a higher normal production than that established in accordance with paragraph (b)(21)(i) of this section, the higher normal year's production may be used in calculating loss.

* * * * *

(28) *Related by blood or marriage.* As used in this subpart, individuals who are connected to one another as husband, wife, parents, children, brother and sister.

* * * * *

23. Section 1980.108 is amended by adding paragraph (a)(1)(iii), by redesignating current paragraphs (a)(2)(i) through (a)(2)(iii) as new paragraphs (a)(2)(ii) through (a)(2)(iv) respectively, by adding a new paragraph (a)(2)(i), and by revising paragraphs (c) and (d) to read as follows:

§ 1980.108 General provisions.

(a) * * *

(1) * * *

(iii) When FmHA and a guaranteed lender are involved in separate loans to the same borrower, separate collateral must be clearly identified for both the FmHA and the lender's loans.

(2) * * *

(i) For EM, FO, RL, SW, and OL loans/lines of credit, personal guarantees of all joint operators of a joint operation entity are required.

* * * * *

(c) *Determining whether credit elsewhere is available.* The lender will certify on the appropriate forms that the applicant is unable to obtain the requested loan/lines of credit without the guarantee from the Government. Property and interests in property owned and income received by an individual applicant, a cooperative and its members as individuals, a corporation and its stockholders as individuals, a joint operation and the joint operators as individuals, and a partnership and its members as individuals will be considered and used by an applicant in obtaining credit without a guarantee.

(d) *Relationship between FmHA loans and guaranteed or insured economic emergency loans.* (1) If an applicant qualifies for an insured LM loan in an authorized area, the applicant's total credit needs will be considered under EM loan authorities.

(2) Borrowers indebted to FmHA and/or an FmHA guaranteed lender for EE loans, may be considered for FO, RL, SW guaranteed loans or OL guaranteed loans/lines of credit provided the total outstanding principal indebtedness to FmHA and/or an FmHA guaranteed lender would not exceed *$650,000.*

* * * * *

24. Section 1980.109 is amended by redesignating current paragraphs (a)(1) through (a)(3) as new paragraphs (a)(2) through (a)(4) respectively and by adding a new paragraph (a)(1) to read as follows:

§ 1980.109 Promissory notes, line of Credit Agreements, security instruments, and financing statements.

(a) * * *

(1) For EM, FO, RL, SW and OL loans/lines of credit, personal guarantees of all joint operators of a joint operation entity are required.

* * * * *

25. Section 1980.113 is amended by revising paragraphs (a)(5), (b), (c), and the administrative text to read as follows:

§ 1980.113 Receiving and processing applications.

* * * * *

(a) * * *

(5) For a cooperative, corporation, partnership, or joint operation, those additional items listed below in § 1980.113(b) of this subpart.

* * * * *

(b) *Cooperative, corporation, partnership, or joint operation applicants.* If the applicant is a cooperative, corporation, partnership, or joint operation, the following additional information will be obtained and included in the loan docket:

(1) A complete list of members, stockholders, partners, or joint operators showing the address, citizenship, principal occupation, and the number of shares and percentage of ownership or of stock held in the cooperative or corporation, by each, or the percentage of interest held in the partnership or joint operation, by each.

(2) A current personal financial statement from each joint operator of a joint operation entity.

(3) A current personal financial statement from each of the principal members of a cooperative, partners of a partnership or stockholders of a corporation. For this purpose, a principal is one owning or controlling as much as 20 percent of the ownership, stock or interest of a cooperative, corporation, or partnership. If no member, partner, or stockholder whose financial statement, in the judgment of the loan approval official, would be pertinent to a consideration of the financial strength of the cooperative, corporation, or partnership will also be required to provide personal financial statements.

(4) A current financial statement from the cooperative, corporation, partnership, or joint operation itself.

(5) A copy of the cooperative's or corporation's charter, or any partnership or joint operation agreement, any articles of incorporation and bylaws, any certificate or evidence of current registration (good standing) and a resolution(s) adopted by the Board of Directors or members of stockholders authorizing specified officers of the cooperative, corporation, partnership, or joint operation to apply for and obtain the desired loan and execute required debt, security, and other instruments and agreements.

(c) *Preliminary determination by FmHA.* If it appears, after a review of the preliminary application, that the applicant is not eligible, the County Supervisor will notify the loan applicant and the lender in writing within 10 days of FmHA's decision of all of the reasons for the decision, and advise them of their opportunity for an appeal as set out in Subpart B of Part 1900 of this chapter, if applicable. If it appears that the applicant is eligible and loan guarantee authority is available, the County Supervisor will inform the lender and applicant not later than 20 days after receipt of the preliminary application and request the lender to submit a complete application.

* * * * *

Administrative:

(A) Regardless of whether the appplicant is acting as an individual or as a representative of a cooperative, corporation, partnership, or joint operation, when FmHA solicits personal information, the individual will be given Form FmHA 410-9, "Statement Required by the Privacy Act."

(B) If FmHA desires to obtain information concerning an individual from any source, FmHA will provide such source with Form FmHA 410-10, "Privacy Act Statement to References."

(C) Immediately after a preliminary or complete application is received, and prior to County Committee action, the County Supervisor will send Attachment 1 to Exhibit D of this subpart to the borrower and lender describing the Interest Rate Buydown Program.

26. Section 1980.114 is amended by revising paragraph (a) to read as follows:

§ 1980.114 FmHA evaluation of applications.

* * * * *

(a) *Indication of unacceptability.* If the evaluation indicates that the guarantee cannot be approved for reasons that would not be affected by the County Committee certification, the County Supervisor will inform the lender and the loan applicant in writing within 10 days of the decision of these reasons, discuss with them ways to overcome the denial of the guarantee, and inform them of their opportunity for an appeal as set out in Subpart B of Part 1900 of this chapter.

* * * * *

27. Section 1980.115 is amended by revising the introductory text, paragraph (b) and the administrative paragraph B to read as follows:

§ 1980.115 County Committee review.

The County Supervisor will have the County Committee to review all loan applications within 30 days after receipt of completed applications to determine whether the applicants meet FmHA eligibility requirements. The County Supervisor will promptly notify the lender and applicant in writing of the County Committee's determination. (See Section 1980.115 Administrative paragraph B.)

* * * * *

(b) *Unfavorable action.* If the County Committee finds the applicant ineligible, the members will complete Form FmHA 440-2 and the County Supervisor will inform the lender and the loan applicant in writing within 10 days of FmHA's decision of the reasons for disapproval of their opportunity for an appeal as set out in Subpart B of Part 1900 of this chapter.

Administrative: * * *

B. *The approval official will:*

1. Approve or disapprove all loan applications not later than 60 days after receipt of completed applications, and promptly notify the lender and applicant in accordance with the provisions of this subpart.

2. Set forth in the space provided on Form FmHA 449-14 (A.1., above) or Form FmHA 1980-15 (A.1., above) any special conditions of approval, including requirements for security, improved management practices, and type and frequency of financial reports required by FmHA but not required by the lender. An attachment to the form may be used if necessary. Return Forms FmHA 449-14 or FmHA 1980-15 to the County Supervisor for execution and proper distribution.

3. Sign original and one copy of Form FmHA 1940-1 distributing copies in accordance with the FMI, making sure the lender receives a signed copy.

4. Forward the docket to the National Office for approval when the loan/line of credit exceeds the State Director's approval authority or when the State Director needs assistance in handling any complaints of noncompliance.

5. In addition to the requirements in Paragraph B.1., above, approval determinations will be made within 14 working days of County Committee Certification for Approved Lenders, and within 30 days of County Committee Certification for nonapproved lenders.

28. Section 1980.116 is revised to read as follows:

§ 1980.116 Review of requirements.

The lender and applicant, after reviewing approval conditions and security requirements as set forth in Form FmHA 449-14 or Form FmHA 1980-15, will complete and execute the "Acceptance or Rejection of Conditions" and return a copy to the County Supervisor. If the conditions cannot be met, the lender and applicant may propose alternatives to the County Supervisor. These alternatives will be considered and the lender will be advised of FmHA's decision to accept or reject the alternatives. If accepted, Form FmHA 449-14 or Form FmHA 1980-15 will be so revised. If rejected, the County Supervisor will notify the loan applicant and the lender in writing within 10 days of the FmHA's decision, of all the reasons for the decision, and

advise them of their opportunity for appeal as set out in Subpart B of Part 1900 of this chapter.

29. Section 1980.145 is amended by revising paragraph (b) to read as follows:

§ 1980.145 Defaults by borrower.

* * * * *

(b) The lender will arrange with the County Supervisor to meet with the borrower to resolve the problems. At least 3 working days prior to the meeting, the County Supervisor will mail Attachment 1 to Exhibit D of the subpart to the lender and the borrower.

* * * * *

30. Section 1980.146 is amended by revising the administrative paragraphs B and E to read as follows:

§ 1980.146 Liquidation.

* * * * *

Administrative:

* * * * *

B. Form FmHA 449-35, paragraph XI B or paragraph XI B of Form FmHA 1980-36. FmHA will exercise the option to liquidate only when there is reason to believe the lender's liquidation plan is not likely to provide a reasonably adequate recovery. If FmHA liquidates, all the requirements for liquidating an insured loan will be followed (see Subpart A of Part 1962 and Subpart A of Part 1965 of this chapter). The County Supervisor will approve lender liquidation plans or exercise the FmHA option to liquidate. The District Director or State Office may be consulted on complex cases for advice if necessary. When such a decision is made, submit Form FmHA 1980-45, "Notice of Liquidation Responsibility," to the Finance Office.

* * * * *

E. Form FmHA 449-35, paragraph XI E 3 or paragraph XI E 3 of Form FmHA 1980-36. Final loss payments will be made within 60 days after the review of the accounting of the collateral. These payments will be reduced if necessary after considering the Conditions of Guarantee in Form FmHA 449-34 or Form FmHA 1980-27. State Directors are responsible for seeing that such reviews are accomplished in time to be evaluated and accepted or otherwise resolved within the 60-day period. The County Supervisor may conduct such reviews when the loss payment does not exceed $55,000. The State Director will conduct all other reviews. The State Director may request National Office assistance in conducting any review. If a lender's final loss claim is either denied or reduced, the County Supervisor will notify the lender in writing within 10 days of FmHA's decision, of all the reasons for the decision, and advise the lender of its opportunity for appeal as set out in Subpart B of Part 1900 of this chapter.

31. Section 1980.148 is revised to read as follows:

§ 1980.148 Appeal procedure.

Refer to Subpart B of Part 1900 of this chapter for the method of appealing adverse decisions of County Committees, County Supervisors, District Directors and State Directors.

§ 1980.170 [Temporarily suspended]

32. The program under § 1980.170 of Subpart B of Part 1980 relating to guaranteed EM loans continues to be suspended. Accordingly, authority to approve guaranteed EM loans continues to be suspended.

33. Section 1980.175 is amended by revising paragraph (b)(1)(i), the introductory text of paragraph (b)(2), paragraphs (b)(2)(i) and (b)(2)(iii), the introductory text of paragraph (b)(2)(iv), paragraphs (b)(2)(iv) (A) and (E), the introductory text of paragraph (b)(2)(v), and paragraphs (d)(1), (e), and (f)(4) and by adding paragraph (b)(2)(vi) to read as follows:

§ 1980.175 Operating loans.

* * * * *

(b) * * *

(1) * * *

(i) Be a citizen of the United States (See § 1980.106(b)(30) of this subpart for the definition of "United States") or an alien lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Forms I-151 or I-551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If the authenticity of the information shown on the alien's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G-641, "Application for Verification of Information from Immigration and Naturalization Records," obtainable from the nearest INS district. (See Exhibit B of Subpart A of Part 1944.) Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G-641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

* * * * *

(2) A cooperative, corporation, partnership, or joint operation must:

(i) Be unable to obtain sufficient credit without a guarantee to finance actual needs at reasonable rates and terms, taking into account prevailing private and cooperative rates and terms in or near the community for loans for similar purposes and periods of time. This applies to the entity and all of its members, stockholders, partners, or joint operators, as individuals.

* * * * *

(iii) Consist of members, stockholders, partners, or joint operators who do not, as individuals, have either a guaranteed or insured FO, SW, RL, or OL loan and are not members of another entity or have interest in another entity that has either a guaranteed or insured, FO, SW, RL, or OL loan.

(iv) If the members, stockholders, partners, or joint operators holding a majority interest are related by marriage or blood (A) They must be citizens of the United States (see § 1980.106 (b)(30) of this Subpart for the definition of "United States") or aliens lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Forms I-151 or I-551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If authenticity of the information shown on the aliens's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G-641, "Application for Verification of Information from Immigration and Naturalization Records," obtainable from the nearest INS district (see Exhibit B of Subpart A of Part 1944). Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G-641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

* * * * *

(E) At least one member, stockholder, partner, or joint operator must operate the family farm.

* * * * *

(v) If the members, stockholders, partners, or joint operators holding a majority interest are *not* related by marriage or blood:

* * * * *

(vi) If each member's, partner's, stockholder's or joint operator's ownership interest does *not* exceed the family farm definition limits, their collective interest can exceed the family farm definition limits only if: (1) All of the members of the entity are related by blood or marriage, (2) All of the members are or will be operators of the entity, and (3) The majority interest holders of the entity meet the requirements of subparagraphs (b)(2)(iv) (A) through (D) and (F) of this section.

* * * * *

(d) * * *

(1) The total outstanding guaranteed OL principal balance may not exceed $400,000 at loan closing. The amount of principal outstanding at any one time on a guaranteed line of credit must never

exceed the ceiling set out on the Contract of Guarantee.

* * * * *

(e) *Interest rates.* The interest rate will be a fixed or variable rate agreed upon by the borrower and the lender. The lender may charge a rate not to exceed one percent (1%) above the rate the lender charges its average farm customer. If a variable rate is used, it must be tied to a base rate published periodically in a financial publication specifically agreed to by the lender and borrower. Variable rates may change according to the normal practices of the lender for its average farm customers, but frequency of change must be set forth in the loan/line of credit instrument. The lender, borrower, and holder (if any) may collectively effect a temporary reduction in the interest rate of the OL loan/line of credit when processing an Interest Rate Buydown under Exhibit D of this subpart. The reduced rate of interest must be a fixed rate for the term of the buydown. The lender is responsible for the legal documentation of interest rate changes by an "allonge" attached to the promissory note(s) or line or credit agreement or other legally effective amendment of the interest rate, however, no new note(s) or line of credit agreement(s) may be issued. If the amendment is attached to a variable rate note or line or credit agreement, the fixed rate of interest charged during the buydown period will be calculated not to exceed the average variable rate charged the lender's average farm customer over the past 90 days plus one percent (1%). Average farm customers are those conventional farm borrowers who are required to pledge their crops, livestock, and other chattel and real estate security for the loan. This does not include those high risk farmers with limited security and management ability that are generally charged a higher interest rate by conventional agricultural lenders. Also, this does not include those low risk farm customers who obtain financing on a secured or unsecured basis, who have as collateral, items such as savings accounts, time deposits, certificates of deposit, stocks and bonds, and life insurance which they are able to pledge for the loan. At the request of FmHA, the lender will provide evidence of the rate charged the average farm customer. Such evidence may consist of average yield data, or documented adminstrative differential rate schedule formulas used by the lender. Interest will be charged only on the actual amount of funds loaned and for the actual time the loan is outstanding. Interest on protective advances made by the lender to protect the security may be charged at the rate specified in the security instruments.

(f) * * *

(4) When conditions warrant, installments scheduled in accordance with paragraph (f)(2) of this section may include equal, unequal, or balloon installments. The amount ballooned should not exceed that which the borrower could reasonably expect to pay during a maximum additional 15 year period except for NFE loans, which will be a maximum additional 7 years. The applicant must be advised before the loan is closed that the lender will review each case at the end of the initial loan term to determine if such rescheduling is warranted. (See § 1980.124 of this subpart.)

* * * * *

34. Section 1980.180 is amended by revising paragraphs (b)(1), (c)(1)(i), the introductory text of paragraph (c)(2), paragraphs (c)(2)(i), and (c)(2)(iii), the introductory text of paragraph (c)(2)(iv), paragraphs (c)(2)(iv) (A) and (E), the introductory text of paragraph (c)(2)(v), and paragraphs (f)(2), and (f)(3) and by adding paragraph (c)(2)(vi) to read as follows:

§ 1980.180 Farm ownership loans.

* * * * *

(b) * * *

(1) An application from a veteran, as defined in § 1980.106

(b) (33) of this subpart, will be given preference over one from a nonveteran.

* * * * *

(c) * * *

(1) * * *

(i) Be a citizen of the United States (see § 1980.106(b)(30) of this subpart for the definition of "United States") or an alien lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Forms I-151 or I-551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If the authenticity of the information shown on the alien's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G-641, "Application for Verification of Information from Immigration and Naturalization Records," obtainable from the nearest INS district. (See Exhibit B of Subpart A of Part 1944.) Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G-641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

* * * * *

(2) A cooperative, corporation, partnership, or joint operation must:

(i) Be unable to obtain sufficient credit without a guarantee to finance actual needs at reasonable rates and terms, taking into account prevailing private and cooperative rates and terms in or near the community for loans for similar purposes and periods of time. This applies to the entity and all of its members, stockholders, partners, or joint operators, as indivduals.

* * * * *

(iii) Consist of members, stockholders, partners, or joint operators who do not, as individuals, have either a guaranteed or insured FO, SW, RL, or OL loan and are not members of another entity or have an interest in another entity that has either a guaranteed or insured FO, SW, RL, or OL loan.

(iv) If the members, stockholders, partners, or joint operators holding a majority interest are related by marriage or blood:

(A) They must be citizens of the United States (see § 1980.106(b)(30) of this subpart for the definition of "United States") or an alien lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Forms I-151 or I-551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If the authenticity of the information shown on the alien's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G-641, "Application for Verification of Information from Immigration and Naturalization Records," obtainable from the nearest INS district. (See Exhibit B of Subpart A of Part 1944.) Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G-641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

(E) At least one member, stockholder, partner, or joint operator must operate the family farm.

* * * * *

(v) If the members, stockholders, partners, or joint operators holding a majority interest are *not* related by marriage or blood:

* * * * *

(vi) If each member's, partner's, stockholder's or joint operator's

ownership interest does not exceed the family farm definition limits, their collective interest can exceed the family farm definition limits only if: (1) All of the members of the entity are related by blood or marriage, (2) all of the members are or will be operators of the entity, and (3) the majority interest holders of the entity meet the requirements of subparagraphs (c)(2)(iv) (A) through (D) and (F) of this section.

* * * * *

(f) * * *

(2) The interest rate will be a fixed or variable rate agreed upon by the borrower and lender. The lender may charge a rate not to exceed one percent (1%) above the rate the lender charges its average farm customer. If a variable rate is used, it must be tied to a base rate published periodically in a financial publication specifically agreed to by the lender and borrower. Variable rates may change according to the practices of the lender for its average farm customers, but the frequency of change must be set forth in the loan instrument. The lender, borrower, and holder (if any) may collectively effect a temporary reduction in the interest rate of the FO loan when processing an Interest Rate Buydown under Exhibit D of this subpart. The reduced rate of interest must be a fixed rate for the term of the buydown. The lender is responsible for the legal documentation of interest rate changes by an "allonge" attached to the promissory note(s) or other legally effective amendment of the interest rate; however, no new note(s) may be issued. If the amendment is attached to a variable rate note, the fixed rate of interest charged during the buydown period will be calculated not to exceed the average variable rate charged the lender's average farm customer over the past 90 days plus one percent (1%). Average farm customers are those conventional farm borrowers who are required to pledge their crops, livestock, and other chattel and real estate security for the loan. This does not include those high risk farmers with limited security and management ability that are generally charged a higher interest rate by conventional agricultural lenders. Also, this does not include those low risk farm customers who obtain financing on a secured or unsecured basis, who have as collateral, such items as savings accounts, time deposits, certificates of deposit, stocks and bonds and life insurance which they are able to pledge for the loan.

(3) Installments on loans may be deferred in accordance with § 1980.124(d) of this subpart.

* * * * *

35. Section 1980.185 is amended by revising paragraphs (b) and (c)(1)(i), the introductory text to paragraph (c)(2), paragraphs (c)(2)(iii), (c)(2)(v), (c)(2)(ix), (f)(2), and (f)(3) to read as follows:

§ 1980.185 Soil and water loans.

* * * * *

(b) *Preference.* An application on hand from a veteran as defined in § 1980.106(b)(33) of this subpart will be given preference by the lender over an application from a nonveteran on file at the same time when it appears that available funds will be inadequate to meet the needs of all applicants.

(c) * * *

(1) * * *

(i) Be a citizen of the United States (see § 1980.106(b)(30) of this subpart for the definition of "United States") or an alien lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Forms I–151 or I–551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If the authenticity of the information shown on the alien's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G–641, "Application for Verification of Information from Immigration an Naturalization Records," obtainable from the nearest INS district (see Exhibit B of Subpart A of Part 1944). Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G–641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

* * * * *

(2) A cooperative, corporation, partnership, or joint operation must:

* * * * *

(iii) Consist of members, stockholders, partners, or joint operators holding a majority interest who are citizens of the United States (see § 1980.106(b)(30) of this subpart for the definition of "United States"), or an alien lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act. Aliens must provide Form I–151 or I–551, "Alien Registration Receipt Card." Indefinite parolees are not eligible. If the authenticity of the information shown on the alien's identification document is questioned, the County Supervisor may request the Immigration and Naturalization Service (INS) to verify the information appearing on the alien's identification card by completing INS Form G–641, "Application for Verification of Information from Immigration and Naturalization Records," obtainable from the nearest INS district (see Exhibit B of Subpart A of Part 1944). Mail the completed form to INS. The payment of a service fee by FmHA to INS is waived by inserting in the upper right hand corner of INS Form G–641, the following: "INTERAGENCY LAW ENFORCEMENT REQUEST."

* * * * *

(v) Be unable to obtain sufficient credit without a guarantee, either as an entity or as individual members, stockholders, partners, or joint operators, to finance actual needs at reasonable rates and terms, taking into account prevailing private and cooperative rates and terms in or near the community for loans for similar purposes and periods of time.

* * * * *

(ix) Consist of members, stockholders, partners, or joint operators who do not, as individuals, have either a guaranteed or insured FO, SW, RL, or OL loan and are not members of another entity or have an interest in another entity that has either a guaranteed or an insured FO, SW, RL, or OL loan.

* * * * *

(f) * * *

(2) The interest rate will be a fixed or variable rate agreed upon by the borrower and lender. The lender may charge a rate not to exceed one percent (1%) above the rate the lender charges its average farm customer. If a variable rate is used, it must be tied to a base rate published periodically in a publication specifically agreed to by the lender and borrower. Variable rates may change according to the normal practices of the lender for its average farm customers, but the frequency of change must be set forth in the loan instrument. The lender, borrower, and holder (if any) may collectively effect a temporary reduction in the interest rate on the SW loan when processing an Interest Rate Buydown under Exhibit D of this subpart. The reduced rate of interest must be a fixed rate for the term of the buydown. The lender is responsible for the legal documentation of interest rate changes by an "allonge" attached to the promissory note or other legally effective amendment of the interest rate; however, no new note(s) may be issued. If the amendment is attached to a variable rate note, the fixed rate of interest charged during the buydown period will be calculated not to exceed the average variable rate charged the lender's average farm customer over the past 90 days plus one percent (1%). Average farm customers are those conventional farm borrowers who are required to pledge their crops, livestock, and other chattel and real estate security for the loan. This does not include those high risk farmers with limited security and management ability that are generally charged a higher interest rate by conventional agricultural lenders. Also, this does not include those low risk farm customers who obtain financing on a secured or unsecured basis, who have as collateral such items as savings accounts, time deposit, certificates of deposits, stocks and bonds, and life insurance which they are able to pledge for the loan. At the request of FmHA, the lender will provide evidence of the rate charged the average farm customer. Such evidence may consist of average yield data or documented administrative differential rate schedule formulas used by the lender.

(3) Installments may be deferred in accordance with § 1980.124(d).

* * * * *

36. Exhibit A to Part 1980, Subpart B is amended by revising the introductory text of paragraph II A to read as follows:

Exhibit A of Subpart B of Part 1980—Approved Lender Program—Farm Ownership and Operating Loans

* * * * *

(II) * * *

(A) *Lender approval.* Any lender who desires to apply for ALP status must also be an "Eligible Lender" as defined in § 1980.13(b) of Subpart A of Part 1980 of this chapter. Except for FCS member institutions having an acceptable loan loss percentage as specified in the introductory text of paragraph II, lenders who meet this requirement and desire ALP status will prepare a written request to the State Director for the State in which they desire to have ALP status. The written request will address each item of "required criteria," and "optional criteria" contained in paragraph II A (1) and (2) and may be accompanied by any supporting evidence or other information the applicant lender believes will be helpful to the State Director in making a decision on the application for ALP status. Any FmHA County, District or State Office may provide a lender who desires to apply for ALP status, a complete copy of Part 1980, Subparts A and B of this chapter, including a copy of this Exhibit, and will assist in completion of the request. The State Director will make any necessary investigation or inquiry to determine accuracy of information and notify the applicant lender within 15 days of receipt of a request that the request is approved, denied, or requires additional information. The application material will be retained by the State Director for all approved lenders and periodic checks will be made by FmHA personnel to insure the lender's performance is as outlined in the application.

38. Exhibit D of Subpart B of Part 1980 is added to read as follows:

Exhibit D—Interest Rate Buydown Program

I. General

This exhibit contains the policies and procedures pertaining to an Interest Rate Buydown Program for guaranteed Operating (OL) loans and lines of credit, described in § 1980.175 of this subpart, guaranteed Farm Ownership (FO) loans described in § 1980.180 of this subpart and guaranteed Soil and Water (SW) loans described in § 1980.185 of this subpart. Subparts A and B of Part 1980 are applicable to this exhibit except as modified by Exhibit A and Exhibit B of this subpart and this exhibit. Authority to enter into Interest Rate Buydown agreements expires September 30, 1988.

II. Introduction

The authorities contained in this exhibit provide lenders with a tool to enable them to continue to provide credit to operations of not larger than family farms who are temporarily unable to project a positive cash flow on all income and expenses including debt service without a reduction in the interest rate.

Lenders that participate in this program enter into an agreement with FmHA to reduce the interest rate paid on a loan/line of credit. In return, FmHA will make annual interest rate buydown payments to the lender in an amount not more than 50 percent of the cost of reducing the interest rate on the loan. Payments made to a lender under this exhibit will in no case exceed 2 percentage points.

III. Definitions

A. *Cash flow*—a projection listing on an annual basis, of all anticipated cash inflows (including all farm and non-farm income) and all expenses to be incurred by the borrower during such period (including all farm and non-farm debt service and other expenses). Production records and prices used in the preparation of a cashflow will be calculated in accordance with § 1980.113(d)(8) of this subpart.

B. *Interest Rate Buydown Agreement*—(Form FmHA 1980-58.) The signed agreement between FmHA, the lender, and the borrower, setting forth the terms and conditions of the interest rate buydown.

C. *Positive Cash Flow*—a cash flow projection, as defined in this exhibit, where cash income (including all farm and non-farm income) equals or exceeds total estimated cash expenses to be incurred by the borrower (including all farm and non-farm debt service and other expenses).

UMI

IV. Program Administration

County Supervisors are authorized to approve interest rate buydown agreements providing the following requirements are met by the lender:

A. The measures for assessing borrower's financial viability will include considerations based on debt to asset ratios and returns on assets, and, where applicable, returns on equity.

B. For those borrowers currently indebted for an FmHA guaranteed loan(s) of line(s) of credit where the guaranteed loan/OL line of credit is to be considered for an interest rate buydown under this exhibit, the lender must demonstrate that a positive cash flow projection on all income and expenses, including debt service, is not possible by rescheduling or reamortizing the account in equally amortized installments as descibed in Section 1980.124 of this subpart. If a positive cash flow can be achieved using rescheduling or reamortizing authorities, subject to the requirements outlined in § 1980.124, the borrower's account will be rescheduled or reamortized. If a positive cash flow projection is then possible, the borrower is not eligible for an interest rate buydown.

1. For borrowers currently indebted for an FmHA guaranteed loan/line of credit who wish consideration under this exhibit, the lender will submit Attachment 2 of this exhibit with all requests for all interest rate buydowns.

2. In addition, the following information will be submitted by the lender:

(a) Verification of off-farm employment, if any.

(b) Form FmHA 440-32, "Request for Statement of Debts and Collateral," or similar documentation provided by approved lenders.

C. Applications from individuals who are not presently indebted for an FmHA guaranteed loan/line of credit shall be processed in accordance with § 1980.113 of this subpart and this exhibit. In addition, the lender will submit Attachment 2 of this exhibit with the application. The lender must demonstrate that a positive cash flow projection is not possible without reducing the interest rate on the borrower's loan(s)/line(s) of credit.

D. In all cases, the lender and County Supervisor must determine whether the borrower owns any assets which do not contribute to essential family living expenses or to the maintenance of a sound farming operation. The lender must determine whether the borrower could sell these assets and, if so, for how much. The lender will then prepare new cash flow projections which take into account the sale of these assets. If a positive cash flow can then be achieved, the borrower is not eligible for a interest rate buydown.

E. If a positive cash flow cannot be achieved, the lender may ask other creditors to voluntarily adjust their debts as outlined in Subpart A of Part 1903 of this chapter. If other creditors adjust their debts and the proposed interest rate buydown results in a positive cash flow, interest rate buydown may be approved.

F. If a positive cash flow cannot be achieved, even with other creditors voluntarily adjusting their debts and the interest rate buydown, the interest rate buydown will not be approved.

G. In order for a borrower's loan to be eligible for an interest rate buydown, a typical plan of operation must show that a positive cash flow can be expected all during the buydown period. A loan/line of credit with a term greater than one year must show that a positive cash flow on all income and expenses, including debt service, can be demonstrated during each year of the buydown. All loans/lines of credit with terms exceeding the buydown period must demonstrate that the borrower will be able to project a postive cash flow on all income and expenses, including debt service, after the buydown agreement expires. Further, if the lender proposes a term for the interest rate buydown which exceeds one year, the lender will provide FmHA with future financial statements documenting the necessity for the increased term. In no case will the Federal buydown period exceed three years.

H. Any holder(s) must agree to the interest rate reduction in writing. If the holder does not consent to the interest rate reduction proposed by the lender, the lender must repurchase the unpaid portion of the loan from any holder(s) before the interest rate buydown can be granted. When FmHA purchases a portion of a guaranteed loan, buydown payments on that portion shall cease.

I. The Interest Rate Buydown Agreement will be attached to the promissory note(s) or line of credit agreement. The promissory note(s) or line of credit agreement, cannot exceed the interest rate the lender charges its average farm customer, *prior* to any writedown by the lender, as outlined in §§ 1980.175(e), 1980.180(f), or 1980.185(f) of this subpart. The lender may only charge a fixed rate of interest during the term of the buydown agreement. The lender is responsible for the legal documentation of interest rate changes by an "allonge" attached to the promissory note(s) or line of credit agreement or other legally effective amendment of the interest rate; however, no new notes or line of credit agreements may be issued. If the lender elects to use a variable rate note or line of credit agreement, the fixed rate of interest charged during the buydown period will be calculated *not to exceed* the average variable rate charged the lender's average farm customer (as defined in §§ 1980.175(e), 198.180(f) or 1980.185(f) over the past 90 days, plus one percent (1%)). The promissory note(s), line of credit agreements and any attachments to these agreements, must schedule repayment in equally amortized installments, except for the first and last installments which must be prorated installments.

J. FmHA will pay the lender any interest buydown equal to one-half of the lender's writedown of interest percentage points, except that such payments will in no case exceed the cost of reducing such interest by more than two percentage points. The lender will adjust its interest rate in increments of .25%, rounded to the nearest .25% necessary to achieve a positive cash flow on any individual borrower's account.

V. Approval of interest rate buydown

If the approval official determines the buydown will be approved in accordance with paragraph IV of this exhibit, in addition to the determinations required in Section 1980.115 Administrative A and B, *the approval official will:*

A. Prepare Form FmHA 1940-1, "Request for Obligation of Funds." This form will be used to obligate the buydown portion for those loans presently guaranteed where the interest rate is subsequently bought down, and to obligate the loan and interest rate buydown for initial loans.

B. The approval official will execute Form FmHA 1940-1 and distribute copies in accordance with the FMI. The Finance Office will enter the obligation of funds on their records for the interest rate buydown and/or loan and notify the approval official by forwarding the original and one copy of Form FmHA 440-57, "Acknowledgement of Obligated Funds/Check Request."

C. A loan or line of credit for which the interest rate was previously reduced under this exhibit, may receive a subsequent buydown provided the total buydown term(s) over the life of the loan does not exceed 3 years and the buydown is approved on or before September 30, 1988.

IV. Interest Rate Buydown Closing

A. The lender will prepare and deliver a Form FmHA 1980-19, "Guaranteed Loan Closing Report," for each initial and existing guaranteed loan/line of credit in which the interest rate is bought down under this exhibit.

B. See §§ 1980.761(b)(1) and 1980.118(c) Administrative B.

1. If FmHA finds that all requirements have been met, the lender, FmHA and the borrower will execute Form FmHA 1980-58, "Interest Rate Buydown Agreement." In NO CASE will Form FmHA 1980-58 be executed prior to the determination of availability of funds for the loan/line of credit and buydown as evidenced on Form FmHA 440-57, "Acknowledgement of Obligation of Funds/Check Request."

2. An original Form FmHA 1980-58 will be prepared for each note or line of credit agreement executed. All originals of Form FmHA 1980-58 will be provided to the lender and attached to the note(s) with the original Loan Note Guarantee or Contract of Guarantee. In the event the lender assigns the guaranteed portion of the loan to holder(s), or the holder(s) agree(s) to any reduction in interest rate, a copy of Form FmHA 1980-58 will be attached to the original Form FmHA 449-36, along with a copy of the borrower's note(s) with "allonge" and Loan Note Guarantee. Form FmHA 449-36 will b revised to reflect the note amounts. At the top of the face of the document type: "This Assignment Guarantee Agreement is subject to an attachment(s) to the promissory note dated ——— and Form FmHA 1980-58, "Interest Rate Buydown Agreement," which temporarily reduces the interest rate on the promissory note to an effective interest rate of ———%." This revision will be initialed and dated by the lender, holder, and FmHA. Copy(ies) of the Interest Rate Buydown

Agreement will be kept in the County Office, attached to the appropriate Loan Note Guarantee or Contract of Guarantee. Additional copies may be retained by the State Office. Copies of all issued Interest Rate Buydown Agreements will be kept in the file.

3. Repurchase of loans presently guaranteed by FmHA eligible for interest rate buydown (Loan Note Guarantee cases only).

See Item number 10 of Form FmHA 449-36 and Item number 6 of Form FmHA 1980-58. When FmHA purchases a portion of the guaranteed loan, buydown payments on that portion shall cease. The interest rate reduction shall remain in effect.

VII. Interest Rate Buydown Claims and Payments

Claims and payments will be processed in accordance with paragraph 3 of Form FmHA 1980-58, "Interest Rate Buydown Agreement." Such claims and payments will be processed in accordance with paragraph 2 of Form FmHA 1980-58.

VIII. Term of Buydown Agreement

The term of a buydown agreement entered into under this exhibit shall not exceed 3 years or the outstanding term of the loan involving the interest rate buydown, whichever is less.

IX. Cancellation of Interest Rate Buydown

Form FmHA 1980-58, "Interest Rate Buydown Agreement," is incontestable except for fraud or misrepresentation, of which the lender has actual knowledge at the time the Interest Rate Buydown Agreement is executed, or for which the lender participates in or condones.

X. Excessive Interest Rate Buydown

Upon written notice to the lender, borrower and any holder(s), the Government may amend or cancel the Interest Rate Buydown Agreement and collect from the lender any amount of reduction granted which resulted from incomplete or inaccurate information (of which the lender was aware), an error in computation, or any other reason which resulted in payment that the lender was not entitled to receive.

XI. Transfer and Assumption of Loans Involving Interest Rate Buydown

Transfers will be processed in accordance with Section 1980.123 of this subpart. The loan/line of credit will be transferred with the Interest Rate Buydown Agreement only in cases where the transferee was liable for the debt at the time the buydown was granted. Under no other circumstances will the buydown be transferred. If the buydown is necessary for the transferee to achieve a positive cash flow, the lender must make application for an initial buydown under this exhibit.

XII. Review by FmHA Employees

The lender will submit FmHA 1980-24, "Request Interest Rate Buydown/Subsidy Payment to Guaranteed Loan Lender," annually along with detailed calculations and a statement of acitivity on the borrower's account to support the claim. The County Supervisor will approve, if correct, and forward to the Finance Office for payment. FmHA may review audit reports by the lender's supervising agency when buydown clams are involved.

UNITED STATES DEPARTMENT OF AGRICULTURE

Farmers Home Administration (Location)

Dear ———————:

The Farmers Home Administration (FmHA) has authority under the Food and Security Act of 1985 (Pub. L. 99-198) to temporarily make payments to lenders to reduce borrower interest rates on a guaranteed loan to eligible applicants and borrowers. The Interest Rate Buydown Program provides lenders with a tool to enable them to continue to provide credit to family farm operators who are temporarily unable to project a positive cash flow on all income and expenses, including debt service, without a reduction in the interest rate.

Lenders that participate in this program enter into an agreement with FmHA to reduce the interest rate paid on a loan. In return, FmHA will make annual payments to the lender in an amount of not more than 50 percent of the cost of reducing the interest rate on the loan. Payments made to a lender under this authority may not exceed two percentage points.

Borrowers with existing guaranteed Farm Operating (OL), Farm Ownership (FO), and Soil and Water (SW) guaranteed loans, may have the interest rate on their loans bought down by FmHA.

If you would like additional information regarding the Interest Rate Buydown Program for guaranteed loans and how to apply, you should contact this office.

I will be glad to discuss this program in detail with you.

Sincerely,

County Supervisor To: County Supervisor, FmHA

———————————————

———————————————

Subject: Request for Interest Rate Buydown
Borrower's name: ———————————

In connection with the subject application for an interest rate buydown, this lending institution certifies:

(1) The loan balance of $——— is the amount requested for an interest rate buydown. If a line of credit, the line of credit balance is $———, and the line of credit ceiling amount of $——— is the amount requested for an interest rate buydown.

(2)(a) This interest rate charged the lender's average farm customer, plus one percent, determined in accordance with Section 1980.175(e), Section 1980.180(f) or Section 1980.185(f)(2) of this subpart, is $———%. (Specify fixed or variable. If variable rates are used, the average farm customer's variable rate for the past 90 days shall be inserted.)

(b) The lender's interest rate to the subject borrower prior to writedown is ———% (may not exceed (2)(a)).

(c) The lender's writedown is $———%.

(d) The interest rate to be charged with the writedown to the borrower is $———%.

(3) The amount of interest written down is permanently cancelled as it becomes due and no attempt will be made to collect that portion of the debt.

(4) The lender's interest rate reduction to the borrower will result in a reduced payment schedule for the term of the buydown and that a positive cash flow on all income and expenses, including debt service, will be expected during the buydown period. A loan/line of credit with a term greater than one year must show that a positive cash flow can be demonstrated during each year of the buydown. In cases where the term of the loan exceed the term of the buydown, the borrower is projected to have a positive cash flow on all income and expenses, including debt service, after the buydown period terminates.

(5) The borrower's cash flow projections have been prepared in accordance with Part 1980, Subpart B, Section 1980.113(d)(18), and are attached to this document.

Warning: Section 1001 of Title 18, United States Code provides: "Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falisfies, conceals or covers up . . . a meterial fact, or makes any false, fictitious or fraudulant statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulant statement or entry, shall be fined not more that $10,000 or imprisoned not more than 5 years, or both."

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

	ST. LOUIS, MO	WASHINGTON, DC	DENVER, CO	DALLAS, TX
WHEN:	March 11; 9 am.	March 20; 9 am and 1 pm. (identical sessions)	March 24; 9 am.	April 23; 1:30 pm.

Title 3—

The President

Proclamation 5443 of February 24, 1986

National Black (Afro-American) History Month, 1986

By the President of the United States of America

A Proclamation

Black history is a book rich with the American experience but with many pages yet unexplored. A chapter once beautiful and tragic was brilliantly illuminated this very year with the first celebration of the birthday of Dr. Martin Luther King, Jr., as a national holiday. This new holiday symbolizes the trail he blazed for others and the struggle of many Americans for full and unfettered recognition of the constitutional rights of all Americans, regardless of race or color.

Black history in the United States has been a proving ground for America's ideals. A great test of these ideals came with the Civil War and the elimination of slavery. Another test came a century later, in the struggle for practical recognition of the rights already won in principle—the abolition of legalized segregation and second-class citizenship.

The foremost purpose of Black History Month is to make all Americans aware of this struggle for freedom and equal opportunity. It is also a time to celebrate the many achievements of blacks in every field, from science and the arts to politics and religion. It not only offers black Americans an occasion to explore their heritage, but it also offers all Americans an occasion and opportunity to gain a fuller perspective of the contributions of black Americans to our Nation. The American experience and character can never be fully grasped until the knowledge of black history assumes its rightful place in our schools and our scholarship.

The Congress, by Senate Joint Resolution 74, has designated the month of February 1986 as "National Black (Afro-American) History Month" and has authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim February 1986 as National Black (Afro-American) History Month. I invite the Governors of the several States, and our schools, colleges, universities, and libraries, the stewards of our national consciousness, and all Americans to observe this month with appropriate activities to heighten awareness of black history and to stimulate continuing inquiry into this rich vein of the American experience.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of February, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Presidential Documents

Proclamation 5444 of February 24, 1986

Hugo Lafayette Black Day, 1986

By the President of the United States of America

A Proclamation

February 27, 1986 marks the one hundredth anniversary of the birth of Hugo Lafayette Black, one of the most respected and influential Justices to serve on the Supreme Court in this century.

Hugo Black's tenure on the Supreme Court lasted for 34 years, from 1937 to 1971, from the days in which America was struggling to free itself from the effects of the Depression, through World War II and its aftermath, and through the turbulent decade of the 1960s. At the time of his appointment to the Court, Hugo Black was serving as a Senator from Alabama.

Justice Black was a strong believer in a written Constitution, as an instrument to assure control of the government by the people, by virtue of restraints specifically embodied in the document to limit governmental power and protect minorities of whatever race, creed, or ideological persuasion. He once called the Constitution his "legal bible." He cherished every word of it, he said, because it is our surest guarantee that this Nation will endure "strong and great through countless ages."

Throughout his tenure, Justice Black fought to maintain the vital principle of separation of powers. He strongly resisted what he regarded as unauthorized efforts of judges to supersede the judgment of the elected representatives of the people and to substitute their own views of appropriate social and economic policy.

This proud Son of the South played a leading role in the Supreme Court's effort to eliminate racial segregation from our society and ensure equal rights for all persons.

Justice Black's long and distinguished career also was marked by his commitment to the Bill of Rights, including most notably a strong belief in freedom of speech, and the importance of a free press to the governance of a democracy. He also was a strong believer in unhindered access to the political process for all persons and to the core procedural protections afforded by the Constitution.

Hugo Black's formal accomplishments as Senator and Justice and his contributions to American jurisprudence cannot overshadow his warmth as a human being, the intimate collegial relationships he developed with colleagues, and remarkable gift for friendship that helped the Supreme Court function effectively through some of the most turbulent episodes in its history.

In order to honor Hugo Lafayette Black as a defender of freedom and dedicated public servant, the Congress of the United States, by Senate Joint Resolution 59, has designated February 27, 1986 as "Hugo Lafayette Black Day" and authorized and requested the President to issue a proclamation in observance of the one hundredth anniversary of his birth.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim February 27, 1986 as Hugo Lafayette Black Day, and I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

VOL 51 ISS 38 FE 26 1986 UMI

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of February, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 38
Wednesday, February 26, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures; Request for Comments

AGENCY: Merit Systems Protection Board.

ACTION: Interim Rule; Request for comment.

SUMMARY: This rule amends the procedures of the Merit Systems Protection Board with respect to compliance and enforcement. This action clarifies that authority and duty of the Board and explains that the parties have a responsibility to cooperate to assure that compliance is obtained promptly and completely. It also improves the process and shortens the time frame for the settlement and adjudication of disputes among the parties and the enforcement of the final decision by the Board.

DATES: Effective February 26, 1986; comments should be submitted in writing on or before March 28, 1986.

ADDRESS: Comments should be submitted in writing and addressed to Robert E. Taylor, Clerk, Merit Systems Protection Board, 1120 Vermont Avenue, NW., Washington, DC 20419.

FOR FURTHER INFORMATION CONTACT: Charles J. Stanislav, (202) 653-8900.

SUPPLEMENTARY INFORMATION: This amendment of 5 CFR Subpart E makes it clear that the parties are expected to cooperate with each other to assure that the Board's final decisions are complied with promptly and in accord with applicable laws, rules, and regulations. Moreover, it recognizes that not all aspects of compliance can reasonably be ascertained and resolved immediately. Finally, it directs the Board's resources and involvement in compliance matters to the issues in dispute and provides an expedited procedure for the adjudication of those issues and ultimately, when necessary, the enforcement of the Board's final decision.

1. Subpart E—Enforcement of Final Order. A new § 1201.181 containing explanatory paragraphs has been added in advance of the procedural sections to clarify the roles of the parties preliminary to invoking enforcement.

2. § 1201.181 Petition for Enforcement has been changed to § 1201.182 and paragraph (a) has been revised to emphasize that a petition should be filed promptly and should contain a statement of the results of any attempt to obtain compliance.

Paragraph (b) has been revised to conform with changes in this subpart.

3. § 1201.182 Compliance; § 1201.183 Referral to the Board; and § 1201.184 Enforcement Action by the Board have been eliminated as separate sections and incorporated in a new § *1201.183 Enforcement Action by the Board* to more clearly describe the enforcement process and to set forth the obligations of the persons involved and to set the time frames required to complete the compliance and/or enforcement process.

Regulatory Flexibility Act

The Chairman, Merit Systems Protection Board, certifies that the Board is not required to prepare an initial or final regulatory analysis of the proposed rule, pursuant to section 603 or 604 of the Regulatory Flexibility Act, because of his determination that this rule would have a significant economic impact on a substantial number of small entities, including small business, small organizational units, and small governmental jurisdictions.

List of Subjects in 5 CFR Part 1201

Administrative practice and procedure, civil rights, government employees.

Accordingly, the Merit Systems Protection Board amends 5 CFR Part 1201 as follows:

1. Authority for 5 CFR Part 1201 continues to read:

Authority: 5 U.S.C. 1205.

2. Subpart E is revised to read as follows:

Subpart E—Enforcement of Final Order

Sec.
1201.181 Authority and Explanation
1201.182 Petition for Enforcement
1201.183 Enforcement Action by the Board

Subpart E—Enforcement of Final Order

§ 1201.181 Authority and explanation.

(a) Pursuant to 5 U.S.C. 1205(a)(2) the Board has the authority to order any Federal agency or employee to comply with decisions and orders issued under its jurisdiction. The Board also has the authority and duty to enforce compliance with its orders and decisions and will do so when necessary as described in this subpart. The parties are expected to cooperate fully with each other so that compliance with the Board's orders and decisions can be accomplished promptly and in accord with laws, rules, and regulations applicable to the individual case. The Board's decisions and orders shall contain a notice of the Board's enforcement authority.

(b) In order to avoid unnecessary petitions under this subpart, the agency shall promptly communicate with the appellant its actions to comply, and shall advise the appellant when it considers compliance to have been accomplished. The appellant must provide all necessary information requested by the agency in furtherance of compliance and should, from time to time, inquire as to the agency's progress, if not otherwise notified.

§ 1201.182 Petition for enforcement.

(a) *Appellate jurisdiction.* Any party may petition the Board for enforcement of a final decision issued under the Board's appellate jurisdiction. The petition shall be filed promptly with the regional office which issued the initial decision and shall set forth specifically the reasons why the petitioning party believes there is noncompliance. The date and results of any communications with respect to compliance should be stated. Any petition for enforcement filed more than 30 days after the Agency's Notice that compliance has been accomplished shall contain a statement of the reasons for delay and a request for an extension of time to file.

(b) *Original jurisdiction.* Any party seeking enforcement of a Board order issued under its original jurisdiction shall submit a petition for enforcement to the Clerk of the Board. The petition shall set forth specifically the reasons why the petitioning party believes there is noncompliance. The petition will be processed by the Presiding Official

VOL

under the procedures set forth in § 1201.183 of this subpart.

§ 1201.183 Enforcement action by the Board.

(a) *Regional Office processing.* (1) When a petition has been filed in a regional office for enforcement of a final appellate decision, the Regional Director or a designated presiding official will promptly issue an enforcement order reminding the agency of its burden of proof and requiring the agency respondent to file within 10 days: evidence of compliance; a statement of actions completed, actions in process, and actions remaining and a reasonable schedule for full compliance; or otherwise show good cause why there was noncompliance or compliance is incomplete. The appellant will have 10 days from the date of service of the agency's reply in which to file a response to the agency submission. The parties are required to serve each other as required under § 1201.26(b)(2).

(2) A hearing may be convened when necessary to resolve matters at issue.

(3) If the agency is found to have been in compliance with the required corrective action or is making a good faith effort and reasonable progress to comply, the Regional Director or presiding official will issue a *Decision* so finding, which will be subject to the procedure for a petition for review by the Board pursuant to § 1201.114, *et seq.*, and for judicial review pursuant to § 1201.118 of this Part.

(4) If the agency is found not in compliance and is not making a good faith effort to comply, the Regional Director or presiding official will issue a *Recommendation* that the Board enforce the final decision. The agency respondent will have 10 days from the date of service of the *Recommendation* in which to file with the Clerk of the Board, proof of the required compliance. If satisfactory compliance evidence is not filed within that 10-day period, the *Recommendation* will be processed in accordance with (b) of this section.

(b) *Referral to the Board.* (1) Where an agency has failed to submit satisfactory evidence of compliance as required by paragraph (a)(4) of this section, the agency respondent must file a brief with the Clerk of the Board within 20 days of the date of service of the *Recommendation* identifying by name, title and grade the agency official responsible for the failure to comply and explaining why it disagrees with the Recommendation. The appellant may file with the Clerk of the Board a brief in response within 15 days of the date of service of the agency's brief. The Board may require the respondent agency official or his/her representative to appear before the Board and/or to respond in writing to show cause why sanctions pursuant to 5 U.S.C. 1205 (a)(2) and (d)(2) should not be imposed against the person responsible for the agency's failure to comply.

(2) The Board may hold a hearing on an order to show cause, or it may issue a decision without a hearing.

(c) *Certification to the Comptroller General.* Where appropriate, the Board may, under 5 U.S.C. § 1205(d)(2), certify to the Comptroller General of the United States that no payment shall be made to any Federal employee found to be in noncompliance with the Board's order, other than a Presidential appointee subject to confirmation by the Senate.

(d) *Effect of Special Counsel's action or failure to act.* No proceeding under this subpart shall be precluded because the Special Counsel did not file a complaint under 5 U.S.C. 1206(g)(1)(B) and Subpart D of this part.

Dated: February 18, 1986.

Herbert E. Ellingwood,

Chairman.

BILLING CODE 7400-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1106

Milk in the Southwest Plains Marketing Area; Temporary Revision of a Provision of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Temporary revision of a rule.

SUMMARY: This action extends the application of a lower pooling standard for plants operated by a cooperative association under the Southwest Plains milk order. It is based on the record of a public hearing held in Tulsa, Oklahoma, on November 6, 1985. At the hearing, a cooperative association asked that the lower 40-percent delivery standard, which has been revised downward by 10 percentage points since May 1985, continue to apply for pool plants operated by a cooperative association until the hearing proceeding is concluded. A proposal to lower the minimum delivery standard was considered at the November 6 hearing. An extension of the lower pooling requirements for plants operated by a cooperative is warranted on an interim basis to enable the cooperative to continue the orderly disposition of the reserve milk supplies now associated with the market while the hearing proposals are evaluated on the basis of the record evidence and the proceeding advances toward completion.

EFFECTIVE DATE: February 26, 1986.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Hearing: Issued September 20, 1985; published September 26, 1985 (50 FR 39017).

The Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

The temporary revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the provisions of § 1106.7(d) of the Southwest Plains milk order.

It is hereby found and determined that the current temporary revision, which expires at the end of February, should be extended beginning for the month of March 1986 and continuing until the hearing proceeding on proposed amendments to the order has been completed. A proposal to reduce the delivery percentage that a cooperative must meet to qualify its plants was considered at a public hearing held on November 6, 1985, at Tulsa, Oklahoma. Interested parties had an opportunity to testify about the proposal and no opposition testimony was presented at the hearing.

Statement of Consideraton

This action is based on the record of a public hearing held on November 6, 1985, at Tulsa, Oklahoma, to consider several proposed amendments to the Southwest Plains order. This action continues the effect of a prior temporary revision and applies a lower delivery percentage for plants operated by a cooperative association. Under the continuing action, the percentage of milk marketed by a cooperative association that must be delivered to and physically received at pool distributing plants during the month would be reduced by 10 percentage points, from 50 to 40 percent, for pool plants operated by a cooperative association. Section

1106.7(d) of the order provides that the Director of the Dairy Division may increase or decrease the delivery percentage by up to 10 percentage points to obtain needed shipments or to prevent uneconomic shipments of milk.

Due to the significant shift of milk to the Southwest Plains market and the resulting changes in the market's supply-demand relationship that took place when the St. Louis-Ozarks order was terminated on April 1, 1985, the delivery percentage was reduced from 50 to 40 percent for the months of May through August 1985. The downward revision of the delivery percentage was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that operates plants and represents producers supplying the Southwest Plains market. At Mid-Am's request the 40-percent pooling standard was extended through February 1986 to accommodate the efficient pooling of the additional reserve milk supplies associated with the market.

When Mid-Am asked that the lower delivery percentage continue to apply through February 1986, the cooperative requested a hearing on this issue and proposed that such percentage be reduced. At the hearing, Mid-Am testified that the lower standard is needed to reflect current marketing conditions. There was no opposition to the proposed lower standard. Mid-Am also asked that the lower delivery percentage for plants operated by a cooperative be further extended if the hearing proceeding has not been completed by the end of February 1986 when the current revision expires.

Testimony and statistics presented at the hearing indicated that the scope of regulation under the Southwest Plains order was extended considerably by the April 1 termination of the St. Louis-Ozarks order. For example, several distributing plants and supply plants regulated under the former St. Louis-Ozarks order and located in southwest Missouri and northwest Arkansas became regulated under the Southwest Plains order. The regulation of these plans under the Southwest Plains order had a dramatic impact of the market's supply-demand relationship. For example, from March to April 1985, Class I use of producer milk increased by 58 percent while producer supplies more than doubled. As a result, the Class I utilization of producer milk declined from 57 percent in March to 44 percent in April. Record data also show that during the months of April through September 1985, the Class I use of producer milk ranged from 6.9 to 10.8 percentage points below the market's Class I utilization for the same month of 1984. For the entire period of April through September 1985, such Class I utilization was 8.6 percentage points below the use during the same six-month period in 1984.

In view of the changes in the market's supply-demand relationship, it is concluded that a reduction of 10 percentage points in the pooling standard for plants operated by a cooperative association should be continued until the hearing proceeding, which involves consideration of this issue, is concluded. If the present downward revision expired at the end of February, more milk would have to be delivered to distributing plants than is necessary to meet the fluid milk needs of the market. A continuation of the lower pooling standard will prevent costly and inefficient movements of milk to distributing plants solely to qualify for pooling the milk of dairy farmers who supply the market's fluid needs.

It is hereby found and determined that notice of proposed rulemaking, public procedure thereon and 30 days' notice of the effective date hereof are impractical, unnecessary, and contrary to the public interest in that:

(a) This temporary revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that without this action costly and inefficient movements of milk would be made solely for the purpose of pooling the milk of dairy farmers who supply the market;

(b) This continuing action does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing conditions that provide the basis for this continuing action were fully explored at a public hearing held on November 6, 1985, where all interested parties had an opportunity to testify on the proposals in the notice. No opposition testimony to the proposed lower pooling requirement for a cooperative's plants was presented at the hearing.

Therefore, it is appropriate to reduce the delivery percentage specified in § 1106.7(c) by 10 percentage points beginning with the month of March 1986 and continuing until the hearing proceeding concerning this issue is concluded.

List of Subjects in 7 CFR Part 1106

Milk marketing orders, Milk, Dairy products.

The authority citation for 7 CFR Part 1106 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

It is therefore ordered, That the 50-percent delivery requirement specified in § 1106.7(c) of the order be reduced to 40 percent until the hearing proceeding on this issue is completed.

PART 1106—MILK IN THE SOUTHWEST PLAINS MARKETING AREA

§ 1106.7 [Amended]

In CFR Part 1106 is § 1106.7(c) the 50-percent delivery requirement is reduced to 40 percent beginning with the month of March 1986 and continuing until completion of the hearing proceeding on this issue.

Effective date: February 26, 1986.

Signed at Washington, DC, on: February 20, 1986.

W.H. Blanchard,

Acting Director, Dairy Division.

Single and Multiple Family Housing and Farmer Program Loan; Interest Rates

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations regarding loans for Single Family Housing, Multiple Family Housing and Farmer Program loans. This action is taken by FmHA to comply with Pub. L. 99-88 dated August 15, 1985. A provision of Pub. L. 99-88 provides that applicants requesting FmHA assistance have the right to request that their FmHA loan close at the lower of the interest rates in effect at the time of loan closing or loan approval. The intended effect of this action is to bring existing FmHA regulations into compliance with Pub. L. 99-88.

EFFECTIVE DATE: February 26, 1986.

FOR FURTHER INFORMATION CONTACT: David J. Villano, Senior Realty Specialist, Property Management Branch, Single Family Housing Servicing and Property Management Division, Farmers Home Administration, USDA, South Agriculture Building, Room 5309, Washington, DC 20250. Telephone: (202) 382-1452.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental

VOL 51 ISS 38 FE 26 1986 UMI

Regulation 1512-1 which implements Executive Order 12291, and has been determined "nonmajor" since the annual effect on the economy is less than $100 million and there will be no increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This program is listed in the Catalog of Federal Domestic Assistance under:

10.404	Emergency Loans
10.405	Farm Labor Housing Loans and Grants
10.406	Farm Operating Loans
10.407	Farm Ownership Loans
10.410	Low Income Housing loans
10.411	Rural Housing Site Loans
10.415	Rual Rental Housing Loans
10.416	Soil and Water Loans
10.421	Indian Tribes and Tribal Corporation Loans

Catalog Nos. 10.405, 10.411, 10.415 and 10.416 are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. Catalog Nos. 10.404, 10.406, 10.407, 10.410 and 10.421 are excluded from Executive Order 12372.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-90, an Environmental Impact Statement is not required.

It is the policy of this Department that rules relating to public property loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking since the purpose of the change is to comply with a mandatory statute in Pub. L. 99-88 and any delay would be contrary to the public interest.

Pub. L. 99-88 requires that effective November 12, 1983, and thereafter, upon request of the applicant, the interest rate charged by FmHA to housing, farm, water and waste disposal, and community facility applicants shall be the lower of the rates in effect at either the time of loan approval or loan closing and any FmHA grant funds associated with such loans shall be set in the amount based upon the interest rate in effect at the time of loan approval.

The provisions of Pub. L. 99-88 regarding the right of applicants to request that their FmHA loan be closed at the lower of the interest rates in effect at the time of loan approval or loan closing does not specifically address applicants requesting the transfer by assumption of an existing FmHA debt at new rates and terms, or a credit sale made to an applicant requesting credit on eligible terms to purchase a property from FmHA inventory. In many cases involving transfers by assumption and credit sales, a subsequent loan is made. It would be inconsistent with the intent of the law to provide that an applicant have the right to request the lower interest rate on a newly made FmHA loan but not on an FmHA loan they will assume or incur to purchase a property from FmHA inventory on the same day. Therefore, FmHA has determined that Public Law 99-88 does apply to transfers by assumption and credit sales for consistency within the loan program and to ensure that equal rights are provided for all FmHA applicants. Further, FmHA has determined that Pub. L. 99-88 does not apply to credit extended by the agency to individuals that are not eligible for program assistance. Credit of this nature is provided to facilitate the sale of Government inventory property or security servicing and such individuals applying for this type of credit are not considered program applicants.

Existing FmHA regulations do not give applicants the right to request that their FmHA loan close at the lower of the interest rates in effect at either the time of loan approval or loan closing. The interest rate is currently established on the date of loan approval and the loan is closed at that interest rate.

FmHA amends Subpart G of Part 1822, Subparts I and N of Part 1823, Subpart A of Part 1941, Subparts A, B and C of Part 1943, Subparts A, D and E of Part 1944, Subpart D of Part 1945, Subpart C of Part 1955, Subpart A of Part 1962, and Subparts A and C of Part 1965 by authorizing that Single Family Housing (SFH), Multiple Family Housing (MFH), and Farmer Program (FP) applicants shall have a choice as to the interest rate charged by FmHA on their loans. This action will bring existing FmHA SFH, MFH, and FP regulations into compliance with Pub. L. 99-88.

PART 1822—RURAL HOUSING LOANS AND GRANTS

1. The authority citation for Part 1822 is revised to read as follows:

Authority: 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart G—Rural Housing Site Loan Policies, Procedures, and Authorizations

2. § 1822.266 (a) is revised to read as follows:

§ 1822.266 Rates, terms, and source of funds.

(a) *Interest Rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

* * * * *

§ 1822.270 [Amended]

3. § 1822.270 (c) is amended by replacing the word "him" with the words "the State Director" in the second sentence.

4. § 1822.270 (d) is amended by replacing the word "him" with the words "the State Director" in the second sentence.

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

5. The authority citation for Subpart I and N is revised to read as follows:

Authority: 7 U.S.C. 1989, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart I—Processing Loans to Associations (Except for Domestic Water and Waste Disposal)

6. § 1823.256 (d) is revised to read as follows:

§ 1823.256 Loan Terms.

* * * * *

(d) *Interest rates.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

Subpart N—Loans to Indian Tribes and Tribal Corporations

§ 1823.401 [Amended]

7. § 1823.401 is amended by removing the word "his" from the last sentence.

§ 1823.406 [Amended]

8. § 1823.406 is amended by removing the last sentence and adding the following to the end of the section:

Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

PART 1941—OPERATING LOANS

9. The authority citation for Part 1941 is revised to read as follows:

Authority: 7 U.S.C. 1989, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Operating Loan Policies, Procedures, and Authorizations

10. § 1941.18 introductory paragraph (a) is revised to read as follows:

§ 1941.18 Rates and terms.

(a) *Rates.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved. A lower rate may be established for a limited resource applicant subject to the following:

* * * * *

PART 1943—FARM OWNERSHIP, SOIL AND WATER AND RECREATION

11. The authority citation for Part 1943 is revised to read as follows:

Authority: 7 U.S.C. 1989, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Insured Farm Ownership Loan Policies, Procedures, and Authorizations

12. § 1943.16 introductory paragraph (c) is revised to read as follows:

§ 1943.16 Rates and terms.

* * * * *

(c) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If the applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved. A lower rate is established in this Exhibit for a limited resource applicant subject to the following:

* * * * *

Subpart B—Insured Soil and Water Loan Policies, Procedures, and Authorizations

13. § 1943.66(c) is revised to read as follows:

§ 1943.66 Rates and terms.

* * * * *

(c) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

Subpart C—Insured Recreation Loan Policies, Procedures, and Authorizations

14. § 1943.116 (c) is revised to read as follows:

§ 1943.116 Rates and terms.

* * * * *

(c) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

PART 1944—HOUSING

15. The authority citation for Part 1944 is revised to read as follows:

Authority: 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

16. § 1944.25(b) is revised to read as follows:

§ 1944.25 Rates, terms, and source of funds.

* * * * *

(b) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the rates in effect at the time of loan approval or loan closing. If the applicant does not

indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

* * * * *

Subpart D—Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations

17. § 1944.159(b) is revised to read as follows:

§ 1944.159 Rates and terms.

* * * * *

(b) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office).

* * * * *

Subpart E—Rural Rental Housing Loan Policies, Procedures, and Authorizations

18. § 1944.214(a) is revised to read as follows:

§ 1944.214 Rates and terms.

(a) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office).

* * * * *

PART 1945—EMERGENCY

19. The authority citation for Part 1945 is revised to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart D—Emergency Loan Policies, Procedures and Authorizations

20. § 1945.168(a) is revised to read as follows:

§ 1945.168 Rates and terms.

(a) *Interest rates.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If the applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved. Interest on the initial advance will accrue from the date of the promissory note. Interest on other advances will accrue from the date of the loan check for each such advance.

* * * * *

PART 1955—PROPERTY MANAGEMENT

21. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart C—Disposal of Inventory Property

22. § 1955.106(d)(2) is revised to read as follows:

§ 1955.106 Sale of suitable property (CONACT).

* * * * *

(d) * * *

(2) Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or closing. If the applicant does not indicate a choice, the loan will be closed at the rate in effect at the time of loan approval.

* * * * *

23. § 1955.107(a) is revised to read as follows:

§ 1955.107 Sale of surplus property (CONACT).

* * * * *

(a) *Rates and terms.* Surplus property will be offered for cash or on ineligible terms of not less than a ten percent (10%) downpayment with the remaining balance amortized over a period not to exceed 25 years. The interest rate for business and industrial property will be the established insured B&I rate for profit corporations plus ½ percent; for community programs property the interest rate will be the market rate for Community Programs. The interest rate for all other surplus property will be the current Farmer Program ineligible interest rate set forth in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office). Loans made on ineligible terms will be closed at the interest rate in effect at the time the loan was approved. The State Director will determine the loan terms for surplus property within these limitations. After extensive sales efforts where no acceptable offer has been received, the State Director may request the Administrator to permit offering surplus property for sale on more favorable rates and terms; however, a downpayment of not less than ten percent (10%) must be required and the terms may not be more favorable than those legally permissible for eligible borrowers. Surplus property will be offered for sale for cash or terms that will provide the best net return to the Government. The term of any financing extended may not be longer than the period for which the property will serve as adequate security. All credit sales on ineligible terms will be identified as NP loans.

* * * * *

24. § 1955.117(e) is revised to read as follows:

§ 1955.117 Processing credit sales on eligible terms (housing).

* * * * *

(e) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA will be the lower of the interest rate in effect at the time of loan approval or loan closing. If the applicant does not indicate a choice, the loan will be closed at the rate in effect at the time of loan approval.

* * * * *

§ 1955.118 [Amended]

25. § 1955.118(c) is amended by adding the following to the end of the paragraph:

Loans made on ineligible terms will be closed at the interest rate which is in effect at the time the loan was approved.

PART 1962—PERSONAL PROPERTY

26. The authority citation for Part 1962 is revised to read as follows:

Authority: 7 U.S.C. 1989, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Servicing and Liquidation of Chattel Security

27. § 1962.34(a)(2) is amended by removing the last two sentences and adding the following to the end of the paragraph:

§ 1962. 34 Transfer of chattel security and EO property and assumption of debts.

* * * * *

(a) * * *

(2) * * * If any deferred interest is not paid by the time the transfer takes place, it must be added to the principal balance and the loan must be assumed at new rates and terms. Upon request of an applicant assuming a loan at new rates and terms and/or an applicant eligible to receive limited resource rates and terms, the interest rate charged by FmHA will be the lower of the interest rates in effect at the time of loan approval or loan closing. If the applicant does not indicate a choice, the loan will be closed at the rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type assistance involved.

* * * * *

PART 1965—REAL PROPERTY

28. The authority citation for Part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, 7 CFR 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases

29. § 1965.27(c)(2) is amended by removing the first sentence and adding the following sentences in its place:

§ 1965.27 Transfer of real estate security.

(c) * * *

(2) * * * Except as provided in paragraph (b)(5) of this section and in this paragraph, an applicant may request the interest rate charged by FmHA to be the lower of the rate in effect at either the time the assumption is approved or closed. If the applicant does not indicate a choice, the assumption will be closed at the rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type loan involved.

* * * * *

30. § 1965.27(d)(2) is amended by replacing the words "current rate" with the words "interest rate in effect at the time of loan approval" in the third sentence.

31. § 1965.27(d)(3) is amended by inserting the words "in effect at the time of loan approval" to the end of the last sentence.

Subpart C—Security Servicing for Single Family Rural Housing Loans

32. § 1965.126(c)(1) is revised to read as follows:

§ 1965.126 Transfer of property with assumption of indebtedness.

* * * * *

(c) * * *

(1) Except as provided in paragraph (c)(2) of this section, the applicant may request the interest rate charged by FmHA to be the lower of the rate in effect at either the time the assumption is approved or closed. If the applicant does not indicate a choice, the assumption will be closed at the rate in effect at the time of loan approval. Interest rates are specified in Exhibit B of FmHA Instruction 440.1 (available in any FmHA office) for the type loan involved. The repayment period may be up to the maximum legal limit for the type loan involved.

BILLING CODE 3410-07-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM 79-14]

Order Prescribing Incremental Pricing Acquisition Cost Thresholds Under Title II of the NGPA

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order prescribing incremental pricing thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: March 1, 1986.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Federal Energy Regulatory Commission, 825 N. Capitol Street, N.E., Washington, D.C. 20426, (202) 357-8500.

SUPPLEMENTARY INFORMATION:

Publication of Prescribed Incremental Pricing Acquisition Cost Threshold of the NGPA of 1978

[Docket No. RM79-14]

Order of the Director, OPPR

Issued February 21, 1986.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incemental pricing acquisition cost threshold prices for the month of March 1986 are issued by the publication of a price table for the month. The incremental pricing acquisition cost threshold prices for months prior to those reflected on the table are found in § 282.304.

The threshold price for March which is based upon 130% of the cost of No. 2 fuel oil landed in New York City reflects data gathered by the Energy Information Administration (EIA) during December 1985. The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which the incremental pricing threshold becomes effective. The prices found in *Platt's Oilgram Price Report* are given for each trading day in the form of high and low prices for No. 2 fuel oil in Metropolitan New York and Northern New Jersey. A lag adjustment factor was calculated using the average of the low posted price for those two areas for the ten trading days ending February 14, 1986, and dividing that price by the corresponding average price computed from prices published by Platt's for the month of December 1985. This lag adjustment factor was applied to the December price to determine the price for March. This procedure will be followed in all subsequent months.

Correction

In FR Doc. 85-17456, beginning on page 29964, in the issue of Thursday, July 23, 1985, make the following corrections:

1. On page 29964, first column, under DATES, in the sixth line, "§ 31.6053-3(j)(g)(9)" should read "§ 31.6053-3(j)(9)", and in the thirteenth line, "§ 31.6053—(b)(5)" should read "§ 31.6053-3(b)(5)".

2. On page 29967, first column, in § 31.6053-4T(b), in the fifth line, "of" should read "or".

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[A-10-FRL-2974-5]

Standard of Performance for New Stationary Sources; Delegation of Authority of Local Air Agency in Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Delegation of Authority.

SUMMARY: Section 111(c) of the Clean Air Act permits EPA to delegate to States the authority to implement and enforce the standards set out in 40 CFR Part 60, Standard of Performance for New Stationary Sources (NSPS).

The State of Oregon Department of Ecology (ODEQ) requested EPA to delegate to the Lane Regional Air Pollution Authority (LRAPA) the authority to implement and enforce 22 NSPS categories on December 17, 1985. EPA granted the request on February 12, 1986. LRAPA now has the authority to enforce these 22 NSPS source categories as set forth in 40 CFR Part 60.

EFFECTIVE DATE: February 12, 1986.

ADDRESSES: The relative material in support of this delegation may be examined during normal business hours at the following locations: Air Programs Branch (10A-85-23), Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Mark Hooper, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442-1949 FTS: 399-1949.

SUPPLEMENTARY INFORMATION: Pursuant to Section 111(c) of the Clean Air Act, as amended, the Regional Administrator of Region 10, EPA, delegated to the State of Oregon Department of Environmental Quality (ODEQ) on November 10, 1975, the authority to enforce the Standards of Performance for New Stationary Sources (NSPS). The delegation was announced in the **Federal Register** on February 20, 1976 (41 FR 7749). Subsequently, on April 23, 1982 (47 FR 20305), EPA concurred in a delegation by ODEQ to LRAPA for certain categories of the NSPS program. An additional delegation was made on February 10, 1983 (48 FR 8571).

On December 17, 1985, ODEQ requested approval of a delegation to LRAPA the authority to enforce 22 additional source categories under NSPS and on February 12, 1986, the Regional Administrator concurred in the following letter:

M/S 532

Fred Hansen, Director,
Department of Environmental Quality, P.O. Box 1760, Portland, Oregon 97207.

Dear Mr. Hansen: On December 17, 1985, you requested that EPA extend the subdelegation of authority to enforce 22 additional New Source Performance Standards (NSPS) to the Lane Regional Air Pollution Control Authority (LRAPA). We have reviewed that request and hereby grant the subdelegation to LRAPA with the authority to enforce the following categories:

Nitric Acid Plants (Subpart G)
Sulfuric Acid Plants (Subpart H)
Secondary Lead Smelters (Subpart L)
Secondary Brass & Bronze Production Plants (Subpart M)
Steel Plants-Electric Arc Furnaces (Subpart AAa)
Surface Coating of Metal Furniture (Subpart EE)
Lime Manufacturing Plants (Subpart HH)
Lead-Acid Battery Manufacturing Plants (Subpart KK)
Automobile & Light-Duty Truck Surface Coating Operations (Subpart MM)
Graphic Arts Industry-Publ. Rotogravure Printing (Subpart QQ)
Pressure-Sensitive Tape & Label Surface Coating Operations (Subpart RR)
Industrial Surface Coating-Large Appliances (Subpart SS)
Metal Coil Surface Coating (Subpart TT)
Asphalt Processing & Asphalt Roofing Manufacturing (Subpart UU)
Equipment Leaks of VOC in Synthetic Organic Chem. Mfg. (Subpart VV)
Beverage Can Surface Coating Industry (Subpart WW)
Bulk Gasoline Terminals (Subpart XX)
Flexible Vinyl Urethane Coating & Painting (Subpart FFF)
Synthetic Fiber Production Facilities (Subpart HHH)
Petroleum Dry Cleaners (Subpart JJJ)
Wool Fiberglass Insulation Manufacturing Plants (Subpart PPP)

In addition to the subdelegation of the 21 above listed categories, EPA grants authority directly to LRAPA to enforce the following category: Nonmetallic Mineral Processing Plants (Subpart OOO).

This delegation is subject to the conditions outlined in the original letter of delegation dated November 10, 1975 and published in the Federal Register (40 FR 7749) to the Oregon State Department of Environmental Quality. A Notice announcing this subdelegation will be published in the Federal Register in the near future.

The Notice will state, among other things, that effective immediately, all reports required pursuant to the federal NSPS from sources located in Lane County which were previously sent to the Director, Oregon State Department of Environmental Quality will now be sent to the Director, Lane Regional Air Pollution Authority. Additionally, LRAPA agrees to submit until further notice copies of reports required pursuant to 40 CFR 60.7(c) relating to excess emissions to EPA Region 10, Attention: Chief, Air Operations Section.

Since this subdelegation is effective immediately, there is no requirement that the state or local agency notify EPA of its acceptance. Unless EPA receives from the state or local agency written notice of objections within ten days of the date of receipt of this letter, the state or local agency will be deemed to have accepted all the terms of the subdelegation.

An advance copy of the **Federal Register** is enclosed for your information.

Sincerely,

Ernesta B. Barnes,
Regional Administrator.

Enclosure
cc: D. Arkell, LRAPA

This notice is being published to notify the public that a delegation of authority under NSPS has occurred.

Authority: Sec. 111(c) of the Clean Air Act, as amended. (42 U.S.C. 7401-7642.)

40 CFR Part 65

[A-5-FRL-2971-2]

Air Quality Implementation Plans; Delayed Compliance Order; C.W. Zumbiel Co., Norwood, OH

AGENCY: U.S. Environmental Protection Agency (U.S. EPA).

ACTION: Final rule.

SUMMARY: The Administrator of U.S. EPA hereby issues a Delayed Compliance Order (DCO) to C.W. Zumbiel Company. The Order requires the Company to bring volatile organic compound (VOC) emissions from its rotogravure printing lines into compliance with Ohio Rule 3745-21-09(Y), part of the federally approved Ohio State Implementation Plan (SIP). Compliance with the Order will preclude suits under the federal enforcement and citizen suit provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the Order during the period the Order is in effect.

EFFECTIVE DATE: This Final Rulemaking becomes effective on February 26, 1986.

FOR FURTHER INFORMATION CONTACT: Brent Marable, U.S. Environmental Protection Agency, Air Compliance Branch (5AC-26), 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6812.

SUPPLEMENTARY INFORMATION: On April 12, 1985, the Regional Administrator of U.S. EPA's Region V office published in the **Federal Register** (50 FR 14396) a notice setting out the provisions of a proposed federal Delayed Compliance Order for C.W. Zumbiel Company. The Order requires the Company to comply with the volatile organic compound emission limitations of Ohio Rule 3745-21-09(Y) by November 1, 1985, by the installation of add-on control equipment. The notice asked for public comments by May 13, 1985. No public comments were received. Therefore, effective this date, a Delayed Compliance Order is issued to C.W. Zumbiel Company by the Administrator of the U.S. EPA, pursuant to the authority of section 113(d) of the Clean Air Act. Compliance with the Order by the Company will preclude federal enforcement action under Section 113 of he Clean Air Act for violations of the SIP requirements covered by the Order. Citizen suits are similarly precluded.

Under section 307(b) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate Circuit by April 28, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2)).

List of Subjects in 40 CFR Part 65

Air pollution control.

This notice is issued under authority of section 113 of the Clean Air Act, as amended (42 U.S.C. 7413 and 7601).

Dated: February 6, 1986.

Lee M. Thomas,
Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

§ 65.400 [Amended]

1. By adding an entry to the Table in § 65.400—Federal Delayed Compliance Orders issued under sections 113(d) (1), (3), and (4) of the Act, to read as follows:

Source	Location	Order No.	SIP regulation(s) involved	Date of Federal Register Promulgation	Final compliance date
C.W. Zumbiel Co.	Norwood, Ohio		Rule 3745-21-09(Y)	2-26-86	11/1/85

United States Environmental Protection Agency, Region V

[Order No. EPA-5-85-113-A(a)-3]

Proceeding Pursuant to Sections 113(d) and 114 of the Clean Air Act, as Amended [42 U.S.C. 7413(d), 7414]

In the matter of C. W. Zumbiel Company, 2339 Harris Avenue, Norwood, Ohio, Respondent.

This Order is entered into between the C.W. Zumbiel Company ("Zumbiel") and the United States Environmental Protection Agency ("USEPA") and is issued this date pursuant to Sections 113(d) and 114 of the Clean Air Act, as amended, 42 U.S.C. 7413(d), 7414 (hereinafter, "Act"). This Order contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for public comment, and thirty days notice to the State of Ohio have been provided by USEPA in accordance with section 113(d)(1) of the Act, 42 U.S.C. 7413(d)(1).

BEST COPY AVAILABLE

VOL 51 ISS 38 FE 26 1986 UMI

To effectuate the mutual objectives of USEPA and Zumbiel and to resolve the matter constructively and without litigation. Zumbiel consents to the actions required by this Order. Zumbiel agrees that USEPA has the right to enforce this Order under the Act in a court of competent jurisdiction.

Findings

1. On November 1, 1984, USEPA issued a Notice of Violation pursuant to section 113(a)(1) of the Act, 42 U.S.C. 7413(a)(1), to Zumbiel for violation of Ohio State Implementation Plan (SIP) Rule 3745-21-09(Y) by Press #50 and Press #51 at the company's facility located at 2339 Harris Avenue in Norwood, Ohio ("facility"). Rule 3745-21-09(Y)(1) prohibits any owner or operator of a rotogravure printing line from causing, allowing, or permitting the discharge of volatile organic compounds (VOCs) from each such line unless: (a) No coating used on the line has a VOC content of greater than forty percent by volume, excluding water; or twenty five percent by volume of the volatile content; or (b) the line is equipped with a capture system which operates at an efficiency of seventy percent by weight, and a control efficiency which is at least ninety percent by weight. Rule 3745-21-04(C)(32) requires that these limitations be achieved by December 31, 1982.

2. Zumbiel owns and operates two color rotogravure printing lines. One is a Bobst Champlain 6 Rotogravure color printer with an inline cutter, designated as Press #50 (P001). The other is a Bobst Champlain 7 Rotogravure color printer, designated as Press #51 (P002). Both presses are subject to Rule 3745-21-09(Y)(1)(a) or, alternatively, Rule 3745-21-09(Y)(1)(b)(i)(b).

3. Pursuant to Section 113(a)(4) of the Act, 42 U.S.C. 7413(a)(4), an opportunity to confer with USEPA representatives was extended to Zumbiel, and a conference was held on December 5, 1984. During the conference Zumbiel explained the results of its investigations of compliance methods and efforts to come into compliance.

4. The violations of Rule 3745-21-09(Y) have continued beyond the thirtieth day after the date that Zumbiel received the Notice of Violation.

5. The Administrator has determined that, although Zumbiel has made significant efforts to achieve compliance with Rule 3745-21-09(Y), it was not able to do so by December 31, 1982. The Administrator has also determined that Zumbiel will be unable to achieve compliance prior to the dates set forth in the Compliance Program section of this Order.

6. After a thorough investigation of all relevant facts, including the seriousness of the violations and Zumbiel's good faith efforts to comply, and after opportunity for public comment, the Administrator has determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of the Order comply with section 113(d) of the Act, 42 U.S.C. 7413(d).

Therefore, the following terms are ordered and agreed:

Compliance Program

1. Zumbiel shall achieve and demonstrate compliance with Rule 3745-21-09(Y) at the facility. After November 1, 1985, Zumbiel shall not operate the facility in violation of Rule 3745-21-09(Y).

2. Zumbiel shall achieve and demonstrate compliance with Rule 3745-21-09(Y)(1)(b) in accordance with the following schedule:

A. Zumbiel has proposed to comply with Rule 3745-21-09(Y)(1)(b) by means of installation of a catalytic converter/heat recovery system manufactured by Pillar Corporation ("controls").

B. Zumbiel shall execute all necessary contracts for the purchase and installation of the controls not later than March 1, 1985.

C. Zumbiel shall acquire delivery of the controls by July 15, 1985.

D. Zumbiel shall complete installation of the controls, including collection equipment and all necessary auxiliaries, by September 30, 1985.

E. Zumbiel shall achieve and demonstrate compliance with Rule 3745-21-09(Y)(1)(b) not later than November 1, 1985. Compliance shall be demonstrated according to the test described in 40 CFR Part 60, Appendix A, Method 25 or, in the alternative, by a method determined by USEPA to be acceptable. Zumbiel shall notify USEPA of the date and time established for the test not less than fourteen days prior to such date. A written report of the test and its results shall be delivered to USEPA not later than fourteen days following the date of the test.

3. During such time that Zubiel is working toward compliance as outlined in paragraph 2 of the Compliance Program, above, Zumbiel shall also minimize VOC emissions in the following manner:

A. By not later than July 15, 1985, Zumbiel shall reduce the VOC content of its coatings and inks to a daily average of not more than 3.22 lbs VOC/lbs. solids on each of Presses #50 (P001) and #51 (P002); and

B. Effective immediately, Zumbiel shall substitute any reasonably available water-based coating and/or ink, for each solvent-based coating and/or ink used on each of Presses #50 (P001) and #51 (P002), provided that the substituted coating is first accepted by Zumbiel's customer. Customer acceptance shall be determined for each product affected by such substitution within fourteen days of such substitution.

4. The capture and control efficiencies of the controls shall meet the requirements of Rule 3745-21-09(Y)(1)(b)(i)(b) and Rule 3745-21-09(Y)(1)(b)(ii). Those sections require, *inter alia,* a capture efficiency that is at least seventy percent by weight, and a control efficiency that is at least ninety percent by weight.

5. With respect to the controls, Zumbiel shall:

A. Submit to USEPA not later than May 15, 1985, specifications, prints, and designs of the controls (including all hoods and collection equipment).

B. Maintain a continuous record of the operating temperature of the controls.

C. Submit to USEPA all information that USEPA may reasonably request in order to evaluate the controls, and/or operation thereof, by such date as USEPA shall establish.

6. USEPA shall have the right to reject any plans, specifications, or designs of the controls if in USEPA's judgment the controls will not meet the appropriate emission limitations.

7. In the event that Zumbiel fails to achieve compliance with Rule 3745-21-09(Y) by November 1, 1985, then it shall submit to USEPA in writing the following information for each coating, and/or ink used on each of presses #50 (P0001) and #51 (P002):

A. The identification of each coating and/or ink used on the press, as given by Zumbiel, and as given by the manufacturer of such coating or ink.

B. The VOC content, in percent by volume.

C. The water content, in percent by volume.

D. The density, in pounds per gallon.

E. The daily usage, in pounds per gallon.

F. The VOC content, as determined under Rule 3745-21-10(B) in:

i. percent by volume, excluding water; and

ii. percent by volume of the volatile content.

The information required by this paragraph 7 shall be submitted by January 15, 1986, for the fourth quarter of 1985, and for each quarter of 1986 if compliance with Rule 3745-21-09(Y) is not achieved by November 1, 1985. Any information reported hereunder for 1986 shall be reported to USEPA not later than 15 days after the close of the preceding quarter.

8. Not later than fourteen days after the scheduled completion date of any interim or final compliance schedule increment Zumbiel shall submit to USEPA a status report stating whether or not such compliance schedule milestone was achieved, and explaining any failure to meet such date.

9. All submittals, notifications and reports to USEPA pursuant to this Order shall be made to the Chief, Air Compliance Branch, Air Management Division, USEPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. A copy of each document submitted to USEPA shall be sent to the Ohio Environmental Protection Agency, Office of Air Pollution Control, Box 1049, 361 East Broad Street, Columbus, Ohio 43216.

10. Nothing contained in this Order shall affect the responsibility of Zumbiel to comply with State or local laws or regulations or other Federal laws or regulations.

11. The provisions of this Order in no way address Zumbiel's potential liability under Section 120 of the Act, As amended, 42 U.S.C. 7420, nor is this Order a "notice of noncompliance" as that term is applied in section 120(b)(3) of the Act. Zumbiel acknowledges that it has been notified that it may be subject to penalties under section 120 of the Act, but reserves all rights to contest the assessment and attempted collection of noncompliance penalties under that Section. 42 U.S.C. 7413(d)(1)(E).

12. This Order shall be terminated in accordance with section 113(d)(8) of the Act, 42 U.S.C. 7413(d)(8), if the Administrator or his delegate determines on the record, after notice and hearing, that an inability to comply with the applicable Ohio State Implementation Plan no longer exists.

13. Zumbiel is protected by section 113(d)(10) of the Act, 42 U.S.C. 7413(d)(10), from Federal enforcement action, and from citizen suits under section 304 of the Act, 42 U.S.C. 7604, for noncompliance with those parts of the Ohio State Implementation Plan covered by this Order until November 1, 1985, where Zumbiel is in compliance with the terms of this Order.

14. Nothing herein shall be construed to be a waiver by the Administrator of any rights or remedies under the Act, including, but not limited to, section 303 of the Act, 42 U.S.C. 7503.

15. This Order is effective upon publication in the Federal Register.

Dated: February 8, 1986.

U.S. Environmental Protection Agency.
Lee M. Thomas,
Administrator, United States Environmental Protection Agency.

Zumbiel, by the duly authorized undersigned, hereby consents to the provisions of this Order and believes it to be a reasonable means by which the facility can achieve compliance with the Ohio State Implementation Plan. Zumbiel further waives any and all rights under any provisions of law to challenge this Order or its validity, but reserves all rights it may have to object to or contest any allegation of violation of this Order.

Dated: March 12, 1985.

C.W. Zumbiel Company.
Robert W. Zumbiel,
President.

Cross References; Technical Amendments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; Technical amendments.

SUMMARY: This document revises cross references in 40 CFR Part 162 to reflect changes made by the removal of §§ 162.9-1 through 162.9-8 and the addition of Part 152 to the Code of Federal Regulations, as published in the Federal Register of August 1, 1984 (49 FR 30903). The removal of those sections and the addition of Part 152 became effective on April 25, 1985, as published in the Federal Register of April 25, 1985 (50 FR 16234). This regulation is a technical amendment which requires no opportunity for comment or public participation.

EFFECTIVE DATE: February 26, 1986.

FOR FURTHER INFORMATION CONTACT:

By mail: Jean M. Frane, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., Washington, DC 20460.

Office location and telephone number: Rm 1114B, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-0944).

Administrative practice and procedure, Intergovernmental relations, Labeling, Packaging and containers, Pesticides and pests.

Dated: February 10, 1986.

John A. Moore,
Assistant Administrator for Pesticides and Toxic Substances.

Therefore, 40 CFR Part 162 is amended as follows:

PART 162—[AMENDED]

1. The authority citation for Part 162 is revised to read as follows:

Authority: 7 U.S.C. 136a, 136d, 136q, 136s, 136v, and 136w.

§ 162.2 [Amended]

2. In § 162.2(g)(2), the reference in the last line to "§§ 162.9-1 through 162.9-8" is revised to read "Subpart E of Part 152 of this chapter."

§ 162.6 [Amended]

3. In § 162.6(b)(1), the reference in the last line to "§§ 162.9-1 through 162.9-8" is revised to read "Subpart E of Part 152 of this chapter."

§ 162.41 [Amended]

4. In § 162.41, the language "and Subpart E of Part 152 of this chapter" is added to the end of the second sentence of the introductory text.

§ 162.45 [Amended]

5. In § 162.45(b), the reference in the heading to "§§ 162.9-1 through 162.9-8" is revised to read "40 CFR Part 152, Subpart E".

§ 162.160 [Amended]

6. In § 162.160(b)(2), the reference to § 162.9-1(b) is revised to read "§ 152.81(b)(4) of this chapter".

§ 162.165 [Amended]

7. In § 162.165(a), the language "and Subpart E of Part 152 of this chapter" is added after "162.17" in the introductory text.

[PP 5F3214, 6F3305/R810; FRL-2973-7]

Pesticide Chemicals in or on Raw Agricultural Commodities; Tolerances for Iprodione

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the fungicide iprodione, its isomer and

VOL 51
ISS 38
FE 26
1986
UMI

metabolite, in or on certain raw agricultural commodities. This regulation, to permit the maximum levels of residues in or on the commodities, was requested in petitions submitted by Rhone-Poulenc, Inc.

EFFECTIVE DATE: Effective on February 26, 1986.

ADDRESS: Written objections, identified by the document control number (PP 5F3214, 6F3305/R810), may be submitted to the:

Hearing Clerk (A–110), Environmental Protection Agency, Rm. M–3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Henry M. Jacoby, Product Manager (PM) 21, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 227, CM# 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1900).

SUPPLEMENTARY INFORMATION: EPA issued notices, published in the **Federal Register**, which announced that Rhone-Poulenc, Inc., P.O. Box 125, Monmouth Junction, NJ 08852, submitted the following pesticide petitions to the EPA, requesting that the Administrator, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for the combined residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-*N*-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its isomer [3-(1-methylethyl)-*N*-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] and its metabolite [3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], in or on certain raw agricultural commodities as follows:

1. *PP 5E3214*. 50 FR 9123, March 6, 1985. Blueberries, boysenberries, currants, and raspberries at 15.0 parts per million (ppm).

2. *PP 6F3305*. 50 FR 46178, November 6, 1985. Broccoli at 25.0 ppm.

No comments were received in response to the notices of filing.

The data submitted in the petitions and other relevant material have been evaluated. The toxicological data considered in support of the tolerances include:

1. A three-generation rat reproduction study with a no-observed-effect level (NOEL) of 500 ppm (25 mg/kg body weight/day), a reproductive lowest-effect level (LEL) of 2,000 ppm (100 mg/kg body weight/day), and a systemic NOEL equal to or greater than 2,000 ppm (100 mg/kg body weight/day).

2. A rabbit teratology study in which the following doses were administered by gavage, 0, 100, 200 and 400 mg/kg body weight, resulting in a teratogenic NOEL equal to or greater than 400 mg/kg body weight. This study is considered unacceptable under current guidelines because no NOEL for fetotoxic effects were demonstrated.

3. A rat teratology study in which the following doses were administered by gavage, 0, 100, 200, 400 mg/kg body weight, resulting in a teratogenic NOEL greater than 400 mg/kg body weight.

4. A 24-month rat feeding/oncogenicity study using dosage levels of 125, 250, and 1,000 ppm (6.25, 12.5, and 50 mg/kg body weight/day), which showed no oncogenic effects under the conditions of the study and resulted in a systemic NOEL equal to or greater than 1,000 ppm.

5. An 18-month oncogenicity study in mice using dosage levels of 200, 500, and 1,250 ppm (28.6, 71.4, 178.6 mg/kg body weight/day), which showed no oncogenic effects under the conditions of the study.

6. A 1-year dog feeding study using dosage levels of 100, 600, and 3,600 ppm (2.5, 15, and 90 mg/kg body weight/day) with a NOEL of 100 ppm (2.5 mg/kg body weight/day) and a LEL of 600 ppm (15 mg/kg body weight/day).

7. A 90-day dog feeding study using dosage levels of 800, 2,400, and 7,200 ppm (20, 60, and 180 mg/kg body weight/day) with a NOEL of 2,400 ppm (60 mg/kg body weight/day) and a LED of 7,200 ppm (180 mg/kg body weight/day).

8. A mammalian cell forward mutation study, Chinese hamster ovary (CHO) metaphase analysis study, and sister chromatid exchange study were negative for mutagenic effects and a DNA damage study was positive.

Data currently lacking include a second teratology study using gastric intubation, and an acute dermal study. The second teratology study was required under section 3(c)(2)(B) of FIFRA (7 U.S.C. 136(c)(2)(B)). The study has been received and is under evaluation by the Agency.

The acceptable daily intake (ADI) based on the three-generation rat reproduction study (NOEL of 25 mg/kg/day) and using a 100 fold safety factor, is calculated to be 0.2500 mg/kg of body weight/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 15.00 mg/day. The theoretical maximum residue contribution (TMRC) from the tolerances is .065 mg/day and utilizes 0.44 percent of the MPI. These tolerances and the published tolerances utilize a total of 12.74% of the MPI.

The nature of the residues is adequately understood and an adequate analytical method, gas liquid chromatography using an electron capture detector, is available for enforcement purposes. There are presently no actions pending against the continued registration of the chemical.

Based on the information and data considered, the Agency concludes that the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation, may within 30 days after the publication in the **Federal Register**, may file written objections with the Hearing Clerk at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

As required by Executive Order 12211, EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this regulation from the OMB review requirements of Executive Order 12291 pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that the regulations establishing tolerance levels or establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: February 11, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.399 is amended by adding and alphabetically inserting the commodities to read as follows:

§ 180.399 Iprodione: tolerances for residues.

(a) * * *

Commodities	Parts per million
* * * * *	
Blueberries	15.0
Boysenberries	15.0
Broccoli	25.0
Currants	15.0
* * * * *	
Raspberries	15.0
* * * * *

United States Standards for Grades of Frozen Quick-Cooking Beans or Frozen Quick-Cooking Peas

Correction

In FR Doc. 86-2657, beginning on page 4605, in the issue of Thursday, February 6, 1986, make the following correction:

1. On page 4605, third column, in the table of contents, § 52.6429, "Samples" should read "Sample".
2. On page 4606, first column, § 52.6423(c), in the sixth line, "bean" should read "beans".

BILLING CODE 1505-01-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 85-092]

Cattle From Canada

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the regulations in 9 CFR Part 92 concerning the importation into the United States of cattle from Canada. It is proposed to amend the regulations by designating the Canadian provinces of Ontario and Quebec as brucellosis certified free provinces and by allowing cattle classified as cattle from brucellosis certified free provinces of Canada to enter into the United States at certain existing ports of entry. It appears that this action is necessary to relieve restrictions on the importation of certain cattle from Canada since it has been determined that these provinces are free of brucellosis.

DATE: Written comments must be received on or before April 28, 1986.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 85-092. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday though Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Allan A. Furr, Chief Staff Veterinarian, Import—Export Animals and products Staff, VS, APHIS, USDA, Room 846, Federal Building, 6505 Belcrest Road Hyattsville, MD 20782. 301-436-8170.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 92 (referred to below as the regulations) regulate the importation into the United States of specified animals and animal products in order to prevent the introduction into the United States of various diseases. Section 92.20 of the regulations contains specific provisions concerning the importation into the United States of cattle from Canada. These provisions include, as a condition of importation, that cattle from Canada six months of age or older, except steers and cattle for immediate slaugher, must be accompanied by a brucellosis test certificate or brucellosis vaccination certificate.

Brucellosis Certified Free Provinces of Canada

To qualify for a brucellosis test certificate or brucellosis vaccination certificate, cattle from Canada six month of age or older, except steers and cattle for immediate slaughter, must meet one of the alternative sets of requirements set forth in § 92.20(c) of the regulations. One alternative set of requirements allows such cattle to qualify for a brucellosis test certificate if they originated from brucellosis certified free provisnces of Canada, if they have been tested for brucellosis with negative results within 30 days prior to their date of entry, and if they originated from a herd that had been maintained as a herd unit for at least one year prior to their exportation. Also, it should be noted that a herd unit is defined as:

> a herd in which all the cattle were born and raised within the herd or were moved directly from another herd located within the brucellosis certified free provinces of Canada, or were moved directly from a brucellosis certified free herd in accordance with Canadian requirements for movement into brucellosis certified free provinces of Canada.

The brucellosis certified free provinces of Canada are listed in § 92.1(w) of the regulations. Section 92.1(w) states as follows:

> (w) *Brucellosis certified free provinces of Canada.* Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland (including Labrador), Nova Scotia, Prince Edward Island, and Saskatchewan, known in Canada as brucellosis accredited free provinces.

This document proposes to amend § 92.1(w) adding the provinces of Ontario and Quebec to the list of brucellosis certified free provinces of Canada.

Based to the results of disease control surveillance and testing programs conducted by animal health authorities of the Canadian government, these two provinces have been accredited by the Canadian government as brucellosis free. Animal health authorities of the Canadian government have advised the Department that the last province was declared officially free of brucellosis in September 1985 and that there are no brucellosis-quarantined herds in these provinces.

Under Canadian law, as a condition to maintain status as a brucellosis accredited free province (as noted above in § 92.1(w), brucellosis certified free provinces are known in Canada as brucellosis accredited free provinces), dairy herds in the province must be subjected to a minimum of three milk ring tests for brucellosis each year. Also, non-dairy herds must have had a rate of a least 5 percent market cattle tests conducted each year or a complete herd test at the end of each 3-year period. Further, cattle for breeding purposes originating from provinces of Canada other than brucellosis accredited free provinces must comply with testing requirements for movement into the brucellosis accredited free provinces. If this proposal is adopted as a rule, all of the Canadian provinces will be included in the list of brucellosis certified free provinces.

Ports of Entry

Section 92.20(c)(2) provides, in part, that:

> Cattle to be imported into the United States from brucellosis certified free provinces of Canada shall be (A) moved entirely within the boundaries of the brucellosis certified free provinces of Canada from the farm of origin directly to the United States ports of entry of Eastport, Idaho; Houlton, Maine; Raymond, Opheim, and Sweetgrass, Montana; Pembina, Portal, and Dunseith, North Dakota; and Blaine, Sumas, Lyndon, and Oroville, Washington; or (B) such cattle shall be moved in a vehicle sealed with Canadian Government seals. If the cattle to be imported are shipped in sealed vehicles, the seal numbers shall be recorded on the certificate, and the seals may only be broken by a United States port veterinarian at the United States port of entry.

This document proposes to amend § 92.20(c)(2) by adding the existing Canadian border ports of Jackman, Maine; Detroit, Port Huron, and Sault Ste. Marie, Michigan; Alexandria Bay, Buffalo, Champlain, Ogdensburg, and Rooseveltown, New York; and Derby Line and Highgate Springs, Vermont; to the list of United States ports of entry through which cattle to be imported into the United States from brucellosis certified free provinces of Canada may be shipped. These port of entry provisions are designed to help ensure that cattle are transported only through brucellosis certified free provinces and thereby avoid contact with animals affected with or exposed to brucellosis. If these border ports are added to the list in § 92.20(c)(2), the list wil include all the Canadian border ports, since all of the Canadian provinces will be included in the list of brucellosis certified free provinces.

Executive Order 12291 and Regulatory Flexibility Act

This proposed rule has been reviewed in conformance with Executive Order 12291 and has been determined to be not a major rule. The Department has determined that this action would not have a significant effect on the economy; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and should have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprise to compete with foreign-based enterprises in domestic or export markets.

It is anticipated that if the proposed rule is adopted, there will be no significant change in the number of cattle imported into the United States from Canada and that there will be no significant change with respect to the cost of importing cattle into the United States from Canada.

For this rulemaking action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Under the circumstances explained above, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, it is proposed to amend the regulations in 9 CFR Part 92 as follows:

1. The authority citation for Part 92 would continue to read as set forth below:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

2. Section 92.1(w) would be revised to read:

§ 92.1 Definitions.

* * * * *

(w) *Brucellosis certified free provinces of Canada.* Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland (including Labrador), Nova Scotia, Ontario, Quebec, Prince Edward Island, and Saskatchewan, known in Canada as brucellosis accredited free provinces.

* * * * *

§ 92.20 Cattle from Canada.

3. The sixth sentence of paragraph (c)(2) of § 92.20 would be changed to: "Cattle to be imported into the United States from brucellosis certified free provinces of Canada shall be moved entirely within the boundaries of the brucellosis certified free provinces of Canada from the farm of origin directly to the United States ports of entry of Eastport, Idaho, Houlton and Jackman, Maine; Detroit, Port Huron, and Sault Ste. Marie, Michigan; Opheim, Raymond, and Sweetgrass, Montana; Alexandria Bay, Buffalo, Champlain, Ogdensburg, and Rooseveltown, New York; Dunseith, Pembina, and Portal, North Dakota; Derby Line and Highgate Springs, Vermont; and Blaine, Lynden, Oroville, and Sumas, Washington, or such cattle shall be moved in a vehicle sealed with Canadian governmental seals.

Done at Washington, DC, this 20th day of February 1986.

Gerald J. Fichtner,
Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

Food Safety and Inspection Service

9 CFR Part 322

[Docket No. 85-011P]

Delivery of Export Certificates

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is proposing to amend Part 322 (9 CFR Part 322) of the Federal meat inspection regulations by adding a provision to § 322.2(e) that would permit the filing of a duplicate export certificate with the U.S. Customs Service within four days of the clearance of a vessel carrying a shipment of meat products. This action is consistent with regulations of the United States Customs Service that allow a 4-day delay in the filing of the Complete Cargo Declaration. In the interim period, Customs has agreed to clear the vessel on the basis of a statement containing information as to the export certificate number. This action is necessary so that vessels carrying meat products can depart on schedule even though certain export certificates are not on file at the time of departure.

DATES: Comments must be received on or before: April 28, 1986.

ADDRESS: Written comments to: U.S. Department of Agriculture, Food Safety and Inspection Service, Policy Office, Attention: Annie Johnson, Room 3863,

VOL 51 ISS 38 FE 26 1986 UMI

South Agriculture Building, Washington, DC 20250. (See also "COMMENTS" under "SUPPLEMENTARY INFORMATION.")

FOR FURTHER INFORMATION CONTACT: Patricia Stolfa, Deputy Administrator, International Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–3473.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Agency has determined that this proposed rule is not a "major rule" under Executive Order 12291. It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This proposed rule would make more flexible and less burdensome certain paperwork requirements imposed by the Department.

Effect on Small Entities

The Administrator, FSIS, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601). The proposed rule would make more flexible and less burdensome certain paperwork requirements imposed by the Department.

Comments

Interested persons are invited to submit comments concerning this proposal. Written comments must be sent in duplicate to the Policy Office and should refer to the docket number located in the heading of this document. All comments received in response to this proposal will be available for public inspection in the Policy Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

Under the provisions of the Federal Meat Inspection Act (FMIA), an export certificate must be issued by an inspector covering meat products intended for export to and sale in a foreign country indicating that the products were sound and wholesome at the time of inspection. In addition, the FMIA prohibits the clearance for departure of any vessel carrying meat products unless and until an export certificate has been issued (21 U.S.C. 617). Section 322.2(e) of the Federal meat inspection regulations (9 CFR 322.2(e)) requires that the duplicate of the export certificate be delivered to the shipper for filing with the United States Customs Service (Customs) at the time the master's manifest or supplemental manifest is filed by the chief officer of the vessel with Customs, that is, on the day of departure (9 CFR 322.2(e)). However, Customs' laws and regulations allow shippers a 4-day delay in the filing of a Complete Cargo Declaration (manifest) if the vessel's cargo declaration is not complete (or if certain required shipper's export declarations are not on file), and a General Declaration is filed at departure time (46 U.S.C. 91, 19 CFR 4.75).

Recently, there have been several instances where a vessel carrying meat products has been denied clearance by Customs because the export certificate, covering meat products on board, was not available at the time the vessel was due to depart. This frequently occurs because certain importing countries require that a veterinarian sign the export certificate. All such products would be certified as being sound and wholesome, and the certificate would be prepared and the boxes stamped with the number of the export certificate. However, if the veterinarian is on an assignment covering more than one establishment, or if the product is being shipped from an establishment without veterinary coverage, then the veterinarian may not be able to send the signed certificate, verifying completion of inspection, in a timely manner. In these cases, if the veterinarian notifies plant management that product may be shipped, then the product may be moved from the establishment even without a signed certificate.

This proposed rule would permit the shipper, shipper's agent or the vessel's agent to provide to Customs a statement under the shipper's or agent's letterhead signed by the shipper briefly describing the shipment of the product, in those instances where the export certificate is not available at departure time. This description would include the number of boxes covered, number of pounds covered, type of product, and the number of the export certificate that covers the shipment of the product. For example, the following statement would be acceptable: "The *600* boxes, *36,000* pounds of *Beef Tenderloins* in the shipment are covered by *USDA Export Certificate No. MPA 52983.*" The export certificate number is readily available to the shipper because the outside of each container is required to be stamped with the number of the export certificate covering it before the shipment leaves the establishment. Customs has agreed to then clear the vessel for departure on the basis of the statement. The duplicate of the signed export certificate would be delivered to Customs by the shipper, shipper's agent or vessel's agent within four business days of the vessel's departure. The 4-day time frame is consistent with Customs' regulations that allow a Complete Cargo Declaration (manifest) or shipper's export declarations to be filed within four business days after clearance.

This proposed rule is expected to impact positively on all shippers and exporters, and on FSIS and the Customs Service, as it immediately relieves an unnecessary, FSIS-imposed restriction that conflicts with Customs' procedures and is currently causing enforcement problems for Customs and vessel delays for shippers transporting meat products as part of or all of their cargo. Since the product has been inspected and certified for export (the export stamp provides this assurance), unavoidable delay in the delivery of the certificate to Customs should not delay a vessel's departure.

Meat inspection, Exports.

Proposed Rule

PART 322—[AMENDED]

1. The authority citation for Part 322 continues to read as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1254.

2. Paragraph (e) of § 322.2 of the Federal meat inspection regulations (9 CFR 322.2(e)) would be amended by revising it to read as follows:

§ 322.2 Export certificates; instructions concerning issuance.

* * * * *

(e) The duplicate of the certificate shall be delivered to the shipper and shall be delivered by him to the agent of the railroad or other carrier which transports the consignment from the United States otherwise than by water, or to the chief officer of the vessel on which the export shipment is made, or to the vessel's agent, and shall be used only by such carrier and only for the purpose of effecting the transportation of the consignment certified. The chief officer of the vessel or the vessel's agent, shipper or shipper's agent shall file such duplicate with the Customs officer within four (4) days of the clearance of the vessel at the time of filing the complete manifest. In the interim period, the vessel will be cleared by Customs on the basis of a statement, under the shipper's or agent's letterhead, containing the number of boxes, the number of pounds, the product name and the USDA export certificate number that covers the shipment of the product.

BILLING CODE 3410-DM-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 842-3109]

C&D Electronics, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Jenison, Mich. manufacturer and marketer of cable television decoders to cease selling or distributing the decoders to any unauthorized purchasers. Additionally, respondents would be required to cease representing that: (1) Consumers can lawfully own or use decoders; (2) the use of decoders is legal without authorization from a cable company; or (3) ownership or use of a cable decoder is similar to the ownership or use of a telephone. Further, respondents would be required to make an affirmative disclosure with the sale of any of their cable television decoders.

DATE: Comments must be received on or before April 28, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: William MacLeod, Director, Chicago, Regional Office, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, IL 60603. (312) 353–4423.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having being filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Cable television decoders, Trade practices.

Before Federal Trade Commission

[File No. 842–3109]

Agreement Containing Consent Order to Cease and Desist

In the Matter of C&D Electronics, Inc., a corporation, and David Barwacz, and Larry Bostelaar, individually and as officers of the corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of C&D Electronics, Inc., a corporation, and David Barwacz and Larry Bostelaar, individually and as officers of said corporation, and it now appearing that C&D Electronics, Inc., a corporation, and David Barwacz and Larry Bostelaar, individually and as officers of said corporation, hereinafter sometimes referred to as proposed respondents, are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between C&D Electronics, Inc., by its duly authorized officer, and David Barwacz and Larry Bostelaar, individually and as officers of said corporation, and their attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent C&D Electronics, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Michigan, with its office and principal place of business located at 2026 Chicago Avenue, Jenison, Michigan 49428.

Proposed respondents David Barwacz and Larry Bostelaar are officers of said corporation. They formulate, direct and control the policies, acts and practices of said corporation and their address is the same as that of said corporation.

2. Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute and admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other order. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondents' address as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement

VOL 51
ISS 38
FE 26
1986
UMI

may be used to vary or contradict the terms of the order.

7. Proposed respondents have read the proposed complaint and order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For purposes of this Order, the following definitions will apply:

"Authorized person(s)" shall mean any person that is a cable operator or a cable system operator, operating a cable system, as defined herein, pursuant to a franchise issued by a cable franchising authority, or any person manufacturing or distributing cable television decoders, descramblers converter-decoders, or converter-descrablers pursuant to a contract, agreement, license or other arrangement with a cable operator or a cable system operator to provide, furnish or supply such products to a cable system.

"Cable operator" or "cable system operator" shall mean any person, partnership, or corporation that provides cable service over a cable system or that, directly of through one or more affiliates, owns a significant interest in any cable system or who otherwise controls or is responsible for, through any arrangement, the management and operation of a cable system.

"Cable system" shall mean a facility or combination of facilities, constructed or operated pursuant to a franchise, that consists of a set of closed transmission paths and associated signal generation, reception and control equipment and that is designed to provide cable service to multiple subscribers within a community or a satellite master antenna system (SMATV), that serves subscribers in one or more multiple unit dwellings under common ownership, control or management.

"Franchise" shall mean an initial authorization or renewal thereof, issued by a franchising authority, whether designated as a franchise, permit, license, resolution, contract, certificate, agreement or otherwise, which authorizes the construction or operation of facilities designed to provide cable service.

"Franchising authority" shall mean any state, political subdivision, or agency thereof, or any governmental entity empowered by Federal, State of local law to grant a franchise.

I

It is ordered that respondents C&D Electronics, Inc., a corporation, its successors and assigns, and its officers, and David Barwacz and Larry Bostelaar, individually and as officers of the corporation, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, offering for sale, sale or distribution in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, of any cable television decoder, descrambler, converter-decoder or converter-descrambler that may be used for decoding, descrambling, and/or intercepting in any manner whatsoever of all or any part of any cable television transmission do forthwith cease and desist from selling or distributing, any such product to any person that is not an authorized person hereunder.

II

It is ordered that respondents C&D Electronics, Inc., its successors and assigns, and its officers, and David Barwacz and Larry Bostelaar, individually and as officers of the corporation, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, offering for sale, sale, or distribution in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, of any cable television decoder, descrambler, converter-decoder or converter-descrambler that may be used for decoding, descrambling, and/or intercepting in any manner whatsoever of all or any part of any cable television transmission, do forthwith cease and desist from representing, directly or by implication that:

1. Any consumer may lawfully own or use such a product.

2. The ownership and use of any such product is the same as or similar to the ownership or use of telephone equipment.

3. Any consumer may lawfully use any such product without first obtaining authorization from a cable company and paying the required fees.

III

It is further ordered that respondents shall, for a period of five years after the date this Order becomes final, maintain and upon request make available to the Federal Trade Commission for inspection and copying copies of:

1. All sales invoices showing sales of any cable television decoder, descrambler, converter-decoder or converter-descrambler with the invoices showing the name of the person or persons, to whom the sale was made, along with their address(es) and the quantity of such products sold to such person(s).

2. Documents verifying that for each such sale the buyer was an authorized person hereunder.

IV

It is further ordered that respondents shall, in connection with the sale of any cable television decoder, descrambler, converter-decoder or converter-descrambler that may be used for the decoding, descrambling, and/or intercepting in any manner whatsoever of all or any part of any cable television transmission, disclose clearly and conspicuously in writing to the buyer the following statement:

> The possession and use of cable TV equipment on any cable TV system without specific authorization from a cable company and the payment of required fees is strictly prohibited in most states. C&D sells its products only to authorized persons.

V

It is further ordered that respondents shall forthwith distribute a copy of this Order to each of its agents, representatives and employees having advertising, marketing, sales or corporate policy responsibilities with respect to the subject matter of this Order and secure from each such person a signed statement acknowledging receipt of a copy of the Order.

VI

It is further ordered that respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

VII

It is further ordered that respondents David Barwacz and Larry Bostelaar shall, for a period of five (5) years after the date of service of this Order, notify the Commission of the discontinuance of their present employment and of their affiliation with any new business or employment, involving the manufacture, advertising, sale, offering for sale or distribution in commerce of any cable

television equipment or accessories, or of their affiliation with any new business or employment in which their duties or responsibilities would involve the manufacture, advertising, sale, offering for sale or distribution of cable television equipment or accessories, with each such notice to include respondent's new business address and a statement as to the nature of the new business or employment, as well as a description of their duties and responsibilities.

VIII

It is further ordered that respondents, within sixty (60) days from the date of service of this Order, shall file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from C&D Electronics, Inc., a corporation, and David Barwacz and Larry Bostelaar, individually and as officers of the corporation.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

This matter concerns the alleged sale of unauthorized cable television decoders, descramblers, converter-decoders or converter-descramblers (hereinafter collectively referred to as "decoders") to cable television subscribers. Cable companies provide the decoders to their subscribers in order to determine and charge for the level of programming service used. By purchasing a decoder from an unauthorized source, a cable subscriber could avoid payment of the required fees to the cable company.

The complaint accompanying the proposed order alleges that C&D Electronics and the individuals sold cable television decoders designed and used to allow unauthorized viewing by cable subscribers of certain cable television programming. According to the complaint the sale and use of C&D's decoders resulted in the loss to cable companies of potential or present subscription revenues, resulting in legitimate cable subscribers paying higher prices or receiving reduced services from cable companies. In addition, municipalities granting cable system franchises received reduced fees from the cable systems to the detriment of all residents of the municipality. These acts and practices were to the prejudice and injury of the public and constituted unfair acts or practices in violation of section 5 of the Federal Trade Commission Act.

The consent order defines the meaning of the terms "Authorized Person", "cable operator" or "cable system operator", "cable system", "Franchise" and "Franchising Authority" as those terms are used in the order. The rest of the consent order contains provisions designed to remedy the company's and the individual's alleged violations of section 5.

Part I of the order prohibits respondents from selling or distributing cable television decoders to any person that is not an authorized person under the order.

Part II requires respondents to cease representing directly or by implication that any consumer can lawfully own or use a decoder; that the use of such a device is legal without first obtaining authorization from, and paying the required fees to, a cable company; or that ownership and use of a cable decoder is the same or similar to the ownership or use of a telephone.

In addition, respondents must make the following affirmative disclosure in connection with the sale of any cable television decoder:

> The possession and use of cable-TV equipment on any cable-TV system without specific authorization from a cable company and the payment of required fees is strictly prohibited in most states. C&D sells its products only to authorized persons.

The Commission is interested in public comment on the appropriateness of revising this disclosure to reference the recently enacted Cable Communication Policy Act of 1984, 47 U.S.C. 521 *et. seq.*, which prohibits the manufacture and distribution of cable equipment intended for the unauthorized reception of any cable communications.

Respondents must also maintain, for a period of five (5) years, such sales records as will show their compliance with the terms and provisions of the order. Respondents must also distribute a copy of the order to appropriate employees, and provide the Commission at least thirty (30) days notice of any proposed changes in the corporate Respondent. Furthermore, the individual respondents, for a period of five (5) years, must notify the Commission of the discontinuance of their present employment and their affiliation with any new business or employment that would involve the manufacture, advertising, sale, offering for sale or distribution of any cable television equipment or accessories.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,
Secretary.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H-040]

Health and Safety Standards; Occupational Exposure to 4,4'-Methylenedianiline (MDA)

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice. Response to the Environmental Protection Agency (EPA) under section 9(a) of the Toxic Substances Control Act (TSCA).

SUMMARY: This notice was prepared in response to the EPA notice of July 5, 1985 (50 FR 27674) which announced that EPA was referring MDA to OSHA under section 9(a) of TSCA. OSHA has determined, on the basis of the evidence available, that the risk described by EPA may be eliminated or reduced to a significant extent by a workplace standard which regulates worker exposure. Further, OSHA believes, on the basis of preliminary data, that the adoption of an occupational standard for worker exposure to MDA is economically and technologically feasible. The Agency is therefore examining various exposure scenarios which might serve as the basis for a proposed regulation. OSHA has also concluded that there is a reasonable basis to believe that the manufacture and use of MDA presents a significant risk to the health of exposed workers. This notice also describes the regulatory activities initiated by OSHA including negotiated rulemaking.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, OSHA, U.S. Department of Labor, Office of Public Affairs, Room N-3641, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone: (202) 523–8151.

SUPPLEMENTARY INFORMATION:

I. Background

OSHA announced its intention to study and possibly regulate workplace exposure to the chemical, MDA, in an Advance Notice of Proposed Rulemaking (ANPR) [48 FR 42836; September 20, 1983], published jointly with EPA. The comments and information received in response to the ANPR were submitted to the EPA Docket No. OPTS–64000A. All relevant materials from this docket are now a part of the OSHA Docket (H–040). All citations herein refer to this docket.

OSHA has analyzed the material submitted in response to the ANPR, including the risk assessment developed by EPA and the technological and economic feasibility documents. As a result of this analysis, the Agency has determined that a significant risk may be associated with worker exposure to MDA. This determination supports the evaluation of risk by EPA.

OSHA and EPA examined the docket information and made regulatory determinations simultaneously. On July 5, 1985, EPA published a Federal Register notice which indicated that MDA rulemaking would be referred to OSHA in accordance with EPA's section 9 TSCA provisions (90 Stat. 2030; 15 U.S.C. 2608) (50 FR 27674). This notice gave OSHA 180 days (later extended 45 days) to respond. Specifically, the EPA referral notice states that the unregulated manufacture and use of MDA presents an unreasonable risk of injury to human health, and that the risk may be prevented or reduced to a sufficient extent by actions taken under the Occupational Safety and Health Act (OSH Act). EPA, following the procedural requirements of section 9(a) of TSCA, requested OSHA to determine if the risks described in the EPA report may be prevented or reduced to a sufficient extent by action taken under the OSH Act. If such a determination is made, then OSHA was requested to issue an order declaring whether the manufacture and use described in the report present the risk therein described (50 FR 27675).

In this notice, OSHA is responding to the EPA referral by making a preliminary determination that an OSHA standard limiting occupational exposure to MDA could sufficiently prevent or reduce the risk to exposure, and that such risk has been accurately described by EPA in its report.

II. OSHA's Evaluation; Findings

Health Effects Associated With Exposure to MDA

Both chronic and acute adverse health effects are associated with occupational exposure to MDA. The available evidence suggests that the most severe chronic effect resulting from occupational exposure to MDA is cancer. Both primary and secondary information in the record were used to estimate the risk of cancer among workers exposed to MDA. The primary information consisted of long-term animal studies and epidemiological data. The available secondary information consisted of structure-activity relationships, the results of short-term tests, pharmacokinetic studies, comparative metabolic studies, and data on other relevant toxicological responses.

The most persuasive study has been conducted by National Toxicology Program (NTP) (Ex. 18b; 18c). The study involved the oral administration of MDA dihydrocholoride in drinking water to 50 Fischer 344 rats and 50 B6C3F1 mice of each sex. Significantly increased incidences of tumors were observed in the thyroid and the liver in both sexes of both species. Cancers of the adrenal glands, lung and lymph nodes were also induced in mice and rare tumors such as transitional cell papillomas of the urinary bladder were induced in female rats. Other studies, in addition to the NTP study, have also demonstrated the induction of tumors in experimental animals (Ex. 14; Ex. 151).

In 1983, the National Institute for Occupational Safety and Health (NIOSH) conducted a Health Hazard Evaluation (the only available epidemiological study) (Ex. 232) of MDA on exposed workers employed at a helicopter manufacturing plant. This study demonstrated an association between occupational exposure to MDA and a significant proportional increase in the risk of mortality from certain site-specific cancers. NIOSH noted a significant elevation in the proportion of

deaths due to cancers of the bladder, large intestine, skin and lymphosarcoma. When proportional mortality was based only on cancer deaths, the excess of bladder cancer deaths remained significantly elevated. In addition to the bladder cancer deaths, there were two bladder cancers observed among the MDA exposed workers who were still alive.

For some time, investigators have demonstrated carcinogenicity with several analogues of the class of bis-benzenamines including MDA. These analogues induce cancer of the liver and thyroid glands of rodents.

MDA is also structurally related to benzidine, a recognized bladder carcinogen in humans (IARC, 1979). Even though the limitations of the PMR method of study are well known, the results obtained in the NIOSH epidemiological study undoubtedly heighten concern that MDA, like its analogue benzidine, may cause bladder cancer in humans.

In summary, the strongly positive results demonstrated by MDA in the NTP cancer bioassay, evidence that the structural analogues cause similar cancers in animals and that one analogue (benzidine) causes bladder cancer in humans, plus data suggesting the ability of MDA to interact with genetic material, all lead to the conclusion that this chemical is carcinogenic in animals and may be carcinogenic to humans. This conclusion is further heightened by the observation of a significant proportional increase in bladder cancer mortality as demonstrated by the NIOSH study. In animals, MDA has also been associated with neurotoxicity, potential adverse reproductive effects, and disturbances in metabolism. A characteristic acute toxic hepatitis also has been observed in several studies of workers following accidental exposure to MDA.

Quantitative Risk Assessment for MDA

Details of the data used by EPA to estimate the risks from exposure to MDA, and the conclusions based on that evidence are presented in the EPA support document "Risk Characterization for 4,4'-Methylenedianiline" (Ex. 3a, b, c). OSHA analyzed these data and the accompanying conclusions and agrees with the evaluation provided by EPA. The EPA assumptions that the risk to workers exposed under the conditions of a work place standard, based on 10 hours per week of dermal exposure and 40 hours per week of inhalation exposure at 0.001 ppm (0.008 mg/m^3) (accounting for the use of protective clothing and good industrial hygiene practices), would result in an estimated excess lifetime cancer risk of about 1 in 100,000 to about 2 in 10,000 is consistent with OSHA's findings.

OSHA adjusted the data furnished by EPA to estimate excess occupational lifetime cancer risks for workers exposed to various airborne and dermal concentrations of MDA for 8 hours per day, 5 days per week, 46 weeks per year, for 45 years starting at age 20. Total daily doses are received through inhalation, dermal exposures, or a combination of both.

Estimates based on current exposure situations indicate that workers exposed to airborne concentrations ranging from 0.57 mg/m^3 (0.07 ppm) to 0.38 mg/m^3 (0.05 ppm) and dermal exposure ranging from 9.0–250 mg/cm^2-hr demonstrate an excess cancer risk ranging from 60 to 200 extra cancer deaths per 1,000 workers.

OSHA also examined the effect that dermal exposure has on the worker. Hypothetical estimates were constructed (based on actual work place data) which assumed zero inhalation exposure. Dermal exposures ranged from 2.1 to 4.2 μg/cm^2/hr (palms of the hands). The estimated occupational lifetime excess cancer risk is 1 to 2 per 1,000 workers. Assuming zero dermal exposure and an inhalation exposure of 0.01 mg/m^3 per 8-hours per day over a 40 hour work week, the estimated excess cancer risk associated with this exposure limit would be 3 per 10,000. Estimated risks associated with other combinations of inhalation and dermal exposure were also examined (See Ex. 247).

The results of the NTP bioassay, the evidence of the NIOSH proportional cancer mortality ratio study, and the structural relationship between MDA and other recognized human carcinogens, combined with generally accepted methods of estimating human risk based on well designed and well executed animal studies, allow OSHA to make a preliminary estimate of the risks that may result from various combinations of dermal and atmospheric exposures (See Ex. 247). The results of the preliminary risk assessment indicate that MDA may present a carcinogenic risk to workers occupationally exposed and that establishing a permissible exposure limit and prohibiting dermal exposure will likely result in a significant reduction in the cancer risk.

Significance of Risk

OSHA has reviewed the toxicological and epidemiological literature and the record evidence on MDA described in the Health Effects section. The record, as summarized herein, shows that MDA exposure may be associated with a wide range of adverse health effects. The ability of MDA to induce tumors in animals, suggestive evidence that MDA may induce bladder tumors in humans, and data indicating that MDA interacts with genetic material lead to the conclusion that this chemical is an animal carcinogen and may be carcinogenic to humans. The NTP study clearly indicates that MDA is carcinogenic in both rats and mice when orally administered.

In animals, MDA has also been associated with neurotoxicity, potential adverse reproductive effects, and disturbances in metabolism. In addition, human studies strongly indicate that MDA causes a characteristic acute toxic hepatitis.

In evaluating the observed risks predicted by EPA and those anticipated by OSHA's review of the data in terms of OSHA's "significant risk" requirements. OSHA relied upon "best estimates" of current occupational levels, in that there is currently no permissible exposure limit for MDA. According to EPA data, the current atmospheric occupational exposure levels are approximately 0.05 to 0.07 ppm with dermal exposures ranging from 9.0–250 mg/cm^2-hr. A preliminary risk assessement based on the NTP Study suggests that, as these limits, there may exist an excess cancer risk ranging from 60 to 200 extra cancer deaths per 1,000 workers respectively. OSHA used these levels in examining risk rather than the existing ACGIH TLV of 0.1 ppm because some of the industry appears already to have reduced occupational exposures. However, as indicated previously, not all of the companies responded to the CMA survey and provided current exposure data. Therefore, although OSHA used "best estimates" in making baseline determinations, OSHA does realize that many of the companies providing and using MDA may be following ACGIH limits. In this case, the potential risk of cancer at 0.1 ppm (.81 mg/m^3) (inhalation only) is 20 per 1,000. Further, because there is currently no existing permissible exposure limit for MDA, there are no requirements to achieve any exposure limit. Therefore, some employers may exceed even the ACGIH limit resulting in an even greater potential risk.

OSHA will examine these permissible exposure limits in accordance with the OSH Act as interpreted by the Courts. In addition, the estimates of risk only consider the standard's exposure level and do not take into account the other

VOL 51 ISS 38 FE 26 1986 UMI

protective provisions of the standard which may be included such as respirators and medical surveillance. The decrease in risk to be achievd by these additional provisions cannot be adequately quantified beyond a determination that they will add to the protection provided by the PEL alone. Compliance with an occupational health standard which provides for medical surveillance, monitoring, recordkeeping, workpractices, use of personal protective equipment, etc., will provide protection beyond that of merely establishing a permissible exposure limit.

As a result of these preliminary assessments, the Agency has selected MDA for rulemaking. OSHA has also decided that negotiated rulemaking will be used to assist in the development of a proposed rule for MDA (50 FR 42789).

OSHA has initiated rulemaking activities which include the development of a risk assessment, a technological and economic feasibility analysis, a health effects summary, and a summary of the components needed in a proposed standard. These material is being generated for use by the Negotiated Rulemaking Committee, although OSHA also intends to utilize this information in developing a proposed ruel for MDA exposure. Furthermore, should the negotiated rulemaking process fail. OSHA intends to proceed with rulemaking under section 6(b) of the OSH Act. The following section discusses the regulatory measures that could be used to control exposure in the workplace. OSHA agrees with EPA and has concluded that workplace control methods appear both technologically and economically feasible. OSHA is considering various exposure scenarios which are discussed below.

Regulatory Approach and Feasibility

OSHA's overall analytic approach for setting worker health standards is a four step process consistent with recent court interpretations of the OSH Act and rational objective policy formulation. In the first step, quantitative risk assessments are performed where possible and considered with other relevant factors to determine whether the substance to be regulated poses a significant risk to workers. In the second step, OSHA considers which, if any, of the proposed standards being considered for the substance will substantially reduce the risk. In the third step, OSHA looks at the best available data to set the most protective exposure limit that is both technologically and economically feasible. In the fourth and final step, OSHA considers the most cost-effective way to achieve the objective. In the following sections, OSHA examines the technological and economic feasibility of extablishing a standard regulating occupational exposure to MDA. For purposes of determining the feasibility of regulating occupational exposure to MDA and to determine the likely of intended regulations, OSHA has examined five possible exposure scenarios associated with significant occupational risk which are (1) PEL-0.06 mg/m^3; (2) 0.03 mg/m^3; (3) 0.01 mg/m^3; (4) 0.001mg/m^3; and (5) do not regulate. The industries examined where surveyed to determine the baseline exposures and what controls were currently in place. Additional controls to achieve the proposed PEL's were estimated.

MDA is a large-volume industrial chemical used primarily as an intermediate in the production of polyurethane foams and other polyurethane and isocyanate-based products. About 98% of the MDA produced is used as an intermediate in the production of methlylene-bis-phenylisocyanate (MDI). The non-MDI uses include epoxy curing, urethane curing, MOCA production, Ketimine production, production of coatings for P.C. boards and aircraft parts, rubber processing chemical, Qiana® intermediate, dyes and pigments, antioxidant in lubricating oil, corrosion inhibitor, pharmaceutical, pesticide intermediate.

MDA is normally handled as a liquid or in the form of flakes, granules, or lumps. It has an extremely low vapor pressure. Exposure usually occurs as a result of a spill or loss during handling operations such as filling or emptying of containers, rather than from the release of vapors or airborne dusts.

Local exhaust ventilation is used rather than higher volume general dilution air systems. Effective control requires minimizing air motion at the source (thermal currents, machinery motion, material motion, operator movements, room air current, etc.) and capturing the contaminants on a filter through an exhaust hood. Ideally the operation should be completely enclosed, providing access and working openings only as needed. The number of openings should be kept to a minimum and located away from the natural path of the contaminant travel.

The filing of containers (drums, barrels, bags, etc.) with dry MDA represents a potentially significant source of exposure. Both inhalation and skin contact could result from dusting and spills. Relatively standardized engineering designs and other workplace controls are available to control these problems.

The handling of dry MDA is expected to present the greatest potential source of workplace exposures. Various hooding arrangements are in use in industry to draw dust particles away from the worker during material handling operations (i.e., transport, mixing with other chemicals, and small packaging operations). One common method is the use of restricted area rooms with a slotted ventilation opening on one wall facing the wall with the door.

Personal protective equipment and workpractices will also limit employee exposure to MDA. Equipment consists of chemical splash goggles, impervious gloves, protective clothing (including footwear, and respirators. The respirator used will depend upon the concentrations to which the employee may be exposed.

Depending upon the industrial hygiene measures, protective equipment, and engineering controls being employed, risks can range from approximately 2 in 10 in uncontrolled circumstances to 3 in 100,000 in very tightly controlled circumstances. Considering that probably less than 10,000 workers are potentially exposed to MDA most for less than 40 hours per week, the actual risk will be lower.

The Agency has conducted a feasibility analysis which provides the best estimate of the costs of requiring a workplace standard throughout the industry (including capital and operating and maintenance costs for engineering controls, dermal protection, and all other compliance elements) (Ex. 246). The Agency does not anticipate that the costs of controls will have significant impact on the national economy or on small business. OSHA therefore believes that the existing manufacturing and uses of MDS present a significant risk of injury to the health of exposed workers.

Reduction of Risk to a Sufficient Extent by Action Taken Under OSH Act

Exposure to MDA appears to occur primarily in the workplace. The OSH Act is the primary statute for protecting the health and safety of workers and allows OSHA to regulate chemicals in the workplace. In this document, OSHA preliminarily has determined that the existing risks are significant and that the promulgation of a health standard regulating control to MDA will reduce these anticipated risks. Through the establishment of a permissible exposure limit which appears to be technologically and economically

feasible. OSHA can reduce the potential exposure which might occur through inhalation. Further, through the use of personal protective equipment, labeling, worker exposure monitoring, medical surveillance, and other industrial hygiene practices the exposure resulting from both inhalation and dermal absorption can be reduced.

III. Determination and Order

After careful consideration of: (1) The EPA report; (2) the relevant materials regarding occupational exposure to MDA in both the EPA and OSHA dockets; (3) the preliminary regulatory impact assessment conducted by OSHA regarding the technological and economic impact of an MDA standard; and (4) an independent risk assessment conducted by OSHA which generally confirmed EPA's estimates of risk, OSHA hereby makes the following Determination and Order:

> Occupational exposure to MDA presents a significant risk to workers that can be prevented or reduced to a sufficient extent by a workplace standard promulgated and enforced by OSHA.

The above Determination and Order is issued pursuant to section 9(a) of TSCA and is based on all of the information available to OSHA at this time. However, the rulemaking authority found in section 6 of the OSH Act provides the procedures and requirements for promulgating occupational safety and health standards. These procedures and requirements allow for the development of a complete rulemaking record, affording full participation by interested parties. Nothing in this document shall serve to diminish any right, requirement, or procedure established by the OSH Act, including the right to a hearing and the obligation to base a standard on substantial evidence in the record considered as a whole.

This Notice was prepared under the direction of Patrick R. Tyson, Acting Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue, NW., Washington, DC 20210. It is issued pursuant to section 9(a) of the Toxic Substances Control Act (90 Stat. 2030; 15 U.S.C. 2608), and Secretary's Order No. 9–83 (48 FR 35736).

Signed at Washington, DC, this 20 day of February, 1986.

Patrick R. Tyson,

Acting Assistant Secretary of Labor.

BILLING CODE 4510-26-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of proposed program amendments to the Indiana Permanent Regulatory Program (hereinafter referred to as the Indiana program) received by OSMRE pursuant to the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The proposed amendments submitted by the State on January 31, 1986, would amend the Indiana regulations concerning civil penalties, incidental boundary revisions and use of explosives.

This document sets forth the times and locations that the Indiana program and proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment and information pertinent to the public hearing.

DATE: Written comments relating to Indiana's proposed modification of its program not received on or before 4:00 p.m. March 28, 1986, will not necessarily be considered.

If requested, a public hearing will be held on March 24, 1986, beginning at 10:00 a.m. at the location shown below under "ADDRESSES."

ADDRESSES: Written comments should be mailed or hand-delivered to: Mr. Richard D. Rieke, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

If a public hearing is held, its location will be at: OSMRE Indianapolis Field Office, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana; Telephone: (317) 269–2600.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. Rieke, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 45204; Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Indiana program, the proposed amendment, and a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSMRE office and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive free of charge, one single copy of the proposed amendment by contacting the Indianapolis Field Office listed below:

Office of Surface Mining Reclamation and Enforcement, Room 5124, 1100 L Street, NW., Washington, DC 20240.

Office of Surface Minning Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana.

Indianapolis Department of Natural Resources, 608 State Office Building, Indianapolis, Indiana 46204.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanation in support of the commenter's recommendations. Comments not received by March 28, 1986 or received at locations other than the OSMRE Indianapolis, Indiana Field Office, will not be necessarily considered.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business March 18, 1986. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to

VOL 51
ISS 38
FE 26
1986
UMI

do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSMRE representatives to discuss the proposed amendment may request a meeting at the OSMRE office listed in "**ADDRESSES**" by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.**"

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

II. Discussion of the Proposed Amendment

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982 **Federal Register** (47 FR 32071–32108).

On January 31, 1986, the Indiana Department of Natural Resources submitted to OSM pursuant to 30 CFR 732.17, proposed State program amendments for approval. Briefly, the proposed amendments and cities are as follows:

1. Indiana proposes to amend its requirements for when a civil penalty shall be assessed. 310 IAC 12–6–11.
2. Indiana proposes to amend its provisions for assigning points for civil penalty amount determinations. 310–IAC 12–6–12.
3. Indiana proposes to add a point system for determining the dollar amount of civil penalties according to the points assigned. 310 IAC 12–6–12.5.
4. Indiana proposes to amend its rules for permit revisions to establish which boundary revisions are incidential boundary revisions. 310 IAC 12–3–121.
5. Changes are proposed concerning pre-blast surveys in response to a required program amendment in 30 CFR 914.16(b)(1). 310 IAC 12–5–34 and 12–5–100.
6. Changes are proposed concerning use of explosives requirements in response to required program amendments in 30 CFR 914.16 (b)(2), (b)(3) and (b)(4). 310 IAC 12–5–36 and 310 IAC 12–5–101.

Pursuant to 30 CFR 732.15 and 732.17, the Director requests public comment on the adequacy of the above modifications. If the Director determines that the proposed modifications are in accordance with SMCRA and consistent with the Federal regulations, the amendment will be incorporated as part of the approved Indiana program.

Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption for sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 914

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: February 19, 1986.

James W. Workman,

Deputy Director, Operations and Technical Services.

30 CFR Part 935

Public Comment Procedures and Opportunity for Public Hearing on Proposed Modifications to the Ohio Permanent Regulatory Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for a public comment period and for requesting a public hearing on the substantive adequacy of program modifications submitted by Ohio as amendments to the State's permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendments consist of proposed changes to the Ohio regulations at 1513–3–01, 1513–3–02, 1513–3–03, 1513–3–04, 1513–3–16, 1513–3–17, and 1513–3–21. These rules govern the procedures used by the Reclamation Board of Review.

This notice sets forth the time and locations that the Ohio program and proposed amendments will be available for public inspection, the comment period during which interested persons may submit written comment on the proposed amendments, and the procedures that will be followed for the public hearing.

DATES: Written comments from the public not received by 4:30 p.m., March 28, 1986, will not necessarily be considered in the decision on whether the proposed amendments should be approved and incorporated into the Ohio regulatory program. If requested, a public hearing on the proposed amendments has been scheduled for March 18, 1986. Any person interested in speaking at the hearing should contact Ms. Nina Rose Hatfield at the address or telephone number listed below by March 13, 1986. If no person has contacted Ms. Hatfield by that date to express an interest in the hearing, the hearing will be canceled. If only one person requests an opportunity to speak at the public hearing, a public meeting, rather than a hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: The public hearing if requested, is scheduled for 1 p.m. in Room 202, Columbus Field Office, 2242 South Hamilton Road, Columbus, Ohio 43227.

Written comments and requests for an opportunity to speak at the hearing should be directed to Ms. Nina Rose Hatfield, Field Office Director, Columbus Field Office, Office of Surface Mining Reclamation and Enforcement, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866–0578.

Copies of the Ohio program, the proposed modifications to the program, a listing of any scheduled public meetings, and all written comments received in response to this notice will be available for public review at the OSMRE Field Office listed above and at the OSMRE Headquarters Office and the Office of the State regulatory authority listed below, during normal business hours Monday through Friday, excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Room 5124, 1100 "L" Street, NW., Washington, DC 20240

Ohio Division of Reclamation, Building B, Fountain Square, Columbus, Ohio 43224

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, Office of Surface Mining Reclamation and Enforcement, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866–0578.

SUPPLEMENTARY INFORMATION:

I. Background on the Ohio Program

The Ohio program was approved effective August 16, 1982, by notice published in the August 10, 1982, **Federal Register** (47 FR 34688). Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Ohio program can be found in August 10, 1983 **Federal Register**.

II. Submission of Revision

By letter dated January 15, 1986, Ohio submitted proposed amendments to the rules of procedures for the Reclamation Board of Review (RBR).

The proposed amendments consist of the following:

(1) Revisions to 1513–3–01 *Definitions*, "burden of persuasion" and "proffer";

(2) Revisions to 1513–3–02 *Internal regulations*, rules for a quorum, deciding tie votes, keeping records of the RBR's actions, issuance of subpoenas, and governing proceedings following amendment of the RBR's rules;

(3) Revisions to 1513–3–03 *Appearance and practice before the board*, concerning ethical standards of persons appearing before the board and representation before the RBR;

(4) Revisions to 1513–3–04 *Appeals to the RBR*, concerning identification of counsel, if counsel is used, contents of an appeal, and grounds for dismissing an appeal;

(5) Revisions to 1513–3–16 *Conduct of evidentiary hearings*, rules concerning evidence, stipulation, written testimony, witnesses, post-hearing briefs, and additional oral arguments;

(6) Revisions to 1513–3–17 *Voluntary dismissal and settlement* setting forth rules for a settlement prior to a final order by the RBR; and

(7) Revisions to 1513–3–21 *Award of costs and expenses.*

The full text of the proposed program amendments submitted by Ohio is available for public inspection at the addresses listed above. Upon request to OSMRE's Field Office Director, each person may receive, free of charge, one single copy of the proposed amendments. The Director now seeks public comment on whether the proposed amendments are no less stringent than SMCRA and no less effective than the Federal regulations. If approved, the amendments will become part of the Ohio program.

III. Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1291(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paper Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[A-3-FRL-2974-8]

Air Quality Implementation Plans; Delayed Compliance Orders; Pennsylvania Department of Environmental Resources

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rulemaking; invitation for public comment.

SUMMARY: EPA has proposed to approve an Administrative Order issued by the Pennsylvania Department of Environmental Resources to ACF Industries Inc. The Order requires the company to bring air emissions from its two railroad car manufacturing facilities located in Milton Township, Northumberland County, Pennsylvania into compliance with certain regulations contained in the federally-approved Pennsylvania State Implementation Plan (SIP) for the control of ozone. Compliance shall be achieved by April 21, 1986 utilizing low solvent technology (LST) and April 21, 1987 should LST be abandoned and add-on controls installed. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a Delayed Compliance Order pursuant to the Clean Air Act (the Act). If approved by EPA, the Order will constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violation of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the Order as a Delayed Compliance Order.

DATE: Written comments must be received on or before March 28, 1986.

ADDRESSES: Comments should be submitted to Director, Air Management Division, EPA Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at the EPA Region III address above during normal business hours.

VOL 51 ISS 38 FE 26 1986 UMI

Division, U.S. EPA Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107, Telephone: (215) 597–6553.

SUPPLEMENTARY INFORMATION: ACF Industries, Inc. operates two railroad car manufacturing facilities in Milton Township, Northumberland County, Pennsylvania. The Order under consideration addresses emissions from the metal surface coating processes, which are subject to § 129.52, Miscellaneous Metal Parts and Products, of Title 25 of the Pennsylvania Code. The regulations limit the emissions of volatile organic compounds (VOC), and are part of the federally-approved Pennsylvania State Implementation Plan for the control of ozone. The Order requires final compliance with the regulation by April 21, 1986 through the use of low solvent technology (LST) and April 21, 1987 should LST be abandoned and add-on controls installed.

Because this Order has been issued to a major source of VOC emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a Delayed Compliance Order under section 113(d) of the Clean Air Act (the Act). EPA has reviewed the Order and has found that the Order does satisfy the requirements of this subsection of the Act.

EPA's review indicates that the two railroad car manufacturing facilities of ACF are a major source of VOC emissions. The facility is located in the Central Pennsylvania Interstate Air Quality Control Region, essentially a non-attainment area for the National Ambient Air Quality Standard for ozone, excluding the attainment counties of Fulton, Huntingdon, Mifflin, Union, Montour, Columbia, Lycoming, and Clinton. The facility as presently constructed is unable to comply with regulations limiting emissions of VOC's codified at § 129.52 of Title 25 of the Pennsylvania Code, part of the federally-approved State Implementation Plan, because low solvent coatings are still being developed. Prior to issuance of the Order, Pennsylvania provided an opportunity for public comment and hearing on the Order. No public comments or requests for Commonwealth public hearing were received by the State. The Order contains requirements for expeditious increments of progress towards compliance and emission monitoring and reporting requirements and provides for interim emission reduction requirements as required by section 113(d)(6) of the Clean Air Act. These requirements are sufficient to avoid any imminent and substantial endangerment to health within the meaning of section 113(d)(7)(A) of the Clean Air Act. The first four increment(s) of progress, which require bimonthly progress reports, on the reformulation on low solvent coatings, have been completed. The 1984 estimated VOC emissions of 117.2 Ton/Year (T/Y) from AMCAR Division of ACF Industries and 48.4 T/Y from Shippers Division of ACF Industries will be reduced to 58.0 T/Y, and 17.9 T/Y, respectively by April 21, 1986 if low solvent coatings are chosen, but in any event no later than April 21, 1987.

The system of emissions reduction required during the period covered by this Order is the best practicable system in light of the ultimate emission reductions required for compliance with the SIP. This interim system provides substantial emission reduction in a manner which permits the Company to move toward the use of either low solvent coatings or facility alterations to install add-on control.

The Order requires the facility to comply with the State Implementation Plan whenever it is temporarily able to do so and the Order, therefore, meets the requirements of section 113(d)(7)(B). The Order notifies ACF Industries, Inc. of its liability for noncompliance penalties under section 120 of the Clean Air Act, 42 U.S.C. 7420 as required by section 113(D)(1)(E) of the Act.

If the Order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded.

If approved, the Order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the Order will not preclude assessment of any penalties under section 120 of the Act, unless the source is otherwise entitled to an exemption under section 120(a)(2)(B) or (C).

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether EPA may approve the Order. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of the Executive Order 12291.

Medicare Program; Payment for Indirect Costs of Medical Education

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We propose to eliminate an inaccuracy in the application of the formula used to calculate payment for the indirect costs of medical education for hospitals under the prospective payment system. In doing so, we are not proposing to change the basic method of estimating the effect of graduate medical education on hospital operating costs.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on March 28, 1986.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC–376–P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC; or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC–376–P. Comments will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202–245–7890).

FOR FURTHER INFORMATION CONTACT: Linda Magno, (301) 594–9343.

SUPPLEMENTARY INFORMATION:

I. Background

The Medicare program provides payment for both the direct and indirect costs of medical education incurred by teaching hospitals. The direct costs of approved medical education programs (for example, salaries for interns and residents and overhead costs) are not included in hospital-specific, regional, or national payment rates to hospitals subject to the prospective payment system, but are reimbursed on a reasonable cost basis. The special provisions governing reimbursement for the services of interns and residents appear at sections 1832(a)(2)(B)(i) and 1861(b)(6) of the Act. The indirect costs of medical education are increased operating costs, that is, patient care costs, associated with teaching programs. These increased costs may reflect a number of factors, for example, an increase in the number of tests and procedures ordered by interns and residents relative to the number ordered by more experienced physicians or the need of hospitals with teaching programs to maintain more detailed medical records.

A. The 1983 Legislation

Section 1886(d)(5)(B) of the Social Security Act (the Act) provides that prospective payment hospitals receive an additional payment for the indirect costs of medical education.

In 1983, during the debate on passage of legislation establishing the prospective payment system, Congress expressed concerns that the system not have an adverse impact on teaching hospitals. To mitigate against such an adverse impact, Congress mandated that the education adjustment factor be doubled for the purpose of determining the additional payment for the indirect costs of graduate medical education programs to hospitals. That is, except that it was multiplied by two, this factor was derived in the same manner as for the limit on hospital inpatient operating costs in effect on January, 1, 1983. The doubling was not based on any empirical evidence; rather, it was a safeguard to protect teaching hospitals from any unintended, negative effects of the prospective payment system.

Because the indirect costs of medical education are defined in terms of increased operating costs, they are not separately identifiable on the cost report or in other financial or accounting records. Rather, these incremental costs have been statistically estimated as a function of teaching intensity, and a proxy measure (the hospital's ratio of the number of interns and residents to the number of beds) has been used to measure teaching intensity. The coefficient describing this statistical relationship has been expressed as a percentage and applied as the indirect medical education factor. This factor was first used as an adjustment to the routine operating cost limits and the total operating cost limits under the reasonable cost reimbursement system. The regulations governing this matter under the prospective payment system are found at 42 CFR 412.118 (Determination of indirect medical education costs).

Currently, § 412.118(d) provides that each hospital's indirect medical education payment is determined by multiplying the following three factors:

(1) Total diagnosis-related group (DRG) revenue based on the Federal rates.

(2) A factor for each ten percent increment above zero in the hospital's ratio of full-time equivalent interns and residents to beds.

(3) An education adjustment factor, expressed as a percentage, that represents double the statistically-estimated effect of teaching activity on operating costs.

B. Disparity between hospital operating costs and Medicare payment

This proposed rule would eliminate an inaccuracy in the formula used to calculate payments for the indirect costs of medical education. The factor for indirect medical teaching costs was introduced in connection with the limits for routine inpatient operating costs and was used at the time to recognize the higher costs teaching hospitals incurred that could not be separately indentified on the cost report used for Medicare reimbursement purposes (or in other financial or accounting records). When we examine the effect of teaching intensity on hospital operating costs, we found a logarithmic relationship between costs and the measure of teaching intensity (intern and resident to bed ratio). Strictly speaking, the coefficient of the teaching intensity measure (when the antilogarithm was taken) was an exponent of the teaching intensity measure. Thus, the function that described the effect of teaching intensity on hospital costs when the teaching adjustment factor was originally developed is consistent with the one we are now proposing to apply under the prospective payment system.

Since we first used a teaching adjustment factor to recognize indirect medical education costs in connection with the hospital routine operating cost limits effective July 1, 1980, we have applied the factor as a fixed percentage add-on to a hospital's otherwise applicable cost limit or prospective payment rate. While the proportional nature of this adjustment was consistent

VOL
51
ISS
38
FE
26
1986
UMI

with the manner in which other adjustments for variables known to influence hospital costs were applied (for example, the wage index and the fewer covered days of care factor), the result was an overstatement in both the cost limits and prospective payment rates for the indirect effects of medical education programs. This occurred because we used the regression coefficient for the logarithm of the teaching variable incorporated in the hospital cost functions that we had developed as a constant percentage add-on for each incremental increase in the intern and resident to bed ratio, rather than as and exponent. While we believe that applying the adjustment in this manner has administrative advantages, it also had the effect of only linearly approximating the true underlying logarithmic relationship between teaching intensity and Medicare operating costs. The bias was upward and increased significantly as the intern and resident to bed ratio increased. Thus, the application of the adjustment overstated both the cost limits and the prospective payments with respect to indirect medical education costs.

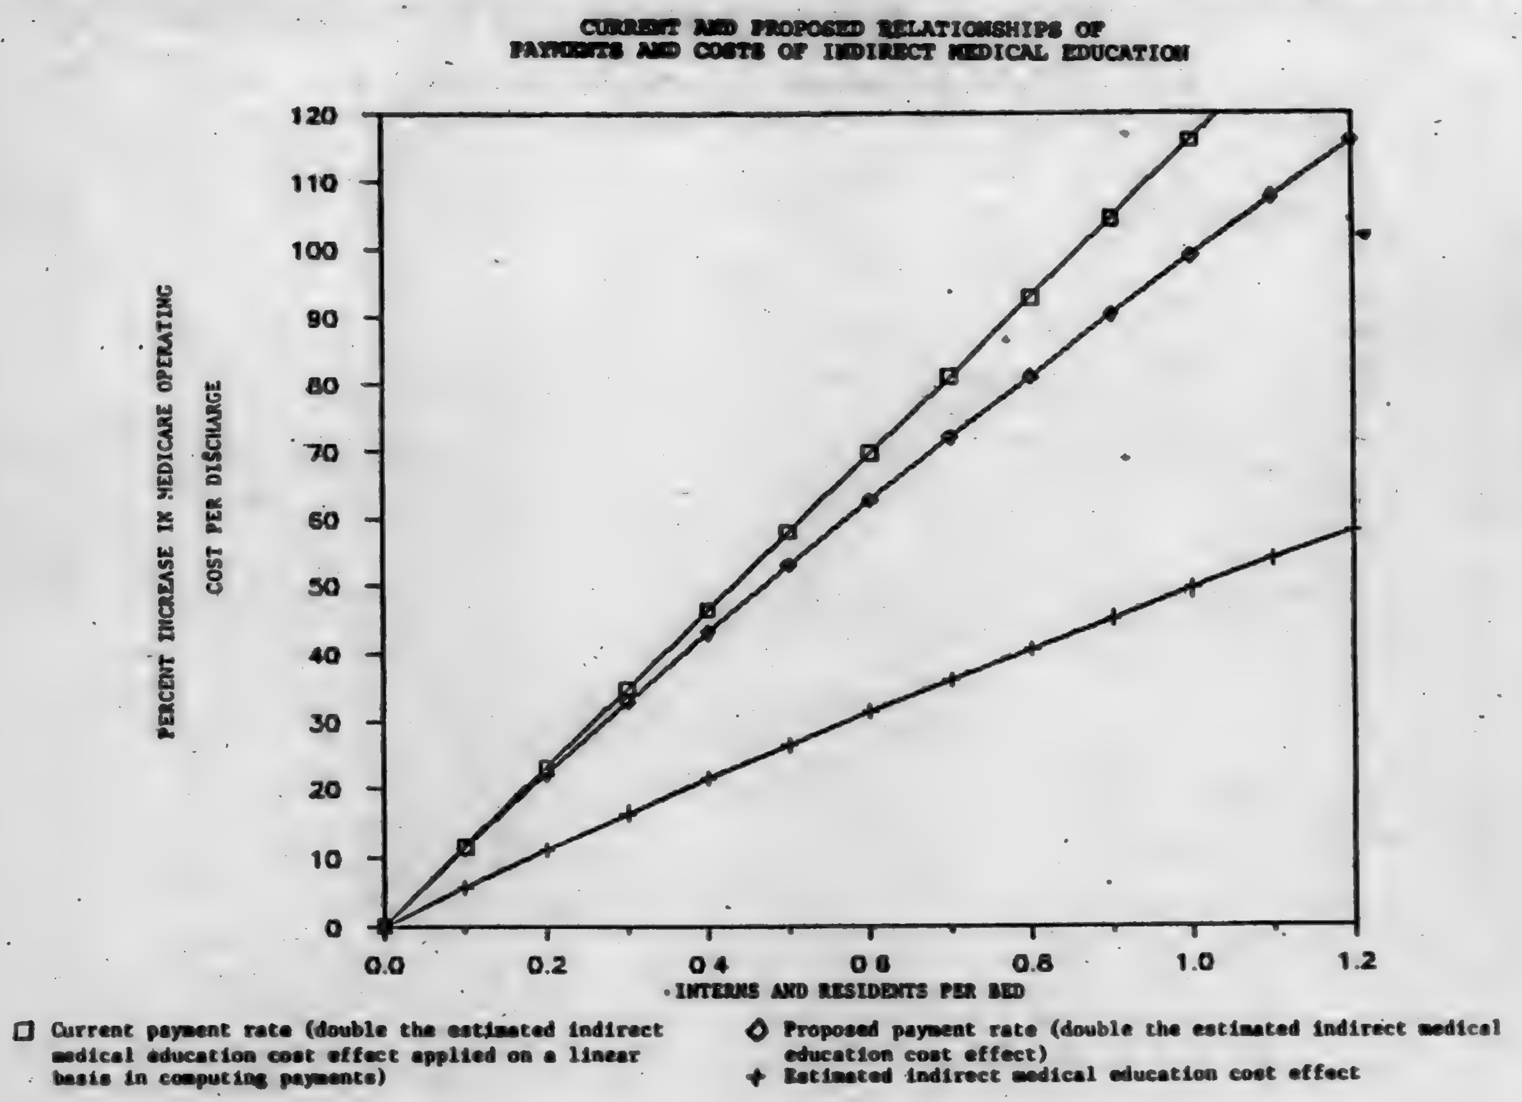
The reason for this bias is that the current payment formula treats each ten-percent increment in the ratio of interns and residents to beds equally, whereas in fact the change in the teaching variable [1] from, for example, 1.5 to 1.6 is not a ten-percent increase, but rather a 6.67 percent increase [(1.6 minus 1.5) divided by 1.5], whereas the change from 1.0 to 1.1 is a ten-percent increase [(1.1 minus 1.0 divided by 1.0)]. For example, on average, the indirect medical education costs of a hospital whose ratio of interns and residents to beds is 0.5 are not five times as great as those of an otherwide similar hospital whose intern and resident to bed ratio is 0.1.

The following graph shows how Medicare operating costs increase as the intern and resident to bed ratio increases. The lowest line, representing the estimated effect of indirect medical education on hospital operating costs, demonstrates how, as the intern and resident to bed ratio increases, the Medicare operating costs per discharge also increase but at a slower rate. The estimated indirect medical education cost effect is the statistically estimated relationship between the change in the intern and resident to bed ratio and Medicare operating costs per case. The middle line, representing the proposed Medicare payment rate for the indirect cost of medical education, was derived by doubling the estimated indirect medical education cost effect represented by the lowest line. The highest line represents the current Medicare payments for the indirect costs of medical education (using double the current education adjustment factor).

---

[1] The teaching variable is 1.00 for non-teaching hospitals, since the variables in the hospital operating cost function are transformed to logarithms and the logarithm of zero is underfined.

For a detailed discussion of the regression analysis, see Pettengill and Vertrees, *Health Care Financing Review*, December 1982.



C. Pending Legislation

It should be noted that both houses of Congress have also concluded that the current payment formula for indirect costs of medical education results in payments that exceed the actual incremental costs of teaching hospitals and, consequently, have included in the Consolidated Omnibus Budget Reconciliation Act of 1985, H.R. 3128, a provision to lower these payments. The Conference Report accompanying H.R. 3128, H.R. Rep. No. 453, 99th Cong., 1st Sess. 456 (1985), explained that Congress intends to move from payment on a linear basis to payment on a curvilinear basis because "each increase in residents-to-bed ratio does not result in a proportional increase in costs."

That both houses of Congress have passed legislation similar to this proposal reinforces our view that it is appropriate the correct the inaccuracy in the payment formula to more realistically reflect the actual increment costs of teaching hospitals.

II. Proposed Changes

We are proposing to eliminate an inaccuracy in application of the education adjustment factor, although we are not proposing to change the basic method for estimating the statistical relationship between operating costs and teaching intensity (that is, the regression coefficient). This proposed change would have the effect of more closely reflecting the marginal contribution of increased teaching intensity to the operating costs of teaching hospitals.

We would reduce the payment for the indirect costs of graduate medical education by changing the application of the current factor used to derive the indirect medical education payment. Under the proposed revision, the payment would continue to increase as the hospital's ratio of interns and residents to beds increases, but the rate of increase would be smaller for successive equal increments in the ratio of interns and residents to beds. This means that a slightly smaller education adjustment factor would be applied to each incremental increase in the ratio. This "curvilinear" or variable application of the education adjustment factor would yield a smaller increase in payments per discharge as teaching intensity increases, thus reflecting more accurately that this indirect costs do not increase on a linear basis.

For hospital discharges on or after June 1, 1986, we propose to apply the current education adjustment factor in a corrected payment formula as follows:

BEST COPY AVAILABLE

VOL
51
ISS
38
FE
26
1986
UMI

Current formula

2 x .5795 x Adjusted intern and resident to bed ratio x DRG revenue based on Federal rates

where the adjusted intern and resident to bed ratio = intern and resident to bed ratio divided by .1.

Proposed new formula

$$2 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.5795} - 1\right] \times \text{DRG revenue based on Federal rates.}$$

The table that follows contains examples of the effect of this proposed change on teaching hospitals under the prospective payment system:

Ratio of interns and residents to beds	Doubled indirect medical education factor under—		Percent difference
	Current rule	Proposed rule	
.01	.0116	.0116	0.00
.02	.0232	.0231	0.43

1.00	1.1590	.9886	17.24
1.25	1.4488	1.1998	20.75
1.50	1.7385	1.4012	24.06
1.75	2.0282	1.5944	27.21
1.90	2.2022	1.7068	29.03

For the purpose of clarity, we would also make several technical changes in § 412.118.

III. Regulatory Impact Analysis

A. Introduction

Executive Order 12291 (E.O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulations that are likely to meet criteria for a "major rule".

A major rule is one that would result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Based on available data, we expect this regulation to have an annual effect on the economy in excess of $100 million. Therefore we are providing an impact analysis.

Consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare and publish an initial regulatory flexibility analysis for proposed regulations unless the Secretary certifies that the regulations would not have a significant impact on a substantial number of small entities. (For purposes of the RFA, we consider all hospitals to be small entities.)

Since the proposed rule would affect all of the 1,035 prospective payment hospitals that receive payment for the indirect costs of Medical education, and would have an effect on payments made to those hospitals in excess of $100 million over the next five years, we are also performing a regulatory flexibility analysis.

B. Objectives

Our proposed adjustment corrects for this deficiency in the current payment formula. We believe that now is an appropriate time to initiate this refinement because the cost limits constituted only an upper ceiling on provider costs. Providers whose costs were below the limits were reimbursed their actual reasonable costs and did not receive any additional payments because of their indirect medical education adjustment. However, under the prospective payment system, the indirect medical education adjustment is an integral part of the formula for computing Medicare payment for each discharge in a teaching hospital. That is, a teaching hospital automatically receives an extra payment based on the adjustment factor regardless of the hospital's actual cost experience. Therefore, it is more crucial now that the indirect medical education factor be as precise as possible under the prospective payment system than it was previously under cost-based reimbursement.

C. Estimated impact on program expenditures

Under the reasonable cost reimbursement system, a linear formula, which approximated the actual indirect cost function, sufficed for purposes of setting operating cost limits. However, under the prospective payment system, the upward bias resulting from the current method of computing the teaching adjustment factor results in unreasonably high payments to hospitals with large teaching programs.

As a result of adopting the proposal to refine the method of computing payments for indirect teaching costs, we estimate that total payments to teaching hospitals would be reduced by the following amounts over the next five fiscal years (FYs):

Savings Estimates

Rounded to the Nearest $5 Million

FY 1986, $20; FY 1987, $120; FY 1988, $170; FY 1989, $175; FY 1990, $180; FY 1991, $200.

The expected reduction in payments to teaching hospitals will not affect all hospitals and all regions of the country equally. By using the proposed formula for computing payments for indirect teaching costs, hospitals with the most teaching activity would experience the largest reductions in their indirect medical education payments.

Hospitals with large teaching programs (teaching hospitals with an intern and resident to bed ratio of .25 or more) would experience a reduction in their total prospective payments, including reimbursement for indirect medical education costs, of 1.55 percent while teaching hospitals with small teaching programs (teaching hospitals with an intern and resident to bed ratio of less than .25) would have their total prospective payments reduced by .17 percent. Currently, there are only 183 teaching hospitals with resident to bed ratios of .25 or higher and 852 hospitals with resident to bed ratios of less than .25. Teaching hospitals constitute less than 20 percent of all prospective payment hospitals. Teaching hospitals would have an average reduction in total prospective payments of .51 percent as a consequence of this change in payment for the indirect costs of medical education.

In addition, urban teaching hospitals with 685 beds or more would have their total payments reduced by .84 percent. In contrast, large rural teaching hospitals with 170 beds or more would have their total payments reduced by .29 percent. However, total prospective payments for rural teaching hospitals with between 100 beds and 169 beds would decline .75 percent. As a group, all urban teaching hospitals would experience a decline in total Medicare prospective payment by .51 percent, while rural hospitals would sustain an average reduction of only .33 percent.

Effect on Teaching Hospitals by Census Division

Payments to teaching hospitals in the different census divisions would be reduced under the proposed rule depending on the intensity of teaching programs in a particular census division. As previously stated, the reduction in total prospective payments to teaching hospitals across the country is approximately .51 percent. However, the average reductions in total prospective payments to teaching hospitals would range from a high of .66 percent in the Middle Atlantic census division to a low of .19 percent in the East South Central census division.

The following table shows the estimated average reduction in total payments to teaching hospitals according to census division:

Census division	Percent of decrease
New England	0.65
Middle Atlantic	0.66
South Atlantic	0.58
East North Central	0.41
East South Central	0.19
West North Central	0.38
West South Central	0.23
Mountain	0.41
Pacific	0.57
National average	0.51

Assumptions Used in Estimating Savings and Impact

In estimating savings and the effect of this proposed rule on teaching hospitals, we assumed that hospitals would be paid on the basis of the standardized rates and the blend of hospital-specific and Federal rates that would have become effective on October 1, 1985 except for the fact that Congress extended through March 14, 1986 the payments rules in effect on September 30, 1985 (see the **Federal Register** of February 3, 1986, 51 FR 4166). For these estimates, we used a hospital data base that has 5,672 hospitals and includes hospitals in Massachusetts and New York that recently have come under the prospective payment system.

D. Effects on Graduate Teaching Programs

Currently, there are approximately 1,000 hospitals that receive payments for indirect medical education costs. We do not expect any of these programs to be curtailed or to be affected in any significant manner as a result of this proposed rule. Teaching hospitals would still receive the doubled teaching adjustment, although the factor itself would be reduced slightly for hospitals with small teaching programs, and by as much as 17 percent for a hospital with an intern and resident to bed ratio equal to one. (Currently, no hospital in our data base has an intern and resident to bed ratio of one. Thus, no hospital's teaching adjustment factor would actually be reduced by 17 percent.)

The most likely consequences of the proposed rule may be in the form of altering plans hospitals may have for expanding their teaching programs. As explained elsewhere in this document, the effect of correcting the teaching adjustment payment forumla is to make curvilinear the percentage increase in the Medicare payments for the indirect costs of medical education. Therefore, as a hospital's intern and resident to bed ration increases, the factor increases, but at a diminishing rate.

E. Paperwork Reduction Act

These proposed changes would not impose information collection requirements; consequently, they need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.)

IV. Response to Comments

Because of the large number of pieces of correspondence we normally receive on proposed regulations, we cannot acknowledge or respond to them individually. However, we will consider all comments that are received by the end of the comment period and, if we proceed with a final rule, we will respond to those comments in the preamble to that rule.

List of Subjects in 42 CFR Part 412

Health facilities, Medicare.

42 CFR Part 412, Subpart H would be amended as set forth below:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

1. The authority citation for Part 412 is revised to read as follows:

Authority: Secs. 1102, 1871, and 1886 of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395ww).

2. In § 412.118, the introductory language and paragraphs (a)(1), (c) and (d) are revised; current paragraphs (e), (f) and (g) are redesignated as paragraphs (f), (g), and (h), respectively; a new paragraph (e) is added; and newly redesignated paragraph (g) is revised to read as follows:

§ 412.118 Determination of indirect medical education costs.

For hospital discharges occurring on or after June 1, 1986, to determine the indirect medical education costs, HCFA uses the following procedures:

(a) *Basic data.* HCFA determines for each hospital its—

(1) Ratio of full-time equivalent interns and residents, except as limited under paragraph (g) of this section to number of beds (as determined in paragraph (b) of this section); and

* * * * *

(c) *Measurement for teaching activity.* Based on a comparison of the inpatient operating costs (as defined in § 412.2(c)) of all hospitals, HCFA statistically estimates a factor representing the effect of teaching activity on operating costs in the same manner as for the limit on hospital inpatient operating costs in effect on January 1, 1983.

(d) *Determination of education adjustment factor.* Each hospital's education adjustment factor is calculated as follows:

(1) *Step one*—A factor representing the sum of 1.00 plus the hospital's ratio of full-time equivalent interns and residents to beds, as determined under

VOL 51
ISS 38
FE 26
1986
UMI

paragraph (a)(1) of this section, is raised to an exponential power equal to the factor derived in paragraph (c) of this section.

(2) *Step two*—The factor derived from step one is reduced by 1.00.

(e) *Determination of payment amount.* Each hospital's indirect medical education payment is determined by multiplying the following two factors:

(1) *Education adjustment factor.* Twice the education adjustment factor derived in paragraph (d) of this section.

(2) *Total DRG revenue.* Total DRG revenue, as determined under paragraph (a)(2) of this section.

* * * * *

(g) *Limits on count of interns and residents.*—(1) Interns and residents who are assigned to a freestanding family practice center or an excluded distinct part hospital unit on the day that the count of interns and residents (as described in paragraph (f)(2)(i)) is made are not counted as full-time equivalents. Only the percentage of time that these interns and residents spend in the portion of the hospital subject to the prospective payment system on the day the count is made is used to determine the indirect medical education adjustment.

(2) Interns and residents in anesthesiology who are employed to replace anesthetists are not counted as full-time equivalents.

(3) For cost reporting periods beginning on or after October 1, 1985, interns and residents who are assigned to the outpatient department of the hospital on the day the count is made are subject to the provisions of paragraph (g)(1) of this section.

(4) For cost reporting periods beginning on or after October 1, 1985, the number of interns and residents assigned to ancillary departments of the hospital will be apportioned between inpatients and outpatient settings based on the ratio of each ancillary department's inpatient and outpatient charges to total department charges, respectively. In determining the indirect medical education adjustment, only that percentage attributable to furnishing inpatient services will be included in the computation of the intern and resident-to-bed ratio.

Maritime Administration

46 CFR Part 252

[Docket No. R-102]

Subsidized Vessels and Operators; Bulk Cargo Vessels Engaged in Worldwide Services; Operating-Differential Subsidy; Extension of Deadline for Comments

AGENCY: Maritime Administration, DOT.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On December 23, 1985, the Maritime Administration (MARAD) published in the **Federal Register** (50 FR 52338) a notice of proposed rulemaking (NPRM) proposing to amend its regulations governing the calculation and payment of operating-differential subsidy (ODS) for bulk cargo vessels engaged in world-wide services. These amendments would provide for the payment of ODS as a fixed and final daily amount encompassing all items of expense authorized by the ODS contracts.

The law firm of Kominers, Fort, Schlefer & Boyer has requested on behalf of Moore McCormack Bulk Transport, the Berger Group of Subsidized Vessels, and the Keystone Group of Subsidized Vessels, a thirty-day extension of time to file comments. It cited as the reasons for requesting an extension were the complexity of the matter, the time required to prepare a textual comparison of the existing and proposed regulations, and the difficulty in coordinating meetings among the affected subsidized operators represented by the law firm. MARAD will grant this request.

DATES: The deadline for submitting comments concerning this proposal is extended to 5 p.m. on March 26, 1986.

ADDRESS: Send original and two copies of comments to the Secretary, Maritime Administration, Room 7300, Department of Transportation, 400 Seventh Street, SW., Washington, DC. 20590. To expedite review of the comments, the agency requests, but does not require, submission of an additional ten (10) copies of the comments. All comments will be made available for inspection during normal business hours at this address. Commenters wishing MARAD to acknowledge receipt should enclose a self-addressed and stamped envelope or postcard.

FOR FURTHER INFORMATION CONTACT: Arthur B. Sforza, Director, Office of Ship Operating Costs, Maritime Administration, Department of Transportation, Washington, DC. 20590. Telephone. (202) 382-0036.

BILLING CODE 4910-81-M

FEDERAL MARITIME COMMISSION

46 CFR Part 552

[Docket No. 86-8]

Financial Reports of Tug and Barge Operators in the Domestic Offshore Trades

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule and request for comments.

SUMMARY: The Federal Maritime Commission proposes to amend its rules governing financial reports required of vessel operating common carriers in the domestic offshore waterborne commerce of the United States. Tug and barge operators have been completing the reporting form (Form FMC-377) based on the accounts prescribed by the Interstate Commerce Commission (ICC) for Carriers by Inland and Coastal Waterways. Since the ICC no longer requires reports from such carriers, it is necessary to define the terms used in the report form.

DATE: Comments due by March 28, 1986.

ADDRESS: Comments (original and 15 copies) to: John Robert Ewers, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573.

FOR FURTHER INFORMATION CONTACT: Robert G. Drew, Director, Bureau of Tariffs, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523-5796.

SUPPLEMENTARY INFORMATION: The Federal Maritime Commission is required to evaluate the reasonableness of rates in the domestic offshore trades filed by vessel operating common carriers. To provide for the orderly acquisition of data essential to this evaluation, the Commission promulgated what is now 46 CFR Part 552. Tug and barge operators report the required financial and operating data on Form RMC 377, "Statements of Financial and Operating Data". It had been the policy of the Commission to base these statements on the accounts prescribed by the Interstate Commerce Commission (ICC) for Carriers by Inland and Coastal Waterways. The ICC no longer requires reports from such carriers. Consequently, Form FMC-377 will now contain a glossary.

These amendments, which do not result in any substantive modification of the financial reporting requirements, reflect new terminology and the consolidation of certain schedules and are summarized as follows:

1. *Section 552.5(o)(2)*—New terminology is used to define voyage expense

2. *Section 552.6(a)(2)*—The new basis for the Form FMC-377 is substituted for the reference to ICC accounts.

3. *Section 552.6(b)(4)*—The title is amended to reflect the consolidation of schedules A-IV(A) and A-V(A).

4. *Section 552.6(b)(6)*—The title is amended to reflect the renumbering in Item 3 above, and the term "Vessel Operating Expense" is changed to "Voyage Expense" and the term "Administrative and General Expense—Net" is changed to "Administrative and general Expense."

5. *Section 552.6(b)(7)* is deleted. This information is to be included in Schedule A-IV(A)—Other Property and Equipment.

6. *Section 552.6(b)(8)* is renumbered section 552.6(b)(7) and reference to paragraph (b)(7) is removed.

7. *Section 552.6(b)(9)* is renumbered section 556.6(b)(8) and the title and subparagraph (iii) references to Schedule A-IX(A) are changed to A-VI(A).

8. *Section 552.6(b)(10)* is renumbered section 552.6(b)(9) and the references to Schedule A-X(A) are changed to A-VII(A).

9. *Section 552.6(c)(2)*—The applicability of this provision to vessel operators is stated, and the reference to "vessel operating expense" is changed "voyage expense" in subparagraph (iii).

10. *Section 552.6(c)(3)*—The title is changed to read "Voyage Expense" and the paragraph is revised to define this term.

11. *Section 552.6(c)(9)*—The term "income" in the title and subparagraph (i) is changed to "revenue" and Schedule B-VIII(A) is renumbered to Schedule B-VII(A).

The Commission has determined that this proposed rule is not a "major rule" as defined in Executive Order 12291, February 27, 1981, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or;

(3) Significant adverse effect on competition, employment, investment productivity, innovations, or on the ability of the United States to compete with foreign-based enterprises in domestic or export market.

The Chairman of the Federal Maritime Commission certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizations and small governmental jurisdictions. The primary economic impact of this rule would be on ocean common carriers which generally are not small entities. A secondary impact may fall on shippers, some of whom may be small entities, but that impact is not considered to be significant.

The collection of information requirements contained in original Part 552 were approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned control numbers 3072-0008, 3072-0029 and 3072-0030. Those requirements were submitted to OMB for an extension of clearance on January 31, 1986. The amendments in this proposed rulemaking are technical in nature and will not result in any substantive modification of the financial reporting requirements contained in the Commission's request for extension of clearance.

List of Subjects in 46 CFR Part 552

Cargo vessels, Freight, Maritime carriers, Rates and fares, Reporting and recordkeeping requirements, Uniform system of accounts.

Therefore, for the foregoing reasons, Part 552 of Title 46, Code of Federal Regulations, is proposed to be amended as follows:

PART 552—[AMENDED]

1. The Authority Citation of Part 552 continues to read:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 817(a), 820, 841a, 843, 844, 845, 845a, and 847.

2. Paragraph (o) of § 522.5 is revised to read as follows:

§ 552.5 Definitions.

* * * * *

(o) "*Voyage Expense*" means:

(1) For carriers required to file Form FMC-378: the total of Vessel Operating, Vessel Port Call and Cargo Handling Expenses less Other Shipping Operations Revenue.

(2) For carriers required to file Form FMC-377: the total of Transportation, Terminal and Traffic Expenses.

* * * * *

3. Section 552.6 is amended by revising paragraphs (a)(2), (b)(6), and the heading of paragraph (b)(4) to read as follows:

§ 552.6 Forms

(a) *General.*

(1) * * *

(2) Statements containing the required exhibits and schedules, are described in paragraphs (b), (c), (d), (e), and (f) of this section and are available upon request from the Commission. The required General Information, schedules and exhibits are contained in Forms FMC-377 and FMC-378. For carriers required to file Form FMC-378, the statements are based on the *Uniform Financial Reporting Requirements* prescribed by the Maritime Administration, U.S. Department of Transportation. For carriers required to file Form FMC-377, the statements are based on definitions contained therein. The schedules contained in these statements are distinguished from those contained in the Form FMC-378 statements by the suffix "A" (e.g., Schedule A-IV(A)).

(b) *Rate Base (Exhibits A and A(A)).* * * *

(1)-(3)

(4) *Investment in Other Property and Equipment; Accumulated Depreciation*

VOL
51
ISS
38
FE
26
1986
UMI

Other Property and Equipment (Schedules A–IV and A–IV(A)).

* * * * *

(6) *Working Capital (Schedule A–V(A)).* Working capital for tug and barge operators shall be determined as the average monthly expense. Average monthly expense shall be equal to one-twelfth of the expense of the carrier during the relevant 12-month period, computed by adding Voyage Expense, Administrative and General Expense, Interest Expense, and Inactive Vessel Expense, each as allocated to the Trade, and dividing the total by 12.

4. Section 552.6 is further amended by removing paragraph (b)(7); redesignating paragraphs (b) (8)–(10) as paragraphs (b) (7)–(9) and revising newly redesignated paragraph (b)(7), the heading of paragraph (b)(8), paragraphs (b)(8) (iii) and (iv), (b)(9), (c)(2) introductory text, (c)(2)(iii), (c)(3), and (c)(9) to read as follows:

(7) *Property and Equipment of Related Companies.* Property and equipment of related companies used by the filing carrier in the Trade shall be reported in accordance with paragraphs (b)(1), (b)(2), and (b)(4) of this section. The cost of such assets shall be that which is recorded on the books of the related company. Where such assets are included in the rate based, the profits or losses from intercompany transactions related to such assets are to be eliminated in accordance with paragraph (c)(11) of this section.

(8) *Capitalization of Interest During Construction (Schedules A–VI and A–VI(A)).*

* * * * *

(iii) A detailed description of the interest calculations shall be submitted for each capital asset included in the rate based on the carrier in the first year of its inclusion. Such description shall be set forth on Schedule A–VI or A–VI(A), "Capitalization of Interest During Construction." Capitalized interest shall be included in the rate base when the asset is included in the rate base, in accordance with paragraph (b) of this section, and in the same allocable amounts as the asset. A schedule shall be provided each time a rate base statement is submitted, setting forth the year in which an interest calculation statement was submitted for each asset which included capitalized construction interest in the rate base.

(iv) The effects of the interest-during construction provisions shall be applicable to all work completed after December 31, 1977.

(9) *Capitalization of Leases (Schedules (A–VII and A–VII(A)).* Leased assets which are capitalized on the carrier's books and which meet the AICPA guidelines for capitalization may also be included in rate base. Schedule A–VII or A–VII(A), "Capitalization of Leases", shall be submitted setting forth pertinent information relating to the lease and the details of the capitalization schedule. Allocations to the Trade shall follow the requirements of paragraphs (b)(1) and (b)(4) of this section.

(c) *Income Account (Exhibits B and B(A)).*

(2) *Voyage expense (Schedule B–II).* This schedule shall be submitted by vessel operators for any period in which any cargo was carried in the Service. Allocations to the Trade shall be on the following basis:

(iii) Other Shipping Operations Revenue shall be deducted from Gross Voyage Expense. Other Shipping Operations Revenue should be assigned directly, to the extent possible, or otherwise allocated on the basis of cargo cube loaded and discharged at each port. Any direct assignments shall be fully set forth and explained.

(3) *Voyage Expense (Schedule B–II(A))* This schedule shall be submitted by tug and barge operators:

(i) For all voyages in the Service, Transportation expense shall be allocated to the Trade in the cargo-cube mile or cargo-cube relationship, as appropriate. Should any elements of transportation expense be directly allocable to specific cargo, such direct allocations shall be made and explained.

(ii) Terminal and traffic expenses shall be assigned directly, to the extent possible, by ports at which incurred, to the Trade and Other Cargo, or otherwise allocated on the basis of cargo cube loaded and discharged at each port.

(iii) Where multiple barge units are towed by a single tug, voyage expense shall be allocated on the basis of the cargo-cube relationship.

(4)–(8) * * *

(9) *Other Revenue or Expense (Schedules B–VIII and B–VII(A)).*

(i) Any other elements of revenue or expense, wholly or partially applicable to the Trade, shall be fully explained by a schedule showing details of allocation.

(ii) Operating-differential subsidy refunds under section 605(a) of the Merchant Marine Act, 1936, shall not be allocated to the Trade.

* * * * *

By the Commission.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. 1

[Gen. Docket No. 85-305]

Subscription Video Services

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; Extension of Comment/Reply Comment Period.

SUMMARY: The Notice of Proposed Rulemaking in Gen. Docket 85–305, concerning the classification of subscription video services, was published in the Federal Register on January 15, 1986 (51 FR 1817). The National Association for Better Broadcasting requests an extension of the comment dates in that proceeding until after the Court's decision in *Telecommunications Research and Action Center et al* v. *FCC (TRAC* v. *FCC)*, concerning the classification of nonsubscription teletext. The Commission has requested a remand of that case, Under the circumstances, the Commission will extend the date for comments on the classification of nonsubscription teletext only until thirty days after the Court's decision in the Motion for Remand.

DATES: If the Court grants the motion, comments that pertain to non-subscription teletext will be due 30 days after the Court's ruling, and reply comments will be due 30 days after that comment date. Notice of the Court's ruling will be published in the Federal Register.

All other comments in Docket 85–305 should be filed by the originally established dates, February 28, 1986 and March 28, 1986.

ADDRESS: Office of the Secretary, Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Martin Blumenthal, Office of General Counsel (202) 632–6990.

SUPPLEMENTARY INFORMATION: If the Court grants the Motion for Remand, the Commission will issue a public notice of that decision, and parties will have thirty days from the release of the Court's decision to file comments on the classification of nonsubscription teletext.

Order

In the Matter of Subscription Video Services; Gen. Docket 85–305.

Adopted: February 14, 1986.
Released: February 18, 1986.

By the General Counsel.

1. The National Association for Better Broadcasting ("NABB") has filed a motion requesting that the Commission extend for all parties the date for filing comments in the above-captioned proceeding from February 28, 1986 to 30 days after the ruling of the United States Court of Appeals for the District of Columbia Circuit in *Telecommunications Research and Action Center, et al.* v. *Federal Communications Commission ("TRAC* v. FCC") No. 85–1160. The Commission has sought comments on the regulatory status of non-subscription teletext in the context of this docket, but only in the event the court consents to remand the pending appeal in *TRAC* v. *FCC.*

2. The court has deferred a ruling on the Commission's *Motion for Remand* in *TRAC* v. *FCC* until after oral argument, scheduled for February 20, 1986. Therefore, it is appropriate to extend the time for comments concerning non-subscription teletext until after the court rules on the Commission's *Motion for Remand.* If the court grants the motion, comments that pertain to non-subscription teletext will be due 30 days after the court's ruling and reply comments will be due 30 days after that comment date. If the court denies the motion, however, the regulatory status of non-subscription teletext will not be addressed in this proceeding unless upon further order of the Commission.

3. All comments in this proceeding that do not pertain to non-subscription teletext remain due on or before February 28, 1986.

4. Accordingly, it is ordered, that the Motion of National Association of Better Broadcasting for Extension of Time filed February 13, 1986 is granted in part and otherwise denied.

Jack D. Smith,

General Counsel.

[FR Doc. 86-4086 Filed 2-25-86; 8:45 am]

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 86–66; RM–4802]

FM Broadcast Station in Sierra Vista, AZ

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the allotment of noncommercial educational FM Channel 210A to Sierra Vista, Arizona, as requested by the Shiloh Educational Broadcasting Foundation, and requests infomation regarding interference to TV Channel 6 in Tucson, Arizona.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner or Stanley Schmulewitz, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Proposed Rule Making

In the Matter of Amendment of § 73.504(a), Table of Allotments, Noncommercial Educational FM Broadcast Stations (Sierra Vista, Arizona); MM Docket No. 86–66, RM–4802.

Adopted: January 29, 1986.
Released: February 20, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission for consideration is a petition for rule making filed on behalf of Shiloh Educational Broadcasting Foundation ("petitioner") requesting the allotment of Channel 210A to Sierra Vista, Arizona, as that community's first local noncommercial educational FM service. In accordance with Commission policy, petitioner indicates that it will apply for the channel if its proposal is adopted.

2. A staff engineering study reveals that Channel 210A can be allotted to Sierra Vista in conformity with the minimum distance separation requirements of §§ 73.207 and 73.504 of the Commission's Rules, provided a site restriction 2.1 kilometers southeast of the community is imposed to avoid short-spacing to Station KUAT–FM (Channel 213), Tucson Arizona. Moreover, since the proposal is located within 320 kilometers (199 miles) of the common U.S.-Mexico border, the Commission must obtain approval by the Mexican government to the proposed allotment.

3. Due to the proximity of Station KUAT–TV (Channel 6), Tucson, Arizona petitioner is requested to submit showings relating to television Channel 6 interference protection, in accordance with the standards set forth in Section 73.525 of the Commission's Rules, (*Memorandum Opinion and Order* adopted June 20, 1985, Docket No. 20735). Such showings should describe the extent of predicted interference to Station KUAT–TV, and the proposed remedial measures.

PART 73—[AMENDED]

4. In light of the above, the Commission believes it is appropriate to seek comments on the proposal to amend the Noncommercial Educational FM Table of Allotments, § 73.504(a) of the Commission's Rules, with regard to Sierra Vista, Arizona, as follows:

City	Channel No.	
	Present	Proposed
Sierra Vista, Arizona		210A

5. It is ordered, that the Secretary of the Commission shall send a copy of this *Order* to the licensee of Station KUAT (TV), at the address listed below, to provide it an opportunity to respond accordingly. Arizona Board of Regents, Modern Language Building, University of Arizona, Tucson, Arizona 86721.

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

7. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: F. Joseph Brinig, Fortas and Hardman, 1200 29th Street, NW., Washington, D.C. 20007–3385, (counsel for petitioner).

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the Noncommercial Educational FM Table of Allotments, § 73.504(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not*

VOL 51 ISS 38 FE 26 1986 UMI

Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Nancy V. Joyner or Stanley Schmulewitz, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the noncommercial educational FM Table of Allotments, § 73.504(a) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceedings, and Public Notice to this effect will given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86–64; RM–5010]

FM Broadcast Station in Auberry, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes to allot FR Channel 286B1 to Auberry, California, as that community's first local service, in response to a petition filed by Eric R. Hilding.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio Broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Proposed Rule Making

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Auberry, California); MM Docket No. 86–64, RM–5010.

Adopted: January 29, 1986.
Released: February 20, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission for consideration is a petition for rule making filed by Eric R. Hilding ("petitioner") seeking the allotment of Channel 286B1 to Auberry, California, as that community's first local service. Petitioner has failed to state specifically that he will apply for the channel and should correct that deficiency in his comments herein.

2. A staff engineering study has determined that Channel 286B1 can be allotted to Auberry, California, consistent with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

3. Since the proposal could provide a first local service to Auberry, the Commission believes it is appropriate to propose amending the FM Table of Allotments, § 73.202(b) of the Commission's Rules with regard to that community, as follows:

City	Channel No.	
	Present	Proposed
Auberry, California		286B1

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

PART 73—[AMENDED]

5. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows Eric R. Hilding, P.O. Box 1300, Freedom, California 95019–1300.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in section 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC

[MM Docket No. 86–61; RM–4970]

FM Broadcast Station in Valley Springs, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: Action taken herein proposes the allotment of Channel 259A to Valley Springs, California, as that community's first local FM broadcast service, in response to a petition filed by Eric R. Hilding.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

Proposed Rule Making

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Valley Springs, California); MM Docket No. 86–61, RM–4970.

Adopted: January 29, 1986.
Released: February 19, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission for consideration is a petition for rule making filed by Eric R. Hilding ("petitioner") requesting the allotment of Channel 259A to Valley Springs, California, as that community's first local FM service. Petitioner failed to specifically indicate that he will apply for the channel, if allotted. He should do so in his comments to this *Notice*.

2. A staff engineering study reveals that Channel 259A can be allotted to Valley Springs, California, consistent with the minimum distance separation requirements of § 73.207 of the Commission's Rules, provided the transmitter is sited approximately 12.6 kilometers (7.8 miles) northeast of the community to avoid co-channel interference to Station KYUU(FM) (Channel 259), San Francisco, California.[1] Due to the substantial site restriction involved in this proposal, petitioner must demonstrate in his comments that he could indeed provide the required 70 dBu city grade signal over Valley Springs.

PART 73—[AMENDED]

3. In view of the fact that Valley Springs could receive a first local FM broadcast service, the Commission believes it is appropriate to seek comments on the proposal to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Valley Springs, California		259A

4. As indicated above, it is ordered, That the Secretary shall send a copy of this *Notice* by certified mail, return receipt requested, to the Mt. Bullion, California, applicants for Channel 260, as follows:

AJB Broadcasting, Inc., 7564 Buckingham, Clayton, Missouri 63105
New Life Enterprises, Inc., 3636 N. First, Suite 142, Fresno, California 93726
Edward E. Abramson, Rte. 2, Box 96, Chico, CA 95928
Mount Bullion Community Broadcasting, Inc., P.O. Box 1300, Freedom, CA 95019
Rosalie Lopez Bustos, 3430 Jefferson Avenue, Redwood City, CA 94062
Peter E. Baird P.O. Box 2631 Livonia, MI 48151

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Eric R. Hilding, P.O. Box 1300, Freedom, California 95019–1300.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.
Charles Schott,
Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of §1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

[FR Doc. 86–4068 Filed 2–25–86; 8:45 am]
BILLING CODE 6712–01–M

---

[1] We note that the proposal herein is short spaced to all applications for Channel 260 at Mt. Bullion, California. However, the proposal is not deficient to the Mt. Bullion center city coordinates. Accordingly, a copy of this *Notice* will be served on the applicants to afford them an opportunity to comment on the proposal.

47 CFR Part 73

[MM Docket No. 86–65; RM–5136]

FM Broadcast Station in Havelock, NC

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: Action taken herein proposes the substitution of FM Channel 286C2 for Channel 285A at Havelock, North Carolina, and the modification of Station WMSQ (FM)'s license to specify operation on the higher powered channel, at the request of Musicradio of North Carolina, Inc. The new allocation could provide expanded service to the Havelock area.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio Broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Proposed Rule Making

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Havelock, North Carolina); MM Docket No. 86–65, RM–5136.

Adopted: January 29, 1986.
Released: February 20, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the petition for rule making submitted by Musicradio of North Carolina, Inc. ("petitioner") requesting the substitution of FM Channel 286C2 for Channel 285A at Havelock, North Carolina, and modification of its license for Station WMSQ(FM) to specify operation on the higher powered channel.

2. Channel 286C2 can be allocated to Havelock in compliance with the Commission's minimum distance separation requirements if the transmitter site is restricted to an area at least 16.7 kilometers (10.4 miles) southeast to avoid a short-spacing to Station WDCG at Durham, North Carolina.[1] Petitioner believes that a suitable site is available within this restricted area. Petitioner states that the public interest would benefit from the substitution of channels as it could provide Havelock and nearby Cherry Point Military Reservation with a first wide coverage area FM service.

3. In accordance with Commission policy, we shall propose to modify the license of Station WMSQ(FM) to specify operation on the new channel. However, pursuant to § 1.420(g) of the Commission's Rules, modification of the license may not be imlemented if another party expresses an interest in the proposes allotment unless an additional equivalent channel is available for Havelock.[2] See *Modification of FM and TV Station Licenses*, 98 F.C.C. 2d 916 (1984). See also *Notice of Propsed Rule Making*, MM Docket No. 85–313, which proposed to make adjacent channel upgrades, such as this one, without requiring the showing of the availability of a second equivalent channel.

PART 73—[AMENDED]

4. We believe the public interest would be served by proposing the channel substitution as it could provide Havelock with expanded FM service. Accordingly, we propose to amend the FM Table of Allotments, § 73.202(b) of the Rules, for the community listed below, to read as folllows:

Channel No.	City	Proposed
	Present	
Havelock, North Carolina	285A	286C2

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: James A. Koerner, Esq., Baraff, Koerner, Olender & Hochberg, P.C., 2033 M Street, NW., Suite 203, Washington, D.C. 20036 (counsel to petitioner).

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings,

---

[1] The use of Channel 286C2 at Havelock originally conflicted with the petition of Marine Broadcasting Corporation seeking the substitution of Channel 287C2 for its present Channel 288A at Jacksonville, North Carolina. However, the Jacksonville upgrade required the deletion of newly allocated Docket 84–231 channels at Wilmington and Fairbluff, North Carolina. Marine's petition has been dismissed as unacceptable since it did not comply with the compelling showing of need or Commission error required for the deletion of a Docket 84–231 channel. See *Memorandum Opinion and Order*, 50 FR 47391, published November 18, 1985. Marine Broadcasting Corporation has filed a petition for reconsideration of the dismissal.

[2] Petitioner states that additional Class C2 channels are available for allocation at Havelock.

such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the noncommercial educational FM Table of Allotments, § 73.504(a) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in ititial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceedings, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than than, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the committees involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied be a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-67; RM-5070]

FM Broadcast Station in Georgetown, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein, at the request of Werlinger Communication Company, proposes the allotment of Channel 299A to Georgetown, Texas, as that community's second FM service.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 308, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rulemaking

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations, Georgetown, Texas; MM Docket No. 86-67 and RM-5070.

Adopted: January 29, 1986.
Released: February 20, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission for consideration is a petition for rule making filed by Werlinger Communication Company ("petitioner"), seeking the allotment of Channel 299A to Georgetown, Texas, as that community's second FM service. Petitioner has expressed an intention to apply for the channel.

2. The channel can be allotted in compliance with the Commission's minimum distance separation requirements with a site restriction 8.0 kilometers (5.0 miles) north of the community. This site restriction is necessary to avoid short spacing to Station KBUC-FM, Channel 298, San Antonio, Texas.

PART 73—[AMENDED]

3. In view of the fact that Georgetown, Texas, could receive its second local FM service, the Commission finds it would be in the public interest to seek comments on the proposal to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Georgetown, Texas	244A	244A, 299A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Don Werlinger, Werlinger Communication Company, 602 Stueve Lane, Lockhart, Texas 78644.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex partè* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-60; RM-5152]

FM Broadcast Station in Huntington, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein, at the request of Robert D. Tindle, proposes the allotment of Channel 270A to Huntington, Texas, as that community's first FM service.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 308, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rulemaking

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations, Huntington, Texas; MM Docket No. 86-60 and RM-5152.

Adopted: January 29, 1986.
Released: February 19, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration a petition for rule making filed by Robert D. Tindle ("petitioner"), seeking the allotment of FM Channel 297A to Huntington, Texas, as that community's first FM service. Although

VOL
51
ISS
38
FE
26
1986
UMI

the petitioner submitted information in support of the proposal he failed to express an intention to apply for the channel, if allotted. Therefore, he is requested to do so in his comments.

2. Also pending before the Commission is a proposal requesting Channel 297C2 as a substitute for Channel 257A at Whitehouse, Texas (RM–5243). However, Channel 297 cannot be allotted consistent with the minimum spacing requirements to Huntington and Whitehouse. Therefore, in order to resolve the conflict between the instant request and RM–5243, we have determined that Channel 270A can be allotted to Huntington in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules. Therefore, we will herein propose the allotment of Channel 270A to Huntington, Texas.

PART 73—[AMENDED]

3. In view of the fact that the proposed allotment could provide a first FM channel to Huntington, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, for the following community:

City	Channel No.	
	Present	Proposed
Huntington, Texas		270A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Eugene T. Smith, 715 G Street, SE., Washington, DC 20003 (Counsel for petitioner).

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau (202) 634–6530. However, member of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See §§ 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

[MM Docket No. 86–62; RM–5149]

TV Broadcast Station in Bishop, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of UHF television Channel 20 to Bishop, California, as that community's first local commercial television service, in response to a petition filed by Pappas Telecasting Inc.

DATES: Comments must be filed on or before April 14, 1986, and reply comments on or before April 29, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rulemaking

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations, Bishop, California; MM Docket No. 86–62 and RM–5149.

Adopted: January 29, 1986.
Released: February 19, 1986.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed by Pappas Telecasting, Incorporated ("petitioner"),[1] seeking the reassignment of UHF television Channel 61 from Porterville to Bishop, California, as that community's first local commercial television service. Petitioner indicates that it will apply for the channel, if assigned.

2. Bishop (population 3,333),[2] in Inyo County (population 17,895), is located in east central California, approximately 145 kilometers (90 miles) northeast of Fresno, California. Currently educational Channel *14 (vacant) is assigned to Bishop.

3. Petitioner advises that Bishop is located near serveral resort areas, and as such, has a diversity of services available to fulfill the needs of its many tourists. In further support of its proposal, petitioner asserts that the origninal proponent for the Porterville channel assignment has since died, thus rendering it unlikley that the channel will be applied for there in the near future.

4. We believe the petitioner has demonstrated the need for a commercial television channel at Bishop. However, we do not believe the public interest would be served by reassigning Channel 61 to Bishop since the effective date of the assignment to Porterville occurred approximately seven months ago. Therefore, in an effort to accommodate petitioner's proposal, a staff engineering study reveals that Channel 20 can be assigned to Bishop consistent with the minumum distance separation requirements of §§ 73.610 and 73.698 of the Commission's Rules. We believe our proposed action can satisfy both the petitioner's demonstrated need and its expressed interest in constructing and operating a commercial television station at Bishop. Accordingly, on our own motion, we will propose to substitute Channel 20 at Bishop.

5. Although petitioner has stated an intention to apply for an authorization on Channel 61, in light of our action herein, it is requested to specify in its comments that it will now apply for Channel 20 at Bishop, if it is assigned.

PART 73—[AMENDED]

6. In view of the above, we believe it is appropriate to seek comments on the proposal to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Bishop, California	*14–	*14–, 20+

7. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest in required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before April 14, 1986, and reply comments on or before April 29, 1986, and are advised to read the Appendix for the proper Procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Richard Hildreth, Esquire, Frank R. Jazzo, Esquire, Fletcher, Heald and Hildreth, 1225 Connecticut Avenue, NW., Suite 400, Washington, DC 20036 (Counsel for petitioner).

9. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46b F.R. 11549, published February 9, 1981.

10. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Cmmunications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Propoed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly.

---

[1] Petitioner is the licensee of Station KMPH(TV), Visalia, CA.

[2] Population figures were extracted from the 1980 U.S. Census.

Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Part 242

Department of Defense Federal Acquisition Regulation Supplement Contracting Officer Determination Procedures

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: The Defense Acquisition Regulatory Council is considering the promulgation of a new rule in Part 242 of the DoD FAR Supplement. The purpose of this rule is to implement paragraphs 2324(f) (2), (3), and (4) of section 911 of the FY 1986 DoD Authorization Act (Pub. L. 99-145).

DATE: Comments on the proposed rule should be submitted in writing to the DAR Council at the address shown below no later than 28 March 1986, to be considered in the formulation of the final rule. Please cite DAR Case 85-289 in all correspondence related to this issue.

ADDRESS: Interest parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, ODASD(P)/DARS, c/o OASD(A&L), Room 3C841, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202)697-7266.

SUPPLEMENTARY INFORMATION:

A. Background

Paragraphs 2324(f) (2), (3) and (4) of section 911 of the FY 1986 DoD Authorization Act (Pub. L. 99-145) established procedures to be followed by DoD contracting officers in determining allowability of cost rates. The Defense Acquisition Regulatory Council is considering changes to the DoD FAR Supplement, Section 242.705-1, Contracting Officer determination procedures, to implement the above-cited statute. These proposed changes will provide clarifying instructions to contracting officers with respect to determination procedures in the resolution of questioned costs. In addition, a requirement is included for the contracting officer to notify the contractor of the specific costs which were disallowed.

These proposed changes do not have a significant effect beyond the internal operating procedures of the Department of Defense and are therefore not required, by Pub. L. 98-577, to be published for public comment. However, any comments submitted by the date shown above will be considered in the promulgation of a final rule.

B. Regulatory Flexibility Act.

As the proposed coverage is not required to be published for public comment pursuant to Pub. L. 98-577, the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) does not apply.

C. Paperwork Reduction Act Information

The rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Part 242

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Part 242 be amended as follows:

PART 242—CONTRACT ADMINISTRATION

1. The authority citation for 48 CFR Part 242 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

2. Section 242.705-1 is amended by adding paragraph (b)(5)(i) to read as follows:

242.705-1 Contracting Officer determination procedure.

* * * * *

(b)(5)(i) The Contracting Officer shall:

(A) Not resolve any questioned costs until he has obtained—

(1) Adequate documentation with respect to such costs; and

(2.) The opinion of the defense contract auditor on the allowability of such costs;

(B) Ensure that the defense contract auditor, to the maximum extent practicable, is present at any negotiation or meeting with the contractor regarding a determination of final indirect cost rates of the contractor;

(C) Ensure that all categories of costs designated in the report of the defense contract auditor as questioned with respect to a proposal for settlement be resolved in such a manner that the amount of the individual questioned costs that are considered allowable will be reflected in the negotiation memorandum; and

(D) Notify the contractor which individual costs were considered unallowable and the respective amounts of the disallowance.

National Oceanic and Atmospheric Administration

50 CFR Part 677

Bering Sea King Crab Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of change of date for a public hearing.

SUMMARY: In reference to a notice of a public hearing that was published February 20, 1986, the North Pacific Fishery Management Council and the Alaska Board of Fisheries hearing date on crab proposals has been changed and the room where the hearing will be held has been added. All other information given in the hearing notice published February 20, 1986, is correct.

FOR FURTHER INFORMATION CONTACT: Jim Glock, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510, 907-274-4563.

In FR Doc. 86-38512 appearing on page 6151 in the issue of February 20, 1986, the following changes are made:

1. Under the "DATE" heading, the date, "March 7, 1986," is corrected to "Saturday, March 1, 1986."

2. Under the "ADDRESS" heading, the hearing will be held in the auditorium of the Northwest and Alaska Fisheries Center, 7600 Sand Point Way NE, Seattle, Washington.

Dated: February 24, 1986.

Richard B. Roe,

Director, Office Fisheries Management, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

February 21, 1986.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

CIVIL RIGHTS COMMISSION

Minnesota Advisory Committee; Agenda Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Minnesota Advisory Committee to the Commission will convene at 6:00 p.m. and adjourn at 9:00 p.m. on March 10, 1986, at the Hennepin County Government Center, Commissioners Conference Room, 300 S. 6th Street, Minneapolis, Minnesota. The purpose of the meeting is to conduct a community forum on civil rights, focusing on the affirmative action plans for the State, the cities of St. Paul and Minneapolis, and the counties of Hennepin and Ramsey.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Talmadge Bartelle or Clark Roberts, Director of the Midwestern Regional Office at (312) 353–7371, (TDD 312/886–2188). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, February 21, 1986.

Yvonne E. Schumacher,
Program Specialist for Regional Programs.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration
Title: Foreign Fishing Vessel Permit Application
Form Number: Agency—NOAA 88–120; OMB—0648–0089
Type of Request: Required to obtain or retain a benefit
Burden: 1,200 respondents; 360 reporting hours
Needs and Uses: Information is used to determine if permits should be issued to foreign vessels for fishing in U.S. waters. The information is also used for enforcement purposes.
Affected Public: Businesses or other for-profit institutions
Frequency: Annually
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Office: Sheri Fox, 395–3785

Agency: National Oceanic and Atmospheric Administration
Title: Survey of Inshore Shrimp Fishery in the Gulf of Mexico
Form Number: Agency—N/A; OMB—N/A
Type of Request: New collection
Burden: 300 respondents; 460 reporting hours
Needs and Uses: The information collected will be used to refine management strategies for the Gulf of Mexico shrimp fishery.
Affected Public: Businesses or other for-profit institutions, small businesses or organizations
Frequency: One background interview and semi-monthly intercept survey
Respondent's Obligation: Voluntary
OMB Desk Office: Sheri Fox, 395–3785

Agency: National Oceanic and Atmospheric Administration
Title: Scientific Research/Public Display Permit Application
Form Number: Agency—N/A; OMB—0648–0084
Type of Request: Extension of the expiration date
Burden: 75 respondents; 2,175 reporting hours
Needs and Uses: Information is used to determine if permits should be issued for scientific research and/or public display of animals protected under the Marine Mammal Protection Act, the Endangered Species Act and the Fur Seal Act.
Affected Public: Individuals or households, state or local governments, businesses or other for-profit institutions, non-profit institutions, small businesses or organizations
Frequency: On occasion
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Office: Sheri Fox, 395–3785

Agency: International Trade Administration
Title: Application for the President's "E" or "E Star" Awards for Export Expansion
Form Number: Agency—ITA 725P; OMB—0625–0065
Type of Request: Extension of the expiration date
Burden: 100 respondents; 2,000 reporting hours
Needs and Uses: In 1961 Executive Order 10978 established Presidential awards for significant contributions to the export expansion program. The application form is the vehicle used to evaluate candidates for the awards.
Affected Public: State or local governments, farms, businesses or other for-profit institutions, non-profit institutions, small businesses or organizations.
Frequency: On occasion
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Office: Sheri Fox, 395–3785

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Sheri Fox, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

Dated: February 20, 1986.

Edward Michals,
Departmental Clearance Officer, Information Management Division, Office of Information Resources Management.

International Trade Administration

[A–122–004]

Steel Reinforcing Bars From Canada; Final Results of Antidumping Duty Administrative Review and Revocation in Part

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review and revocation in part.

SUMMARY: On April 26, 1985 the Department of Commerce published preliminary results of its administrative review and a tentative determination to revoke in part the antidumping finding on steel reinforcing bars from Canada. The review covered the only manufacturer covered by this finding, Western Canada Steel Limited, and the two other known exporters to the United States of this merchandise manufactured by Western Canada Steel Limited and the period April 1, 1983, through March 31, 1984.

We gave interested parties an opportunity to submit oral or written comments on the preliminary results and tentative determination to revoke in part. We received no comments. We also determined that there were no shipments of this merchandise to the United States by Western Canada Steel Limited during the period April 1, 1984, through the date of the tentative determination to revoke in part. We advised all interested parties that there were no shipments and we provided an additional opportunity to comment. Again, we received no comments. In accordance with § 353.53a(a) of the Commerce Regulations, Western Canada Steel Limited requested that we complete the administrative review for that firm. Based on our analysis, the final results of our review for that firm are the same as the preliminary results, and we revoke the finding for merchandise manufactured and exported to the United States by Western Canada Steel Limited.

EFFECTIVE DATE: February 26, 1986.

FOR FURTHER INFORMATION CONTACT: Sheila Forbes or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2923/3601.

SUPPLEMENTARY INFORMATION:

Background

On April 26, 1985, the Department of Commerce ("the Department") published in the Federal Register (50 FR 16529) the preliminary results of its administrative review and tentative determination to revoke in part the antidumping finding on steel reinforcing bars from Canada produced by Western Canada Steel Limited (29 FR 5941, April 21, 1964). The preliminary results covered Western Canada Steel Limited and the two other known exporters to the United States of this merchandise

UMI

manufactured by Western Canada Steel Limited and the period April 1, 1983, through March 31, 1984. The tentative determination to revoke applied to merchandise produced and exported by Western Canada Steel Limited. In accordance with §353.53a(a) of the Commerce Regulations, Western Canada Steel Limited requested that we complete the administrative review for that firm. The Department has now completed the administrative review for that firm.

Scope of the Review

Imports covered by the review are shipments of steel reinforcing bars from Canada, currently classifiable under items 606.7900 and 606.8100 of the Tariff Schedules of the United States Annotated.

The review covers Western Canada Steel, Ltd., the only manufacturer of Canadian steel reinforcing bars to the United States covered by this finding, and the period April 1, 1983, through April 26, 1985.

Final Results of Review and Revocation in Part

We gave interested parties an opportunity to submit oral or written comments on the preliminary results and tentative determination to revoke in part. We received no comments. We also determined that there were no shipments of this merchandise to the United States by Western Canada Steel Ltd. during the period April 1, 1984, through April 26, 1985, the date of the tentative determination to revoke in part. We advised interested parties that there were no shipments and we provided and additional opportunity to comment. Again, we received no comments. Based on our analysis, the final result of our review are the same as those presented in the preliminary results of review with respect to Western Canada Steel Ltd.

For the reasons set forth in the preliminary results, we are satisfied that there is no likelihood of resumption of sales at less than fair value by Western Canada Steel Ltd. Accordingly, we revoke in part the antidumping finding on steel reinforcing bars from Canada. This partial revocation applies to all unliquidated entries of this merchandise manufactured and exported by Western Canada Steel Ltd. entered, or withdrawn from warehouse, for consumption on or after April 26, 1985. The Department shall instruct the Customs Service not to assess antidumping duties on all appropriate entries.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 6.40 percent shall be required on all shipments of Canadian steel reinforcing bars manufactured by Western Canada Steel Ltd. and exported by firms remaining in the finding. This deposit requirement is effective for all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next requested administrative review.

This administrative review, partial revocation, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1), (c)), §§ 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a; 50 FR 32556, August 13, 1985; 353.54).

Dated: February 18, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of issuance of an export trade certificate of review.

SUMMARY: The Department of Commerce has issued an amended export trade certificate of review to U.S. Export & Trading Company (USEXP). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: James V. Lacy, Director, Office of Export Trading Company Affairs, International Trade Administration, 202-377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 ("the Act") (Pub. L. 97-290) authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

(a) High-impact ultraviolet-resistant polyvinyl chloride (UVR-PVC) irrigation pipes, fittings, and related products (the "Products").

(b) High-impact ultraviolet-resistant polyvinyl chloride (UVR-PVC) resin compounds (the "Compounds").

Export Trade Facilitation Services (as They Relate to the Export of Goods and Services)

Export Trade Services include consulting; international market research; product research and design exclusively for export; transportation, including trade documentation and freight forwarding; communication and processing of foreign orders; foreign exchange; financing and collection; and taking title to goods in connection with the foregoing Compounds and Products.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

To engage in the Export Trade in the Export Markets, USEXP may:

(a) Enter into an agreement with each Supplier to serve as that Supplier's sales representative in the Export Markets by providing Export Trade Services. Each agreement may provide that:

(1) The Supplier agrees not to sell, directly or through any intermediary other than USEXP, into the Export Markets, nor to any purchaser in the United States for resale in the Export Markets; and/or

(2) The Supplier agrees to authorize USEXP to appoint, after consultation with and approval by the Supplier, exclusive agents and distributors ("distributors") in the Export Markets.

(b) Enter into agreements with distributors in the Export Markets that USEXP will not sell into a territory in the Export Markets assigned to a distributor except through that distributor nor sell to any purchaser in the United States for resale in the distributor's assigned territory.

(c) Independently or with each Supplier individually.

(1) Establish prices at which the Supplier's Products and/or Compounds will be sold in the Export Markets,

(2) Establish quantities of the Supplier's Products and/or Compounds will to be sold in the Export Markets, and/or

(3) Allocate territories or customers among distributors in the Export Markets.

(d) Enter into agreements with foreign buyers in the Exports Markets by which USEXP will be the buyer's exclusive or non-exclusive supplier of Products and/or Compounds and the technology to make Products from the Compounds. Such agreements may include price, quantity, territory and/or customer restrictions for the Export Markets on the sale in the Export Markets of the Products, Compounds and/or Products made from the Compounds.

A copy of each certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC, 20230.

Dated: February 20, 1986.

James V. Lacy,

Director, Office of Export Trading Company Affairs.

N01500-6

SYSTEM NAME:

Personnel and Training Evaluation Program Automated System.

SYSTEM LOCATION:

Strategic Systems Programs Office, Navy Department, Washington, DC 20376.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Enlisted technicians who have been trained to operate and maintain the Strategic Weapon System on Fleet Ballistic Missile Submarines. These individuals are identified by a Navy Enlisted Classification Code in the series 3301–3349.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, social security number, NEC codes, current duty station and projected rotation date, duty station assignment history, Armed Services Vocational Aptitude Battery or Basic Test Battery scores, completion data for Navy schools, civilian education, promotion history (present and past rate), enlistment data (dates of service entry and expiration of enlistment/extension), patrol experience and scores on the Personnel and Training Evaluation Program examinations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031.

PURPOSE(S):

To maintain a data base which will permit the Strategic Systems Programs Office to record achievement test scores of enlisted members who operate and maintain the Strategic Weapon System on Fleet Ballistic Missile Submarines. This information will be used to assess the adequacy of training received and the need for additional training.

Internal Navy users: Director, Strategic Systems Programs, Chief of Naval Technical Training and assigned schools, Type Commanders and assigned units in the performance of their duties relating to training on the Strategic Weapon System. Commander, Naval Military Personnel Command and Type Commanders and assigned units in the performance of their duties related to personnel assignment. Navy Personnel Research and Development Center who may, from time to time, validate service selection criteria for the DOD. It may be provided to such civilian contractors and their employees as are or may be operating in accordance with an approved official contract with the U.S. Navy.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING/ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on computer media, disks or magnetic tape. Hard copy reports are distributed to authorized user activities. These reports are stored in notebooks or file folders in drawers, cabinets or other filing equipment.

RETRIEVABILITY:

SSN, name and duty station.

SAFEGUARDS:

Access is provided to authorized personnel only on a "need-to-know" basis. Records are maintained in controlled access rooms or areas. Computer terminal access is controlled by terminal identification and password. Terminal identification is positive and maintained by control points. Physical access to terminals is restricted to specifically authorized individuals. Password authorization, assignment and monitoring is the responsibility of the systems manager.

RETENTION AND DISPOSAL:

Records are retained for five years after an individual leaves the Fleet Ballistic Missile program and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Head, Training Systems Branch, Strategic Systems Programs, Navy Department, Washington, DC 20376.

NOTIFICATION PROCEDURE:

Information should be obtained from the systems manager. Requester should provide his/her full name, social security number and military duty status. Visitors should present military identification card, civilian drivers license or other similar identification.

RECORD ACCESS PROCEDURE:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individuals, their supervisors, Naval Military Personnel Command, schools assigned to the Chief of Naval Technical Training.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

N03900-1

SYSTEM NAME:

Naval Air Test Center Technology Data File.

SYSTEM LOCATION:

Office of Staff Assistant for Research and Technology, Naval Air Test Center, Patuxent River, Maryland 20670. Included in this notice are those records duplicated for maintenance at a site closer to where the technical specialists and technology representatives work.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All civilian and military technical managers, directors, technical directors, chief test pilots, chief engineers, program managers, department heads, department chief engineers, technical specialists and technicians who work at the Naval Air Test Center (NAVAIRTESTCEN). It also includes personnel who are considered a technical resource by directorate management.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, SSN, date of birth; status (military or civilian); classification (i.e., GS–0855/12/05 for civilians or 06/1510 for military); formal education; technical courses/operational training; test and evaluation, research and development, and military experience; current RDT&E activity contacts; membership in professional organizations and societies; level of responsibility in NAVAIRTESTCEN organization/organizational code; office telephone number; naval aviation technology preference and a listing of any unique technical skills, experience or knowledge the individual may possess.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031.

PURPOSE(S):

To develop an on-line information network which provides project personnel a means to fully exploit NAVAIRTESTCEN technical resources and provide technical managers a real-time assessment of NAVAIRTESTCEN technical depth in the areas of education, training, experience and professional interface associated with emerging naval aviation technologies.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Users that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICE FOR STORING, RETRIEVING/ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic disk and hard-copy forms.

RETRIEVABILITY:

Social Security Number.

SAFEGUARDS:

During working hours the NAVAIRTESTECEN staff building is open to official visitors and civilian, military and contractor personnel employed by NAVAIRTESTECEN. After working hours the building is secured. Access to the staff building after working hours can only be obtained by securing assistance from the base Command Duty Officer. The system is protected by the following software features: user identification number, password sign-on and procedure name.

RETENTION AND DISPOSAL:

Records are retained in the current data base until he/she is no longer an employee of NAVAIRTESTECEN. When an employee leaves NAVAIRTESTECEN, the record is removed from the current data base. After ten years, the record will be erased from tape.

SYSTEM MANAGER(S) AND ADDRESS:

Staff Assistant for Research and Technology, Naval Air Test Center, Patuxent River, MD 20670.

NOTIFICATION PROCEDURE:

Information should be obtained from the systems manager. Requesting individuals should specify their full names. Visitors should be able to identify themselves by any commonly recognized evidence of identity. Written requests must be signed by the requesting individual.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the systems manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the systems manager,

RECORD SOURCE CATEGORIES:

All data contained in the NAVAIRTESTECEN Technology Data File is obtained from the individuals in the data file. Data is collected by means of an annual questionnaire.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

N05300-3

SYSTEM NAME:

Faculty Professional Files.

SYSTEM LOCATION:

Superintendent, Naval Postgraduate School, Monterey, CA 93943–5100.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Faculty personnel employed by the Naval Postgraduate School and individuals applying for positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Faculty academic promotion/tenure case evaluation files and faculty professional status and accomplishment file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031.

PURPOSE(S):

Records are used by Department Chairmen, Deans, and the Superintendent to determine the ranking, promotion, tenure, reappointment and evaluation of faculty personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To potential/future employers who inquire concerning a faculty member's qualifications, status and accomplishments and who have an interest in hiring the member.

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation also apply to this system.

POLICIES AND PRACTICE FOR STORING, RETRIEVING/ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Name.

SAFEGUARDS:

During work hours, records are secured within locked file drawers within departmental offices to which only authorized personnel have access. After working hours, records are kept within locked files drawers within secured offices located within a locked building which is part of a naval facility to which entry is restricted.

RETENTION AND DISPOSAL:

Records are retained during the faculty member's period of employment. Records are destroyed upon termination of employment.

SYSTEM MANAGER(S) AND ADDRESS:

Provost, Code 01, Naval Postgraduate School, Monterey, CA 93943–5100.

NOTIFICATION PROCEDURE:

Information should be obtained from the systems manager. Requesting individuals should specify their full names. Visitors should be able to identify themselves by any commonly recognized evidence of identity. Written requests must be signed by the requesting individual.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the systems manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the systems manager.

RECORD SOURCE CATEGORIES:

Information in this system comes from previous employers, education background, correspondence, peer evaluations, supervisory evaluations and student evaluations of teaching.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Portions of this system are exempt under 5 U.S.C. 552a(k)(5).

N5300-6

SYSTEM NAME:

Armed Forces Staff College Administrative Data System.

VOL
51
ISS
38
FE
26
1986
UMI

SYSTEM LOCATION:

Armed Forces Staff College (AFSC), 7800 Hampton Blvd., Norfolk, VA 23511-6097.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have attended or will attend AFSC and those who are assigned to staff or faculty at AFSC.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name; SSN; age; sex; service specialty; engineering, logistics, or intelligence experience; rank; work room assignment; marital status; spouse's name; number, names and ages of dependents; seminar assignments; date or rank; years commissioned service; aero rating; Vietnam experience; smoker indicator; source of commission; examination results; education level; auditorium seat; address and telephone number of student while attending course; next duty assignment; major writing exercise grade; and recommendation for faculty assignment. The data items maintained on the historical file are name, SSN, military service, class number, major writing exercise grade, and recommendation for future faculty assignment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5031.

PURPOSE(S):

To maintain a data base that will permit the Armed Forces Staff College to keep track of student's examinations, evaluations and grades; to assign base housing; to achieve a uniform distribution of students at seminars based upon student's experience and military service affiliation; and to maintain a historical file of recommendations for future faculty assignments of students.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICE FOR STORING, RETRIEVING/ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic disk, magnetic tape, and hard copy forms.

RETRIEVABILITY:

AFSC users obtain information by means of standard reports or update programs.

SAFEGUARDS:

Access to building is protected by uniformed guards who require positive identification for admission after hours. System information is protected by port access restrictions and user password sign-on software.

RETENTION AND DISPOSAL:

The record of an individual in the current class is retained on disk and will be available for on-line access. Student information is kept in a historical file for all past classes. The historical file is also retained on disk and will be available for on-line access. An individual's class record will be retained for one year after graduation and then destroyed. There are currently no plans to discard the historical file information.

SYSTEM MANAGER(S) AND ADDRESS:

Commanding Officer, Naval Administrative Command, and Dean, Department of Academic Support, Armed Forces Staff College, 7800 Hampton Blvd., Norfolk, VA 23511-6097.

NOTIFICATION PROCEDURE:

Information should be obtained from the systems manager. Requesting individuals should specify their full names. Visitors should be able to identify themselves by a commonly recognized evidence of identity. Written requests must be signed by the requesting individual.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the systems manager.

RECORD SOURCE CATEGORIES:

Information in this system comes from the individual to whom it applies and from the individual's seminar chairman.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Office of Bilingual Education and Minority Languages Affairs

Grants, Availability, etc.; Bilingual Education—State Educational Agency Program

AGENCY: Department of Education.

ACTION: Application Notice for New Awards under the Bilingual Education: State Educational Agency Program for Fiscal Year 1986.

Programmatic and Fiscal Information

Applications are invited for new projects under the Bilingual Education: State Educational Agency Program.

The purpose of the awards is to provide financial assistance to State educational agencies (SEAs) to collect, aggregate, analyze, and report data and information on each State's population of limited English proficient persons, and the educational services provided or available to those persons. The program further provides assistance for activities designed to improve the effectiveness of programs for limited English proficient persons in their States.

State education agencies (SEAs) are eligible for assistance under the State Educational Agency Program. It is expected that approximately $4,785,000 will be available for this program for fiscal year 1986.

An award to an SEA shall not be less than $50,000 nor greater than 5 percent of the aggregate amount paid to local educational agencies within the State under Part A of Title VII during fiscal year 1985.

These estimates do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Applications will be approved for a period of one year.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand delivered on or before April 14, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.003Q, 400 Maryland Avenue, SW., Washington, DC 20202.

Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets, SW Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

Each late applicant will be notified that its application will not be considered.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations in 34 CFR Parts 500 and 548.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR 74, 75, 77, 78, and 79.

Intergovernmental review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by June 13, 1986, to the following address:

The Secretary, U.S. Department of Education, Room 4181, (CFDA No. 84.003Q), 400 Maryland Avenue, SW. Washington, DC 20202.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATION. DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.

Application Forms

Application forms and program information packages are expected to be available by February 28, 1986.

These may be obtained by writing to Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 421, Reporters Building), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Luis A. Catarineau, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 421, Reporters Building), Washington, DC 20202. Telephone: (202) 245-2922.

Program authority: 20 U.S.C. 3242.

(Catalog of Federal Domestic Assistance Number 84.003, Bilingual Education)

Dated: February 21, 1986.

Carol Pendas Whitten,

Director, Office of Bilingual Education, and Minority Languages Affairs.

[FR Doc. 86-4142 Filed 2-25-86; 8:45 am]

BILLING CODE 4000-01-M

Office of Elementary and Secondary Education

Grants, Availability, etc.; School Construction in Areas Affected by Federal Activity

AGENCY: Department of Education.

ACTION: Application Notice for Transmittal of Applications for Increase Periods Ending June 1986 or June 1987.

Programmatic and Fiscal Information

Notice is given that the Secretary of Education has established a cutoff date for the transmittal of applications for increase periods ending June 1986 or June 1987 for assistance under sections 5 and 9 of Pub. L. 81-815. (An increase period is a period of four consecutive regular school years during which a school district has experienced a substantial increase in school membership as a result of new or increased Federal activities.) This cutoff date also applies to applications for new projects under section 14 of Pub. L. 81-815, and to new applications for supplemental assistance under section 8 of Pub. L. 81-815. (Section 14 authorizes assistance for certain school districts which serve children residing on Indian lands, or which are significantly burdened by the presence of nontaxable Federal property. Section 8 authorizes assistance that supplements certain awards made under sections 5, 9, and 14 of Pub. L. 81-815.)

Approval of these applications is subject to availability of funds.

Federal funds are provided for the construction or temporary provision of urgently needed minimum school facilities in school districts which have had substantial increases in school membership of children who reside on Federal property or reside with a parent who is either in the Uniformed Services of the United States or who is employed on Federal property. Federal funds are provided for construction of needed minimum school facilities in school districts which serve children residing on Indian lands, or which are significantly burdened by the presence of nontaxable Federal property.

Cutoff Date for Transmittal of Applications

Applications for new awards must be mailed or hand delivered on or before June 30, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, 400 Maryland Avenue, SW., Room 2107A, Washington, DC 20202-6272.

Each late applicant will be notified that its application will not be considered.

Applications that are hand delivered must be taken to the U.S. Department of Education, Room 2107A, 400 Maryland Avenue, SW., Washington, DC.

A hand-delivered application will be accepted between 8:00 a.m. and 4:30 p.m. (Washington, DC, time) daily, except Saturdays, Sundays, and Federal Holidays.

Applicable Regulations

Regulations applicable to this program inlcude the following:

(a) The regulations governing the School Construction Program (34 CFR Part 221).

(b) The Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 79).

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes developed by State and local government coordination and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about, and to comply with, the State's

VOL

process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by August 29, 1986 to the following address:

The Secretary, U.S. Department of Education, Room 4181, (CFDA No. 84.040), 400 Maryland Avenue, SW., Washington, DC 20202.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATION. *DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.*

Application Forms

Application forms and program information packages are available. These may be obtained from the appropriate State educational agency which serves the applicant local educational agency.

FOR FURTHER INFORMATION CONTACT: Dr. Walter Steidle, School Construction Program, Division of Impact Aid, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2069, Washington, DC 20202–6272 Telephone: (202) 245–8412.

Program authority: 20 U.S.C. 631–647.

Dated: February 21, 1986.

Lawrence F. Davenport,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 86–4143 Filed 2–25–86; 8:45 am]

BILLING CODE 4000-01-M

Office of Postsecondary Education

Guaranteed Student Loan Program and PLUS Program

AGENCY: Department of Education.

ACTION: Notice of Special Allowance for Quarter Ending December 31, 1985.

The Assistant Secretary for Postsecondary Education announces a special allowance to holders of eligible loans made under the Guaranteed Student Loan Program (GSLP) or the PLUS Program. This special allowance is provided for under section 438 of the Higher Education Act of 1965 (the Act), as amended (20 U.S.C. 1087–1). Except for loans subject to section 438(b)(2)(B) of the Act, 20 U.S.C. 1087–1(b)(2)(B), for the quarter ending December 31, 1985, the special allowance will be paid at the following rates:

	Applicable interest rate (percent)	Annual special allowance rate (percent)	Special allowance rate percent for quarter ending Dec. 31, 1985
GSLP loans or PLUS loans made prior to Oct. 1, 1981.	7	4.00	1.00
	8	2.00	0.50
GSLP loans or PLUS loans made on or after Oct. 1, 1981.	7	3.88	0.97
	8	2.88	0.72
	9	1.88	0.47
	12	0.00	0.00
	14	0.00	0.00

The Assistant Secretary determines the special allowance rate in the manner specified in the Act, for loans at each applicable interest rate by making the following four calculations:

(a) *Step 1.*

Determine the average bond equivalent rate of the 91-day Treasury bills auctioned during the quarter for which this notice applies.

(b) *Step 2.*

Subtract from that average the applicable interest rate (7, 8, 9, 12, or 14 percent) of loans for which a holder is requesting payment;

(c) *Step 3.*

(1) Add 3.5 percent to the remainder; and

(2) In the case of loans made before October 1, 1981, round the sum upward to the nearest one-eighth of one percent;

(d) *Step 4.*

Divide the resulting percent in Step 3 (either (c)(1) or (c)(2), as applicable) by four.

FOR FURTHER INFORMATION CONTACT: Nancy Eakin, Program Specialist, or Ralph Madden, Acting Chief, Policy Section, Guaranteed Student Loan Branch, Division of Policy and Program Development, Department of Education on (202) 245–2475.

(Catalog of Federal Domestic Assistance No. 84.032, Guaranteed Student Loan Program and PLUS Program)

Dated: February 21, 1986.

C. Ronald Kimberling,

Acting Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

District Heating and Cooling Systems: Extension of Closing Date for Applications

AGENCY: Department of Energy.

ACTION: Extension of Solicitation Number DE–PSOI–86CE28546.

New Closing Date: The date by which applications must be received has been extended from February 28, 1986 by four weeks until March 28, 1986. Applications must be received by 4:30 p.m. local prevailing time on that date.

Synopsis of Solicitation: Solicitation is for grant applications for the purpose of assessing the potential for using District Heating and Cooling (DHC) systems in communities where such systems could substantially increase the efficiency of energy delivery and/or substitute abundant and renewable resources for the use of scarce premium fuels while enhancing the economic viability of the community.

Written requests for solicitation should be sent to: U.S. Department of Energy, Office of Procurement Operations, Forrestal Building, Room IJ–005, 1000 Independence Ave., SW., Washington, DC. 20585, Attn.: Document Control Specialist, MA–451.1.

Point of contact: Lynn Warner, telephone number (202) 252–1061.

Issued in Washington, D.C. on February 21, 1986.

Edward T. Lovett,

Director, Contract Operations Division "B" Office of Procurement Operations.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 86–10–NG]

NATGAS (U.S.) Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas from Canada for short-term and spot sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department

of Energy (DOE) gives notice of receipt on February 10, 1986, of an application filed by Natgas (U.S.) Inc. (Natgas), an affiliate of Pan-Alberta Gas Ltd. (Pan-Alberta), for a blanket authorization to import up to 730 Bcf for a two-year period beginning on the date of first delivery. The gas would be supplied by Pan-Alberta or other Canadian suppliers and sold on a short-term or spot basis to U.S. purchasers, including gas distribution companies, pipelines, electric utilities, and industrial or agricultural users. Natgas would also act as a broker or agent on behalf of U.S. purchasers and/or Canadian suppliers. The specific terms of each import and sale would be negotiated on an individual basis including the price and volumes. Natgas proposes to make quarterly reports to the ERA.

The application is filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., on March 28, 1986.

FOR FURTHER INFORMATION CONTACT:

Norman Breckner, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9482;

Michael T. Skinker, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures: In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076–A, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.s.t., March 28, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Natgas' application is available for inspection and copying in the Natural Gas Division Docket Room, GA–076, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on February 20, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86–4189 Filed 2–25–86; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ERA–C&E–86–32]; OFP Case No. 61059–9312–20–24]

Acceptance of Petition for Exemption and Availability of Certification by Champlin Energy Co. & South Coast Energy Co.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of petition for exemption and availability of certification by Champlin Energy Company & South Coast Energy Company.

SUMMARY: On February 3, 1986, Champlin Energy Company & South Coast Energy Company (Champlin—South Coast or CSC) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for their Harbor Cogeneration Project which is jointly owned by CSC a wholly owned subsidiary of Southern California Edison located in Wilmington, California, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in certain new powerplants and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29209, July 6, 1982), and are found at 10 CFR 503.37.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination, and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701 (c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person

VOL 51 ISS 38 FE 26 1986 UMI

may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification, as well as other documents and supporting materials on this proceeding, is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E-190, Washington, D.C. 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any extension, together with a statement of reasons therefor, would be published in the Federal Register.

DATES: Written comments are due on or before April 14, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Office of Fuels Programs, Room GA-045, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585.

Docket No. ERA-C&E-86-32 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue SW., Room GA-045, Washington, D.C. 20585, Telephone (202) 252-8233

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue SW., Washington, D.C. 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: The principal purpose of the proposed facility is the generation of steam for enhanced oil recovery. The Harbor Cogeneration Project will occupy an area of approximately 450 x 250 feet and be located on the Champlin Petroleum Company Wilmington Oil Field property.

The Harbor Cogeneration Project will be designed to produce approximately 500 × 10^6 Btu per hour of 80% quality process steam at approximately 1,000-1,600 psig and 546 °F to 606 °F and to generate approximately 80 MW of electric power. The steam will be used for thermally enhanced oil recovery.

Section 212(c) of the Act and 10 CFR 503.37 provide for a permanent cogeneration exemption from the prohibition of Title II of FUA. In accordance with the requirements of § 503.37(a)(1), CSC has certified to ERA that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility, where the calculation of savings is in accordance with 10 CFR 503.37(b); and

2. The use of a mixture of oil or natural gas and an alternate fuel for the cogeneration facility, for which an exemption under 10 CFR 503.38 would be available, would not be economically or technically feasible.

In accordance with the evidentiary requirements of § 503.37(c) (and in addition to the certifications discussed above), CSC has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environment impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as possible. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that CSC is entitled to the exemption requested.

That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC on February 20, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-85-033; OFF Case No. 66910-9293-01, 03-12]

Order Granting to Pennwalt Corp. an Exemption From the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order granting to Pennwalt Corporation an exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted to Pennwalt Corporation (Pennwalt) a permanent site limitation exemption for a major fuel burning installation (MFBI) from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), for a facility to be located in Riverview, Michigan. The exemption granted permits the use of natural gas as the primary energy source for its proposed gas-fired boilers.

The final exemption order and detailed information on the proceeding are provided in the **SUPPLEMENTARY INFORMATION** section below.

DATES: The order and its provisions shall take effect on April 27, 1986.

The public file containing a copy of this order and other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue SW., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Myra L. Couch, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue SW., Room GA-045, Washington, D.C. 20585, Telephone (202) 252-6769

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue SW., Washington, D.C. 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: The proposed MFBI would consist of two Babcock & Wilcox type boilers with a rated output of 120,00 lb/hr steam at 450 psig each. The new boilers will be installed in Pennwalt's West Plant which is in Riverview, Michigan.

Pennwalt has certified that due to the specific physical limitation enumerated below, the criteria for a permanent

exemption provided for in 10 CFR 503.33(a) are satisfied. Included in the petition is a description of the physical limitations of the plant that are relevant to the location and operation of the new facility. Evidence of the limited space at and around the site for the planned facility were furnished.

Use of coal for this facility at this site is not feasible. The primary barriers to the use of coal at this site is the size and location of the facility. A coal-fired facility was evaluated for the site, including equipment for coal receiving, coal handling, ash collection, water treatment, boilers and auxiliary equipment. It was determined that no location could reasonably be found to provide adequate space for coal-fired configuration.

Pennwalt certified that:

1. The site limitation criteria contained in 10 CFR 503.33(a) are satisfied by the boilers for which exemption is sought and the plant where they will be installed;

2. The mixtures use criteria set forth in 10 CFR 503.9(a) are satisfied by the boilers for which the exemption is sought and the plant at which it will be installed.

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition for Exemption and Availability of Certification relating to the proposed facility in the Federal Register on October 25, 1985 (50 FR 43435), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act.

During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed December 9, 1985; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Site Limitation Exemption

Based upon the entire record of this proceeding, ERA has determined that Pennwalt has satisfied the eligibility requirements for the requested exemption as set forth in 10 CFR 503.33. Therefore, pursuant to section 212(a) of FUA, ERA hereby grants a permanent site limitation exemption to Pennwalt to permit the use of natural gas as the primary energy source for its boilers to be located in Riverview, Michigan.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this action may petition for judicial review thereof at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washington, D.C. on February 19, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-85-027; OFP Case No. 55338-9288-20-24]

Order Granting to Willamette Industries, Inc., Exemption From Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order granting to Willamette Industries, Inc., exemption from Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Willamette Industries, Inc. (Willamette or "the petitioner"), of Oxnard, California. The permanent cogeneration exemption permits the use of natural gas as the primary energy source for a planned Port Hueneme facility. The final exemption order and detailed information on the proceeding are provided in the **SUPPLEMENTARY INFORMATION** section below.

DATES: The order shall take effect on April 27, 1986.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E-190, Washington, D.C. 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION:

Frank Duchaine, Coal & Electricity Division, Office of Coal and Electricity Programs, Economic Regulatory Administration, 1000 Independence Avenue SW., Room GA-045, Washington, DC 20585, Telephone (202) 252-8233

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: The proposed cogeneration project for the Port Hueneme site will supply 100% of the steam required for the paper machine and the other mill systems. It will also supply all of the mill's electrical needs with surplus electrical generation being sold to the utility grid.

The Port Hueneme paper mill is located in Oxnard, California, and is one of four mills in Willamette that produce paper.

The project site will be within the confines of the Port Hueneme mill plant site which is located at the southwest edge of the city along the ocean coast.

The installation proposed will be a simple topping cycle cogeneration facility, incorporating a dual pressure waste heat boiler to gain maximum heat recovery efficiency. The flue gases will be treated in two steps. First, steam is injected to reduce NO_x to 75 PPM. Second, a selective catalytic reductor will reduce NO_x to 15 PPM. The waste heat boiler exhaust gases are then further utilized to heat process water and displace the need for the hot air generated in the present vapor absorption system, thereby eliminating the need for natural gas in these areas.

Power will be produced in a simple topping cycle facility with a gas turbine directly driving the electrical generator. No secondary generation through a combined cycle steam turbine is planned at this time. The permit to operate is based on the gas turbine being operated at its full ISO load rating of 21.8 MW. However, the project will be originally operated at a lessor rate to be in balance with the mill's current steam and electrical constraints.

The gas turbine is designed for a dual fuel capability (natural gas and No. 2 distillate). However, for air quality and economic reasons the special fuel burning nozzles and other equipment required to burn distillate fuel were not purchased and the system will burn only

VOL 51 ISS 38 FE 26 1986 UMI

natural gas. At full ISO rating the amount of gas consumed will be 220.1 MMBtu/hr. At the initial startup load of 18.0 MW the turbine will consume 190.9 MMBtu/hr.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including Willamette's certification to ERA, in accordance with 503.37(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the proposed powerplant, where the calculation of savings is in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the Federal Register on September 20, 1985 (50 FR 38161), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on November 4, 1985; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act.

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that Willamette has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to Willamette to permit the use of natural gas as the primary energy source for its cogeneration facility in Oxnard, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washington, D.C. on February 13, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CI86-19-003]

Amoco Production Co.; Application for Modification of Order Permitting and Approving Limited-Term Abandonments and Granting Certificates

February 20, 1986.

Take notice that on February 11, 1986, Amoco Production Company (Amoco), pursuant to section 7 of the Natural Gas Act (NGA), 15 U.S.C. 717f, and Parts 154 and 157 of the Federal Energy Regulatory Commission's (Commission) regulations thereunder (18 CFR Parts 154 and 157), filed an application requesting that in Docket No. CI86-19-000 the Commission modify Paragraph (A) of its Order Permitting And Approving Limited-Term Abandonments and Granting Certificates issued November 1, 1985 by substituting March 31, 1987 for March 31, 1986 therein, all as more fully shown in the application which is on file with the Commission and open to public inspection.

Amoco states that the circumstances that called forth Amoco's application filed on October 16, 1985 and supported issuance of the Commission's November 1, 1985 Order will continue past the March 31, 1986 termination date prescribed in Paragraph (A) of the November 1, 1985 Order to at least until March 31, 1987. If the limited-term abandonment and certificate authorization granted by the November 1, 1985 Order is extended past March 31, 1986, Amoco states that it could continue existing spot market sales and make additional sales.

Any person desiring to be heard or to make any protests with reference to said application should on or before March 10, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF86-411-000]

The City of St. Marys, West Virginia; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

February 10, 1986.

On January 17, 1986, the City of St. Marys (Applicant), Town Hall, St. Marys, West Virginia 26170 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 40 megawatt hydroelectric facility is located on the Ohio River, in Pleasants County, West Virginia.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-199-000]

Exxon Corp.; Application for Limited-Term Certificate of Public Convenience and Necessity With Pre-Granted Abandonment

February 20, 1986.

Take notice that the Applicant listed herein has filed an application pursuant to Section 7 of the Natural Gas Act for authorization to sell gas in interstate commerce as described herein.

The circumstances presented in the application appear to meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protests with reference to said application should on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

Docket No. and date filed	Applicant	Purchaser and location	Price per Mcf	Pressure base
CI86-199-000, Feb. 7, 1986	Exxon Corporation, P.O. Box 2180, Houston, Texas 77252-2180.	UER Marketing Company, High Island Block A-570 Field, Offshore Texas.	[1]	—

[1] Pursuant to the expedited procedures set forth in § 2.77 of the Commission's rules, Applicant requests that it be issued a Limited-Term Certificate with Pre-Granted Abandonment authorizing it to sell NGPA section 102(c) gas under a Gas Purchase Contract dated September 1, 1985, for a term through November 27, 1987. Applicant was previously granted authorization in Docket No. CI82-001 by order issued November 27, 1985, to abandon sales for a two-year term of production from the subject blocks not purchased by United Gas Pipe Line Company. The abandonment application in Docket No. CI82-4-001 was filed under the expedited procedures established in Order No. 436. Therefore, Applicant requests that this related certificate application be considered on an expedited basis.

BILLING CODE 6717-01-M

[Docket No. SA86-6-000]

Home Petroleum Corp.; Petition for Adjustment

Issued Febrary 20, 1986.

Take notice that on November 26, 1985, Home Petroleum Corporation (Home Petroleum) filed a petition with the Commission for adjustment pursuant to section 502(c) of the Natural Gas Policy Act of 1978, requesting an extension of time within which to make Btu refunds required under Commission Order Nos. 399, 399-A and 399-B.

Home Petroleum states that on October 7, 1985, Tennessee Gas Pipeline Corporation requested it to calculate the amounts owed to Tennessee pursuant to the Commission's Btu refund order. Home Petroleum maintains that in all other instances where refunds have been required, the purchaser has made the calculation and that it was unprepared for Tennessee's request. Home Petroleum has requested Tennessee's assistance in making the calculation.

The procedures applicable to the conduct of this proceeding are set forth in Rules 1101-1117 [Subpart K] of the Commission's rules of practice and procedure. Any person desiring to participate in this proceeding must file a motion to intervene in accordance with Rule 1105. All motions to intervene must be filed within 15 days after publication of this notice in the Federal Register.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 7563-005, et al.]

Hydroelectric Applications; South Fork II, Inc., et al.

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Transfer of License.

b. Project No: 7563-005

c. Date Filed: January 10, 1986.

d. Applicant: South Fork II, Inc. (Licensee) and South Fork II Associates Limited Partnership (Transferee).

e. Name of Project: Weeks Falls Hydroelectric.

f. Location: On the South Fork Snogualmine River in Sec. 34, T23N, R9E in King County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Harry P. Hosey, President, Hosey & Associates Engineering Company, Northup West Business Park, 2820 Northup Way, Bellevue, WA 98004, (206) 827-8861.

i. Comment Date: March 31, 1986.

j. Description of Project: On April 25, 1985, a major license was issued to South Fork II, Inc. for the construction, operation and maintenance of the Weeks Falls Project No. 7563. It is proposed to transfer the license to South fork II Associates Limited Partnership. The purpose of this proposed license transfer is to facilitate the financing and construction of the licensed project through a traditional partnership financing structure.

The Licensee certifies that it has fully complied with the terms and conditions of its license and obligates itself to pay all annual charges accrued under the license to the date of transfer. The Transferee accepts all the terms and conditions of the license and agrees to be bound thereby to the same extent as though it was the original licensee.

k. This notice also consists of the following standard paragraphs: B and C.

2 a. Type of Application: Preliminary Permit.

b. Project No: 9535–000.

c. Date Filed: October 9, 1985.

d. Applicant: Painted Rocks Hydro Associates.

e. Name of Project: Painted Rocks.

f. Location: At the Montana Department of Natural Resources and Conservation's Painted Rocks dam on the West Fork Bitterroot River, in Ravalli County, Montana.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Archie R. Ford, P.O. Box 1940, Orofino, ID 83455.

i. Comment Date: March 28, 1986.

j. Competing Application: Project No. 9364, date filed: July 29, 1985. Due date: February 5, 1985.

k. Description of Project: The existing project facilities at the site consist of: (1) a 143-foot-high rockfill embankment dam; (2) a 160-foot-wide spillway; (3) a 30-foot-high intake tower; (4) a 580-foot-long, 10-foot-diameter concrete conduit; and (5) a 655-acre reservoir with a capacity of 45,000 acre-feet at a normal maximum surface elevation of 4467.5 feet. In addition the project would consist of the following proposed facilities: (1) Lining the outlet conduit from the outlet gates to the discharge point with a 84-inch-diameter penstock; (2) a bifurcation 45 feet upstream of the discharge point; (3) a 54-inch-diameter penstock from the bifurcation to the powerhouse at the toe of the dam; (4) a powerhouse containing 2 generating units with a combined capacity of 1.458 MW and an annual average generation of 7.5 GWh; and (5) upgrading an existing transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $62,000. No new roads would be constructed or drilling conducted during the feasibility study.

l. Purpose of Project: Project power would be sold.

m. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

3 a. Type of Application: Surrender of License.

b. Project No: 3012–003.

c. Date Filed: December 13, 1985.

d. Applicant: Saybrooke Manufacturing Company.

e. Name of Project: Saybrooke.

f. Location: On the South Branch of the Pawtuxet River in Kent County, Rhode Island.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Gary P. Halliwell, Halliwell Associates, Inc., 865 Waterman Avenue, East Providence, Rhode Island 02914.

i. Comment Date: March 28, 1986.

j. Description of Proposed Surrender: The project would have consisted of: (1) An existing granite block step dam, 110 feet long and 21 feet high; (2) a reservoir of negligible storage capacity at spillway crest elevation 77.2 feet m.s.l.; (3) a headrace 150 feet long; (4) a powerhouse area in a mill building with two turbine-generator units with a total capacity of 235 kW; (5) a tailrace, 300 feet long; (6) electrical facilities; and (7) other appurtenances.

The Licensee states that the State of Rhode Island Water Resources Board is planning an upstream water supply reservoir, to be known as the Big River Reservoir, which would control the flow available for the Saybrooke Project. This flow issue has not been resolved and, consequently, the Licensee is not able to provide the required support information to the financial institutions for project financing.

k. This notice also consists of the following standard paragraphs: B, C, and D2.

4 a. Type of Application: Surrender of License.

b. Project No. 3010–003.

c. Date Filed: December 13, 1985.

d. Applicant: Valley Industries, Inc.

e. Name of Project: Centerville.

f. Location: On the South Branch of the Pawtuxet River in Kent County, Rhode Island.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Gary P. Halliwell, Halliwell Associates, Inc., 865 Waterman Avenue, East Providence, Rhode Island 02914.

i. Comment Date: March 28, 1986.

j. Description of the Proposed Surrender: The project would have consisted of: (1) An existing granite block arch-step dam, 80 feet long and 16.0 feet high; (2) a reservior of negligible storage capacity at spillway crest elevation 124.9 feet m.s.l.; (3) a headrace 175 feet long: (4) a powerhouse area in a mill building with two turbine-generator units with a total capacity of 155 kW; (5) a tailrace, 200 feet long; (6) trashracks and headgates; (7) electrical facilities; and (8) other appurtenances.

The Licensee states that the State of Rhode Island Water Resources Board is planning an upstream water supply reservoir, to be known as the Big River Reservoir, which would control the flow available for the Centerville Project. This flow issue has not been resolved and, consequently, the Licensee is not able to provide the required support information to the financial institutions for project financing.

k. This notice also consists of the following standard paragraphs: B, C, and D2.

5 a. Type of Application: Amendment of Annual License.

b. Project No.: 1250–002.

c. Date Filed: January 31, 1985.

d. Applicant: City of Pasadena Water and Power Department.

e. Name of Project: Azusa Water Power Project.

f. Location: On the San Gabriel River, partly on the lands of Angeles National Forest, in Los Angeles County, California.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Karl A. Johnson, General Manager, City of Pasadena Water and Power Department, 100 North Garfield Avenue, Pasadena, California 91109. (818) 405–4420.

i. Comment Date: April 2, 1986.

j. Expiration Date of Initial License: Applicant's initial license for Project No. 1250 expired on May 31, 1984. The project is currently under annual license.

k. Description of The Proposed Action: The City of Pasadena Water and Power Department (City), Licensee for Project No. 1250, proposes to remove the following project works from within its project boundary: (1) An intake structure, within the Los Angeles County Flood Control District's (District) San Gabriel No. 1 Reservoir; (2) a 30-foot-diameter, approximately 1850-foot-long outlet tunnel reduction valves at the end of the outlet tunnel. The City requests the above changes, in its existing license for Project No. 1250, to accommodate Commission authorization of construction and operation of Project No. 8764 at the District's San Gabriel No. 1 Dam and Reservoir.

l. This notice also consists of the following standard paragraphs: B, C, and D1.

6 a. Type of Application: Preliminary Permit.

b. Project No.: 9226–000.

c. Date Filed: May 22, 1985.

d. Applicant: The City of Redding, California.

e. Name of Project: Fiddlers Reservoir.

f. Location: On Middle Fork Cottonwood Creek, near Platina, in Shasta and Tehama Counties, California

(in Section 28 of T29N, R7W, M.D.B. & B).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Robert E. Courtney, City Manager, City of Redding, 760 Parkview Avenue, Redding, CA 96001, (916) 225–4060.

i. Comment Date: March 25, 1986.

j. Competing Application: Project No. 9218–000, date filed: May 22, 1985.

k. Description of Project: The proposed project would consist of: (1) A 348-foot-high, 3,500-foot-long zoned earthfill dam at elevation 1,102 feet msl; (2) a reservoir with a storage capacity of 545,000 acre-feet and a surface area of 5,500 acres; (3) a 12-foot-diameter, 400-foot-long penstock; (4) a powerhouse containing two or more turbine-generator units with a combined rated capacity of 15,200 kW and operating under a head of 300 feet; (5) a 69–kV, 17-mile-long transmission line interconnecting the project to an existing 230:kV, Western Area Power Administration (WAPA) line. The project's estimated average annual generation of 35.8 GWh would be sold to the City of Redding Electric Department customers.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $300,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

7 a. Type of Application: Preliminary Permit.

b. Project No.: 9223–000.

c. Date Filed: May 22, 1985.

d. Applicant: The City of Redding, California.

e. Name of Project: Schoenfield Reservoir.

f. Location: On Red Bank Creek, near Red Bluff, partially within lands administered by the Bureau of Land Management, in Tehama County, California (in Section 16 of T26N, R6W, M.D.M. & B).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Robert E. Courtney, City Manager, City of Redding, 760 Parkview Avenue, Redding, CA 96001, (916) 225–4060.

i. Comment Date: March 25, 1986.

j. Competing Application: Project No. 9219–000, date filed: May 22, 1985.

k. Description of Project: The proposed project would consist of: (1) A 300-foot-high, 1,000-foot-long zoned earthfill dam at elevation 1006 feet msl; (2) a reservoir with a storage capacity of 177,000 acre-feet and a surface area of 2,600 acres; (3) a 6-foot-diameter, a 4-mile-long conduit connecting the Dippingvat Reservoir to the Schoenfield Reservoir (upper powerhouse); (4) a 5-foot-diameter, 350-foot-long penstock (lower powerhouse); (5) a powerhouse (upper) containing two or more turbine-generator units with a combined rated capacity of 1,800 kW and operating under a head of 190 feet; (6) a powerhouse (lower) containing two or more turbine-generator units with a combined rated capacity of 2,500 kW and operating under a head of 250 feet; and (7) a 34.5–kV, 25-mile-long transmission line interconnecting the project to an existing 230-kV, Western Area Power Administration (WAPA) line, The project's estimated average annual generation of 17.5 GWh would be sold to the City of Redding Electric Department customers.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $300,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

8 a. Type of Application: Preliminary Permit.

b. Project No.: 9224–000.

c. Date Filed: May 22, 1985.

d. Applicant: The City of Redding, California.

e. Name of Project: Dippingvat Reservoir.

f. Location: On South Fork Cottonwood Creek, near Red Bluff, partially within lands administered by the Bureau of Land Management, in Tehama County, California (In Section 31 of T27N, R6W, M.D.M.&B.)

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 10-foot-high, 100-foot-long concrete gravity dam; (2) a reservoir with a surface area of 7 acres, a storage capacity of 50-acre-feet, and a normal water surface elevation of 177.0 feet msl; (3) a new concrete intake structure; (4) a new 42-inch-diameter, 2,800-foot-long steel penstock; (5) a new concrete powerhouse containing one generating unit with a capacity of 225 kW and one generating unit with a capacity of 475 kW for a total installed capacity of 700 kW; (6) a new transmission line, 150 feet long; and (7) appurtenant facilities. The Applicant estimates the average annual generation would be 2,300,000 kWh. The existing dam is owned by the City of Troy, New York.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. *Proposed Scope of Studies under Permit*—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $20,000.

12 a. Type of Application: Exemption 5 MW or Less.

b. Project No.: 9180–000.

c. Date Filed: May 8, 1985.

d. Applicant: City of Greenville.

e. Name of Project: Franklin Street Dam.

f. Location: Flat River, Montcalm County, Michigan.

h. Contact Person: Mr. Abe A. Munfah, Ayres, Lewis, Norris & May, Inc., 3983 Research Park Drive, Ann Arbor, MI 48104, (313(371–7800.

i. Comment Date: March 24, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing Franklin Street Dam owned by the Applicant, consisting of a 50 foot-long gated concrete spillway section flanked by two 16-foot-high earth embankments, 200 feet long and 350 feet long, respectively; (2) an existing reservoir with a surface area of approximately 300 acres and a gross storage capacity of approximately 1,500 acre-feet at the normal water surface elevation of 811.0 feet (m.s.l.); (3) a proposed powerhouse, located adjacent to the dam spillway section and housing a single generating unit of 130 kW capacity; and (4) appurtenant facilities. The estimated average annual generation of the project is approximately 915,000 KWh. Project power would be sold to Consumers Power Company.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, D3a.

l. Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

13 a. Type of Application: Preliminary Permit.

b. Project No: 9657–000.

c. Date Filed: December 2, 1985.

d. Applicant: St. Maries River Hydro, Inc.

e. Name of Project: St. Maries River.

f. Location: On the St. Maries River in Sec. 34, T45N, R2W, near St. Maries, Benwah County, Idaho.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James R. Morris, St. Maries River Hydro, Inc., P.O. Box 1016, Lewiston, ID 83501.

i. Comment Date: March 28, 1986.

j. Competing Application: Project No. 9660, date filed: December 3, 1985. Due Date: March 21, 1986.

k. Description of Project: The proposed project would consist of: (1) A 10-foot-high diversion dam at elevation 2,800 feet; (2) a 2,315-foot-long, 102-inch-diameter penstock; (3) a powerhouse containing one generating unit with a capacity of 3,670 kW; and (4) a 6-mile-long transmission line. Applicant estimates the average annual energy production to be 16,136,000 kWh.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $770,000. No new roads would be constructed or drilling conducted during the feasibility study.

l. Purpose of Project: The proposed power produced is to be sold to the local power company.

m. This notice also consists of the following standard paragraphs: A8, B, C, and D2

14 a. Type of Application: Preliminary Permit.

b. Project No: 9633–000.

c. Date Filed: November 20, 1985.

d. Applicant: Stanley Hawkins.

e. Name of Project: Hawkins Willow creek.

f. Location: On Willow Creek, tributary to the Snake River, in Section 21, T1S, R40E, Bonneville County, Idaho.

h. Contact Person: Vernon Ravenscroft, P.O. Box 893, Boise, ID 83701, (208) 345–2670.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed run-of-river project would consist of: (1) A modified head gate diversion structure along the bank in a natural slack water meadow area having water surface elevation 5880 feet MSL; (2) a 42-inch-diameter, 5,300-foot-long buried steel penstock; (3) a powerhouse containing a generating unit rated at 693-kW at a flow of 60 cfs and at a net head of 165 feet; (4) a tailrace; and (5) a 7.2-kV transmission line.

A preliminary permit, if issued, does not authorize construction. Applicant seeks an 18-month preliminary permit to conduct engineering, economic and environmental studies to ascertain project feasibility and to support a development application. The estimated cost of permit activities is $21,000.

k. Purpose of Project: Applicant would sell the power produced at the site to Utah Power & Light Company. Applicant estimates that the average annual energy production would be 3,748,644 KWh.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2

d. Applicant: Newburgh Hydro Partners.

e. Name of Project: Newburgh Lock and Dam.

f. Location: On the Ohio River in Henderson County, Kentucky, and Warrick County, Indiana, near Newburgh, Indiana.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Louis Rosenman, LeBoeuf, Lamb, Leiby, and McCrae, Suite 110, 1333 New Hampshire Ave., NW., Washington, DC 20036, (202) 457–7500.

i. Comment Date: March 24, 1986.

j. Competing Application: Project No. 9455, date filed September 13, 1985. Comment due date March 6, 1986.

k. Description of Project: The proposed would utilize the existing U.S. Corps of Engineers' Newburgh Lock and Dam and reservoir, and would consist of: (1) A proposed 10 foot diameter steel penstock approximately 50 feet long; (2) a proposed concrete powerhouse approximately 130 feet by 230 feet housing one 40,000-kW generator; (3) a proposed concrete tailrace approximately 130 feet wide, 220 feet long and 15 feet deep; (4) a proposed 125-kV transmission line approximately 9,500 feet long; and appurtenant facilities. The Applicant estimates that the average annual generation would be 180 GWh. All project energy generated would be sold to Kentucky Utilities or Alcoa Corporation.

l. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

m. Proposed Scope under this Permit; A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $145,000.

16 a. Type of Application: Exemption.

b. Project No: 9247–000.

h. Contact Person: Mr. Mike Graham, 484 East 300 North, Manti, UT 84642.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed project would be located on lands of the State of Utah and would consist of: (1) A new diversion dam about 5 feet high; (2) a new intake structure and canal, about 13,000 feet long; (3) a new penstock, 24 inches in diameter and about 5,200 feet long; (4) a new powerhouse with an installed capacity of 3,500 kW operating under a head of 1,700 feet; (5) a tailrace returning flow to Pine Creek; (6) a new 12.5-kV transmission line, about one mile long; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 20,000,000 kWh.

k. Purpose of Project: Project energy would be sold to local municipalities or the local power company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

m. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $5,000.

19 a. Type of Application: Preliminary Permit.

i. Comment Date: March 24, 1986.

j. Competing Application: Project No. 9486-001, date filed: October 2, 1985.

k. Description of Project: The proposed project would consist of: (1) An existing stone block masonry dam, 10 feet high and 175 feet long; (2) an existing reservoir with a storage capacity of 1,000 acre-feet and water surface area of 200 acres at normal water surface elevation of 37 feet m.s.l.; (3) a new powerhouse, approximately 30 feet square, housing an installed capacity of 300 kW; (4) a proposed 450-foot-long, 480-V transmission line; and (5) appurtenant facilities. Applicant estimates that the average annual generation would be 1.3 GWh. The owner of the dam is the Metropolitan Distict Commission of Massachusetts.

l. Purpose of Project: The Applicant anticipates that project energy will be sold to the Boston Edison Company.

m. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

n. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $25,000.

20 a. Type of Application: Declaration of Intention.

b. Docket No.: EL86–13–000.

c. Date Filed: November 29, 1985.

d. Applicant: Earle Ausman & Earl Ellis.

e. Name of Project: McRoberts Creek Hydropower.

h. Contact Person: Mr. Mike Graham, 484 East 300 North, Manti, UT 84642.

i. Comment Date: April 11, 1986.

j. Description of Project: The proposed project would be located entirely within the Stanislaus National Forest and would consist of: (1) A diversion/intake structure on Niagara Creek at elevation 6,020 feet m.s.l.; (2) a pipeline/penstock, 3,600 feet long; (3) a powerhouse with an installed capacity of 2,900 kW operating under a head of 1,035 feet; (4) a tailrace returning flow to the creek; (5) a 12.0–kV transmission line about nine miles long; and (6) appurtenant facilities. The Applicant estimates that the average annual energy output would be 8,205,000 kWh.

k. Purpose of Project: Project energy would be sold to local municipalities or the local power company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $85,000.

22 a. Type of Application: Preliminary Permit.

b. Project No.: 9619–000.

c. Date Filed: November 14, 1985.

d. Applicant: Friant Power Authority.

e. Name of Project: Little Dry Creek Siphon.

f. Location: On Friant Kern Canal, near Clovis, within lands administered by the U.S. Bureau of Reclamation, in Fresno County, California (in Section 28 of T11S, R21E, M.D.B. & M).

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. John Boudreau, Manager, c/o Terra Bella Irrigation District, 24790 Avenue 95, Terra Bella, CA 93270, (209) 535–4414.

i. Comment Date: April 11, 1986.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) A powerhouse of the Friant Kern Canal utilizing two turbine-generator units with a combined rated capacity of 800 kW, operating under a heard of 11 feet; (2) a 1,000-foot-long transmission line interconnecting the project to an existing Pacific Gas and Electric Company (PG&E) 12–kV transmission line located along Auberry Road. The project's estimated average annual generation of 3.0 GWh would be sold to PG&E.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $50,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

23 a. Type of Application: Preliminary Permit.

b. Project No.: 9563–000.

c. Date Filed: November 1, 1985.

d. Applicant: Uniontown/Evansville Associates.

e. Name of Project: Uniontown/Evansville Project.

f. Location: On the Ohio River in Posey County, Indiana and Union County, Kentucky.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Jordan R. Walker, 484 East 300 North, Manti, Utah 84642, (801) 835–0202.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers' Uniontown Lock and Dam, having a dam water elevation approximately 342 feet MSL and would consist of: (1) A new powerhouse 100 feet by 200 feet located on the Kentucky side of the dam and containing thirteen turbine/generators having a total installed capacity of 65,000 kW; (2) a new tailrace extending 200 feet downstream of the powerhouse; (3)(a new 3,960-foot-long 25–kV transmission line; and (4) appurtenant facilities. The Applicant estimates the average annual energy production to be 350,000 MWh.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to local municipalities or to Southern Indiana Gas & Electric.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. *Proposed Scope of Studies under Permit:* A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $125,000.

24 a. Type of Application: Preliminary Permit.

b. Project No.: 9816–000.

c. Date Filed: December 31, 1985.

d. Applicant: Taft Hydro.

e. Name of Project: Utica Dam.

f. Location: On the Mohawk River in Oneida County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Lawrence R. Taft, Taft Hydro, 10315 Caughdenoy Rd., Central Square, NY 13036, (315) 437–2547.

i. Comment Date: April 11, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 8-foot-high, 115-foot-long concrete gravity dam; (2) a reservoir with a surface area of 32 acres, a storage capacity of 422 acre-feet, and a normal water surface elevation of 402 feet m.s.l. with: (3) three 9.0-foot-high steel taintor gates: (4) new 2-foot-high wood flashboards; (5) five siphon intake generating units with a capacity of 132 kW each for a total installed generating capacity of 660 kW; (6) a new 40-foot-wide, 100-foot-long earth tailrace; (7) a new transmission line, 1,000 feet long; and (8) appurtenant facilities. The Applicant estimates the average annual generation would be 3,500,000 kWh. The existing dam is owned by the New York State Department of Transportation, Albany, New York.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $21,000.

25 a. Type of Application: Major License.

b. Project No.: 7362–006.

c. Date Filed: January 23, 1985 as supplemented.

d. Applicant: Renewable Resources Development, a General Partnership, and Upper Lake Creek Hydroelectric.

e. Name of Project: Lake Creek Hydroelectric.

f. Location: On Lake Creek, near Riggins, in Idaho County, Idaho on lands of the United States administered by the Bureau of Land Management, Section 23, Township 24N, Range 3E.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

j. Description of Project: The proposed project would consist of: (1) A 3-foot-high, 24-foot-long concrete diversion structure with crest-elevation of 3,647 feet; (2) a 30-inch-diameter, 10,490-foot-long steel penstock; (3) a concrete powerhouse containing one generating unit with an installed capacity of 4,826kW at a head of 1,170 feet; and (4) a 5,600-foot-long, 34.5-kV transmission line connecting through other proposed projects to a substation in Riggins. The estimated project cost, in 1984 dollars, is $2,650,000.

k. Purpose of Project: Project power would be sold to Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

28 a. Type of Application: Preliminary Permit.

b. Project No: 9712–000.

c. Date Filed: December 23, 1985.

d. Applicant: Beardslee Corporation.

e. Name of Project: Beardslee Dam.

f. Location: East Canada Creek in Herkimer and Montgomery Counties, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. C. William Carter, Beardslee Corporation, 420 Lexington Avenue, Suite 440, New York, NY 10170, (212) 986–0440.

i. Comment Date: April 11, 1986.

j. Description of Project: The Applicant proposes to develop the presently unutilized capacity at the Beardslee Dam owned by Niagara Mohawk Power Corporation for the existing unlicensed East Canada Creek Project No. 2648. The proposed project would consist of: (1) An existing dam consisting of: (a) an 18-foot-high, 273-foot-long concrete gravity section, and (b) a 65-foot-high, 647-foot-long rock and earth filled section; (2) a reservoir with a surface area of 255 acres, a storage capacity of 6,500 acre-feet, and a normal water surface elevation of 508.5 feet m.s.l. when structurally increasing the height of the concrete gravity dam by 10 feet to a new dam height of 28 feet; (3) a new 50-foot-wide, 100-foot-long power canal; (4) a new concrete intake structure; (5) a new 12-foot-diameter, 2,600-foot-long steel penstock; (6) a new steel surge tank; (7) a new concrete powerhouse containing two generating units with a capacity of 10,000 kW each for a total installed generating capacity of 20,000 kW; (8) a new 100-foot-long tailrace; (9) a new transmission line, 750 feet long; (10) a new 2,000-foot-long access road; and (11) appurtenant facilities. The Applicant estimates the average annual generation would be 9,000,000 kWh. The existing dam is owned by Niagara Mohawk Power Corporation.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $160,000.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed

project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application [see 18 CFR 4.36 (1985)]. Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9), and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. *Notice of intent*—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevent to the granting of an exemption. If an agency

does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: February 21, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-4172 Filed 2-25-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-292-000 et al.]

Natural Gas Certificate Filings; National Fuel Gas Supply Corp. et al.

Take notice that the following filings have been made with the Commission:

1. National Fuel Gas Supply Corporation

[Docket No. CP86-292-000]

February 20, 1986.

Take notice that on January 27, 1986, National Fuel Gas Supply Corporation (Applicant), Ten Lafayette Square, Buffalo, New York, 14203, filed Docket No. CP86-292-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the replacement of a portion of existing pipeline and for permission and approval to abandon certain facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to replace 1.78 miles of its pipeline, designated as Line K, located in the Town of West Seneca, Erie County, New York, with 1.61 miles of 20-inch new coated steel line. Applicant further proposes to abandon and replace an existing regulator station with a new facility. The total estimated cost of the project, as set forth in the application, is $556,000, which Applicant asserts would be financed with internally generated funds and/or interim short-term bank loans.

Applicant's proposals are part of its effort to relocate bare pipeline where it crosses residential areas.

Comment date: March 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Columbia Gulf Transmission Company

[Docket No. CP85-285-000]

February 20, 1986.

In Docket No. CP85-285-000, Columbia Gulf Transmission Company (Applicant), P.O. Box 683, Houston, Texas 77001, requested specific certificate authorization to continue a transportation service pursuant to section 7(c) of the Natural Gas Act which was self-implemented under its Order No. 60 blanket certificate and was eligible for "grandfathered" treatment pursuant to § 284.105 of the Commission's Regulations. This specific transaction could continue over the short term under the "grandfathered" provisions of Order No. 436 and can continue over the long term under the terms and conditions promulgated by Order No. 436. Applicant has, however, indicated that it desires the Commission to process this separate request under the standard section 7(c) procedures.

To ensure the consistency of the proposal with the purposes of Order No. 436, issued October 9, 1985, in Docket No. RM85-1-000, the application filed in the referenced docket is being renoticed.

Take notice that on February 14, 1985, Applicant filed in Docket No. CP85-285-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natrual gas for Natural Gas Pipeline Company of America (Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport a contract-demand volume of 6,000 Mcf per day of Natural's gas produced from West Cameron Blocks 509 and 510, offshore Louisiana, as well as any excess volumes Natural may request Applicant to transport, such excess volumes to be transported on a best-efforts, interruptible basis.

Applicant states it would transport the gas from a platform in West Cameron Block 531, offshore Louisiana, and would redeliver equivalent volumes to Natural at an interconnection of Applicant's and Stringray Pipeline Company's facilities in West Cameron Block 510, offshore Louisiana.

Applicant further states that Natural would pay Applicant a contract demand charge of 64.0 cents per Mcf of gas and 2.09 cents per Mcf for excess volumes of gas received for transportation at the point of receipt. Transportation would continue for a period of three years from the date of initial delivery and yearly thereafter unless terminated by either party.

Comment date: March 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Northern Natural Gas Company, Division of InterNorth, Inc.

[Docket No. CP86-285-000]

February 20, 1986.

Take notice that on January 23, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-285-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to install, operate and maintain one small volume measurement station to accommodate natural gas deliveries to a non-right-of-way grantor through the local distribution company under the certificate issued in Docket No. CP83-496-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that the residential end-user, LaMonte L. Rauch, is located in Washington County, Minnesota, and would be served through Peoples Natural Gas Company, division of Utilicorp United Inc. (Peoples). It is stated that the proposed volumes to be sold would be within Peoples' existing firm entitlement and that service rendered through the proposed facilities would have no impact on Northern's peak day and annual deliveries. It is further stated that required volumes would be served from the firm entitlement designated by Peoples for delivery to small volume taps.

Northern indicates that installation of the proposed measurement facilities would be pursuant to the letter agreement between Northern and Peoples dated November 1, 1985, and that the total estimated cost to install the facility is $742.

Comment date: April 7, 1986, in accordance with Standard Paragraph G at the end of this notice.

4. Northern Natural Gas Company, Division of InterNorth, Inc.

[Docket No. CP86-303-000]

February 20, 1986.

Take notice that on February 3, 1986, Northern Natural Gas Company, Division of InterNorth, Inc., (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP86-303-000, a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to reassign certain volumes of firm entitlement to accommodate natural gas deliveries to Great Plains Natural Gas Company (Great Plains), its utility customer in Fergus Falls, Minnesota, under the certificate issued in Docket No. CP82-401-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern proposes to reassign volumes of gas which it sells to Great Plains under Northen's Rate Schedule CD-1 because Great Plains has experienced cancellation of certain agreements between its large volume customers.

Northern avers that the reassignment of volumes would have no impact on Great Plains' authorized level of firm entitlement.

No facilities are required to be constructed or modified to accommodate Great Plains' request, it is stated.

Comment date: April 7, 1986, in accordance with Standard Paragraph G at the end of this notice.

5. Northwest Central Pipeline Corporation

[Docket No. CP86-305-000]

February 20, 1986.

Take notice that on February 3, 1986, Northwest Central Pipeline Corporation (Applicant), P.O. Box 3288, Tulsa, Oklahoma 74102, filed in Docket No. CP86-305-000 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and for permission and approval to abandon certain facilities, all in Kansas and Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to install approximately 0.75 mile of 16-inch tie-over pipeline and appurtenant facilities from the Pampa-Wichita 20-inch pipeline to the Alva compressor station (Alva station) intake and approximately 0.75 mile of 16-inch tie-over pipeline from the Alva station discharge to the Pampa-Wichita 20-inch pipeline to replace the existing 0.75 mile of 8-inch pipe. In addition, Applicant proposes to abandon the seven 1,000 horsepower compressor units at the Corwin compressor station (Corwin station). Applicant states that these units were installed in 1928 and have become obsolete. Applicant indicates that the proposed rearragement of facilities would allow it to use the existing horsepower at Alva station and bypass the Corwin station.

Applicant states that the estimated cost of the proposed facilities is $500,000, which would be paid from treasury cash. Applicant indicates that the estimated total cost for the proposed abandonment is $145,296 with an estimated salvage value of $145,296.

Comment date: March 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

6. Panhandle Eastern Pipe Line Company

[Docket No. CP86-302-000]

February 20, 1986.

Take notice that on January 31, 1986, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP86-302-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon by sale to Martin Oil Service, Inc. (Martin), certain wellhead compression facilities located in Weld County, Colorado, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests the authority to abandon and sell its Dacona and Haudrick compressors and appurtenant facilities. It is stated that the sale would be undertaken pursuant to an agreement between the Applicant and Martin dated June 28, 1985. It is further stated that the proposed sale price is the net book value of the facilities as of June 30, 1985, which is $20,329.

Comment date: March 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

7. United Gas Pipe Line Company

[Docket No. CP86-271-000]

February 20, 1986.

Take notice that on January 15, 1986, United States Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP86-271-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase in gas sales volumes to the Town of Greensburg, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United requests authorization to increase Greensburg's maximum daily quantity (MDQ) of natural gas under Rate Schedule G-N from 474 Mcf to 874 Mcf. It is stated that Greensburg requires an increase in its MDQ to meet current demands on its distribution system. It is further stated that one potential customer is a commercial establishment which requires approximately 350 Mcf of natural gas per day. Greensburg's ability to respond to this customer's need is constrained by a total MDQ limitation of 474 Mcf, it is explained. United States that it has sufficient gas supply available to serve the proposed requirements of Greensburg. United further states that no additional facilities would be required to deliver the proposed volumes.

Comment date: March 13, 1986, in accordance with Standard Paragraph F at the end of this notice.

8. Valero Interstate Transmission Company

[Docket No. CP86-300-000]

February 20, 1986.

Take notice that on January 30, 1986, Valero Interstate Transmissison Company (Vitco), P.O. Box 1569, San Antonio, Texas 78296, filed in Docket No. CP86-300-000 and application pursuant to secton 7 of the National Gas Act and § 284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing transportation of natural gas on behalf of interstate pipelines, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Vitco states that it would comply with the conditions specified by paragraph (d) of § 284.221 of the Commission's Regulations.

Comment date: March 13, 1986, in accordance wtih Standard Paragraph F at the end of this notice.

9. Williston Basin Interstate Pipeline Company

[Docket No. CP86-284-000]

February 20, 1986.

Take notice that on January 23, 1986, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, filed in Docket No. CP86-284-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to continue to operate one sales tap and appurtenant facilities under the certificate issued in Docket No. CP82-487-000, *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Williston Basin seeks authorization for a sales tap and appurtenant facilities, which was previously installed under emergency conditions pursuant to § 157.48 of the Commission's Regulations, in order to deliver gas owned by Phillips Petroleum Company (Phillips) for use by Phillips in its gathering operations behind its Tioga processing plant, Williams County, North Dakota. Williston Basin advises that it has sufficient capacity to render the proposed service without detriment or disadvantage to its other customers.

Comment date: April 7, 1986, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of January 27 Through February 7, 1986

During the period of January 27 through February 7, 1986, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: February 19, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decisions and Orders

Meier Oil Service, Inc., Ashkum, Illinois, KEE-0014

Meier Oil Service, Inc., (Meier) filed an Application for Exception from the provisions of the mandatory Form EIA-782B filing requirement. The exception request, if granted, would remove Meier from the list of firms required to respond to the EIA-782B survey. On February 5, 1986, the Department of Energy issued a Proposed Decision and Order granting Meier a three month exception from the reporting requirement.

Wadsworth Oil Company, Inc., Tuskegee, Alabama; KEE-0010

Wadsworth Oil Company, Inc. (Wadsworth) filed an Application for Exception from the Form EIA-782B reporting requirement. The exception request, if granted, would permit Wadsworth to be removed from the sample of surveyed oil companies. On February 5,1986, the Department of Energy issued a Proposed Decision and Order which determined that Wadsworth be granted limited exception relief to simplify the reporting requirement.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-36112; FRL-2974-6]

Pesticide Programs; Chemigation Label Improvement Program; Availability for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability of Draft Label Improvement Program (LIP) on Chemigation.

SUMMARY: This notice announces the availability of a draft pesticide LIP for pesticides applied through irrigation systems for comment. The Agency is seeking to decrease the likelihood of environmental risks associated with pesticide contamination of ground water and of human exposure to pesticides which may be attributed to pesticide-treated irrigation water. The proposed LIP will provide to users either labeling use directions, including required safety equipment, or label prohibitions of pesticides which may be involved in chemigation practices.

DATE: Written comments on the LIP should be submitted on or before April 14, 1986.

ADDRESSES: Three copies of comments identified with the docket number OPP-36112 should be submitted to: By mail: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 236,

CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment in response to this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential will be included in the public docket without prior notice. The public docket will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: To request a copy of the LIP, contact Frances Mann of the Information Service Section, in Rm. 236 at the address given above (703-557-3262). Requests should be submitted no later than March 13, 1986, to allow sufficient time for receipt before the close of the comment period.

For technical questions contact, by mail: Thomas Ellwanger, Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Office location and telephone number: Rm. 241, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1650).

Dated: February 20, 1986.

James W. Akerman,

Acting Director, Registration Division.

[FR Doc. 86-4120 Filed 2-25-86; 8:45 am]

BILLING CODE 6560-50-M

[OPP-36109; FRL-2974-3]

Pesticide Programs; Standard Evaluation Procedure's; Availability of Draft Guidance Documents

AGENCY: Environmental Protection Agency [EPA].

ACTION: Notice of Availability; Request for Comments.

SUMMARY: The Environmental Protection Agency announces the availability of the following draft Standard Evaluation Procedures for public comment prior to their publication: Seed Germination/Seedling Emergence—Tier 1; Seed Germination/Seedling Emergence—Tier 2; Vegetative Vigor—Tier 1; Vegetative Vigor—Tier 2; Terrestrial Field Testing—Tier 3; Growth and Reproduction of Aquatic Plants—Tier 1; Growth and Reproduction of Aquatic Plants—Tier 2; Aquatic Field Testing—Tier 3; Target Area Testing; Droplet Size Spectrum; and Drift Field Evaluation. The Standard Evaluation Procedures (SEPs) are a standard set of guidance documents of how the Hazard Evaluation Division (HED) in the Office of Pesticide Programs evaluates studies and scientific data to ensure consistency of scientific reviews of studies submitted by registrants in support of pesticide registrations. This will increase the efficiency of pesticide registration and other regulatory activities. Copies of the draft documents are available at the address given below.

DATE: Comments must be received on or before March 28, 1986.

ADDRESS: Submit three copies of written comments, identified with the document control number "OPP-36109," by mail to: Information Service Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, Virginia 22202.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Copies of these draft Standard Evaluation Procedures are also available at this address.

FOR FURTHER INFORMATION CONTACT: By mail: Stephen L. Johnson, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1121, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, Virginia 22202, (703-557-7695).

SUPPLEMENTARY INFORMATION: The Standard Evaluation Procedures are a standard set of guidance documents on how HED evaluates studies and scientific data to ensure consistency of scientific reviews. Not only will the SEPs serve as valuable internal reference documents and training aids for new staff, but these documents will also inform the public and regulated community of important considerations in the evaluation of test data for determining chemical hazards.

The SEPs ensure a comprehensive, consistent treatment of major scientific topics in HED science reviews and provide interpretive policy guidance where appropriate, but are not so detailed that they inhibit creativity and independent thought. The SEPs also serve as training aids for new staff, and inform the public of the internal review process. Throughout the remainder of this and next fiscal year, HED will be writing additional SEPs on the scientific disciplines of toxicology, chemistry, exposure assessment, and ecological effects. Twenty SEPs have been published thus far and will soon be available from the National Technical Information Service, which will be responsible for distribution of all SEPs after they have been finalized. Prior to publication, each of the SEPs must undergo extensive peer review including Division, Program Office, intra-Agency, FIFRA Scientific Advisory Panel, and public comment; this announcement solicits public comment on the draft documents.

Dated: February 3, 1986.

Susan H. Sherman,

Acting Director, Office of Pesticide Programs.

BILLING CODE 1505-01-M

FEDERAL COMMUNICATIONS COMISSION

A.G.A., Inc.; Hearing Designation Order

In re Applications of MM Docket No. 86-69:

	File No.
A.G.A., Inc., La Coste, Texas, Req: 810 kHz, 0.25 kW, DA-D.	BP-841102AI
Fundamental Christian Broadcasting, Somerset, Texas, Req: 810 kHz, 0.5 kW, DA-D.	BP-850208AD

For Construction Permit.

Adopted: February 10, 1986.
Released: February 20, 1986.

By the Chief, Audio Services Division.

1. The Commission, by the Chief, Audio Services Division, acting pursuant to delegated authority, has under consideration the above-captioned applications for new AM broadcast stations and an informal objection to the A.G.A., Inc. (AGA) application filed by Fundamental Christian Broadcasting (FCB).

2. *A.G.A., Inc.* FCB asserts that the AGA application is unacceptable for filing because some of the technical information describing the proposed directional antenna system is inaccurate. FCB further asserts that in contested proceedings, an applicant whose proposal is returned as unacceptable for filing is accorded only one opportunity for acceptance *nunc pro tunc* if a minor curative amendment is tendered within thirty days of dismissal. The AGA application was initially returned on October 4, 1984, as unacceptable for filing, and was retendered November 2, 1984. Therefore, FCB asserts, AGA has had its one opportunity to submit a curative amendment. We agree with FCB in so far as it claims that some of the information in the AGA application is inaccurate. Dismissal is unwarranted, however, as these errors are not of a nature rendering the proposal patently defective under our rules. Rather, we were able to process the amended application without undue delay and determine that the proposal conformed to all relevant acceptance criteria. The application is therefore acceptable for filing. We will deny FCB's objection.

3. The AGA application does however contain errors that must be corrected. The proposed tower heights in degrees do not agree with the heights in feet as listed on the application form (FCC Form 301) and the field ratio for tower number one is mistakenly listed as zero. In addition, the application does not contain antenna site photographs as required by Section V-A, paragraph 8, of the application form. AGA must therefore correct these deficiencies and submit an amendment to the presiding Administrative Law Judge within thirty days of the release of this Order.

4. The environmental narrative statement contained in the AGA application does not contain information concerning the zoning classification of the antenna site and whether construction of the proposed facilities has been a source of controversy in the local community as required by § 1.1311(a) (3) and (4) of the Commission's Rules. AGA must therefore comply with the rules and file the required environmental information with the presiding Administrative Law Judge within thirty days of the release of this Order. In addition, a copy shall be filed with the Chief, Audio Services Division, who will then proceed regarding this matter in accordance with the provisions of § 1.1313(b). Section 1.1317 of the Rules will be waived by the extent that the comparative phase of the case will be allowed to begin before the environmental phase is completed. See *Golden State Broadcasting Corp.*, 71 F.C.C. 2d 229 (1979), *recon. denied sub nom. Old Pueblo Broadcasting Corp.*, 83 F.C.C. 2d 337 (1980).

5. The Commission has not yet received Federal Aviation Administration clearance for the antenna towers proposed by A.G.A., Inc. Accordingly an appropriate issue will be specified.

6. *Fundamental Christian Broadcasting.* On November 22, 1985, FCB filed an amendment to its application. The last date on which an amendment could be filed as a matter of right ("B" cut-off date) was July 9, 1985. The amendment contains current mailing address and ownership information and is in part required by § 1.65 of the Commission's Rules. We will therefore accept the amendment for filing with the restriction that it cannot be used to enhance the comparative position of the applicant nor to diminish the comparative position of any other applicant. The amendment is, however, incomplete in that that a one-third ownership interest in the applicant was transferred from one individual to another but none of the information concerning the legal qualifications of that new individual required by section II of the application form was provided. FCB must therefore file the necessary information with the presiding Administrative Law Judge within thirty days of the release of this Order.

7. Except as indicated by the issues specified below the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding. As the proposals are for different communities, we will specify issues to determine pursuant to section 307(b) of the Communications Act of 1934, as amended, which proposal would better provide a fair, efficient and equitable distribution of radio service. We will also specify a contingent comparative issue, should such an evaluation of the proposals prove warranted.

8. Accordingly, it is ordered, that pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearings in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the heights and locations of the antenna towers proposed by A.G.A., Inc.

2. If a final environmental impact statement is issued with respect to the proposal of A.G.A., Inc., which concludes that the proposed facility is likely to have an adverse effect of the quality of the environment, to determine:

a. Whether the proposal is consistent with the National Environmental Policy Act, as implemented by §§ 1.1301-1319 of the Commission's Rules and,

b. Whether, in light of the evidence adduced pursuant to (a) above, the applicant is qualified to construct and operate as proposed.

3. To determine: (a) The areas and populations which would receive primary aural service from the proposals and the availability of other primary service to such areas and populations, and (b) in light thereof and pursuant to section 307(j) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient and equitable distribution of radio service.

4. To determine, in the event that a choice between the applicants should not be based solely on considerations relating to section 307(b), which of the proposals, on a comparative basis, would better serve the public interest.

5. To determine in light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

9. It is further ordered, that the Federal Aviation Administration is made a party to these proceedings.

10. It is further ordered, that the informal objection filed by Fundamental Christian Broadcasting is denied.

11. It is further ordered, that A.G.A., Inc., shall within thirty (30) days of the release of this Order, submit to the presiding Administrative Law Judge, an amendment to its application correcting the deficiencies set out in paragraph three (3) above.

12. It is further ordered, that § 1.1317 of the Commission's Rules is waived to the extent indicated herein. Within thirty (30) days of the release of this Order, A.G.A., Inc., shall submit an amendment to its application containing the required environmental narrative information (set out in paragraph four (4) above) required by § 1.1311 of the Commission's Rules to the presiding Administrative Law Judge, with a copy to the Chief, Audio Services Division.

13. It is further ordered, that the amendment filed by Fundamental Christian Broadcasting on November 22, 1985, is accepted for filing subject to the restrictions set out in paragraph six (6), above.

14. It is further ordered, that Fundamental Christian Broadcasting file the legal qualification information required by section II of the application form (FCC Form 301) for each new party to its application with the presiding Administrative Law Judge within thirty (30) days of the release of this Order.

15. It is further ordered, that in addition to the copy served on the Chief, Hearing Branch, a copy of each amendment filed in this proceeding subsequent to the date of adoption of this Order shall be served on the Chief, Data Management Staff, Audio Services Division, Mass Media Bureau, Room 350, 1919 M Street, NW., Washington DC 20554.

16. It is further ordered, that to avail themselves of the opportunity to be heard and pursuant to § 1.221(c) of the Commission's Rules, the parties shall within 20 days of the mailing of this Order, in person or by attorney, file with the Commission, in triplicate, written appearances stating an intention to appear on the date fixed for hearing and to present evidence on the issues specified in this Order.

17. It is further ordered, that pursuant to section 311(a) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, the applicants shall give notice of the hearing as prescribed in the rules, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

Federal Advisory Committee for the 1987 ITU World Administrative Radio Conference for the Mobile Services; Meeting

February 21, 1986.

The sixth meeting of the Federal Advisory Committee for the 1987 Mobile World Administrative Radio Conference will be held on Friday, April 25, 1986, at 9:30 A.M. in the Commission Meeting Room 856, 1919 M Street, NW., Washington, DC.

The meeting agenda is:

1. Approval of meeting agenda.
2. Approval of the summary record of the March 10, 1986, meeting.
3. Report on administrative matters from designated federal employee.
4. Progress reports and consideration of draft proposals from Ad Hoc Group Chairmen:
   (a) Aeronautical,
   (b) Land Mobile,
   (c) Maritime,
   (d) Satellite,
   (e) Steering.
5. Report on technical matters under consideration in the U.S. CCIR organization relevant to the Mobile WARC.
6. Reports on international meetings bearing on the Mobile WARC.
7. Other business.
8. Selection of next meeting date.

Anyone desiring further information should contact Gordon Hempton, FCC/PRB at (202) 632-7175. These meetings are open to the public.

William J. Tricarico,

Secretary, Federal Communications Commission.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreements pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC. Office of the Federal Maritime Commission, 1100 L. Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No. 202-010676-011.

Title: Mediterranean/U.S.A. Freight Conference.

Parties:

Atlanttrafik Express Service, Ltd.
Achille Lauro
C.I.A. Venezolana de Navegacion
Compania Trasatlantica Espanola, S.A.
Costa Container Lines
d'Amico Societa di Navigazione per Azioni
Farrell Lines, Inc.
Flota Mercante Grancolombiana S.A.
"Italia" di Navigazione, S.P.A.
Jugolinija
Jugooceanija
Lykes Lines
Nedlloyd Lines
Nordana Line/Dannebrog Line AS
Sea-Land Service, Inc.
Zim Israel Navigation Company, Ltd.

Synopsis: The modification provides for the calling of an emergency Owners' Meeting of the agreement. The parties have requested a shortened review period.

Agreement No. 024-010889.

Title: Port of Galveston Terminal Agreement.

Parties:

The Board of Trustees of the Galveston Wharves (Port)
Container Terminal of Galveston, Inc. (CTG)

Synopsis: The proposed agreement would permit the Port to lease the Galveston Wharves' East End Container Terminal to CTG to be operated as a public marine container terminal. The initial term of the agreement is one year with options for ten one-year extensions. The parties have requested a shortened review period.

Dated: February 21, 1986.

By Order of the Federal Maritime Commission.

John Robert Ewers,

Secretary.

FEDERAL RESERVE SYSTEM

Amsterdam-Rotterdam Bank N.V. et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 18, 1986.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Amsterdam-Rotterdam Bank N.V.*, Amsterdam, The Netherlands; to engage *de novo* through its subsidiary, The Private Bank & Trust, N.A., Miami, Florida, in trust company and investment and financial advisory activities, pursuant to § 225.25(b) (3) and (4). These activities would be conducted in the State of Florida.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Allied Bankshares, Inc.*, Thomson, Georgia; to engage *de novo* through its subsidiary, Financial Data Dimension, Inc., Thomson, Georgia, in the business of providing data processing and data transmission services and facilities to other financial institutions, pursuant to § 225.25(b)(7) of Regulation Y. Comments on this application must be received not later than March 13, 1986.

C. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Mid Town Bancorp. Inc.*, Chicago, Illinios; to engage *de novo* through its subsidiary, Mid Town Development Corporation, Chicago, Illinois, in real estate development loans, real estate rehabilitation loans and other commercial and industrial loans. Some consumer finance, credit card and factoring activities may be engaged in by subsidiary, pursuant to § 225.25(b)(1) of Regulation Y. Comments on this application must be received not later than March 14, 1986.

Board of Governors of the Federal Reserve System, February 20, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Security Pacific Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicated how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the office of the Board of Governors not later than March 15, 1986.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Security Pacific Corporation*, Los Angeles, California; to acquire the remaining 75 percent of the outstanding common stock of EXCEL Business Systems, Inc. ("XCEL"), Mill Valley, California, a California corporation, and thereby engage through EXEL, as a wholly-owned subsidiary, in providing data processing and data transmission services and facilities to other financial institutions, pursuant to § 225.25(b)(7) of Regulation Y. Such activities will involve a packaged system including all applications needed to meet the data processing requirements of financial and banking institutions, including the processing of general ledgers, deposits and extensions of credit. The activities will be conducted from an office of EXCEL, located in Mill Valley, California, serving the United States and the District of Columbia.

Board of Governors of the Federal Reserve System, February 20, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4160-15-M

National Institutes of Health

National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases; Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following Subcommittees of the Arthritis, Diabetes, and Digestive and Kidney Diseases Special Grants Review Committee for March 1986, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

The publication of this meeting notice is late as the committee has recently been established and the committee members approved.

These meetings will be open to the public to discuss administrative matters for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. The meetings will be closed thereafter in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

After the meetings, Mrs. Carole Frank, Committee Management Officer, National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, National Institutes of Health, Building 31, Room 9A19, Bethesda, Maryland 20892 (Telephone: 301-496-6917), will provide a summary of the meetings and rosters of committee members. Substantive program information may be obtained from the executive secretary of each Subcommittee whose name, room number, and telephone number are listed below.

Name of committee: Arthritis, Diabetes, and Digestive and Kidney Diseases Special Grants Review Committee (ADDK).

Name of subcommittee: ADDK–A.

Executive secretary: Ms. Tommie Sue Tralka, Room 406, Westwood Building, Telephone: 301-496-8830.

Dates of meeting: March 4–5, 1986.

Place of meeting: Linden Hill Hotel, Bethesda, MD.

Open: March 4, 1986, 7:30 p.m.–8:30 p.m.

Closed: March 4, 1986, 8:30 p.m.–11:30 p.m.; March 5, 1986, 8:30 a.m.–adjournment.

Name of subcommittee: ADDK–B.

Executive secretary: Dr. Michael K. May, Room 419, Westwood Building, Telephone: 301-496-7697.

Dates of meeting: March 3–4, 1986.

Place of meeting: Linden Hill Hotel, Bethesda, MD.

Open: March 3, 1986, 8:30 a.m.–9:30 a.m.

Closed: March 3, 1986, 9:30 a.m.–5:00 p.m.; March 4, 1986, 8:30 a.m.–adjournment.

Name of subcommittee: ADDK–C.

Executive secretary: Dr. Michael K. May, Room 419, Westwood Building, Telephone: 301-496-7697.

Dates of meeting: March 11–12, 1986.

Place of meeting: Linden Hill Hotel, Bethesda, MD.

Open: March 11, 1986, 9:00 a.m.–10:00 a.m.

Closed: March 11, 1986, 10:00 a.m.–5:00 p.m.; March 12, 1986, 8:30 a.m.–adjournment.

Name of subcommittee: ADDK–D.

Executive secretary: Ms. Tommie Sue Tralka, Room 406, Westwood Building, Telephone: 301-496-8830.

Dates of meeting: March 11–12, 1986.

Place of meeting: Linden Hill Hotel, Bethesda, MD.

Open: March 11, 1986, 7:30 p.m.–8:30 p.m.

Closed: March 11, 1986, 8:30 p.m.–11:30 p.m.; March 12, 1986, 8:00 a.m.–adjournment.

Dated: February 24, 1986.

BILLING CODE 4310-02-M

Fish and Wildlife Service

Receipt of Application for Permit; Endangered and Threatened Species

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT-703529

Applicant: Paul E. Moler, Gainsville, FL

The applicant requests a permit to import a blood sample of an Orinoco crocodile (*Crocodylus intermedius*) from Mr. John Thorbjarnarson of Calabozo, Venezuela, for the purpose of scientific research.

PRT-703457

Applicant: Pamela Bompart, Helena, MT

The applicant requests a permit to import eight captive-bred golden parakeets (*Aratinga guarouba*) from Carterton Breeding Avairies, Oxford, England for enhancement of propagation of the species.

PRT-686367

Applicant: Bill Burnhana/Peregrine Fund, Inc., Boise, ID

The applicant requests an amendment to his permit to take, capture, collect, and salvage American peregrine falcons (*Falco peregrinus anatum*) and/or their eggs for scientific research and enhancement of survival to include the States of Oregon and Washington.

PRT-703507

Applicant: Washington Park Zoo, Portland, OR

The applicant requests a permit to import one male and two female Francois' langurs (*Presbytis francoisi*) from Chongging Zoo, Chongging, China, for enhancement of propagation of the species.

PRT-703926

Applicant: Frank Buck Bring 'Em Back Alive, Inc., Sarasota, FL

The applicant requests a permit to purchase 0.4 Asian elephants (*Elephas maximus*) from John Cuneo of Hawthorn Circus Corporation, Grayslake, IL, for the purpose of enhancement of propagation.

PRT-702013

Applicant: Lorne E. Hanna, Corvallis, OR

The applicant requests a permit to engage in interstate and foreign commerce with the following species of endangered or threatened cactus species: *Cereus eriophorous* var. *fragrans, Coryphantha minima, C. sneedii* var. *leii, C. sneedii* var. *sneedii, Echinocereus fendleri* var. *kunzleri*, and *E. triglochidiatus* var. *inermis*.

PRT-697630

Applicant: U.S. Fish & Wildlife Service, Regional Director, Region 3, Minneapolis, MN

The applicant requests an amendment to their current permit to take piping plovers (*Charadrius melodus*) and least terns (*Sterna antillarum*) for scientific purposes and the enhancement of propagation or survival in accordance with Recovery Plans, listing, or other Service work for those species.

PRT-703246

Applicant: Milwaukee County Zoological Gardens, Milwaukee, WI

The applicant requests a permit to import one Asian elephant (*Elephus maximus*) from Rangoon Zoo, Burma, for the purpose of enhancement of propagation of the species.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: February 20, 1986.

Alaska Native Claims Selection; Cook Inlet Region, Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(e) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(e) and section 12(b)(6) of the Act of January 2, 1976, 43 U.S.C. 1611 nt, will be issued to Cook Inlet Region, Inc., for approximately 171 acres. The lands involved are in the vicinity of Tps. 6, 7 and 8 N., R. 8 W., Copper River Meridian, Alaska.

A notice of the decision will be published once a week for four (4) consecutive weeks, in the COPPER VALLEY VIEWS. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision shall have until March 28, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Olivia Short,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

California; Proposed Reinstatement of Terminated Oil and Gas Lease

A petition for reinstatement of oil and gas lease CA 14517, embracing lands in the State of California, County of Kern,

was timely filed and accompanied by all the required rentals and royalties accruing from December 1, 1985, the date of termination.

The lessee has agreed to new lease terms for rental at the rate of $10.00 per acre or fraction thereof and royalty at a rate of not less than 16⅔ percent, computed on a sliding scale four percentage points greater than the competitive royalty schedule in the original lease. The lessee has paid the required $500.00 administrative fee and has reimbursed the Bureau of Land Management for the estimated cost of this **Federal Register** notice.

The lessee having met all the requirements for reinstatment of the lease as set forth out in section 31 (d) and (e) of the Minerals Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease effective December 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Dated: February 18, 1986.

Joan B. Russell,

Chief, Leasable Minerals Section Branch of Lands & Minerals Operations.

VOL 51 ISS 38 FE 26 1986 UMI

SUPPLEMENTARY INFORMATION: The objectives of the Bureau of Land Management (BLM) are to:

(1) Ensure timely and orderly development of this important resource in a manner compatible with the use of the public lands for other purposes;

(2) Assure that wind development and production is conducted with maximum protection of the environment; and

(3) Assure the public a fair return for the use of public lands and the use of its renewable resources.

(4) Foster diligent development and production of the wind resources by sound companies using proven technology, rather than focusing on experimental research and development.

The schedule of this right-of-way includes:

(1) Conducting competitive bidding for the development rights on the offered parcels;

(2) Issuance of rights-of-way to the successful bidders;

(3) Submission of detailed plans of development and site specific Environmental Assessments (EAs) prepared to BLM requirements by the right-of-way grantees within twelve months of issuance of the rights-of-way;

(4) Issuance of Notices to Proceed upon (a) BLM review and approval of the plans and EAs, and (b) grantees' submission of reclamation bonds and funds to reimburse BLM expenses to be incurred in monitoring the rights-of-way activity.

The annual rental on a parcel will be the greater amount of (1) the basic annual site rental, which must be at least the appraised value shown above, or (2) 4% of the annual gross revenues received from the sale of electrical energy produced from the wind resources.

Competitive bidding procedures are being used in this offer. Each parcel will be offered for wind energy development rights by sealed bid only. All sealed bids must be submitted to BLM's Ridgecrest Resource Area Office at 112 East Dolphin Street, Ridgecrest, California 93555 no later than April 14, 1986. Sealed bids will be for not less than the appraised values specified in this notice with a separate bid submitted for each parcel. Each sealed bid shall be accompanied by a certified check, postal money order, bank draft or cashier's check made payable to the Department of the Interior, BLM for not less than 10% of the amount of the bid. The sealed bid envelopes must be marked on the front left corner as shown in the following example:

Tehachapi Wind Energy Rights-of-Way
Notice of Realty Action
Serial No. —
Final Bid Date—April 14, 1986

If two or more envelopes containing valid bids of the same amount are received for the wind energy parcels, the determination of which is considered the highest bid shall be by supplemental biddings. Bidders must be authorized to do business in the State of California. The apparent successful bidders will be required to demonstrate technical and financial capability to construct, operate, maintain and terminate the proposal. The remaining 90% of the bid amount shall be submitted prior to issuance of the rights-of-way. The rights-of-way will be subject to valid existing rights. Natural resource and land use constraints may limit development on portions of the parcels. Each right-of-way will contain general and site specific sitpulations.

FOR FURTHER INFORMATION CONTACT: To receive a copy of a sample right-of-way or for additional information, contact the BLM's Ridgecrest Resource Area Office at (619) 375-7125, 112 East Dolphin Street, Ridgecrest, California 93555.

Dated: February 12, 1986.

Hugh Riecken,

Acting District Manager.

BILLING CODE 4310-40-M

Minerals Management Service

Outer Continental Shelf; Development Operations Coordination Document; Chevron U.S.A. Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposal Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Chevron U.S.A. Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 5019, Block 530, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Cameron, Louisiana.

DATE: The subject DOCD was deemed submitted on February 14, 1986. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44396, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section; Exploration/Development Plans Unit, Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: February 18, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

[Amdt. No. 1 to Delegation of Authority No. 133]

Authority Delegations; Assistant Administrator for Asia

A. AID Delegation of Authority No. 133, dated December 11, 1981 (46 FR 62337, December 23, 1983), is amended as follows:

1. *Section 4. Authorities Delegated to Assistant Administrators.*

a. Paragraph a. is amended by deleting "the Assistant Administrator for Near East" and by inserting "and Near East" after "the Assistant Administrator for Asia";

b. Subparagraph (1)(a) is deleted in its entirety and subparagraphs (1)(b), (1)(c) and (1)(d) are redesignated (1)(a), (1)(b) and (1)(c) respectively; and

c. Subparagraph (2)(a) is deleted in its entirety and subparagraphs (2)(b) and (2)(c) are redesignated (2)(a) and (2)(b), respectively.

2. *Section 5. Authorities That May be Redelegated to AID/Washington Officers.*

Section 5 is amended in its entirety to read as follows:

Section 5. Authorities That May be Redelegated to AID/Washington Officers.

a. Assistant Administrators may redelegate the authorities delegated under section 4 to Deputy Assistant Administrators.

b. The Senior Assistant Administrator for Science and Technology may redelegate the authorities under section 4 to the Agency Directors, except the authority to authorize a project when the life of project funding exceeds $20 million and the authority to amend a project authorization when the amendment will result in a total life of project funding of more than $30 million may be redelegated ony on a project-by-project basis.

c. Authorities redelegated hereunder may be exercised by persons performing the functions of the designated AID/Washington officer in an "Acting" capacity but may not be redelegated.

3. *Section 6. Authorities That May be Redelegated to Principal Officers of Field Offices.*

a. Paragraph c. is redesignated d.; and

b. A new paragraph c. is added as follows:

c. The authority to authorize a project when the life of project funding exceeds $20 million and the authority to amend a project authorization when the amendment will result in a total life of project funding of more than $30 million may be redelegated only on a project-by-project basis based on policy, programmatic and staffing considerations.

B. Effective Date: This amendment is effective February 10, 1986.

Dated: February 10, 1986.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[332-223]

The Impact of Increased U.S.-Mexican Trade on Southwest-Border Development; Public Hearing

AGENCY: International Trade Commission.

ACTION: Scheduling of additional public hearing.

EFFECTIVE DATE: February 19, 1986.

FOR FURTHER INFORMATION CONTACT: Jose Mendez (202-523-8267), Research Division, Office of Economics, U.S. International Trade Commission, Washington, D.C. 20436 (telephone 202-523-8267).

Background

The Commission instituted investigation No. 332-223, The Impact of Increased U.S.-Mexican Trade on Southwest-Border Development, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) following receipt on November 25, 1985, of a request therefor from the Committee on Finance of the United States Senate.

Public Hearings

The Commission will hold a public hearing in connection with this investigation in San Diego, California on April 10, 1986. This hearing is in addition to two public hearings to be held in McAllen, Texas on April 7, 1986 and El Paso, Texas on April 8, 1986. The exact location and times of these hearings shall be announced at a later date. All persons shall have the right to appear, by counsel or in person, to present information to be heard. Requests to appear at the public hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on March 24, 1986. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs. The deadline for filing prehearing briefs is March 28, 1986.

Written Submissions

In lieu of or in addition to appearances at the public hearings, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commissions' *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be assured of consideration by the Commission, written statements should be received no later than March 24, 1986. All submissions should be addressed to the Secretary, U.S. International Trade Commission, Washington, DC 20436.

Posthearing briefs must be submitted not later than the close of business on April 21, 1986. A signed original and 14 true copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's Rules (19 CFR 201.8).

Hearing-impaired persons are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 724-0002.

Issued: February 19, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

Agency Form Submitted for OMB Review

AGENCY: International Trade Commission.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Commission has submitted a proposal for the collection of information to the Office of Management and Budget for review.

PURPOSE OF INFORMATION COLLECTION: The proposed information collection is for use by the Commission in connection with investigation No. 332-224, Competitive Conditions in the U.S. Tuna Industry, instituted under the authority of section 332 of the Tariff Act of 1930 (19 U.S.C. 1332).

SUMMARY OF PROPOSAL:

(1) Number of forms submitted: One.

(2) Title of form: Competitive Conditions in the U.S. Tuna Industry—Questionnaire for U.S. Tuna Boat Owners.

(3) Type of request: New.

(4) Frequency of use: Nonrecurring.

(5) Description of respondents: Firms or individuals that own tuna fishing boats.

(6) Estimated number of respondents: 85.

(7) Estimated total number of hours to complete the forms: 1,275.

(8) Information obtained from the form that qualifies as confidential business information will be so treated by the Commission and not disclosed in a manner that would reveal the individual operations of a firm.

ADDITIONAL INFORMATION OR COMMENT: Copies of the proposed form and supporting documents may be obtained from Roger L. Corey, Jr., (USITC, tel. no. 202-724-1759). Comments about the proposal should be directed to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503, Attention: Francine Picoult, Desk Officer for U.S. International Trade Commission. Any comments should be specific, indicating which part of the questionnaire or study plan is objectionable and describing the problem in detail. IF YOU ANTICIPATE COMMENTING ON A FORM BUT FIND THAT TIME TO PREPARE COMMENTS WILL PREVENT YOU FROM SUBMITTING THEM PROMPTLY YOU SHOULD ADVISE OMB OF YOUR INTENT WITHIN TWO WEEKS OF THE DATE THIS NOTICE APPEARS IN THE **Federal Register**. Ms. Picoult's telephone number is 202-395-7231. Copies of any comments should be provided to Charles Ervin (United States International Trade Commission, 701 E Street, NW., Washington, DC 20436).

Hearing impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 724-0002.

Issued: February 21, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

Indexing the Annual Operating Revenues of Railroads and Motor Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Notice.

SUMMARY: The Interstate Commerce Commission has adopted a methodology for indexing gross annual operating revenues for railroads and motor carriers of property to eliminate the effects of inflation from the classification process. The Commission's price deflator formula will provide assurances that carriers are moved to a higher classification because of real business expansion and not from inflationary consequences.

The annual average Railroad Freight Price Index will be used as the railroad deflator. The annual average Producer Price Index for all commodities will be used as the motor carrier deflator. Each index is developed by the Bureau of Labor Statistics. The base years for railroads and motor carriers are 1978 and 1980, respectively. The deflators for 1983, 1984, and 1985 are:

	Railroads—Railroad freight index			Motor carriers of property—Producer prices index	
	Index	Deflator percent		Index	Deflator percent
1978	213.1		1980	252.4

BILLING CODE 7035-01-M

[Finance Docket No. 30771]

Burlington Northern Railroad Co.; Trackage Rights, Spokane International Railroad Co.

The Spokane International Railroad Company (SI) has agreed to grant overhead trackage rights to the Burlington Northern Railroad Company (BN) between Spokane (milepost 8.24) and Carders (milepost 2.49), WA. The trackage rights will be effective on April 1, 1986.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. A filing of a petition to revoke will not stay the transaction.

As a condition to use of this exemption any employee affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry. Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: February 18, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30777]

The Great Western Railway Co.; Modified Rail Certificate

On January 21, 1986, a notice was filed by the Great Western Railway Co. (GWR) seeking a modified certificate of public convenience and necessity under 49 CFR Part 1150, Subpart C. GWR is authorized to serve a 54.45-mile line of railroad known as the Lakeview Branch that was formerly owned and operated by Southern Pacific Transportation Company (SPT). The line extends from milepost 458.60 in Alturas, CA to milepost 513.05 in Lakeview, OR, and connects with SPT at Alturas.

By certificate and decision served October 19, 1985, in Docket No. AB-12 (Sub-No. 84), SPT was authorized to abandon the line. The County of Lake, OR then acquired the line from SPT, and by and through the Lake County Railroad Commission negotiated an agreement with GWR under which GWR will operate the line, effective January 17, 1986.

This notice will be served on the Association of American Railroads (Car Service Division) as agent of all railroads subscribing to the car-service and car-hire agreements, and on the American Short Line Railroad Association.

Dated: February 18, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet at 200 Clarendon Street, Floor T27, Boston Massachusetts on March 24 and 25, 1986 beginning at 8:30 a.m. each day.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in Title 29 U.S. Code, section 1242(a)(1)(B).

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that the subject of the meeting falls within the exceptions of the open meeting requirement set forth in Title 5 U.S.C. 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: February 21, 1986.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for Enrollment of Actuaries.

BILLING CODE 4810-25-M

DEPARTMENT OF JUSTICE

Antitrust Division

National Cooperative Research Act of 1984; Computer Aided Manufacturing-International, Inc.

Notice is hereby given that pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. No. 98–462 ("the Act"), Computer Aided Manufacturing-International, Inc. '(CAM–I") has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in the membership of CAM–I. CAM–I previously filed a written notification disclosing (1) the identities of the parties to CAM–I and (2) the nature and objectives of CAM–I. Notice of this filing was published in the **Federal Register** on January 24, 1985. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the current parties to Computer Aided Manufacturing-International, Inc. and its general areas of planned activities are given below.

Computer Aided Manufacturing-International, Inc. was incorporated as a membership organization in May 1972, for the purpose of sponsoring joint research and development in the use of computer systems and software to improve the productivity of industry. Its members contribute to, and with the assistance of professional staff, plan and contract for, basic research and development projects in such areas as geometric modeling, process planning, advanced numerical control, sculptured surfaces, robotics automation, quality assurance, factory management, and electronics automation. Upon completion, including testing and evaluation, the results of the projects are made available to the public for a fee. The members include corporations, government agencies, and educational institutions located in the United States, Europe, and Japan.

The current industrial member companies in the United States are: Allied Bendix Aerospace; Kansas City Division; Avco Aerostructures Division; Boeing Computer Services; Caterpillar Tractor Company; Coopers & Lybrand; Deere & Company; Digital Equipment Corporation; E.I. Du Pont de Nemours & Co., Inc.; Eastman Kodak Company; Eaton Corporation; Electronic Data Systems; FMC Corporation; Ford Motor Company; General Dynamics/Convair Division; General Dynamics/Fort Worth; General Electric Company; Grumman Aerospace Corporation; GTE Government Systems Corporation; Hughes Aircraft Company; Lawrence Livermore National Laboratory; Litton IST; Lockheed Missiles & Space Co., Inc.; Lockheed-Georgia Company; Los Alamos National Laboratory; Martin Marietta Data Systems; Martin Marietta Energy Systems, Inc.; McDonnell Douglas Corporation; Morton Thiokol, Inc.; Northrop Aircraft Corporation; Optical Gaging Products, Inc.; Sandia National Laboratories; SEI Information Technology; Sheffield Measurement Division; Warner & Swasey Co.; United Technologies Corporation; USAF AFWAL/MLTC; and Westinghouse Electric Corporation.

The current industrial member companies in Europe are: Aerospatiale (France); Asea AB (Sweden); British Aerospace Aircraft Group (United Kingdom); Construcciones Aeronauticas, S.A. (Spain); Daimler-Benz AG (West Germany); Evans & Sutherland (England); Factron Schlumberger (England); Fiat S.p.A (Italy); GEC Electrical Projects, Ltd. (England); Hewlett Packard GmbH (Federal Republic of Germany); Ingersoll Engineers (England); ITT AMT-Center (Belgium); IVF (Sweden); Lucas Group Services Limited (England); M.A.N. AG (Federal Republic of Germany); Matra-Datavision, S.A. (France); Messerschmitt-Bolkow-Blohm GmbH (West Germany); Nuovo Pignone S.p.A. (Italy); Philips International B.V. (The Netherlands); Prime Computer CAD/CAM Ltd. (England); Racal-Redac Ltd. (England); Raggruppamento Selenia Elsag (Italy); Renault Automation (France); Saab-Scania (Sweden); Sandvik AB Coromant (Sweden); Short Brothers Limited (Northern Ireland); Siemens AG (West Germany); Sperry Corporation (England); STC International Computers Ltd. (United Kingdom); Technical Research Centre of Finland (Finland); The Plessey Company PLC (England); TNO Metaalinstituut (The Netherlands); Valmet Corporation (Finland); Volkswagenwerk AG (West Germany); and Waldrich Coburg GmbH (Federal Republic of Germany).

Current industrial member companies in Japan are: Computer Services Corporation; Daikin Industries, Ltd.; Fujitsu Limited; Hitachi, Ltd.; Honda Engineering Co., Ltd.; Japan Information Services, Ltd.; Kawasaki Heavy Industries, Ltd.; Matsushita Electric Industrial Co., Ltd.; Mitsubishi Electric Corporation; Nachi Fujikoshi Corporation; NEC Corporation; Nippon Telegraph & Telephone Public Corp.; Nippon Univac Kaisha, Ltd.; Oki Electric Industry Co., Ltd.; Sanyo Electric Company, Ltd.; Shoko Co., Ltd.; and Toshiba Corporation.

Current educational members in the United States are: Bradley University; Bringham Young University; California Polytechnic State University; Carnegie-Mellon University; Cornell University; Iowa State University; Lehigh University; Massachusetts Institute of Technology; Michigan State University; New Mexico State University; North Carolina State University; Oklahoma State University; Pennsylvania State University; Rensselaer Polytechnic Institute; Texas A & M University; University of New Orleans; University of Oklahoma; University of Rochester; University of Texas at Arlington; and Wichita State University.

Current educational members in Europe are: Aachen Technical University (West Germany); Bordeaux 1 University; GRAI (France); Cranfield Institute of Technology (England); Helsinki University of Technology (Finland); Katholieke Universiteit Leuven (Belgium); Lund Institute of Technology (Sweden); Politecnico di Milano (Italy); Royal Institute of Technology (Sweden): Technical University of Berlin (West Germany); Universitat Stuttgart (West Germany); University of Manchester (England); University of Nottingham (England); and University of Oulu (Finland).

Current educational members in Japan are: Hokkaido University; Kobe University; and Tokyo University.

Joseph H. Widmar,

Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; American Motors Corp. et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 10, 1986.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 10, 1986.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 18th day of February 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Suttle Apparatus Corp. et al.

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period February 10, 1986—February 14, 1986.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–16, 372; Suttle Apparatus Corp., Lawrenceville, IL
TA–W–16, 339; Penn Aluminum International, Erie, PA
TA–W–16, 428; Diamond-Bathurst, Inc., Indianapolis, IN
TA–W–16, 368; Novelty Textile Mills, Inc., Wauregan, CT
TA–W–16, 359; Georgia-Pacific Corp., Port Hudson, LA
TA–W–16, 402; Interlee, Inc., Lee Filter Div., Edison, NJ
TA–W–16, 388; Hitachi Magna-Lock Corp., Big Rapids, MI
TA–W–16, 329; Caterpillar Tractor Co., York, PA

Affirmative Determinations

TA–W–16, 376; Basque Cedar Co., Clallam Bay, WA

A certification was issued covering all workers of the firm separated on or after August 25, 1984 and before December 31, 1985.

TA–W–16, 380; Hine/Snowbridge, Inc., Boulder, CO

A certification was issued covering all workers of the firm separated on or after August 27, 1984.

TA–W–16, 371; S. Greenberg Co., Boston, MA

A certification was issued covering all workers of the firm separated on or after August 22, 1984 and before September 15, 1985.

TA–W–16, 370; RCA Boringuen, Inc., Juncos, PR

A certification was issued covering all workers of the firm separated on or after August 19, 1984.

TA–W–16, 313; AT&T Information Systems, Shreveport, LA

A certification was issued covering all workers of the firm separated on or after October 1, 1984 and before January 15, 1986.

TA–W–16, 351; Canadian Cedar Industries, Shelton, WA

A certification was issued covering all workers of the firm separated on or after August 16, 1984 and before September 30, 1985.

TA–W–16, 438; Spencer Wright Industries, Cobble Div., Chattanooga, TN

A certification was issued covering all workers of the firm separated on or after September 11, 1984.

TA–W–16, 334; Mallory Times Co., Frankfort, IN

A certification was issued covering all workers of the firm separated on or after December 14, 1984.

TA–W–16, 365; Fisher Corp., Sub-Assembly Dept., Milroy, PA

A certification was issued covering all workers of the firm separated on or after August 20, 1984.

TA–W–16, 373; Technographics Fitchburg Paper, Inc., Fitchburg, MA

A certification was issued covering all workers of the firm separated on or after August 21, 1984.

TA–W–16, 367; Harris Digital Telephone Systems, Novato, CA

A certification was issued covering all workers of the firm separated on or after December 1, 1984.

TA–W–16, 363; Carrier Corp., Syracuse, NY

A certification was issued covering all workers of the firm separated on or after January 1, 1985 and before January 1, 1986.

TA–W–16, 366; Forest Hill Sportswear Co., Inc., Boston, MA

A certification was issued covering all workers of the firm separated on or after August 22, 1984 and before July 3, 1985.

I hereby certify that the aforementioned determinations were issued during the period February 10, 1986–February 14, 1986. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor 601 D Street, NW, Washington, DC during normal business hours or will be mailed to persons who write to the above address.

Dated: February 18, 1986.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–289]

General Public Utilities Nuclear Corp. et al.; (Three Mile Island Nuclear Station, Unit No. 1); Exception

I.

General Public Utilities Nuclear (GPUN) Corporation (the licensee) and three co-owners hold Facility Operating License No. DPR–50, which authorizes operation of the Three Mile Island Nuclear Station, Unit No. 1 (TMI–1) (the facility) at power levels not in excess of 2535 megawatts thermal. This license provides, among other things, that the facility is subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a pressurized water reactor located at the licensee's site in Dauphin County, Pennslyvsania.

II.

Apppendix J of 10 CFR Part 50, Section III.D.3, requires that Type C tests shall be performed during each reactor shutdown for refueling but in no case at intervals greater than two years. Section II.H of 10 CFR Part 50, Appendix J, defines "Type C Tests" as tests intended to measure containment isolation valve leakage rates. These valves help maintain containment integrity at design basis accident conditions.

III.

By letter dated October 22, 1985, the licensee requested an exemption from the schedular requirements of 10 CFR Part 50, Appendix J, Section III.D.3. Specifically, 71 valves are due for Type C testing beginning February 23, 1986. The license proposes to postpone leak testing of these valves until the next scheduled steam generator inspection outage; or if the planned outage does not occur as expected, the licensee will shut down TMI–1 on August 23, 1986.

specifically to test these valves. In order to test these 71 valves, the plant must be in a cold shutdown condition.

TMI–1 had been in a cold shutdown condition since March 28, 1979. On May 29, 1985, the Commission's shutdown Order was lifted and a plant heatup was conducted on June 7, 1985. The plant remained in a hot shutdown condition pending judicial review of the Commission's Order. On October 2, 1985, the Supreme Court lifted the judicial stays in effect on the Commission's restart Order, and the plant was taken critical on October 3, 1985. The plant then entered a planned power ascension test program which was completed January 2, 1986. TMI–1 will operate at full power until approximately March 22, 1986. At that time, license condition 2.c.(8)4 requires a plant shutdown to conduct an eddy-current examination of the steam generators. If the licensee had been allowed to start up upon issuance of the original Commission Order, the steam generator inspection outage would have occured before February 23, 1986. The judicial stay on the Commission's Order could have been lifted at any time, so the licensee remained in hot shutdown. The stay was finally lifted on October 2, 1985, and the plant taken critical. However, starting the power ascension program in October 1985 left insufficient time to complete the program, operate at full power for the specified number of days, and still shut down before February 23, 1986.

The duration of the judicial stay was beyond the control of the licensee. Instead of going to cold shutdown conditions during this, at that time, undefined period, the licensee made a deliberate choice to remain in a hot condition for operator training. As a result of this decision, as noted in the staff's startup inspection reports, the operators gained valuable experience which proved to be benefical when the plant was allowed to operate.

The licensee has leak tested all accessible valves. However, there are 71 valves which require the plant to be in a cold shutdown condition before testing can be accomplished. To require the plant to shut down solely to leak test these valves by February 23, 1986, would cause a non-desired perturbation on the steam generator test program and an unnecessary thermal transient on the plant.

Since the shutdown of March 28, 1979, four series of local leak rate tests have been conducted at TMI–1. This frequency of tests is more than what would ordinarily be required over a less than 7-year span. Moreover, leakage paths were identified during the tests and necessary repairs were satisfactorily performed. The latest local leak rate tests conducted in 1984 showed that the actual leakage was less than one third of the allowable limit which indicates that the valves were in good condition. Based on these test results, the valves are predicted to remain within acceptable leakage limits throughout the time interval extension requested.

Containment test requirements per Appendix J of 10 CFR 50 provide for preoperational tests and periodic verification by tests of the leak-tight integrity of the primary reactor containment and systems and components which penetrate containment. The purposes of the tests are to assure that (a) leakage through the primary reactor containment and systems and components penetrating primary containment shall not exceed allowable leakage rate values as specified in the technical specifications or associated bases and (b) periodic surveillance of reactor containment penetrations and isolation valves is performed so that proper maintenance and repairs are made during the service life of the containment and systems and components penetrating primary containment. The regulations specify a maximum of a 2-year interval between Type C tests to define a general periodicity to satisfy the above objectives. Circumstances factored into the 2-year interval include the assumption that a normal plant will be fully operational and hot for most of the time interval.

The licensee will meet the schedular requirement for all but a maximum of 71 valves. However, for these 71 valves, the four series of local leak rate tests conducted during the 6½-year shutdown, with the accompanying valve surveillance and maintenance as documented in the tests, provide sufficient evidence to conclude that with the few months' delay in testing, (a) leakage through the valves will not exceed allowable values before the next test and (b) sufficient maintenance and repairs ahve been made over the service life of the valves to insure their integrity until the next test. Thus, we conclude that the underlying purpose of the rule, i.e., to require local leak rate testing at periodic intervals of certain types of containment isolation valves to determine whether there has been degradation in the leakage characteristics of these valves which might adversely affect containment integrity, will be satisfied even with the delay in testing.

Based on the above discussion, the licensee's proposed extension for the Type C testing of 71 valves listed in their October 22, 1985, submittal until startup from the steam generator inspection outage scheduled to begin in late March 1986 is acceptable. This is a one-time only schedular exemption from the requirements of 10 CFR 50, Appendix J, Section III.D.3.

IV.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present justifying the exemption, namely that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule—to require local leak rate testing at periodic intervals of certain types of containment isolation valves to determine whether there has been degradation in the leakage characteristics of these valves which might adversely affect containment integrity. Specifically, as noted above, the number of leak tests which have been conducted by the licensee during the shutdown, and the latest local leak rate test results which showed actual leakage less than one-third of the allowable limit, leads the staff to conclude that requiring the plant to shut down solely to test the remaining valves by February 23, 1986 (rather than late March 1986 as requested by licensee) is not necessary to assure the continuing maintenance of containment integrity. Accordingly, the Commission hereby grants an exemption as described in Section III above from Section III.D.3 of Appendix J to the extent that the 2-year interval for performing Type C tests on 71 valves may be extended, on a one-time basis only, for TMI–1 until the startup from the steam generator inspection outage scheduled to begin in late March 1986.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will have no significant impact on the environment (February 4, 1986, 51 FR 4447).

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 20th day of February 1986.

For the Nuclear Regulatory Commission.

Frank J. Miraglia,
Director, Division of PWR Licensing-B.

BILLING CODE 7590-01-M

VOL 51 ISS 38 FE 26 1986 UMI

[Docket No. 50-339]

Virginia Electric and Power Co. et al.; Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-7, issued to Virginia Electric and Power Company and Old Dominion Electric Cooperative (the licensee), for operation of the North Anna Power Station, Unit No. 2 (NA-2) located in Louisa County, Virginia, in accordance with the licensee's application for amendment dated September 26, 1985, and amended on January 16, 1986.

The proposed changes would allow the widening of the axial flux difference bands from the current ±5% about a target value of +6% to −15% at 100% power and +20% to −28% at 50% power. The proposed changes would provide additional operating flexibility during return-to-power after trips near the end of the NA-2 cycle No. 4.

The heat flux hot channel factor (FQ) operating limit specified in the NA-2 Technical Specifications (NA-2) is established by loss-of-coolant accident/emergency core cooling system (LOCA/ECCS) analyses performed in accordance with 10 CFR Part 50, Appendix K. These analyses show that if the FQ limit is not exceeded, the predicted LOCA peak clad temperature will not exceed the 2200° limit specified in the Final ECCS Acceptance Criteria. The TS also establish the required method for verification that the actual peaking factor realized during operation will not exceed the axially dependent peaking factor (FQ(Z)) limit. The verification is currently performed by combining the axially dependent radial peaking factor, Fxy(Z), which is determined by periodic surveillance with the core flux monitoring system, with an analytically determined axial peaking factor (PZ(Z)). The determination of PZ(Z) involves evaluating various plant operating maneuvers such as load following. During constant Axial Offset Control (CAOC) operation, the measured core exial flux difference (AFD) is maintained within a fixed band (+ or −5%) of a target value. The target AFD is established by equilibrium operating conditions.

The proposed changes would replace the CAOC AFD limits with a set of limits established by the licensee's Relaxed Power Distribution Control (RPDC) Methodology and Associated FQ Surveillance Technical Specifications dated October 1984. The NRC staff has reviewed the report and finds it to be acceptable.

The important feature of the RPDC strategy is, instead of analytically verifying the peaking factor (FQ) margin for a fixed AFD limit band, the AFD band is varied until the available FQ margin, which increases as power decreases, is utilized. Because a wider range of axial shapes can be realized under RPDC normal operation, additional analyses must be performed to verify that the overtemperature delta-T (OPDT) and overpower delta-T trips continue to provide adequate DNB and local overpower (high kw/ft) protection over the entire range of anticipated Condition II events. In addition, the shapes are evaluated as potential preconditions for the Complete Loss of Flow accident, to ensure that no departure from nuclear boiling (NDB) violations would occur during the bounding, non-OTDT-protected accident. The methodology for performing this verification is discussed in detail in the licensee's RPDC report.

Additionally, the current requirement for monitoring the axially dependent radial peaking factor, Fxy(Z), is being replaced by a requirement to monitor the total peaking factor FQ(Z). This is accomplished by taking a full core flux map under equilibrium and increasing the measured value by appropriate factors to account for manufacturing tolerances and measurement uncertainties. Finally, since the FQ(Z) is measured under equilibrium conditions, a non-equilibrium factor, N(Z) is applied. N(Z) accounts for the maximum potential increase in local peaking which could occur during transient, nonequilibrium operation. In accounting for the transient effects, N(Z) thus has a function which is similar to PZ(Z) in the current approach. The difference is that, where PZ(Z) is a nonequilibrium axial peaking factor, N(Z) envelopes the potential equilibrium-to-nonequilibrium FQ increase and accounts for both axial and radial xenon and power redistribution effects.

The licensee has performed a detailed review of the impact of operation with Relaxed Power Distribution Control/FQ Surveillance on the various accident scenarios discussed in Chapter 15 of the North Anna updated Final Safety Analysis Report (UFSAR). Specifically, the impact of the wider axial flux difference on key safety parameters which could influence accident analysis results has been assessed. Among those parameters considered are: trip reactivity, both total value and reactivity as a function of rod insertion; shutdown margin; reactivity insertion rates due to rod withdrawal from sub-critical and at power; and rod worths and/or peaking factors for ejected, dropped or misaligned control rods.

The NA-2 Cycle 4 reload core design has been evaluated for operation under the proposed RPDC Technical Specifications in accordance with the methodology presented in the licensee's RPDC report. The anlysis included examination of the LOCA and complete Loss of Flow Accident (LOFA) preconditions, the peak linear power (kw/ft), the overtemperature delta-T f(delta-I) function and the fuel rod design criteria. Each analysis was performed at beginning, middle and end of cycle. The analysis yielded two conclusions: (1) None of the normal operation conditions allowed by RPDC were found to violate the key safety criteria, and (1) all of the Condition II events examined in the UFSAR were shown to yield aceptable results when initiated from any of these normal operation conditions. The RPDC bands were thus found to be an acceptable operating space.

The Commission has made a proposed determination that the request for amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Specifically, as discussed above, the proposed changes involve only a relaxation of the limits in axial power distribution skewing and, therefore, neither the probability of occurrence nor the consequences of any accident or malfunction of equipment important to safety previously evaluated in the safety analysis report is increased by these proposed changes. Furthermore, the RPDC analysis procedures and continued application of current reload design and safety analysis methodology will ensure that the UFSAR accident analyses remain bounding.

Also, the proposed changes do not involve any alterations to the physical plant which introduce any new or unique operational modes or accident precursors. Thus the possibility for an accident or malfunction of a different type than any evaluated previously in

the UFSAR is not being created by the proposed changeds. And, finally, while a relaxation of the axial offset operating limits is realized, the margin of safety as defined in the basis for any technical specifications is not reduced by the proposed changes since the margins of safety are preserved by the imposition of a frequent FQ surveillance requirement and by effectively reducing the limit on measured equilibrium FQ by a conservative nonequilibrium factor, N(Z). Therefore, based on these considerations and the criteria given above, the Commission has made a proposed determination that the amendment request does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Records Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commisson, Washington, DC 20555.

By March 28, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714 a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who had filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If a final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final detemination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Lester S. Rubenstein: (petitioner's name and telephone number), (date petition was mailed), (plant name), and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael W. Mauphin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(l)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated September 26, 1985 as amended January 16, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Board of Supervisors Office,

BILLING CODE 7590-01-M

Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations; Bi-Weekly Notice

I. Background

Pursuant to Pub. L. 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular bi-weekly notice. Pub. L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This bi-weekly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last bi-weekly notice which was published on February 12, 1986 (51 FR 5270) through February 14, 1986.

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Docket Room, 1717 H Street, NW., Washington, DC.

By March 28, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be enetered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide

for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Branch Chief*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Baltimore Gas and Electric Company, Docket No. 50-317 Calvert Cliffs Nuclear Power Plant, Unit No. 1, Calvert County, Maryland

Date of application for amendment: December 17, 1985 as supplemented by letter dated January 16, 1986.

Description of amendment request: The proposed amendment would change the Unit 1 Technical Specification (TS) 3.3.3.2, "Incore Detectors" for the remainder of fuel Cycle 8 operation, as follows: (1) TS 3.3.3.2a would be changed so that the incore detectors would be used to determine azimuthal power tilt at three axial elevations, (2) the number of incore detector segments required for recalibration of the excore neutron flux detection system, in TS 3.3.3.2b, would be decreased from at least 75% to at least 50% of all incore detector segments, and (3) the number of incore detector locations required for monitoring radial peaking factors or linear heat rate would be decreased from at least 75% to at least 50% of all incore detector locations.

Basis for proposed no significant hazards consideration determination: The monitoring of incore neutron flux is accomplished by the incore detectors which provide the detailed power distributions necessary for Technical Specification surveillance of power peaks and core data trends. The 45 in-core self-powered rhodium detector strings are placed in the center control element assembly (CEA) guide tube of selected assemblies. Each detector string has four, 40 cm long rhodium detectors located at 20, 40, 60, and 80 percent core height. Under ideal conditions, the power distribution within the core is symmetrical in that the power produced in one geometric part of the core is the same as other similar geometric core locations. This symmetry exists for both axial (core top to core bottom) and radial (horizontally across the core) locations. Groups of incore detector strings are used to detect asymmetry with regard to power distribution. Since persistent asymmetric power distributions can lead to a degradation of core thermal-hydraulic performance, and result in more adverse post-accident behavior, detection and correction of power asymmetry (power tilt) is important. In addition, incore detectors are used to calibrate the excore detectors which are used for core power level monitoring.

Due to the nature of the incore detector strings, a number of these detectors normally become inoperable during the course of a fuel cycle. With 45 operable incore detector strings, an expected number of failures would still provide an adequate, remaining, detector string complement in both number and location to meet the monitoring requirements of TS 3.3.3.2. An unexpectedly large number of detectors were found failed at startup for Unit 1 Cycle 8 and the number of failed incore detector strings for Unit 1 is approaching the current limits of TS 3.3.3.2. The proposed TS changes provide increased flexibility for Unit 1 Cycle 8 with respect to the acceptable number of failed incore detector strings.

Standard Technical Specifications for Combustion Engineering plants have a Technical Specification (3.3.3.2) requiring an incore detector system with at least 75% of all incore detector locations operable. This operability requirement is applicable when the incore detector system is used for (1) recalibration of the excore neutron flux detector system, or (2) monitoring the azimuthal power tilt, or (3) monitoring the linear heat generation rate. In addition, a surveillance requirement calls for the determination of a core power may once per every 31 effective full power days.

The incore detector system should be maintained as close as possible to 100% operability. This is necessary to be able to identify and evaluate any potential power distribution or reactivity anomaly which occur during the operation of a power plant. An example of a power distribution anomally is a corrosion, "crud", buildup problem that occurred at Calvert Cliffs, Unit 1 during a previous operating cycle. Here, the incore detector system was an important tool in identifying and understanding the problem.

The 75% operability requirement for the incore detector locations, as specified in the Standard Technical Specifications for Combustion Engineering plants, was chosen so that (1) a reasonable number of incore detector failures could be accommodated, (2) overall core power distribution mapping capability could be retained, and (3) there would be incentive for incore detector system maintenance during the next refueling outage. Otherwise a decrease in the operability requirement could lead to a postponement in incore detector maintenance and replacement. Such a degraded incore detector system might not have the capability of identifying and resolving anomalous core conditions.

We have reviewed and approved on a case-by-case basis other requests for Technical Specification changes for the duration of the affected operating cycle when incore detector failures in operating PWRs have approached or exceeded Technical Specification requirements. These interim Technical Specifications have generally been allowed either with increased surveillance (e.g., increased frequency of core mapping), or in most cases because there is substantial margin (usually late in cycle) to Technical Specification power peaking factor limits.

The proposed Technical Specification change is acceptable for Calvert Cliffs, Unit 1 for the remainder of Cycle 8 to allow a decrease from (at least) 75% operable detectors to (at least 50%) operable detectors. This proposed change is acceptable because the licensee has stated that it would

VOL
51
ISS
38
FE
26
1986
UMI

administratively change the core mapping frequency requirement to 15, from 31, accumulated Mode 1 (above 5% power) days. In addition, there have been no reported core power distribution anomalies and potentially increased margin to Technical Specification power peaking limits may be expected in the latter part of Cycle 8.

In addition, a proposed Technical Specification change would be acceptable for the remainder of Cycle 8 for monitoring the azimuthal power tilt. The number of tilt determinations would remain the same. However, two azimuthal tilt estimates would be made at three of the axial elevations containing incore detectors. This is acceptable because core wide azimuthal tilts are generally observable at monitored as well as adjacent power levels and there have been no reported azimuthal tilts during Cycle 8. Localized power distribution anomalies will, if significant, be observable by, for example, the increased core mapping and surveillance available for the duration of Cycle 8.

We have also reviewed "Analysis of CECOR Power Peaking Uncertainties for Calvert Cliffs Unit 1 Cycle 8," Combustion Engineering Report No. CEN-318(B)-P, November 1985, submitted in support of the proposed Technical Specification changes. The statistical analysis discussed in the report supports the operation of Calvert Cliffs Unit 1 without requiring increases in the uncertainties presently approved for use with CECOR. The analysis was performed using the then current detector failures present in Calvert Cliffs Unit 1 and assuming several extrapolated detector failure configurations. This analysis assumed, however, that expected normal core operation is maintained. No anomalous core conditions were examined.

Based upon the above, we conclude that the proposed changes to TS 3.3.3.2a, 3.3.3.2b, and 3.3.3.2c provide for an adequate complement of incore detectors for monitoring azimuthal power tilt, peaking factors or linear heat rate, and recalibration of the excore neutron flux detection system during the remainder of Unit 1, Cycle 8, in light of the increased use of core mapping surveillance to detect anomalies in the observable parameters. Accordingly, the margin of safety regarding the effects produced by core power anomalies would not be reduced as a result of the proposed TS change. Since calibration of the excore neutron flux detection system will remain satisfactory and azimuthal power tilt, radial peaking factors or linear heat rate can be adequately determined, there will not be a significant increase in the probability or consequences of accidents which have previously been considered based upon these parameters. Finally, since no changes in equipment design or use are involved, no new or different kind of accident will be created. Accordingly, the Commission proposes to determine that the proposed changes to TS 3.3.3.2a, 3.3.3.2b and 3.3.3.2c involve no significant hazards considerations.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for licensee: Jay E. Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: Ashok C. Thadani.

Boston Edison Company, Docket No. 50-293, Pilgrim Nuclear Power Station, Plymouth, Massachusetts

Date of amendment request: November 19, 1985

Description of amendment request: The proposed amendment would modify the present Technical Specification requirement to scram test 50% of the control rod drives (CRDs) at 16 week intervals, so that every 32 weeks all of the CRDs shall have been tested. This would be changed to the Standard Technical Specifications requirement to scram test at least 10% of the CRDs, on a rotating basis, within each 120 days operation. An evaluation of the test results would also be completed every 120 days of operation to provide reasonable assurance that proper performance is being maintained.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance (48 FR 14870) which includes examples of amendments that are considered not likely to involve significant hazards considerations. One of these is example (vi), a change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan: for example, a change resulting from the application of a small refinement of a previously used calculational model or design method.

The proposed change would reduce the frequency of testing each CRD, which could result in some increase to the probability of a control rod drop or other previously analyzed accidents. However, no change would be made in an associated Technical Specification requiring that, following each refueling outage, each operable control rod shall be subjected to scram time tests from the fully withdrawn position. The licensee concluded that continued assurance of proper performance would be maintained. This conclusion was based on (1) historical evaluation of the performance of the control rod scram capability at Pilgrim, and (2) other control rod surveillance requirements. The other requirements which provide assurance of the integrity of the control rod system are (1) weekly exercise of all CRDs and (2) the scram time speed measurements made of each CRD prior to full power operation after each refueling.

The reduced frequency of testing the CRDs is consistent with current industry practice and it meets the acceptance criteria of Standard Review Plan Section 6.4

Based upon the licensee's conclusions and the fact that the Standard Review Plan criteria would be met, the staff finds that the proposed change is similar to example (vi). Therefore, the staff proposes to make a determination that the amendment request involves no significant hazards consideration.

NRC Project Director: John A. Zwolinski.

Carolina Power and Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: December 11, 1985.

Description of amendment request: The proposed amendment would revise Technical Specifications (TS) for the H.B. Robinson Steam Electric Plant Unit No. 2. The proposed revision would add operational and surveillance criteria regarding the use and capabilities of the Containment Purge Supply and Exhaust Isolation Valves.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the determination of significant hazards by providing certain examples (48 FR 14870) of amendments considered not likely to involve significant hazards consideration. One of the examples (ii), relates to a change that constitutes an additional restriction or control not presently

limitations included in the Technical Specifications.

The licensee proposes to add: 1. Subsection 3.6.4 to incorporate the requirement that the Containment Purge Supply and Exhaust Isolation Valves shall be capable of closing within two seconds. Non-compliance with this criterion requires that the valve be declared inoperable and the action statements of TS 3.6.3 are imposed.

2. A statement to the basis of subsection 3.6 to provide guidance concerning justifiable causes for purging during normal plant operation and a statement to identify the limiting condition which established the maximum closing time criteria.

3. A surveillance implemented by Section 4.4.5 to verify compliance with the criterion for closing time stipulated within TS 3.6.4.

These additional limitations are clearly identical to example (ii), therefore, the Commission proposes to determine that the amendment does not involve a significant hazards consideration.

Attorney for licensee: Shaw, Pittman, Potts, and Trowfridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: Lester S. Rubenstein.

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: November 19, 1985.

Description of amendment request: The proposed amendment would revise the Technical Specifications to permit the use of higher enrichment reload fuel assemblies and storage of such assemblies both prior and subsequent to their loading in the reactor. The fuel enrichment would be revised from 3.5 w/o U-235 to 4.3 w/o U-235.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will involve a no significant hazards consideration if the proposed amendment does not (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident previously evaluated, or (3) involve a significant reduction in margin of safety.

The licensee provided an analysis in their submittal which concluded that the criteria as stated above are met.

Criterion 1

The storage of the higher enrichment fuel could only affect fuel handling accidents. The enrichment increase will not significantly affect the potential consequences of a fuel drop accident since the isotopic content of a discharged assembly is relatively insensitive to the assemblies enrichment. The probability of a fuel handling accident is similarly unaffected by the enrichment increase. There are no structural changes involved that could affect the fuel handling characteristics of IP-2's fuel.

Criterion 2

The enrichment increase does not create possibility of any new or different type of accident. All other acceptance criteria and operating parameters [DNBR, F_Q, ect.] will remain unchanged.

Criterion 3

Although the storage of fuel with increased enrichment will potentially bring the spent fuel pool and the new fuel storage area somewhat closer to criticality than was previously possible, there will not be a significant reduction in margin of safety. The licensee's submittal indicates that the proposed change is based on conservative analyses which show that with an increase in enrichment, the criticality design criteria of Keff less than or equal to 0.95 is met. This is consistent with criteria of the Standard Review of Plan Sections 9.1.1 and 9.1.2. Therefore, the amendment would not involve a significant reduction in margin of safety.

Based on the above, the staff proposes to determine the amendment does not involve a significant hazards determination.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Directorate: Steven A. Varga.

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: November 26, 1985.

Description of amendment request: The proposed amendment to the Technical Specifications would revise the F^{N} delta H part power multiplier from 0.2 to 0.3. This revision would allow optimization of core loading patterns by minimizing the part power multiplier at low power.

Basis for proposed no significant hazards consideration determination: The proposed revision would change the F^{N} delta H part power multiplier from 0.2 to 0.3 resulting in the following relations: F^{N} delta H is less than or equal to 1.55 [1.0+0.3 (1−P)]. Where: P=fraction of rated thermal power.

No change is made to the F^{N} delta H limit at full power. The proposed increase in the part power multiplier has a direct impact on Departure from Nucleate Boiling Ratio (DNBR) calcualtions. The core safety limits for Indian Point Unit No. 2 included in Technical Specification 2.1.1, represent restrictions of average enthalpy at vessel exist and minimum DNBR.

the core safety limits currently used in IP-2 safety analyses were generated to bound both the High Parasitic (HIPAR) and Low Parasitic (LOPAR) fuel in the core during the transition cycles from a full HIPAR to a full LOPAR core. At power levels below 100% Rated Power the HIPAR fuel is the limiting fuel type for DNB analyses. In Cycle 8 and all subsequent cycles, the cores are planned to be all LOPAR fuel. Consolidated Edison has indicated that the DNBR conservatism associated with core safety limits based on HIPAR fuel is more than enough to compensate for the DNBR penalty associated with the proposed change to the part power multiplier.

To ensure adequate core protection, Consolidated Edison reevaluated the core safety limits due to the increase in the part power multiplier. This evaluation determined that IP-2's current core safety limits are applicable and bounding for full LOPAR cores, including the effects of an increase in the part power multiplier.

10 CFR 50.92 states that a proposed amendment will involve a no significant hazards consideration if the proposed amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Criterion 1

The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated because the licensee's evaluation concludes that the current large and small break LOCA analyses of record remain applicable for an F^{N} delta H increase at partial powers. The LOCA analyses are performed at rated power conditions which bound all

VOL 51 ISS 38 FE 26 1986 UMI

partial power conditions. The F^N delta H has no increase at rated power and therefore, the proposed partial power F^N delta H increase has no impact on the LOCA analysis. In addition, the core safety limit curves in Technical Specification 2.1.1 remain unchanged and the current overpower delta T and overtemperature delta T Technical Specification setpoint equation constants are applicable and will be maintained. As a result the licensee has indicated that no reanalysis is required for non-LOCA accident events, since non-LOCA accident analyses are not impacted by the F^N delta H part power multiplier change.

Criterion 2

The proposed amendment will not create the possibility of a new or different kind of accident previously evaluated because all accident analyses and nuclear design bases remain unchanged. The change involves no plant equipment or operating procedure changes.

Criterion 3

The proposed amendment will not involve a significant reduction in margin of safety because as discussed above all accident analyses and nuclear design bases remain unchanged. The fuel failure criteria remains unchanged.

Based on the above, the staff proposes to determine that the proposed amendment does not involve a significant hazards determination.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, esq., 4 Irving Place, New York, New York 10003.

NRC Project Directorate: Steven A. Varga.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: January 10, 1986.

Description of amendment request: Specification 3.4.1.2, "Reactor Coolant System—Hot Standby," presently requires as a limiting condition for operation that at least two of the four reactor coolant loops be operable and at least one of these be in operation. (A reactor coolant "loop" includes its primary piping, steam generator and reactor coolant pump). The proposed amendments would increase by one the number of reactor coolant loops to be operable and in operation for Mode 3 (hot standby). Bases 3/4.4.1, "Reactor Coolant Loops and Coolant Circulation" would be similarly changed to state that "In MODE 3, two reactor coolant loops provide sufficient heat removal capability for removing decay heat; however, single failure considerations require that three loops to OPERABLE." An addition to the ACTION statement for Specification 3.4.1.2 would require that with only one reactor coolant loop in operation, the operator is to restore at least two loops to operation within 72 hours or open the Reactor Trip System breakers.

Basis for proposed no significant hazards consideration determination: Technical Specification 3.4.1.2 currently states that when operating in Mode 3, at least two reactor coolant loops are to be operable, but only one of these two loops is required to actually be operating. This is inconsistent with the FSAR safety analyses which assume that either two or all four of the reactor coolant pumps are operating. The proposed change would eliminate this inconsistency by imposing a more restrictive condition on the allowed number of operable or operating reactor coolant loops. The more restrictive condition is necessary to ensure that sufficient coolant flow is available when operating in Mode 3 so that the DNB design bases are met for all operating conditions and postulated accidents in Mode 3, including the limiting DNB accident, control rod bank withdrawal from subcritical conditions. The change to the specification, including the additional ACTION statement and the changes to the Bases, would result in a McGuire specifications which would be identical to that previously reviewed and accepted by the NRC for a similar plant, the Catawba Nuclear Station.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of these examples, (ii), involving no significant hazards considerations is "A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications: for example, a more stringent surveillance requirement." As discussed above, the proposed amendments impose a more restrictive requirement for operation and, therefore, match the example. Accordingly, the Commission proposes to determine that the change does not involve significant hazards considerations.

NRC Project Director: B. J. Youngblood.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of amendment request: January 16, 1986.

Description of amendment request: The proposed amendment would remove from the Technical Specifications (TSs) the tabular listing of hydraulic snubbers, as suggested by Generic Letter 84–13 dated May 3, 1984.

The licensee had previously requested (July 25, 1984) TS changes to the tabular listing of snubbers to add new snubbers and to revise the classification of several snubbers to "accessible" or "inaccessible" as applicable. That request was previously noticed (50 FR 47862), but has not yet been acted upon. In view of the licensee's request of January 16, 1986, which is the subject of this notice, the licensee has withdrawn that portion of its July 25, 1984 request dealing with snubbers, by letter dated January 24, 1986.

Basis for proposed no significant hazards consideration determination: Generic Letter 84–13, May 3, 1984, "Technical Specifications for Snubbers" concludes that the tabular listing of snubbers included in Technical Specifications may be deleted by any licensee submitting a license amendment.

The removal of the tabular listing of snubbers from the Technical Specifications is of an administrative nature and does not in itself affect plant design or operation, involve modifications to plant equipment, or make changes that would affect plant safety analyses. The Technical Specifications will continue to require the snubbers to be operable. Appropriate actions to be taken if the snubbers are inoperable will also remain in Technical Specifications. Additionally, the NRC staff has determined that inclusion of snubber listings in Technical Specifications is not necessary because any changes in snubber quantities, types, or locations are controlled under the provisions of 10 CFR 50.59 as a change to the facility.

NRC Project Director: John F. Stolz.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: December 10, 1982, and April 15, 1985, as

superseded the submittal of November 13, 1985.

Description of amendment request: Request approval of changes to the Appendix A Technical Specifications (TS) pertaining to shock suppressors (snubbers). These changes are to Sections 3.5 and 4.5, Containment, and to Section 6.10.2, Administrative Controls-Record Retention, and the Bases for these Sections in the TS.

The changes to TS Section 3.5.A.8 revise the existing limiting conditions for operation on snubbers to (1) delete Table 3.5.1 which lists the safety-related snubbers by number and location and (2) revise the existing requirements on when snubbers have to be operable and the actions to be taken if snubbers are inoperable. The existing requirements are in terms of the snubbers themselves with the requirements being that, if a snubber is inoperable in all modes of operation except cold shutdown and refueling and cannot be made operable within 72 hours, an orderly shutdown of the plant shall be initiated and the reactor shall be in cold shutdown within 36 hours. The proposed requirements are in terms of the systems containing the safety-related snubbers. The new requirements would be that, if a snubber is inoperable and cannot be made operable within 72 hours, the system is declared inoperable and the appropriate action statement for that system in the TS is followed.

The changes to TS Section 4.5.Q would (1) revise the existing surveillance requirements on safety-related hydraulic snubbers to add surveillance requirements for mechanical snubbers, (2) revise the existing surveillance requirements for hydraulic snubbers and (3) add a requirement for a record to be kept of the service life of each snubber. The record would be maintained as required by proposed TS 6.10.2.1. The revision to the surveillance requirements would delete the distinction in the existing surveillance requirements between hydraulic snubbers whose seal material has been demonstrated by operating experience, lab testing or analysis to be compatible with the operating environment and hydraulic snubbers whose seal material has not been demonstrated to be compatible. In the proposed TS, all hydraulic snubbers meet the same acceptance criteria and are tested on the same schedule. The proposed TS include a specific Visual Inspection Acceptance Criteria, Hydraulic Snubbers Functional Test Acceptance Criteria and Mechanical Snubbers Functional Test Acceptance Criteria. The proposed frequency of visual inspection and functional tests of snubbers is similar to that existing for hydraulic snubbers with seal material demonstrated to be compatible with the operating environment. The proposed acceptance criteria for hydraulic snubbers is similar to the existing acceptance criteria for hydraulic snubbers. The proposed TS delete existing TS 4.5.Q.2 which states that the initial inspection shall be performed within 12 months from the date of issuance of these TS and it shall be assumed that the facility has been on a 12-month inspection schedule. This existing TS is not needed because this initial inspection has already been performed.

On December 10, 1982, in accordance with 10 CFR 50.59 and 50.90, the licensee submitted proposed changes to the TS pertaining to shock suppressors (48 FR 33080). These changes were to TS Section 3.5.A.8 and Bases, Section 4.5.Q and Bases, Section 6.10.2 and Table 3.5.1. The proposed changes were to incorporate revision 1 of the inservice inspection surveillance requirements for snubbers which were transmitted by the Commission to the licensee on March 23, 1981, and to revise Table 3.5.1 to add mechanical snubbers and to reword the table to conform to the then existing NRC Standard TS.

On May 3, 1984, the Commission issued Generic Letter (GL) 84–13, Technical Specifications for Snubbers. The licensee reviewed GL 84–13. It submitted by letter dated April 15, 1985, (1) the proposed changes in its request dated December 10, 1982, with one exception and (2) its proposed changes in response to GL 84–13 (50 FR 20980). (The one exception was that the licensee proposed in its letter dated December 10, 1982, to only revise Table 3.5.1 and in its letter dated April 15, 1985, the proposed action was to delete Table 3.5.1.)

After discussions with NRC Region I in IE Inspection 85–27, the licensee has again revised its proposed TS changes for snubbers. This revision is dated November 13, 1985, which supersedes its submittals of December 10, 1982, and April 15, 1985. This latest revision will bring the TS closer to the requirements in the staff's Boiling Water Reactor Standard Technical Specifications, NUREG–0123 (BWR–STS). The BWR–STS are based on the Standard Review Plans. For snubbers, it is appropriate for the TS to conform to the BWR–STS.

Basic for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples (vi) of amendments not likely to involve significant hazards considerations is a change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

For TS Section 3.5.A.8 and Bases and Table 3.5.1, the licensee has requested approval to delete Table 3.5.1 which lists the safety-related snubbers in the plant and to reword the TS to conform to the BWR–STS. The Commission stated in GL 84–13 that a snubber listing within the TS was not necessary provided the TS are modified to specify which snubbers are required to be operable. The staff's acceptance criteria for snubbers is in Standard Review Plan (SRP) 3.9.3, ASME Code Class 1, 2, and 3 Components, Component Supports and Core Support Structures. The BWR–STS and GL 84–13 provide criteria in the SRP

The proposed amendment will not: 1. Involve a significant increase in the probability or consequences of an accident previously evaluated because the removal of the snubber listing does not impact the existing snubber operability requirements.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change introduces no new mode of plant operation nor does it require physical modification to the plant.

3. Involve a significant reduction in the margin of safety because it does not involve changes in plant design or operation or affect plant safety analysis. The purpose of the change is to conform to the NRC guidance in Generic Letter 84–13. Any proposed changes to the snubbers would be subject to the provisions of 10 CFR 50.59 and, as a result, should any proposed change significantly reduce the margin of safety, an application for a license amendment would be submitted.

Based on the above, the Commission's staff proposes to determine that the application for amendment does not involve a significant hazards consideration.

VOL 51
ISS 38
FE 26
1986
UMI

on inspection and testing of snubbers. Therefore, this proposed change is one which may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin but the results of this change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

For TS 4.5.Q and Bases, the licensee has requested approval to revise the existing surveillance requirements on hydraulic snubbers, add surveillance requirements on mechanical snubbers and delete the reference to Table 3.5.1. The revision to the existing surveillance requirements on snubbers is to reword the TS to conform to the BWR–STS. Therefore, this proposed change is a change which may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin but where the result of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

Finally, the revision to TS 6.10.2 would add a requirement that the licensee maintain records of service lives of all safety-related snubbers. Because this is an additional control not currently in the TS, this change is encompassed by the Commission's example (ii) of actions not likely to involve significant hazards consideration.

Because the proposed changes fall within examples (ii) or (vi), provided by the Commission in 48 FR 14870, of amendments that are not likely to involve significant hazards consideration, the staff proposes to determine that the requested action involves no significant hazards consideration.

Local Public Document Room location: Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

Attorney for licensee: G.F. Trowbridge, Esquire, Shaw, Pittman, Potts, and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: January 28, 1986 (TSCR 138).

Description of amendment request: Request approval for an Appendix A. Technical Specifications (TS) change to the surveillance requirements on the Fire Pump Diesel 24-volt battery bank in Section 4.12, Fire Protection. The change would allow the licensee to use a two 12-volt battery cell configuration in addition to the existing twelve 2-volt cell configuration for the 24-volt DC diesel fire pump battery system. The change would revise the surveillance requirements on the cell voltage to be greater than or equal to either 2 volts or 12 volts based on the cell configuration.

Basis for proposed no significant hazards consideration determination: The licensee has proposed Technical Specification Change Request (TSCR) 138 to provide the option of using a two 12-volt battery cell configuration—six 2-volt cells with the intercell connection inaccessible for surveillance—in addition to the existing twelve 2-volt cell configuration with the 2-volt intercell connection accessible for surveillance. Either of these cell configurations would provide the 24 volts needed for the 24-volt DC diesel fire pump battery system (DFPBS).

The DFPBS performance will not be affected by this change. The overall voltage and capacity of the DFPBS will not be changed. The only change is to allow the DFPBS to be either (1) twelve 2-volt cells with the intercell connection accessible for surveillance being the 2-volt cell or (2) two 12-volt cells with the intercell connection accessible for surveillance being the 12-volt cell. The 12-volt cell is composed of six 2-volt cells but the intercell connection are not accessible for surveillance. This TSCR would not change the number of 2-volt cells in the DFPBS but it would change the number of cells required to be accessible for surveillance. It would not change the overall voltage and capacity of the DFPBS and would not affect the function of the DFPBS. This TSCR would not change the method, frequency or the reliability of the surveillance on the DFPBS.

Therefore, based on the above, operation of Oyster Creek with this TSCR.

(1) *Does not involve a significant increase in the probability or consequences of a previously elevated accident because:* The TSCR will not affect the performance or function of the DFPBS and does not change the method, frequency or reliability of the surveillance on the DFPBS.

(2) *Does not create the possibility of a new or different kind of accident from any accident previously analyzed because:* The TSCR will not affect the performance or function of the DFPBS and does not change the method, frequency or reliability of the surveillance on the DFPBS.

(3) *Does not involve a significant reduction in a margin of safety because:* The TSCR will not affect the performance or function of the DFPBS and does not change the method, frequency or reliability of the surveillance on the DFPBS.

Therefore, because the licensee's request meets the above three criteria in 10 CFR 50.92(c), the staff proposes to determine that the licensee's proposed change does not involve a significant hazards consideration.

Local Public Document Room location: Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

Attorney for licensee: G.F. Trowbridge, Esquire, Shaw, Pittman, Potts, and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

Indiana and Michigan Electric Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: January 21, 1986.

Description of amendment request: The proposed amendment would revise the Technical Specifications as follows: In Table 3.3–3 and 3.3–4, instrument numbers have been added for clarity, trip setpoints are now referenced to Table 3.3–6, and a statement added to indicate that the specification applies only during purge. In Table 3.3–6 and 4.3–3, the instrument measurement ranges have been moved to the bases sections, the alarm and trip setpoints have been separated, the noble gas effluent monitors have been included by reference to the appropriate technical specification, the channel functional test and channel calibration have been better defined, and a statement added to indicate that the specifications apply only during purge. In Table 3.3–12 and 3.3–13, instrument numbers have been added for clarity as has the statement that one monitor in required per train for the included by reference to the appropriate technical specification, the channel functional test and channel calibration have been better defined, and a statement added to indicate that the specifications apply only during purge. In Table 3.3–12 and 3.3–13, instrument numbers have been added for clarity as has the statement that one monitor is required per train for the Service Water System effluent line, incorrect footnotes have been removed, and a note has been clarified that other requirements are for non-purging only. In Table 4.3–6, instrument numbers have been added. In Section 6.12–1 and 6.12.2 for Unit 1, the wording is changed to be consistent with Unit 2 and the Standard Technical Specifications.

In Table 4.11–2, the term "charcoal filter" is being correctly identified and replaced with "iodine absorbing media". In Table 3.12–1, the New Buffalo drinking water sample location is deleted. Editorial changes are proposed for Pages 3/4 12–3, 6–21, and for several bases sections.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for making a no significant hazards consideration determination by providing certain examples (48 FR 14870). The first of these examples (i) is a purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. The changes to add instrument numbers, separate alarm and trip setpoints, adding monitors by reference to the appropriate technical specifications, correction of errors in footnotes, clarification of the statement on monitors on the Service Water System effluent line, changes to make Sections 6.12.1 and 6.12.2 consistent between units, and the editorial changes are all directly related to this example. Also related to this example are the changes to indicate that a specification applies only during purge, moving the instrument measurement ranges to the bases section, the changes to the term charcoal filter (now iodine absorbing media) and the revised definition for channel functional test and channel calibration for radiation monitors. The statement that the specification is applicable only during purge relates to the NUREG–0737 item for radiation monitors to be added as a backup to other indicators to close the purge valves if a radiation leak occurs inside containment during purge operation. This reference to a specific mode of operations is a clarification of the technical specifications. The change to move the instrument measurement ranges to the bases is to correct an error in requirements; the instruments are required operable and the instrument ranges are acceptable values to meet the technical specification requirements. Moving these values to the bases will provide the delineation between the requirements and acceptable means for meeting the requirements. The change to the term "charcoal filter" is to clarify or correct technical specification terminology. A charcoal filter is only one of the acceptable methods to absorb iodine, therefore, the correct term to clarify the technical specification is "iodine absorbing media." The revisions to the channel functional test and channel calibration for the radiological effluent monitors is also a clarification to reflect the use of appropriate radioactive calibration sources in the tests and calibrations.

Another example (vi) for making a no significant hazards consideration is a change which may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component. The proposed changes to revise the trip setpoints for the radiation monitors used to terminate purge operations and the change to delete the New Buffalo drinking water sample location are related to this example. The setpoints for the radiation monitors will be set to levels to correspond to requirements of 10 CFR Part 20 "Standards for Protection Against Radiation." The deletion of the New Buffalo drinking water sample location will result in one less sample point for normally checking for effluent releases, however, the St. Joseph station is the control point and the Lake Township location is in the same direction as New Buffalo, thus New Buffalo provides only redundant information. The proposed change is clearly within the acceptable criteria for drinking water sample locations.

Based on the above discussions of the proposed changes, the staff, therefore, proposes to determine that the requested actions do not involve a significant hazards consideration.

Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: B.J. Youngblood.

Iowa Electric Light and Powr Company, Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: December 6, 1985.

Description of amendment request: The proposed amendment would revise the Duane Arnold Energy Center (DAEC) Technical Specifications Tables 3.7–2 and 3.7–3 relating to testing requirements and isolation characteristics of containment isolation valves. As a result of long-term modifications to the post-accident sampling system, additional sampling line was installed in the loop B of the jet pumps. The new line is identical to the existing sampling line in loop A. The loop B sampling line contains a new isolation valve similar to the existing isolation valve in the loop A sampling line. The proposed Technical Specification change will add the new loop B sampling line isolation valve in Tables 3.7–2 and 3.7–3 to assure that the loop B valve will be subject to the testing requirements and operating characteristic requirements of the existing containment isolation valves.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards (10 CFR 50.92(c)) for determining whether a significant hazards consideration exists. A proposed amendment to an operation license for a facility involves no significant-hazards consideration if operating of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

We have reviewed the licensee's request for the Technical Specification change, and find that the proposed amendment:

1. Does not involve a significant increase in the probability or consequences of an accident previously evaluated because the inclusion of the new containment isolation valve in the testing and operating characteristics requirements does not increase the probability or consequences of any accidents;

2. does not creates a possibility of a new or different accident because the inclusion of the new containment isolation valve in testing and operation characteristics requirements is not expected to create a new accident; and

3. does not involve a significant reduction in a margin of safety because testing and conformance with the required characteristics will increase the safety margins.

Therefore, the staff has made a proposed determination that the application involves no significant hazards consideration.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: January 3, 1986.

Description of amendment request: The proposed amendment would revise the Duane Arnold Energy Center (DAEC) Technical Specifications reflecting the Iowa Electric Light and Power Company's (licensee's) proposal to demonstrate feasibility of Hydrogen Water Chemistry System as a mitigator of Intergranular Stress Corrosion Cracking (IGSCC) of stainless steel piping at the DAEC. The licensee estimates that the addition of hydrogen to the reactor water will result in an approximate one to five-fold increase in the nitrogen (N–16) activity in the steam as a result of conversion of soluble N–16 to a volatile form. The increase in normal operating activity in the Main Steam Line for the duration of the proposed test necessitates a temporary increase in the current Main Steam Line radiation scram and containment isolation setpoints. The licensee has, therefore, proposed to change (a) Main Steam Line tunnel high radiation scram setpoint, (b) Main Steam Line tunnel high radiation containment isolation setpoint, and (c) the associated bases explaining the rationale for the changes.

The proposed amendment would permit, during a 17-day test, an increase in the calculated radiation background level used to determine setpoints. The main steam line high radiation level setpoint will remain at three times the background radiation level; however, due to the increased N–16 carryover in the steam, the background radiation level used to determine the high radiation setpoint will be increased prior to the test period. The increase in the background level would be based upon the calculated value of the radiation level expected during the tests (approximately a factor of five increase). During controlled power reduction, restoration to pretest setpoints will be done prior to going below 20% of rated power. If due to a recirculation pump trip or other unanticipated power reduction event, the reactor drops below 20% rated power without the setpoint readjustment, control rod withdrawal will be prohibited until the necessary trip setpoint readjustment is made.

The event which takes credit for that above discussed setpoints is the design bases control rod drop accident. The licensee states that the control rod drop accident is of concern only below 10% of rated power. The hydrogen injection will be stopped below 20% power and, as stated above, the setpoints will be returned to pretest positions. In addition, the capability to monitor for fuel failures will be maintained through: (1) The continued operability of the main steam radiation monitoring scram and isolation system; (2) routine radiation surveys; (3) the performance of daily primary coolant water analyses; and (4) the continued operability of the Steam Jet-Air Ejector Off-Gas Monitor. Furthermore, radiation protection practices will be followed by the licensee during the course of the test based upon the licensee's pretest radiation (ALARA) review. During the hydrogen injection test, special radiation level surveys will be performed and protective actions will be taken, as appropriate, to control all onsite personnel exposure. Changes in gaseous effluent release rates for hydrogen injection are expected to be negligible due to the short decay times for N–16.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards (10 CFR 50.92(c)) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

We have reviewed the licensee's request which is similar to the request previously reviewed and approved for the Pilgrim, Peach Bottom, and FitzPatrick plants. We find that the proposed amendment:

(1) Does not involve a significant increase in probability and consequences of the control rod drop accident which was previously evaluated to determine the Main Steam Line radiation scram and containment isolation setpoints at the reactor power levels below 20%, because (1) the licensee proposes to suspend the hydrogen addition below 20% of the rated power, (2) reset the setpoints to pretest values at power levels below 20% of the rated power, (3) continue to monitor for fuel failures, and (4) perform special radiation surveys during hydrogen addition test period;

(2) does not create a possibility of a new or different kind of accident because the Main Steam Line high radiation scram and containment isolation setpoint changes are intended to mitigate against previously analyzed accident, i.e., control rod drop accident involving fuel failures; and

(3) does not involve a significant reduction of margin of safety, because pretest setpoints will be restored when power drops below 20% of the rated power, the capability to monitor fuel failures will be maintained, and special radiation level surveys will be performed and protective action taken if needed.

Therefore, the staff has made a proposed determination that the application involves no significant hazards consideration.

NRC Project Director: Daniel R. Muller.

Mississippi Power & Light Company, Middle South Energy, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: November 1, 1985, as amended December 10 and December 27, 1985.

Description of amendment request: The amendment would change License Condition 2.C.(26) by increasing the interval for inspection of the low pressure turbine discs.

Basis for proposed no significant hazards consideration determination: License Condition 2.C.(26) in the Grand Gulf Nuclear Station (GGNS) Unit 1 operating license requires inspection of low pressure turbine discs each refueling outage until an acceptable alternate inspection schedule has been established. This interim conservative approach of requiring an inspection each refueling outage was taken by the staff in its December 1981, Supplement No. 1 to the GGNS Safety Evaluation Report (NUREG–0831), based on its evaluation of Westinghouse turbines, because information to justify longer operation for the GGNS turbines was not available. The amendment would increase the maximum interval for inspection of the discs in the three low pressure turbines at Grand Gulf Nuclear Station, Unit 1, from one fuel cycle (approximately 18 months) to 50,000 hours of operation. The 50,000 hours of coperation would permit reactor operation for four fuel cycles. The turbine generator inspection plan proposed by the licensee is to inspect the high pressure turbine and the generator during the first refueling outage and one of the three low pressure turbines during each of the next three refueling outages. If significant cracks are found during any one of these inspections, all low pressure turbines will be inspected. The inspection cycle would be repeated after the fourth refueling outage. The licensee has requested this change because they believe presently available information on turbine disc integrity for the GGNS turbines, manufactured by Kraftwerk Union (KWU) in West Germany, is adequate to support the proposed alternate inspection schedule. The design of the KWU low pressure turbine disc is intended to minimize stress in the keyway area to make it less susceptible to stress corrosion cracking as compared to older designs. To date, several KWU turbines have undergone complete ultrasonic inspections with no cracking having been found. In addition to the steps taken in the design of the turbines to lessen the susceptibility to stress corrosion cracking, MP&L maintains high reactor feedwater quality by strict compliance with reactor vendor water quality criteria, fuel warranty requirements, and other industry recognized recommendations. A major conservative design feature is that in the event that a cracked disc resulted in a failure, the KWU turbine case has been designed to contain all potential missiles generated at speeds of less than 180% rated speed.

The Commission has made a proposed determination that the amendment would not involve a significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The proposed determination is based on the staff's preliminary review of information provided by the licensee in its amendment request. In the licensee's request by letters dated November 1 and December 27, 1985, the licensee concluded (with appropriate justifying bases) that the proposed amendment does not involve a significant hazards consideration.

The relevant previously evaluated accident under consideration is potential damage by turbine missiles to safety related equipment needed to maintain safe plant shutdown and prevent unacceptable radiological release. The licensee has provided an analysis of the probability of occurrence of a turbine missile accident for the proposed 50,000 hour inspection interval. The probability of the accident is the product of the probability of experiencing a low pressure disc failure due to crack propagation during 50,000 hours of operation and the probability of failure of the overspeed protection system. Failure of the overspeed protection system is necessary to generate a turbine disc missile of sufficient energy to penetrate the low pressure turbine casing and damage safety related equipment. The dominant factor for turbine inspection intervals up to 50,000 hours is the probability of failure of the overspeed protection system, which does not vary with length of inspection interval. Therefore, for inspection intervals up to 50,000 hours, the probability of a turbine missile accident is not significantly increased. Based on its preliminary review of the licensee's submittal, the staff finds that the proposed change in turbine inspection interval does not involve a significant increase in the probability of a previously evaluated accident. The change would not involve a significant increase in the consequences of a previously evaluated accident because it would not change the method or assumptions used in calculating the accident consequences. Because the proposed change does not involve a change to either the turbine or generator equipment, control logic or operating procedures, the change would not create the possibility of a new or different kind of accident from any previously evaluated. Because the lengthening of the LP turbine disc inspection interval has no significant adverse effects on any previous safety analyses presented in the FSAR and does not involve a relaxation of the criteria used to establish safety limits or technical specifications, the proposed change will not result in a significant reduction in a margin of safety.

Accordingly, the Commission proposes to determine that the proposed change does not involve a significant hazards consideration.

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: October 30, 1985.

Description of amendment request: The proposed amendment would change the Technical Specifications to allow control rods to be either electrically or hydraulically disarmed when the control rods are inserted and Refuel Interlocks or Reactor Protection System Trip Functions are inoperable. The existing Technical Specifications require that the control rods be disarmed electrically and hydraulically when inserted under the same conditions.
